It is a system which allows the homes of 170 Coloured people to be bulldozed down and then leaves them sitting for two weeks on the roadside . . . without shelter. A 90-year-old man and a 2-month-old baby, we read, shared a ditch.

It is a system which enables the homes of 1,746 Coloured people, to be bought by the Government and resold to Whites, with the Government gaining a total profit of R6.8 million—and this after official Govern-

ment sources inform us that 60 per cent of the Coloured people are poverty-stricken.

It is a system that allows in one year for 12,000 cases of malnutrition diseases among African babies, 700 among Coloured babies and 9 among Whites. According to population ratios, these figures should be Whites 9, Coloureds 4 and Africans 36.

It is a system that allows 50 per cent of all African children born alive to die before they reach their 5th birthday.

It is a system which allows the Minister of Community Development to stand up and say that the Indians in South Africa must branch out willingly from Commerce or the Government will force them out. "They must branch out into other occupations", he said, "and become clerks, roadworkers and fitters and turners. This will be done", he concluded, "not only in the interests of South Africa, but also in the interests of the Indian community."

LIMEHILL AND STINKWATER

It is the policy of the mass removals of Africans from White areas which has caused the horrors of Limehill and Stinkwater. This is a description of a Government resettlement camp. Stinkwater, which lies 35 miles from Pretoria, and into which the Government has forced thousands of Africans to move. It is written by one who was there, and it appeared in the *Rand Daily Mail:*

"It consists of corrugated iron shacks, mud huts and wooden houses. Hundreds of the slum dwellers have been infected with a scourge of skin diseases. Scores of children had bloodshot eyes accompanied by a discharge of tears. A medical practitioner said the children were showing symptoms of trachoma, which could lead to blindness. Other children had their heads covered with ringworm. Some of them found it difficult to play because of swollen limbs."

But in case you are feeling depressed, do not worry, because the report noted that "there is 1 nurse in the area," and as far as sanitation goes, "a borehole is open for 4 hours a day."

But what did this place look like, we wonder, when the Department of Bantu Administration and Development forced these people to move there and said "this is your homeland"? We do not know what it looked like then, but 6 months after these people had been there in the middle of winter, we know what it looked like. There were no schools, no stores and no clinic. The people lived in tents. There was one hand pump for water which was used by over 400 people.

It is only fair, however, to present the other side of the picture too, and 3 months later there had been improvements. There was half a school, an old shack for a store, a motor-driven pump, but still no clinic. That is progress.

Most of the men who live at Stinkwater work in the cities during the week, and only come home to see their families over the weekend. Those who do come home every day arrive home by bus at 9 p.m. and have to be up at 3 a.m. to catch the bus to the city at 4 a.m. The bus fare is 45 cents per day single and R4.40 a month. In addition, money is, of course, needed for clothes and food. There are no toilets provided at all.

Then there is Limehill, where many people have died. In October of last year an epidemic broke out there, and a letter was sent to the Minister of Health, Dr. Carel de Wet, asking for an inquiry as typhoid was suspected.

On December 10th, the Minister issued a statement saying conditions at Limehill were normal. In only 3 months, from September to December, out of a population of 6,000 only 19 people had died.

On December 21st, Archbishop Hurley visited the area and claimed that he had evidence that between October 1st and December 10th at least 45 people had died. He informed the Minister of Health. The Minister then issued a statement admitting that in 5 months 73 people had died, but this, he said, was also normal. If 19 deaths in 3 months is normal, and 73 deaths in 5 months is also normal, I shudder to think what the Minister would regard as abnormal.

At this stage dozens of pressmen were converging on the area to attempt to ascertain the truth. The Minister was quick to slap a ban on any pressmen visiting the area. But he could not stop members of Parliament going there, and he could not stop doctors going there.

Eventually, after 35 deaths had occurred in 2 weeks, the State ordered innoculations and set up medical "checkpoints". The Natal Regional Director for State Health issued the following statement: "We have established contact with the disease. The picture is not entirely clear, but it is apparently the result of insanitary conditions." A spokesman for the State Health Department said that between 15–20 per cent of the children at Limehill have contracted gastro-enteritis and the disease was spreading to adults. But he added "this is quite normal at this time of year because of the heat and the flies".

What really happened at Limehill, we will probably never know, for while people died, the Government banned the Press from going there; while people died the priests who tried to save them were interrogated again and again by the Special Branch; and while people died, White South Africa went about its business.

What we do have, though, is the report of four doctors who did voluntary medical work in the area before the Government went in and who delivered a "factual account" of their findings.

Between December 28th and January 19th, 760 patients attended one clinic. The size of the community which that clinic served was 2,000. Among the cases examined were: diarrhoea and vomiting (68), suspected typhoid (4), confirmed typhoid (8—1 death), pneumonia (9—2 deaths), tonsilitis (19), otitis media (8), eye infections (21), salpingitis (3), cystitis (43), pellagra (53), kwashiorkor (28), vitamin deficiency disease (20), scurvy (8), rickets (3), scabies (27), worm infestation (7), and suspected TB (5).

Fifteen of these patients were pregnant. What, we might ask, would have happened to those people if doctors had not voluntarily gone there to treat them?

One of the diseases mentioned was typhoid. Of this disease the doctors say "it spreads in conditions of poor hygiene . . . In a normal, healthy community the acceptable incidence of typhoid is nil. Thus in a community the size of Limehill, 8 confirmed and 4 suspected cases would in any medical sense be called very serious."

"Diarrhea," the doctors say, "was the commonest reason for consulting us. Just over 50 per cent of all patients who came had these complaints. It is most serious in babies and young children who form a very large percentage of the cases. Sudden deterioration and death may occur within hours."

The doctors continue: "From the disease we saw, it is self-evident that the water and waste disposal facilities were inadequate." They conclude: "We understand that the men are, to a large extent in other areas. We would indicate that this is unsatisfactory and a further factor in continuing the vicious cycle of disease, poverty, ignorance, disease."

This report was published before the Limehill debate began in Parliament. Let us see what occurred there. Dr. de Wet said that in one year there were 18 cases of typhoid and asked what was so abnormal about that. He went on to criticise the United Party, the Press and all those who had attacked Limehill as being "enemies of South Africa". Blaar Coetzee, replying to a barrage of Opposition questions, asked: "Does the U.P. want caviar for the people of Limehill?" Another Government spokesman, amid roars of Nationalist laughter, said that he thought everyone was making a mountain out of a Limehill.

But not all Nationalist comments were sickly witticisms. Sometimes they tried to defend it. There are 2 ambulances available which come in from outside, they cried, and a district surgeon visits the clinic once a week, and there is one district nurse on duty all the time. When their critics said there were 6,000–8,000 people there spread over many miles with no proper toilet facilities, only a pit system, and not one house, Government MP's claimed that these conditions were due to the fact that the people there have done nothing about them. They had, after all, been supplied with tents and equipment to dig pit latrines when they were originally dumped there. It was Dr. Radford, the United Party MP who pointed out that there were no men there—they were working in the cities. "Surely", he said, "you do not expect women with babies on their backs to dig 20-ft. latrines in the hard soil of Northern Natal?

Dr. Radford went on to say that of the many cemeteries in the area, he had only visited 2, and he had counted 40 graves, not 19 as the Minister had said. He had been shown 750 medical cards of children suffering from gastro-enteritis. And amid jeers and catcalls from Government benches, he added: "And if you want the names on the graves, I will show them to you."

And so the tragedy of Limehill was laughed out of Parliament and the Minister of Health refused to set up a commission to investigate it. We will never know how many people died there. Some people say they have seen hundreds of graves; the Minister has only seen 19. We will probably never know how many hundreds of other Limehills have occurred, are occurring, and are going to occur. Perhaps it is just as well, for as the Nationalist Party newspaper, *Die Transvaler* so aptly put it:

"Limehill was never presented as a utopia to the thousands of outcasts who were shifted there, although it undoubtedly must have seemed like one to many of them. The area offers reasonable living conditions and the residents are happy because their living conditions there are infinitely better than the places they come from."

Yes, it is true, the residents are happy. Their happiness is the eternal stillness of the grave. But their passing was not a happy one, their last desperate agonies were not happy, and their deaths have labelled South Africa with a terrible guilt.

The guilt for those deaths lies with the Nationalists who jeered and lied to smother the truth. The guilt lies with the public that didn't care. The guilt for those deaths lies with you and I who read the newspaper reports, shook our heads in horror, and then threw the newspaper aside. The guilt, fellow-students, is ours, because we have done nothing.

I have touched very lightly on the topic of apartheid. I have revealed certain horrors and certain injustices, but I have only scratched the surface. Beneath the surface lie a million further tragedies, human tragedies all of them. Tragedies of discrimination, of despair, of selfishness.

The tragedies of over 12 million Africans who must carry passes with them like dog licenses for fear that they, like dogs, will be impounded. The tragedies of 72,936 Africans who have been uprooted from their homes and forced into barren resettlement areas. The tragedies of 92.5 per cent of an Indian group of 99,000 who have been affected by Group Areas. And these are just the facts and figures. They are statistics. Government official statistics, and they cannot tell of the many other horrors that are caused by this system.

They cannot tell the terrible harm that malnutrition does to the mind and body; they cannot tell of the destruction of minds

and personalities which the horrors of Limehill perpetrate, they can only record the deaths. It is impossible to estimate the drunkenness, the poverty, the prostitution, and other vices which this system forces onto the people who are subjected to it. Our only knowledge that this sort of thing occurs is when we see the battered tramp in rags staggering drunkenly down our dirty streets only to be hurled brutally into the back of a waiting van. And then the reaction of the White population is as certain as ever: "You wouldn't want your daughter to marry one of those, would you?"

This is a story of a people with no rights and no future. This is the story of South Africa today. Behind this lamentable story lies a quiet philosophy: a philosophy which the rulers of our land have nurtured and long cherished. It is the philosophy which today steers South Africa on its present course. It is the philosophy which has entrenched itself in our society, our heritage, our way of life. For the last 15 years young South Africans have been subjected to Christian National Education, which pervades our school textbooks and governs the order of our thinking.

But what is it? What is this Christian Nationalism?

I could not define it better than did our own Prime Minister, Mr. B. J. Vorster, when after he had been appointed a general in the Ossewa Brandwag in 1942, he said:

"We stand for Christian Nationalism which is an ally of National Socialism. You can call this anti-democratic principle dictatorship if you wish. In Italy it is called Fascism, in Germany, German National Socialism (or Nazism), and in South Africa Christian Nationalism.'

THE STUDENT ROLE

South Africa is our country and our responsibility. If we are concerned for the future of our country, as I am because I do not believe she has a secure future, then we must ask ourselves what we can do for our country and for our future. We must ask ourselves what we, as students, as tomorrow's leaders, can do. We must ask ourselves what NUSAS can do.

This is a question which NUSAS leaders have asked themselves for many years. Some of their answers have not, I feel, been either sensible or realistic. One such answer was the one which the President gave five years ago. In 1964 Jonty Driver, speaking of NUSAS, said, "To be brutally frank and utterly honest, NUSAS is a front for the liberation movement in South Africa." Speaking in 1969, I must say to you that to be brutally frank and utterly honest, Jonty Driver was talking nonsense. NUSAS is not and cannot be any sort of subversive organisation, nor can we house or protect subversives. We are a national students' union and we must remember this. This is all we are and this is all we can claim to be. The duty of a national students' union must be to reflect the views of the students it represents and to carry out such functions as the students wish it to carry out. This is all we can do.

At the same time the views of these students will give the national body certain principles and a certain basic policy. That policy we might refer to in South Africa as our social conscience. That basic policy or guide has already been discussed, agreed upon, and accepted by the students within NUSAS. It is the internationally acclaimed Universal Declaration of Human Rights, a document signed by all the countries in the world except eight—South Africa, Portugal and some countries of the Communist Bloc. Not unexpectedly then, the basic thoughts of the Declaration stand directly opposed to the policies of the Government at present.

Our role then, as I see it, the role of NUSAS, the role of South African students, is to hold our basic policy before us as an ideal and to work with all our strength for the implementation of that ideal. Our role must be to point out the injustice of our society. This is our duty, to do both as citizens of South Africa and as members of the community of mankind. Let the South African people never be able to say, as the German people said after they had seen the mangled horrors of Auschwitz and Buchenwald, "We did not know this was happening." In 10 years' time, let this not be the pathetic cry of White South Africa. We know! We are aware of what is happening! It is our duty to make South Africa aware of what we know.

There are those who would say that all is peaceful in South Africa. Let them remember the thousands of banned men and women, who lead twilight existences in our land.

There are those who would say that the African is happy in South Africa. Let them remember Sharpeville.

There are those who would say that the African is well-treated in South Africa. Let them look to the filth of the African locations.

There are those who would say that South Africa is a sunny, healthy land. Let them look to the dead in Limehill.

And when they say to us, as they will: Why do you point out these things? Are you a Communist? Are you a Leftist? Are you an enemy of South Africa? Then reply to them that you are none of these things. Tell them that you are someone who believes that every man who is born has a right to life, that every man who is born has a right to develop himself to his full potential. Tell them that when you point out injustices in your country, you do so not because you wish to harm your country, but because you wish to remove the injustices and thus improve the image of your country.

There is much in this country that needs to be improved for in a land such as this, where the majority have no freedom, none of us can be free. If a Government can condemn one section of the population, there is no reason why it cannot condemn another. The African who struggles for equal rights and equal opportunities is condemned; the White man who defends the African's rights is also condemned. The 180-day law, bannings, passport removals, and deportations are the order of the day. And we must remember that because one person has lost a passport, all of our passports are in jeopardy. We must remember that because one man has been banned, all of us can suffer the same fate.

There is no criterion by which we may judge whether we are safe or not. The law can be no criterion because the courts are discarded by our rulers. You do not have to commit a crime to be condemned by our Government. You simply have to do something that these enlightened dictators do not like at one particular time. With that criterion no one is safe. Not even the verkramptes, or ultra-conservatives, who are harassed as much by the Special Branch as we are.

There are those who say that one can have freedom in South Africa just as long as one keeps quiet and does not say or do anything that will upset the Government. We must ask these people what sort of freedom do you think you have if you are scared to exercise it? What sort of freedom is it when people are scared to do what they wish to do for fear of losing freedom? This is no freedom. This is a pathetic malprocess which stunts the growth of the mind, the personality and the character of any human being who is subjected to it.

And what freedom do we, in South Africa, have today anyway?

Do we have the freedom to love whom we choose? No! It is against the law to love someone whose skin is of a different pigment to ours. We can only love those whom our rulers have by law approved. Do we have the freedom to go wherever we choose in our country or can we go only to those places which are marked by our Government for Whites only? If we are in a hurry, do we have the freedom to catch the first taxi or bus that arrives, or must we wait for one that is marked for Whites only?

Do we have the freedom to invite the MCC cricket team to visit our country or must we first dictate who their team is to be? Do our athletes have the freedom to compete internationally, and I mean all our athletes? Do we have the freedom to read great books and see great films or are we only allowed access to those our rulers deem fit for us?

These are but a few of our unfreedoms. They are only the beginning. There will be more unfreedoms for us to chalk up on our "Book of Rules".

We can, of course, sit back and accept all of this. We can argue that there is nothing we can do now, and that in time all these problems will sort themselves out. This is a fallacy. Time alone can change nothing. It is through our efforts now that time will eventually reflect change. But we must make the effort now!

We must look around us and ask ourselves what we can do. We do not have to look very far. At this very moment a drama is playing itself out, a drama that once again involves the futures of men and their destinies. I refer to the injustice of unequal pay for South African doctors.

The position is clear. Pay for doctors is not on a basis of merit or amount of work being done. It is on the basis of race. We have already seen that the South African non-White labours under far greater difficulties than the White to educate himself. Yet we see that when he eventually achieves this success, he is condemned to less salary than his fellow doctor who is White. Why? These doctors save the same lives, they heal the same sick, they work the same hours, yet they do not receive the same pay.

The Government tells us that it is because non-White doctors do not have the same needs as the White doctors. It is the right of the individual to decide what his needs are, and no Government has the right to decide for him.

At university at present, there are White and non-White medical students studying together. Their futures are involved here. And they are students. They are our fellow-students. The futures of some of them are tainted with injustice, and I believe that we have a duty to stand by our fellow students, and to defend their rights just as they would defend our rights.

At the end of May almost 200 doctors will resign from hospitals in South Africa, because of unfair treatment. I no not believe that we should encourage them to change their minds because their decision is uncomfortable for us. I believe that we should stand by them because they are right.

A few days ago, the NUSAS executive and Standing Committee of SRC Presidents issued a joint statement in which we expressed our concern at the present situation. We pointed out, as has Professor Chris Barnard, that it is unjust to pay a man according to the colour of his skin. We pointed out that this was of direct concern to NUSAS because there were thousands of medical students studying at centres affiliated to NUSAS and their futures would be affected by this. We pointed out further than NUSAS is the largest medical scholarship agency in the coun-

try, and thus we are even more concerned. In our statement we called on the Minister of Health, Dr. Carel de Wel, to take steps to rectify the matter immediately. That is what we have done so far.*

I have spoken at length on our country and our responsibility. I have spoken of our aims and our hopes. If at times we lose heart because we are not making the progress we would like to make then we take courage from the words of the late Senator Robert Kennedy, who said in 1966:

"Each time a man stands up for an ideal, or strike out against injustice or acts to improve the lot of others, he sends forth a tiny ripple of hope, and these ripples meeting each other from a hundred different centres of energy and daring will build a wave which will be so strong that it can sweep down the mightiest walls of oppression and hate."

Let us stand up for our ideals. Let us dare to struggle and let us dare to win. Let us dare to dream of a future in which all the people of South Africa will be able to join hands together and to cry out in the words of the old Negro spiritual:

"Free at last, free at last; thank God Almighty, we're free at last."

---

## WHAT HATH GOD RUNG?

## HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. BINGHAM. Mr. Speaker, I have repeatedly attacked the reduction in interstate telephone rates which was announced jointly by the American Telephone & Telegraph Co. and the Federal Communications Commission on November 5, 1969, as placing an increased burden on users of local telephone service since there are requests pending in 16 States for local rate increases far in excess of the announced interstate long distance rate cut. New York State alone has a rate increase request before the Public Service Commission for hikes totaling $175 million.

It seems particularly disturbing that such local rate increases be requested in New York at a time when the quality of telephone service has declined to a well publicized all-time low. The December 5 issue of Life magazine contains an interesting article by Bill McWhirter entitled, "What Hath God Rung?" The article follows and I commend it to all readers of the RECORD:

*Non-White doctors withdrew their services in April 1969. A month later the Government announced salary increases: the salary scale for Indian and Coloured interns was doubled from R1380 to R2760 a year; the maximum scale for Indians and Coloureds—chief specialists and professors—was raised from R5400 a year to R7500. African interns would earn R2400 compared to R1260, while African chief specialists and professors would get R6900 compared to R5160. The salaries of White medical personnel were to be improved within the framework of the new scales for the professional division of the public service. In this case the minimum salary would be R2400 a year for the lowest ranks, rising to R10,800 for the highest ranks. The non-White doctors immediately resumed their posts.

### WHAT HATH GOD RUNG?

*(By William A. McWhirter)*

The symptoms began appearing some time ago. In disbelief, we kept them to ourselves, hoping vainly that it was only *our* dial tone, *our* busy signal, *our* repairman, *our* operator that was faulty, not everyone else's. Nor could we even be sure what was happening. *Its* faults often looked as if they were *our* faults. We dialed one number, reached another and assumed we were growing absent-minded.... We had no dial tone and assumed someone had left a receiver off the hook. . . . We received no calls and assumed no one was calling. . . . We called, the number was busy and we assumed someone was there and talking. . . . We called, the phone rang, no one answered and we assumed no one was there. We had our doubts, of course, when people later said they were there when their phones clearly said they weren't; or when entire insurance companies occupying 40 floors of office space did not answer; or when, one day, calling a cartoonist, we reached the mayor's home and, after staring at the dial, slowly turning each digit hole to the very end, promptly removing the finger so as not to let it drag back across all the other digits, and carefully watching as we did this seven times, we still got the mayor's home. It was, at times, like dialing M for Murder and getting C for Chicken Delight.

These were not the kinds of occurrences we felt compelled to share with anyone. Nor could we believe after years of telephone service unrivaled anywhere in the world that the worst would be confirmed. But with every passing day, we now know that the telephones are going out all over Manhattan—the suburbs, The Bronx and Staten Island too.

The dimensions of this breakdown are unlike any other. The New York Telephone Company, largest of the 24 operating companies of A.T. & T., the American Telephone & Telegraph Company, has some 80% of its total capacity concentrated in the metropolitan area. Here it handles some 43 million calls a day and services 2.9 million customers—nearly as many customers within New York City as the city itself has taxpayers.

New York, where A.T. & T. keeps its headquarters, has historically been the model city for the "Bell System." As early as the turn of the century. A.T. & T. preceded the rest of the country's growth and set its sights on becoming a city-centered company, leaving the backwater areas to the "independents." Today, it provides nearly 85% of all telephone service in the U.S. while confining its operations to only 15% of the land area. The cities made the Bell System into the world's largest private enterprise, with assets of $45 billion. With the most extensive franchise ever granted to an American corporation, A.T. & T. has complete control, without competition, over phone operations in its service areas from production by its wholly owned subsidiary, Western Electric, to sales, accounting, installation, maintenance and repair.

It is one of the more ironic effects of what has happened in New York that the company which had so much to do with shaping urban life should now be so harassed by it. It was in New York this year that customers began to complain in record numbers of service failures and incredible delays in response from the company. Phone traffic became so heavy that overloaded switching facilities simply broke down. One Manhattan exchange, PLaza 8, became infamous as it reached blackout conditions. But not only the prestige exchanges, the DIgby 4s and HAnover 1s of Wall Street and Madison Avenue, were affected. So was the common man. At the approach of winter this month, many New Yorkers were even unable to call the city's complaint office about another living condition—the lack of heat in their buildings.

New York Telephone has admitted it had been unable to forecast the demand adequately, and that neither its equipment nor its work force was able to cope with the snarl. On an emergency basis it reactivated 45-year-old switching equipment that had been retired only last year in PLaza 8 and other exchanges and brought 1,500 craftsmen into the city from other Bell companies. The state utilities commission convened a service investigation, the Federal Communications Commission has called in A.T. & T. representatives to discuss telephone service, and several members of Congress are considering an inquiry of their own.

The failure of telephone service in New York may have widespread effects throughout the Bell network. These repercussions extend to the type of companies both A.T. & T. and New York Telephone have become, the type of markets that are opening up for direct competition, the type of services the public is demanding, and the type of changing philosophy appearing within the regulatory commissions. The telephone company might have withstood any public challenge even after so massive a breakdown in service as New York's so long as it was big, a monopoly, and faced no competition. Today, the company is that big and a monopoly, but the difference is that it faces a number of challengers asking to compete. And it seems all too vulnerable because of the misadventures of trying to place a call in New York.

A suburban wife gives up trying to reach her husband by phone and calls a friend in an office blocks away from his to walk over an tell him to bring home 12 bratwurst for dinner. A mother calls her home and hears a stranger insisting that it may be her number, but he is in his house and it's also *his* number. A militant lady lawyer testifies that, considering her clientele, she expects to have her lines tapped, but she objects to having to listen to her tappers talk in the background. A New York State utilities commissioner hears how his doctor tried to call Syracuse, N.Y. only to be told to contact the overseas operator.

The results have often been more serious than semicomic. A well-known handbag manufacturer, in moving office locations, had his old phone disconnected, and while waiting weeks for his new one to be installed was without service. His customers, informed by a recording that the phone had been disconnected, began to worry; suppliers withheld their shipments and the rumor rapidly spread that he had gone out of business.

There is obviously more at stake in the New York crisis than handbags, and that is one of its most preculiar and perplexing aspects. Not only does the individual not always know what, if anything, is wrong, but no one has yet been able to detect just how wrong or widespread the troubles are. The company insists that the problems are, more or less, localized. Yet, at random, it seems that virtually everyone has been affected in some way by it. What it amounts to is a disquieting invisibility where none of us can any longer be sure what the instrument on our desks is doing to us at any given moment. Altogether, however, the incidents have created an embarrassing focus at a particularly sensitive time. New York Telephone is seeking a $175 million annual rate increase, which would raise phone bills an average of 10.50%.

The company would have preferred to explain its case in the bloated terminology that it affects at hearings and on other solemn occasions (a phone dial, for example, is identified as a "Network Control Signaling Unit"). Instead, it is being forced to answer to a lot of funny stories. That has hardly upheld its public dignity, which has traditionally resembled that of Benedictine monks, the chosen custodians of a vast mys-

tery whose inner workings are too wondrous to explain. This stance worked well enough when the telephone was *the* American invention. But the telephone is no longer the miracle of an age, and the company finds itself under increasing attack both by the public and by its peers in the space, computer and electronics industries.

It is unfair, perhaps, that so much of this should have been exposed by what has happened in New York. But New York has never been judged like other cities. Its ailments, much like its fashions, are not unique; they are simply seen here first. Just as the fads begin in California, so the problems surface here. Those are the rules, and no one knows them better than A.T. & T. itself, which has organized a top-level committee to review all aspects of the New York case—not only, it says, to correct what's happened in New York, but also to prevent it from occurring in other cities. LIFE correspondents, however, report troubles already appearing along the line, especially in Miami, Washington, Chicago and Los Angeles.

The A.T. & T. review committee, drawn from throughout the company and headquartered in the "think tank" Management Sciences Division, is headed by Henry M. Boettinger, a bow-tied author, structural analyst, assistant comptroller, spokesman and house philosopher. "There's more than a premonition in the Bell System that we're headed into troubled waters," he muses ruefully. "Do you know the adage about the reputation lost in an afternoon?"

The reputation, until now, had stayed remarkably immune from the other common ailments and breakdowns afflicting us. Nearly everyone, from its customers to the men who both managed and worked for the company, basked in its infallibility. When trains did not run, repairers did not repair and workmen did not work, the telephone became the last symbol of one lonely function doing what it was supposed to do.

No other piece of gear had ever assured us we could live miles from where we worked and even work in high, confined spaces hundreds of feet off the ground to which we rose and from which we fell once a day, all the while keeping in touch with friends, business associates and loved ones. As other things stalled, shorted and blew their fuses, it sustained us as much as heat and light, in their day, ever had. As physical movement of any sort became increasingly difficult, costly and sometimes hazardous, it became—even more than the automobile in Los Angeles—indispensable, the only instrument we could not truly do without. It traveled for us, walked, shopped and bought for us, conveyed our anxieties and paid our little social calls. It persuaded us actually to move around less than we ever had. The most prominent men among us, in fact, often moved not at all.

The proportions of this performance reached the area where reality often becomes myth—making believers, in this case, of both the men who worked for and ran the company and the public they served. "You have to understand the heroic ego," says Boettinger. "There's an unwillingness to admit there is anything we can't do."

Few companies these days are so small that an employee talks to the president or even the assistant vice president for employee relations. But then few companies have swelled as has the phone company to the size of a corporate state, with its own by-laws, ruling class, uplifting slogans and customs. In theory, workmen report to foremen and foremen report to supervisors and supervisors to district superintendents and district superintendents to divisional heads and divisional heads to assistant vice presidents and assistant vice presidents to operational vice presidents and operational vice presidents to the president, Cornelius W. Owens, whom few outsiders ever see. Mr. Owens, for such varying reasons as company precedent, a busy schedule and a death in his family, made no public appearance or statement or agreed to a single interview for four months during the New York breakdown. But even that was not viewed as very extraordinary within the company. "The interesting thing about the Bell System," explained a spokesman, "is that probably everyone knows as much about what is going on as the president. You'd like him quite a bit though. He's a very outgoing Scotsman, very hale, very frank."

The various offices of the New York Telephone Company are strewn apart like so many landholdings collected through the ages, their managers jealously at watch over their chunk of the empire. Visits between departments have all the niceties of an Open House Night on Embassy Row. The representatives greet each other giving name, branch and official purpose of the visit. The register book is signed, the inspection is begun, trooping the line of model workers. *Hmmm, very nice, I see, I see.* No secrets divulged. Handshakes all around.

Jobs have become so minced into specialties that installers trained on one-station phones are not always qualified to hook up five-button ones, and cable splicers who can work on one kind of cable cannot work on another. Still, the company likes to think of itself being as affably interconnected and goal-sharing as the combined choirs of some Fellowship of Man. The craftsmen have their union, which is large and powerful, but the company rebuffed a growing association of supervisors that began to look like a union and fired the organizers, claiming "all management people are already members of an 'association'—the management team."

Still, some team members feel the coaching has been a little heavy-handed. One sales manager resigned after being told to meet his quota of visits to A.T. & T. shareholders in his spare time. It became apparent two years ago, some employes say, that demand for the entire spectrum of phone services, from installation to repair, was already increasing beyond their ability to meet it. Yet repeated requests by foremen and supervisors for additional overtime and manpower went unheeded by the company. In February 1967, a 44-hour week was cut back in one plant, despite the job load, to 42 hours, and the allowances for service growth were lowered. "It's the old story," says a 40-year veteran of New York Telephone, "of sawdust being added to the meal for a horse and then more sawdust until finally the horse dies."

Despite the cutbacks in budget, the company still expected its departments to meet their performance objectives. Throughout New York Telephone, promotions and performance records are determined by grade and rating objectives. The goals are set impressively high—95% perfect service or better in most categories. Down the line, however, the figures are not taken very seriously. "Let's face it," a supervisor said, "numbers can always be taken care of." A former repair foreman was more explicit: "People in the local repair bureau can doctor the report. The company has a staff to audit these reports and sometimes it finds them wrong by as much as 40%—yet the company still goes on publishing the reported figures, not the audited ones."

A survey released by the company last month reports that in Manhattan 97.5% of all calls receive a dial tone in three seconds or less; on a call to Information, 91% reach an operator in 20 seconds or less; 98% of all numbers given out by information operators are correct; 98.3% of all attempts to place a call are effective, and 99.7% of bills are accurate. Because these surveys are submitted from a lower-management level, there is some feeling within the company that the senior officers were as taken aback by the seriousness of the breakdown as was the public. "If you had told me a year ago that we would have had this problem," says Walter K. MacAdam, vice president, engineering, "I would have told you that you were out of your mind." Somewhat belatedly they have begun the most massive recovery effort in the company's history.

The question still plagues the officers, however—a recovery from what? They compare the present crisis to the severe shortages following World War II—except that, this time, there is no world war to fall back on. It is as if they have been struck by a phenomenon as irrational as any act of God, an earthquake in which only the statistics collapse. "We have seen some social shifts beyond our own data," says Boettinger. "What this really indicates to me is that our insights into this have to be developed. Is there an objective reality beyond these subjective manifestations? Has the anxiety over crime created a blip?"

The day the New York Telephone Company lost its reputation might be fixed rather precisely with the appearance of an extraordinary advertisement last summer. After five weeks of having its switchboard nearly shut down, Benton & Bowles, the advertising agency, took a full-page ad in the New York *Times* of July 14. Over the names of its 801 employes was the headline: "These are the people you haven't been able to reach at PLaza 8–6200." The ad for the first time exposed that *their* troubles may, all along, have been *our* troubles, and our troubles everybody's.

Two weeks later New York Telephone announced it was bringing in the 1,500 out-of-town workmen, to help until service was back to normal; they will stay on, if the union consents, until at least mid-1970. Three weeks later, the state Public Service Commission announced that during the first 200 days of 1969 the telephone company had piled up 4,317 complaints—more than three times as many as had been received in 1968. The PSC then opened the first investigation into phone service—which would parallel its rate hearings—in the commission's history.

New York Telephone has labeled its emergency program the System Resources Operation (SRO). It has included heavy overtime demands, up to 80 hours a week; an intensive internal recruiting program—spearheaded by "People Make the Difference" committees and merchandise prizes; a stepped-up training program that has put its schools on a three-shift, 24-hour basis, while cutting course time in half; and a two-year "critical" production program at Western Electric that will push New York Telephone orders to the head of every possible assembly line. The company says that beyond the $1 million it is spending monthly for food and hotel expenses of the out-of-town workers, it has no idea how much the SRO program is costing. But its eight-month payroll has jumped 29% in the metropolitan area to $181 million.

The company has staked its hopes for recovery by the end of 1970 on the combined impact of all these measures. Its construction program, it forecasts, will result in an excess capacity for 317,131 telephones and it has expanded other projections accordingly. "It will be very unlikely that our new forecasts will be exceeded," says one vice president. "We're on a new track. We're determined—every one of us—that it won't happen again."

The SRO program, however, has already run into serious trouble; local telephone employes, miffed at the out-of-towners appearing to stay on indefinitely, made it a key strike issue last month. Western Electric does not yet know the effect New York's priority will have on equipment shortages in other major cities over the next two years. And desperately recruited, hastily trained employes have caused antagonism as deep within the company as outside it.

New operators, for example, nearly 75% of whom are no longer even from the New York area, are barely able to cope with the city,

its geography, its quick tempers and its bewildering array of accents. As a result, Directory Assistance (formerly Information) and Long Distance services have become a puzzlement of callers (the phone company refers to them as "subscribers") and operators literally unable to communicate with each other. Numbers once at tongue-tip cannot be found in an archaeological search and several spellings of Waldorf-Astoria. William G. Sharwell, vice president for operations, claims some new employes have never used a telephone directory or placed a long-distance call before. "You know we monitored one girl in Directory Assistance, blurted Mrs. Gladys Zaikowski, chief operator of the Bowling Green Director Assistance Bureau, "and to 10 different subscribers in a row she gave out the same number. Can you believe that?" In frustration, 59% of the company's New York City operators quit their jobs this year.

Among the craftsmen the instant admission of teen-agers and high-school dropouts into the coveted "top" crafts that once took years to reach may have done the worst injury of all. Technicians down the line feel their reputations are being lost in the avalanche of new orders from above and the mistakes of the newcomers being made below. "It causes me real mental anguish to hear about PLaza 8," says one cable splicer. Almost a third of the company's craft force has 20 years' service or more but fully another third has five years or less.

In the field, the school training is supposed to be touched up with close supervision by the foreman. But the foremen say they don't have time. "With this accelerated program," says Bill Meiner, a splicing foreman, "the way they're throwing these cables in here—they don't always do them right. They put one in yesterday, turn it on today, and start service tomorrow."

Edward Berberich, a splicing foreman with 18 years' service, took over one of the accelerated training classes. "You used to hang around for years, go through all the crafts, helper, frameman, lineman, repairman, installer—and these fellows jump all of them right off the streets. Where in the hell can you earn $145 a week and not know anything? I've only had one student out of 50 who's washed out—after he fell asleep 11 times."

New York Telephone has repeatedly referred to the breakdown as the result of a sudden, "unprecedented" and "unpredictable" demand for service. There have been, in fact, 10% more calls daily in 1969 than in 1968, and 24% more telephones installed monthly. Yet a Western Electric manager says that the first emergency requirements for the Wall Street area were obvious as far back as 18 months ago, and for the midtown area a year ago. The company's own records show that in 1968 it installed additional circuits for only 102,000 more phones when actual requirements were nearly 300,000.

For a company literally wired to as many elements of its own community as New York Telephone, its ability to understand or forecast the demands of that community has been badly out of focus. Its estimates for new service were too low by 22% in 1965, too high by 14% in 1966, too high by 19% in 1967, and too low by 20% in 1968. How public use of the telephone has changed and subsequently affected the demands on the system seems a central reason behind what has happened. The company does know that we are calling each other more than ever (the rate of increase in the number of calls last year was two or three times that of previous years). Yet it has not investigated the other usage factor—whether we are also talking longer. So far, it has only a cursory survey of some central offices in two boroughs (Brooklyn and Queens) that show conversation time has increased by no more than .03% since 1965.

The company has committed itself to "community action," sharply increasing its black recruitment programs in recent years. Yet it has badly failed to either understand or train its new force of operators, who are mostly black, or young craftsmen, a good many of whom are not. The company has just started a seven-week "sensitivity training" experiment combined with a remedial education course (called "The World of Work") for new operators. In the past, the company too often assumed that any involvement in its own community, like its investment in it, was risk-free. It could hire as many men as it needed, whenever it needed them, train them as it wished, and turn each one out as The Telephone Man. Nations and heiresses have made similar mistakes.

Just as it chose to ignore the fact that its management "team" is now the size of a small city, the company has steadily refused to look at other consequences of its growth. As long as there were men and cable, there would be telephones without limit; buildings could leapfrog into the sky with the promise that phone cords would follow fast behind, families could put phones in every room so as never to be more than a foot away from the next ring. Only in the midst of the breakdown in New York did the company reluctantly suspend its sales advertising, and it refuses, with heroic ego, to consider controlling the demand for new phones. The public, they say, wouldn't stand for it.

When the telephone company was much smaller, it was relatively painless to grow, as it did, fully 140% between 1902 and 1907. Now, each installation in New York has its own special agony. The once simple task of laying cable between a phone and a central switching office has become an arthritic labor pushing through manholes that are clogged to the choking point, some of them so full that crews can no longer climb down them. As a result the direct route from one place to another is no longer available and cable has to be carefully charted in underground chess patterns that cost more to plan and carry out. One supervisor says jobs may require two or three times the splices they once did; although a splicing machine was finally developed about four years ago, most manholes were already too cramped to use it.

Partially because any conversion requires planning in the dimensions of a troop movement, other traditional procedures have proved equally resistant. The changeover in New York to electronic switching (ESS) which reduces connection time by 50% is under way, but will take 30 years to complete. No Bell company will even have a centralized record-keeping system until sometime in the mid-'70s.

Under the present system, one employee collects the phone sets from a former customer at one address, another installs separate sets at the same address for the new customer. The duplication of what might easily be one job, if the orders could be coordinated, adds up: in the metropolitan area last year, 2,135,000 phones went in; 1,732,900 phones came out.

Cable pairs, which are the lines between a subcriber and a central office, are still assigned to each customer from massive, handwritten books. As a result, frequently cables listed as available are not, customers assigned cables already in use are randomly given another pair by the man in the field, the switch may or may not get recorded in the cable book, the errors roll on, and repairmen one day looking for customer troubles can't find them. The entire PLaza 8 exchange was so ensnarled this year that a complete central-office-to-customer survey of every connection had to be made just to find out who was being served by what, and how well. The books themselves are "scrawled, scribbled," says Gordon Thayer, director of the new computerized record-keeping system. "God, they're a mess. You'd hate to depend on them."

At lunch one day, two New York Telephone executives were trying to characterize the reasoning behind some of the practices. "The system has to sustain itself," one of them said, noting that he had never fired anyone in any department he had ever managed and did not know of any manager who had. The other executive also had never made a change in any of his departments in 16 years, saying, "It's a *feeling* corporation." Both of them agreed that not even the president had made any changes when he had taken over the company. One of his vice presidents, they remembered, did leave to become president of Michigan Bell. They were not sure whether anything was behind that and so they could not say if that had been a shakeup or not.

"It's not a company where you accomplish anything by tearing a system apart," said the second executive. "The character of a Bell executive is that he would lean on a department instead." The first executive agreed. "The president would say that himself. Yes, I've heard him say lean."

It seldom just happens these days that for a customer to get something from the telephone company, he has only to call up and ask for it. Still, most customers dutifully report their complaints, put in their requests and make their appointments. What else is there to do?

A few, however, have turned the tactics of fighting the phone company into an art. Their various systems are the closely guarded secrets of all successful men, but their approaches may be generally summed up in three classes:

*The lobbyist.* Firms known as "communications consultants" function primarily to advise large telephone customers on the kind of equipment they ought to have. They are often, however, of even greater service to their customers in helping them get it shipped, installed and repaired. Many of them employ former telephone men, whose success depends on working their way through equipment shortages and service delays by courting contacts still within the company. In the past few years, the consultants have grown from three to 20 in New York City alone and to perhaps 75 others across the country (the field is so new that one consultant checks on its growth by looking through the yellow pages in airports between planes). "I don't advertise. I don't do anything," says a consultant. "It's all word of mouth and it's getting more complicated all the time. It used to be we could settle things at the local level. Now we have to go right down to the executive suites. It used to be that someone you knew could help you. Now, he can only recommend you to someone who *might* help."

*The pressure group.* In May 1968, the Hospital Communications Association, consisting of about a dozen prominent Manhattan hospitals, was formed. It has become an inspiration for other professional and industrial groups whose sole purpose is to present their grievances collectively to the telephone company. The hospital association does not like to talk about exactly what it does or how it does it. "We've had to befriend some high officials in the telephone company," a spokesman vaguely admits after finally agreeing to outline the organization. "We've learned in detail what their obligations are. When they fall down, we invite the man who is responsible to come visit us. If that doesn't work, we invite one of the vice presidents. We've gotten preferences on some things. I suppose it's like putting oil on a squeaking wheel." The group meets once a month and the oil so far is reportedly $150,000 refunded by the phone company for services not rendered. Refunded? The group will not say more.

*The VIP.* Perhaps the most successful of this breed is Daniel J. Bernstein, whose firm is a member of the New York Stock Exchange with offices in the city and suburban Scarsdale. Bernstein says he began complaining about his service in 1955 and that conditions since have been so unreliable that the company finally provided him with his own di-

rect line to the repair bureau. "The only trouble," he says, "is that it is also out of order most of the time."

There have been attempts through the years to regulate the telephone company, none of them very successful. Immediately after the founding of the Federal Communications Commission, in 1934, a spectacular investigation was carried out under a congressional mandate. It lasted four years, cost $1.5 million and concluded: "Attempts at this late date to develop a strong, independent telephone system to compete with the Bell System would be futile." That investigation set the pace in both size and frustration for those who have tried to follow.

Last December a presidential task force issued a comprehensive report on U.S. communications policy that urged a pilot program to develop voice transmission by domestic satellite. Alan R. Novak, staff director of the task force, recalls that when they went to A.T. & T. for research, the reception was something usually given only to poachers and party crashers.

"We had to assemble our own base of information," says Novak. "There simply wasn't any data that didn't belong to the phone company. They were as antagonistic as hell. We couldn't have been in a leakier ship. As soon as we had so much as a rough draft finished, the phone guys had a copy. We thought they had to be running a Xerox in the basement."

The past failures of similar encounters have led some FCC staff members and several commissioners seriously to consider whether the phone company can be regulated at all. In addition, they say, the policy of consolidating virtually all communications services under a single "natural monopoly" may have already served its purpose. A.T. & T. is the primary source not only of voice transmission, but of television and the growing computer data field as well. The regulators are now willing to consider opening up the field of competition in these areas, and the outcome may mark the first period of genuine utility reform since the early 1900s.

Two of the most recent cases decided by the FCC finally ease restrictions that A. T. & T. has traditionally placed on the attachment of non-Bell (A.T. & T. calls it "foreign") equipment to its lines, and on the use of the lines themselves. As a result, competitors estimate by 1974 there will be a $500 million market for their telephone equipment against Western Electric's.

Last month one company filed with the FCC a proposal to create its own common carrier consisting of 36 major cities linked by a microwave network for the computer and data-processing market. This market has been growing by 100% annually, and by 1975 the information volume of data transmitted should exceed the volume of voice communications. Any such long-distance network will have to connect with A.T. & T. lines so that customers may use their phones to link up with it. Most of A.T. & T.'s past objections to such access—is based on the damage "foreign" equipment or transmitters might do to its circuit quality—have been overturned by the FCC. For the first time in history, the FCC has gone outside its own staff to create a 15-man panel, backed by the National Academy of Sciences, to consider A.T. & T.'s final barriers to unrestricted access.

The first authoritative study of a new era in communications, *Computers and Telecommunication: Issues in Public Policy*, by Stuart L. Mathison and Philip M. Walker, will be published in February. The era may release unparalleled choices that will allow virtually every public and private interest in the nation to arrange its own system, much as is might casually arrange a roomful of furniture today. "Obviously we all can't have 50 telephones on our desks," says an FCC economist, "but if IBM wants to build a communications system and G.E. wants to put up a satellite, let them."

When there are changes to be made, they are more likely to be made in Washington than in Albany, N.Y., headquarters of the New York State Public Service Commission. The commission is supposed to regulate all of New York Telephone's intrastate service—the source of about 75% of the company's revenues. The PSC battled the phone company 12 years ago during the last rate proceedings. But it has since allowed the company to earn anywhere from ½% to 1% annually above the maximum ceiling for earnings which was determined then. In return it asked little of the company, although it did at one point order the initial installation charges for color telephones reduced from $10 to $5.

The PSC has only two field inspectors and two engineers to patrol all of New York Telephone, as well as 62 other independent phone companies in upstate New York. Most of the commission staff and members heatedly defend themselves against charges that their surveillance of the phone company has been inadequate. They say they see no reason to change any of their practices. "This consumerism that's sweeping the country ought to concentrate on things other than the regulated industries anyway," says Thomas J. Brady, chief of the PSC Telephone Bureau.

Neither were they much stirred to concerned by their own service hearings. "You invite people to complain in the metropolitan area and you get a response," says John D. McKechine, director of the utilities division. "This flood of complaints helped nobody out. It involved a considerable amount of time." One commissioner, Ralph A. Lehr, even suggested the problem in New York has been due "to a lot of people leaving their phones off the hook when they go out, because of the crime situation."

At times, the regulators appear mystically happy and serenely reconciled to the infinite impossibilities of their task. They have adopted the naive fatalism of mountain villagers living at the mercy of a volcano, truly believing that no one will ever really control the telephone company. "To say that we could improve our efforts here implies that we could parallel what the company already has in the most preventive surveillance anywhere, and that we could find civil servants with more perception, more sensitivity and more aggressiveness than the phone company has," says Commissioner Edward P. Larkin. "And if you think that, then I'll spare you any further comment. We got a guy at $15,000 a year who's looking at a guy in the phone company making $50,000. What kind of answers is he going to get? It's inconceivable anyway that the world's coming to an end. Who amongst us has never made a mistake?"

---

A STATEMENT FROM THE PRESIDENT OF NEW YORK TELEPHONE COMPANY

*(On the day this article went to press, Cornelius W. Owens, president of the New York Telephone Company, agreed to be interviewed. The following is his first public assessment of the situation.)*

*Q. Mr. Owens, some people have called the situation in New York a crisis or breakdown. Is that how you would describe it?*

A. Absolutely not. We've had some pockets of trouble in some critical areas, but that's about all. No question about it.

*Q. Where have the pockets been created? And why?*

A. In the Wall Street area we got into the 20-million-share days in the winter of 1968, and that put a tremendous burden on our offices. Then, the East Side of Manhattan has had its call rates increase markedly—about 15% or some figure like that. Then traffic went up in the marginal areas—the ghetto areas especially. Where we began to have full employment and the ability of people to have phones on welfare, the ghetto areas really took off. To put it bluntly, they started to use phones like everybody else.

Actually, you know, the New York Telephone Company, up until 1967, was really one of the most slow-growing in the Bell System. We were about 4% in annual growth until we hit this period lately. Everybody says we can see the buildings going up; why weren't we ready? But we don't see the alterations that go on—like the compressing of space because of high rents. Instead of expanding, an office with four girls on phones will just squeeze in two more.

*Q. The recent complaints against the phone company, however, have had to do with virtually all your services?*

A. What most people don't understand is how everything gets affected by demand. High demand has cut down all the margins that used to cushion our other areas. Before, for instance, you might get out there and find that the cable pair that was assigned to your customer was already in use, so you'd take another one. Now, there just might not be another one there. So you can't make the installation, and the customer may or may not find out about it or understand why, or a customer can't get a dial tone right away and doesn't want to wait, so he reports his phone out of order.

Our service orders pile up. When we have a margin, we have ability to maneuver. But when you're at capacity, you don't and you get slow testing, slow repairs.

*Q. When do you expect these margins to be returned and will they be sufficient to fully restore service?*

A. We were there two years ago and we will be there again. At least, with the money we're spending, we ought to be. Some places will be relieved in the next few months and some will be relieved in many, many months.

*Q. Have you seen in the past few months where the company made its mistakes?*

A. We've gone back in hindsight and asked what we could have done. Finally, we decided that with what we knew then, what we did was right. We were a flat company, year after year. As far back as you'd want to look, our construction budget was right around $400 million. When the surtax came in, we could have been much more bearish. Actually, we thought we were putting in plant that was sufficient. Now, we'll spend $740 million this year and $880 million next year and probably $10 billion in the next decade.

But I don't think we'll ever have this sharp a growth as we've had in the last couple of years again. With the picturephone and all the computer services coming in, we'll have a different demand for our services entirely in the 1970s, but I've been in this business a long time and nothing like this is ever going to happen again. Today, you have the railroads in trouble, and the power companies and all of a sudden we popped up. Let me tell you, we're popping down fast.

*Q. You mean this has only been an episode in the company's history and will not recur?*

A. Yes. Episode's a very good word.

*Q. In addition to increasing your construction budget, have you considered making any other changes in the company's operations in the next few years?*

A. I will say that when we get ourselves shaken down this year and next year, we'll be operating just the way we were before—only at a higher plateau. I ask myself if there is something that if I had known two years ago that I know now I would have changed about the company. The answer is no.

## UNLOCKING THE SECRETS OF AGING

### HON. WILLIAM H. AYRES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. AYRES. Mr. Speaker, Frances Spatz Leighton is one of this Nation's finest feature writers. We Ohioans are particularly proud of the prestige that she has brought to our State by her great constructive writing in this country's leading magazines.

Mrs. Leighton, formerly with the International News Service, is now writing for the Metropolitan Sunday Newspapers. She is author of many fine books—the latest on the bestseller list.

Just recently this outstanding Ohio author wrote a very thought-provoking story that appeared in the Sunday magazine of one of my home State's largest newspapers, the Columbus Dispatch, one of the Metropolitan Group.

All of us are constantly looking for ways to aid the aged. In her article, Mrs. Leighton points out methods that we may in the future take to slow up the aging process. The experiments that she refers to are being conducted by the National Institutes of Health.

I believe that this fine article will be of interest to all of my colleagues. It follows:

[From the Columbus (Ohio) Dispatch, Nov. 2, 1969]

UNLOCKING THE SECRETS OF AGING

(By Frances Spatz Leighton)

Fascinating facts are turning up as scientists probe the mysteries of aging. Researchers are learning that diet and body temperature have a lot to do with growing old, but only under certain conditions and at certain times in life. Also, though it has long been known that the body loses certain cells as it ages, doctors are finding out more about the rate of cell loss and how function diminishes because of it.

Since 1958, the Gerontology Research Center of the National Institutes of Health has been testing and keeping records on some 700 male subjects, ranging in age from late teens to over the century mark. Loss of function and effect of this loss are noted in volunteer subjects every 18 months by means of a rigorous series of tests. Through this program, and collateral studies on lower forms of life, scientists hope to offer a program for longevity that will give people a chance for 50 years more of active, healthy life.

"Very few people die of old age," says Dr. Nathan W. Shock, head of the Gerontology Center's new multi-million dollar facility in Baltimore, where over 125 experts are engaged in research on aging. "People tend to die from diseases or organic weaknesses due to progressive loss of vital cells."

In experiments with rotifers (minute multicellular aquatic animals) it was revealed that lowering the temperature 10 degrees could prolong the life span of a specimen by as much as four times its normal expectancy. Cutting in half its food intake could enable it to live three times longer than groups which were fed a full diet.

According to Dr. Charles H. Barrows, who is in charge of the rotifer study, "This would indicate that life is programmed, but you can run the film at different speeds. You can slow it down, you can speed it up. How these findings apply specifically to humans is too early to say, but at least we know that with rotifers, you can slow down deterioration in later life by means of temperature control. You can also slow its demise by nutritional control, but this has to be instituted early in the specimen's life."

Similar findings turned up in rats. Diet control when begun at an early enough age, prolonged a specimen's life, but when started at middle age, it proved ineffective.

In experimenting with mammals, it was found that lowering the external temperature required certain corresponding adjustments to be made in the body chemistry. Dr. Shock explains: "According to one theory of aging it is believed that collagen, a protein vital to connective tissue, undergoes chemical changes with age. These changes can be experimentally prevented in some cases by means of chemical agents.

"There is also some indication that within the cell similar transformations also occur, transformations that might be forestalled chemically. What we're trying to do is find out first of all what aging really is, how it takes place, what happens within the body and at what rate for various individuals. We want to know if there is a time clock within the body and, if there is, how it operates. Then we will be able to tackle the problem of how to slow down the clock. We don't want just to lengthen life, we also want to improve the quality of old age."

Although the biochemical study of life processes in tissue cells is still in its infancy, Dr. Shock foresees in the near future a full vigorous life at age 80 or 90 for most persons. He also foresees the day when most new organs will be artificial parts rather than transplants.

"Yet, this will present a problem. It isn't enough just to be alive. One must be alive to enjoy living. The future may present problems in hospitals concerning when to pronounce a patient dead. Artificial organs, like a heart for example, may continue to function, while the individual for all intents and purposes is really not there at all."

Dr. Shock then turns to the subject of what advice he has for today's elderly and middle-aged persons who want to get the most out of their remaining years. What can these people expect, for example, from exercise?

"To stimulate the growth of new blood vessels, you would have to exercise to the point of exhaustion," says Dr. Shock. "You couldn't expect to achieve such results by being only a Sunday cyclist. You would have to exercise every day and to the point where it actually hurts. You would have to feel muscle fatigue, but your heart may not be prepared to take this kind of punishment.

"If you're going to maintain an improved capillary system, you must develop it early in life and keep pushing. Capillaries disappear with disuse. Sometimes it's too late for such exercise."

Dr. Shock himself doesn't exercise and doesn't worry about it. He simply keeps busy. Five feet, 11 inches tall, and almost 63 years of age, he says he is in the pink of health. "I've maintained the same weight of 142 pounds about all my life."

What can one do to hold back the clock? Dr. Shock has a few tips for slowing the effects of aging:

1. Never get overweight. "In terms of longevity, even a few pounds make a difference. Keep protein intake as high as ever but cut carbohydrates and fats as you grow older. And avoid these deficiencies common to older people—calcium, riboflavin, iron and vitamin C."

2. Smoke very little, if at all. "The danger of cancer is only part of the story. Impaired oxygen supply ages the body."

3. Stay active physically and mentally. "Be a high achiever. The competitive person with goals and a will to live, outlives the others and enjoys life to the end. Some of our elderly test group who are retired are harder to pin down for appointments than those who hold jobs, they are so busy being consultants to companies or traveling for fun.

"We lost one of our oldest and most dynamic volunteers not long ago, a 98-year-old, but not because of sickness or old age. It was an accident. He fell out of bed."

FACTS ON AGING

Studies on 700 males, age 18 to 103, at the Gerontology Center have led to these broad findings:

*Mental Ability:* Memory starts to fade at 30. Yet, such abilities as vocabulary comprehension scarcely change with age. Scientists find that given enough time, the older person still comes up with the right answers in decision-making tests. Average weight of the brain actually shrinks from 3.03 pounds at age 30 to 2.72 pounds at age 90.

*Physical Powers:* Based on tests involving walking a treadmill, climbing steps and cranking a wheel while lying on his back, a 70-year-old's physical capacity has declined 30 per cent from age 35. As for short bursts of energy, peak performance drops almost 60 per cent between these two ages.

*Breathing Changes:* Between ages 20 and 80, there is a 40 per cent decline in the amount of air that can be pumped through the lungs in 15 seconds.

*Heart Function:* Between the ages of 20 and 90, the amount of blood pumped drops from about four quarts per minute, per square meter of body surface to almost half this amount—just over two quarts. Also, the older heart has more trouble speeding up its pace to cope with increased physical activity.

*Basal Metabolism:* Thyroid activity which regulates the basal metabolism continues to function about as well among the elderly as the young. The pituitary hormone continues its performance steadily into advanced years. This partially explains why old folks seem to do well as long as they are relaxing.

*Blood Sugar Level:* In older people the rate at which the system removes sugar from the blood drops to such an extent that under normal diagnostic tests, 50 per cent of the aged would be considered diabetic. Through work at the Center, new techniques are currently helping the nation's physicians to prevent misdiagnosis of diabetes in the elderly.

*Sense of Taste:* The number of taste buds per papilla of the tongue falls from about 245 at age 25 to 30, to a mere 88 taste buds at age 70 to 75, which helps explain picky eaters among the geriatric set.

*Kidney Function:* One of the wonders of the aging process is the difference in kidney function between individuals. Some 80-year-olds were found to have the same kidney efficiency as the average 50-year-old. Normally, by the age of 75, the average kidney receives only 42 per cent as much blood as it did at age 30, making it more difficult for the body to throw off waste.

## JUST WHO IS AMERICA'S SILENT MAJORITY?

### HON. WALLACE F. BENNETT

OF UTAH

IN THE SENATE OF THE UNITED STATES

*Thursday, December 4, 1969*

Mr. BENNETT. Mr. President, for a good many years, now, M. DeMar Teuscher, the Deseret News political editor, has written an interesting and succinct weekly column entitled "Speaking of Politics." His November 13 column in the Deseret News has just been called to my attention. I wish to quote one or two paragraphs from it. Mr. Teuscher said:

Dissent is, and always has been, a legitimate mode of expression under what has come to be hailed as "the American way." But has not dissent nearly always been the tool of the activist, vocal minority rather than that of the quiescent, silent majority? This has been the case whether the dissent has been legitimate and well-founded or irresponsible and loud.

Mr. Nixon, it would seem to me, was well within his rights in seeking a response from the "silent majority." But, it would also seem to me that now is the time for this majority—if it is truly a majority—to speak out. Silence is not always a virtue. Neither is vociferous clamor. In this day, when leaders need to hear the voices of all the people, silence can be misinterpreted—by both sides.

Mr. Teuscher has called on the silent majority to speak out and set forth its views. Even if it is a "silent majority," it still must and should be heard. I feel that this column should receive wide distribution, as it will get in the CONGRESSIONAL RECORD; therefore, I ask unanimous consent that it be printed in the RECORD. In addition, I commend Mr. Teuscher for this well written article.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Salt Lake Deseret News, Nov. 13, 1969]

JUST WHO IS AMERICA'S SILENT "MAJORITY?"

(By M. DeMar Teuscher)

Last week, President Richard M. Nixon rested his Vietnam case with the jury of what he termed "the silent majority." The indications are that he is now hearing more, rather than less, affirmatively, from that jury.

He has already heard from what Vice President Spiro T. Agnew has chosen to call the "effete intellectual snobs"—a group the vice president, with some justification, has termed a "militant, vocal minority."

This entire question seems to pose some rather interesting questions about our democratic system which really is, as many Americans point out, a representative republic.

For instance, who is more snobbish—the "effete intellectuals" who militantly and actively speak out, or the "silent majority" who wait until circumstances force them to discard their chosen role as the quiet American?

In a country such as ours, forged in the crucible of revolution and dissent, wherein lies the virtue of silence? Or is this "virtue" really mainly composed of the vice of apathy?

Who is the "silent majority?" Is it the over 60 per cent of the citizens who stayed away from the polls a week ago in Salt Lake City's municipal election?

Is the "silent majority" composed of those who complain of things as they are or appear to be and who vocally long for things as they were—without doing much to promote effectively a change?

In the Salt Lake City election just concluded, roughly 40 per cent of the registered voters of the community made the decisions for the other 60 per cent—the majority. In this instance, the minority decision was clearly for the status quo.

If those who stayed home from the polls are the "silent majority" referred to by the President, did not their silence indicate satisfaction with the present city government and no real indication of a need for change?

Should this be a resonable assumption to draw from a study of the circumstances, who then were the better citizens, those who stayed home in silence, or those who registered their satisfaction—or lack of it—by going to the polls?

As I read history, those who advocated and led the violent overthrow of the British colonial government in the 1770's were, in reality, a minority. The majority either did not become involved or preferred to remain with the status quo.

However, once this nation was established, and its governing principles set forth—again by a representative minority—it was the majority who, time and time again, has been roused to either thought or deed to maintain these principles.

Dissent is, and always has been, a legitimate mode of expression under what has come to be hailed as "the American way." But has not dissent nearly always been the tool of the activist, vocal minority rather than that of the quiescent, silent majority? This has been the case whether the dissent has been legitimate and well-founded or irresponsible and loud.

Mr. Nixon, it would seem to me, was well within his rights in seeking a response from the "silent majority." But, it would also seem to me that now is the time for this majority—if it is truly a majority—to speak out. Silence is not always a virtue. Neither is vociferous clamor. In this day, when leaders need to hear the voices of all the people, silence can be misinterpreted—by both sides.

## PROPOSED REVERSION OF OKINAWA TO JAPANESE CONTROL

### HON. HARRY F. BYRD, JR.

OF VIRGINIA

IN THE SENATE OF THE UNITED STATES

*Thursday, December 4, 1969*

Mr. BYRD of Virginia. Mr. President, Columnists Robert Allen and John Goldsmith have written a perceptive article about the proposed reversion of Okinawa to Japanese control and the role of the Senate in foreign policy. The column was published in the Farmville Va., Herald of December 3. Of particular significance are the views of the able and influential Senator RICHARD B. RUSSELL, of Georgia.

I ask unanimous consent that the column be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Farmville (Va.) Herald, Dec. 3, 1969]

JAPAN WANTS OKINAWA

(By Robert Allen and John Goldsmith)

WASHINGTON, December 2.—Those plans for returning Okinawa to Japan may still provoke a major controversy in the Senate, and President Nixon is well-aware of that.

No hint of trouble was discernible when Japanese Premier Eisaku Sato visited President Nixon here a couple of weeks ago. The atmosphere was one of friendship when the two leaders issued their joint communique which envisions reversion of Okinawa to Japanese control during 1972.

The communique, however, called for the 1972 deadline, subject to development of specific arrangements for the island's return "with the necessary legislative support." That is where the controversy could arise.

There is strong sentiment in the Senate for return of Okinawa—perhaps enough sentiment to assure approval for any reasonable blueprint to be developed by future consultations. There is, however, some feeling that the island, seized in 1945 by U.S. forces, should not be returned now.

There was a clear and public warning of trouble ahead before Sato arrived for his state visit. The Senate, by a convincing vote of 63 to 14, went on record that any agreement on a change of Okinawa's status should have the "advice and consent of the Senate."

That is language designed to require a treaty, of course, and ratification of a treaty requires a two-thirds vote in the Senate.

The warning of the 63 to 14 vote, on an amendment offered by Sen. Harry F. Byrd, D–Va., was not really that a two-thirds vote might not be forthcoming on the Okinawa issue. Some Senators who supported the Byrd amendment, as modified in Senate debate, strongly favor return of Okinawa to Japan.

The warning was that the Senate, seeking as never before to assert itself in such national security issues, expects to do so on the question of Okinawa.

Private Caution—Now it is reported that the President had received a private caution as well before he had his formal talks with Sato—a caution which questioned the wisdom of reversion on the 1972 schedule. That warning came early last month when the President sandwiched a private lunch with Senate leaders between impromptu speeches in the House and Senate.

On that occasion, according to informed sources, the President brought up the Okinawa question, and Sato's impending visit, over the luncheon table. The matter was then discussed briefly by the President and the other guests in the office of Democratic leader Mike Mansfield, Mont.

Sen. George D. Aiken, R-Vt., the respected GOP "dean" of the Senate, told the President he thought the Senate would support the return of Okinawa to Japan. The same view was expressed, according to our informants by Chairman J. William Fulbright, D-Ark., of the Senate Foreign Relations Committee.

However, Sen. Richard B. Russell, D-Ga., the influential chairman of the Senate Appropriations Committee, is reported to have taken a different view. Russell is said to have commented that Okinawa, with its vital bases, should not be returned to Japan while the United States is charged with responsibility for maintaining security in that part of the world.

The President, according to this account, replied—with some senatorial support—that the future of Premier Sato's government was irrevocably tied to securing the return of Okinawa.

Russell is said to have replied by suggesting that Mr. Nixon explore with Sato the response received by Japan when it tried to recover islands in the Kurile group which were given to Russia after World War II.

Meaning Clear—Russell's meaning was quite clear. While the United States has already ceded control of the Bonin Islands, including Iwo Jima, acquired the hard way during World War II, Russia is still hanging on to its acquisitions in the Kuriles.

Sato is reported to have asked, early this fall, that Russia begin talks looking toward the return of those islands. That request was "turned down cold," according to Senator Byrd.

The implication of the President's advance warnings, public and private, is that the final agreement on Okinawa should be submitted to the Senate as a treaty for ratification. Fulbright is now understood to be urging that course of action on the State Department.

Otherwise, it is argued that the issue of reversion of Okinawa could become further clouded by the Senate's new determination to play a role, with the President, in decisions which affect the foreign policy and security of the United States.

## MORE FAMILY-TYPE MOVIES

### HON. ROY A. TAYLOR

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. TAYLOR. Mr. Speaker, I call the attached letter from a 14-year-old boy to the attention of my colleagues in the hope that it somehow will encourage the

motion picture industry and movie theater operators to produce and show, especially on weekends, more family-type movies which are suitable for children and young people.

The letter follows:

DEAR SIR: I am complaining about the lack of decent movies in my town. It has gotten so that when a "G" rated movie comes on, which is very seldom, I have not the money to go. I'll then make up my mind to go the next week and start saving my money. When I finally have the money, I look in the paper with intentions of selecting a movie to attend. To my despair, I see "X", "X", "X", "R", and "M" rated movies. There is nothing on for one of my age or under.

People are always complaining because teenagers are always getting into something. But when they have nothing to do, and nowhere to go, what is there left for them to do? My parents won't allow me to go to some of the "teenage hangouts", so since I can't go to the movies, I stay home and die of boredom.

I'm sure that I'm not the only teenager trying to live a decent life, so therefore I am concerned not only for myself but for others as well.

Isn't it possible that the movie theaters could reach an agreement by which some could show "X", "R", and "M" rated movies and one could show a "G" rated movie?

Theaters also complain about losing money, but how can they help but lose money if only adults can go when they please? I am sure the majority of adults who have children won't go to the movies if they can't take their children along. I most certainly would not.

Very truly yours,

TERRY HARRELL.

## MARY CUSHING NILES

## HON. JOSEPH D. TYDINGS

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

*Thursday, December 4, 1969*

Mr. TYDINGS. Mr. President, internationalist, ex-management consultant, active Quaker and pacifist, author, grandmother, and wife, Mary Cushing Niles in an interview in Baltimore magazine of November 1969, sums up the driving force of her life: "I have had a passion for leaving the world a better place than when I found it."

She already has.

Always an innovator, Mrs. Niles is the chairman of the board of trustees of the Friends World College—a college dedicated to treating the entire world as its campus and to training students to solve the problems of the world. Her originality and uniqueness is not a recent development, for in 1917 she was one "of the first debutantes in Baltimore to drink wine and champagne in public because this was the end of an era."

Perhaps Mrs. Niles, with her husband Henry Niles, is most renowned for her continual fight against war, "the enemy that we wanted to destroy with our lives. Somebody has to develop some alternative to war or we're going to put an end to life on this planet."

Mary Cushing Niles is trying to find those alternatives. I ask unanimous consent that the interview, published in Baltimore magazine of November 1969, of one of Baltimore's most outstanding women be printed in the RECORD.

There being no objection, the interview was ordered to be printed in the RECORD, as follows:

MARY CUSHING NILES

Mary Cushing Niles can speak critically about people over 60. She was born in 1900 into a family of physicians in Cleveland, Ohio. At a very young age she developed the sense of being a "professional woman," a fairly uncommon attitude for young girls in the early 1900's.

Her father's appointment as Assistant Commissioner of Health brought the family to Baltimore. Mrs. Niles received a certificate from Peabody Conservatory and a B.S. in economics from Johns Hopkins; she completed everything but her dissertation for a Ph.D. at Columbia. She has been married 46 years to Baltimore Life Insurance board chairman Henry E. Niles. (They have two married daughters and five grandchildren.)

From 1931 to 1939 Mr. and Mrs. Niles were partners in a management consulting business in Baltimore and Toronto. Mrs. Niles is the author of "The Essence of Management" and "Middle Management," and, with her husband, wrote "The Office Supervisor," the first book dealing with white collar supervision. The third edition of this book, coauthored with James C. Stephens, has been translated into Italian. Her books have also been published in India, Japan and Turkey.

During World War II Mrs. Niles served as Assistant to the Chairman of the Federal Personnel Council developing new policies for the nearly 4,000,000 civilians employed by the government at that time. She is a charter member and fellow in the Society for the Advancement of Management, and has been active in international management activities, especially in India where she traveled 30,000 miles meeting with management groups when the country was establishing its national management association in 1956.

In her own words, Mary Cushing Niles has always been an internationalist; as early as 1928 she organized the Connecticut Council on International Relations. A dauntless traveler, she has visited 54 countries and has made extensive journeys through India and Africa where, several years ago, she and two other women crossed the Sahara desert in a LandRover.

An active member of the Society of Friends since 1950, she has served as chairman of Overseers, secretary of the Trustees and chairman of the Social Order Committee at Baltimore's Stony Run Friends Meeting. She is currently chairman of the Policy Committee of the Friends Committee for National Legislation, which spent two years working on the principles of an assured annual income now taking the form of legislation.

For the last five years, Mrs. Niles has been a driving force in the establishment of the Friends World College, with the objective of treating the entire world as a university campus. Ultimately the school will have seven centers around the world—each admitting students who would go completely around the world in the course of their studies. Current headquarters are at Westbury, Long Island, with programs also actively operating in Latin America, Kenya, India and Japan. Groups have studied in western and eastern Europe, as well as in Russia. The college is directed toward taking a problem solving attitude to the great concerns of mankind, and as a long-time enemy of war and poverty, Mrs. Niles is very much in her element as chairman of the board of trustees of this unique new school.

MRS. Niles was interviewed for BALTIMORE magazine by Nancy B. Gabler.

*What are some of the basic ideological differences between Friends World College and a standard American university?*

It's something absolutely brand new under the sun that we're doing. We are directed toward problems of mankind and we're going to train our students to do problem solving—to take a problem solving point of view toward what they are studying, which is entirely different than a historical point of view or an aesthetic point of view. We feel that once the student has studied the same type of problem in three or four cultures he's going to get over his provincial attitudes that the solution we have here in Baltimore is the correct solution for Kamchatka or South Vietnam. He would get over that feeling and see that humans do have the same problems, but how they tackle those problems is going to depend quite a lot on their physical environment, their climate, and their culture, and that we can't just patly tell them that if you do so-and-so you get such-and-such a result, because it just isn't as simple as that.

*What need is the college actually fulfilling?*

Well, U Thant has recently cited the need for a world university; he's issued a very strong statement as to the need for world consciousness and looking at problems from a world point of view. Here, there, and the other place these programs are springing up. I believe that we are the first one to give a degree, but there are loads of American colleges now that offer a semester or a year abroad, so it's in the air. The need is to train people to look at the world, because actually, as we sit here, we are no further from New Delhi than Thomas Jefferson was from Washington when he was in Monticello. It took him two days by carriage to make that trip. It was a two-day trip from Philadelphia to Washington or from Philadelphia to New York. Now I can leave Baltimore at night, arrive in London in the morning, take a 10 a.m. flight from there and arrive in New Delhi that evening. So in a little over 24 hours you're half way around the world. Things are different. This is the change we're trying to catch up with. The 20th century has brought us so much that's new, and we've got to prepare the minds of the young to deal more effectively with it. It was hard enough years ago to get people to look at the whole United States. Now we're up against the problem of getting people to look at the whole world. Not too long ago, Africa was called the dark continent—not because it was inhabited by black people but because so little was known about it. As for Latin America, it has been very recently that we have come to recognize its importance. There are more people in India today than there are in Latin America and Africa combined, so knowing Asia has become crucial if we're going to think about problems that really face mankind. We never had to think about the problems that faced mankind before. It was enough for us to be British or American or German. We didn't have to think of the universe. So through these educational experiments we are trying to prepare the young people to live in this kind of a world, and it's pretty exciting. It was wonderful to sit at the first commencement and feel that a number of these kids had literally been around the world in the course of their studies. We don't know of any other college that has done that for students. This is a first.

*Can you really see a definite change in the students' outlook?*

Oh, yes. These people can never go back and be provincial. For better or worse, they think of things now in terms of continents. If we are ever going to have a strengthened United Nations it would have to come about by having a few million people that know these things through their senses, not just by reading a book; that's the world point of view.

*You mentioned the problem-solving method. What exactly is that?*

We've outrun the time when any one person can know all the information about anything. What we have to know when we have a problem is how to go about getting the

information and putting it together, who the people are with the experience in that problem, and go to them. Sooner or later you piece together an answer. It's a group product. We are training people to do that and it's just as important in the long run as the world approach. When we put the two together it's really a revolutionary concept, but not the type that uses guns. It's the type that uses minds and is peaceful in nature.

*What type of student is attracted to the college? Are they predominantly Quakers?*

There are generally a few Friends in every class, because they are interested in this sort of thing. Of course, we do have good contact with Friends schools which tends to give us rather more Friends than otherwise. We attract the more progressive students—the ones who are more adventurous, the ones who would come to us in the first place when we didn't have any charter permitting us to grant a B.A. They said, "Well, we want this, and if we don't get a degree that's all right; we'll manage." In other words, they were venturesome. We couldn't, in any event, take any who were going into medicine or engineering or the more formal disciplines because we don't have laboratories and that sort of thing. Then, to, practically all of our kids are conscientious objectors, and we even give courses to one boy who is in jail for resisting the draft for conscience sake. It is the student who has this kind of ideal who is appealed to by our experiment type of college

*What type of program or curriculum will this student find?*

The first six weeks are devoted to the biggest contemporary world problems. Human rights, race relations, environmental pollution, education, world peace, will each take approximately a week's discussion. This is the broad perspective of what the college is about: to solve the problems of mankind. We don't pick too many problems, just symptomatic ones. After that, the students choose individual projects and work on them for about two months; then they're ready to direct themselves toward the world and get ready to go to their next place.

*Where will that be?*

Most Americans go to Latin America. But some are going to Africa, some to Japan, and two or three to India. These latter are transfer students with previous college work. Some students began the program in Africa and Japan.

*With your student body spread throughout the world, how do you exercise scholastic control?*

The freedoms that we have are very large—many people think too large. There are no quizzes, no exams until the final oral exam, very few formal lectures. Our critics think that the student who doesn't know what he's doing spends too much time drifting because there's nobody to go and shove him into a class and say, "Here, you're supposed to be taking Spanish II." Nobody does that, so if he doesn't compel himself to learn Spanish, the chances are he can slide through the whole Latin American semester just learning to say 'good morning' and 'good night,' in which case he hasn't gotten very much out of his Mexican experience. On the other hand, if he's a painter and has been out in the desert painting the colors and the peasants and so forth, or if he has done construction work, as many of the students do—they go out and help the people build a schoolhouse or a barn—he won't learn much pure Spanish but he will learn an awful lot about how people live and how you can interact with people of another culture. We're really much more interested in this approach to culture than we are in turning out people who can do a perfect formal paper.

*What about the teaching staff? Are they a breed apart from what one would find on most campuses?*

Yes, I think so. In the first place, they have made substantial sacrifices, both in personal security and in salary. We can't pay market rates. We ask them, what their living requirements are and if we can pay it, we do. If not, we have to turn them down—$8,000 or $9,000 is a magnificent salary around our place. In India and Africa we're paying market rates, because the standard there is so low that you'd be ashamed to pay less. Our instructors have to give so much more time, especially in foreign countries—their time is almost continual. Some people psychologically just can't or won't do that. The instructors get to know each student intimately. If you're off in a far part of the world with students and someone knocks on your door late at night, you don't say "go away," you say, "come on in, what's on your mind." It takes an awful lot out of people.

*Can you borrow instructors from other schools just to teach specific subjects?*

We really have to have our own staff, because the job of the teacher in any given place is to interpret that culture and that set of problems of humanity. So while they may be the same old problems of not enough to eat, and too much population, and threat of war, and trouble with the next province, it looks different when it's in an Indian setting or a Mexican setting. We have to have people who can interpret why people feel the way they feel and what their traditions are, and what makes it hard to change things there. For example, an economist can teach economics chained to where he started, but if you're going to teach Indian philosophy, the students want to learn this when they're in India. When I was in India last year with a group of students, seven or eight of them studied under a yogi and began practicing yoga exercises. I did too, and I still practice them. But more important, they were exposed to Hinduism, Buddhism, Islam and Indian philosophy. If we're going to be a world college, we have to understand the things that are important to other cultures. So we must have a native staff in each of the locations, and we're getting quite an international staff at Westbury.

*You've been involved in so many projects, both vocational and as a volunteer. What area has been the most stimulating for you?*

I would say that my peak experience in "jobs" was the period that I was Assistant to the Chairman of the Federal Personnel Council. We were making policy in the personnel field for the entire federal government. This was the time that safety programs were beginning, employee relations programs, counseling, all of these things were just beginning. We were taking the practices of the very best of city, state and private businesses and interpreting these for use by the largest employer in the country during World War II, when federal employment mushroomed from under 1,000,000 to 3,770,000 civilian employees. We had 35 councils in all parts of the country: Army, Navy, Air Force, Internal Revenue, Post Office, Agriculture, the whole works. We were blazing new trails. People would think nothing of driving 200 or 300 miles to meet with me when I was in the field.

*Even with all the refinements in personnel practices that have taken place since the 1940's we still hear a lot about federal waste of manpower and resources. Do you think the government is able to give the same motivation to its employees as private enterprise?*

I think it's the same thing that you'll find in any big company—here in Baltimore or anyplace else. Most people are motivated because they have to make a living—they need a paycheck. But they also become attached to their fellow workers. They become a team if they're given half a chance. Most people have this need to associate with their fellows. Therefore they do their job not only because of profits, nor essentially because of their paycheck, but because they're part of a team.

*What generates this feeling of teamwork?*

Well, teamwork is the result of broadening the interest of the individual to include the whole group. It springs from satisfying relationships on the job, in the daily associations with coworkers and management. If these relationships are pleasant, cooperation is smooth and it is easy to get out the work. Most people not only meet economic needs through, but also fulfill many of their psychological and social needs through associations with their working companions.

*When you and Mr. Niles were in the management consulting business, this human approach to problems was somewhat unique, wasn't it?*

Yes, it was. We felt that if you think about the people doing the work and not just about cogs in a machine, you would get much better production. This hadn't been proven when I started out in management consulting. We thought it would be nice if people had more scope and were treated better, but we thought it would cost money, but far from it! We found that you can save money in a business by making jobs more worthwhile to people, because then they will do them better. It's simple really, but hard for the engineering minds to take in. They really feel, sometimes, that if you install a machine and leave the human relations out of it, things will work much better.

*How does a "gentlewoman" with a certificate from Peabody all of a sudden turn up as a management consultant circa 1930? What led to this transition?*

My official major *was* music, and I took a piano teacher's certificate from Peabody, but I also took a full major in economics and went on to three years of graduate work. You mention "gentlewoman" I suppose in the Baltimore sense. My father's family had several gentlewomen who left a very deep imprint on me. They were very attractive, cultured people, but they never did a day's work on anything. My mother had wanted to be a doctor as her father and uncle and three of her brothers had become, but things in her life prevented it. She had the talent and the drive to succeed as a professional woman and all that parked itself inside of me. My father chose my mother as his wife because she had all this talent and he was very excited about my developing mine.

*How, exactly, did your parents help develop this professionalism in you?*

The table talk at my childhood dinner table was a joy to the ear. My mother and father were very witty. They would spar with each other and we would laugh and joke. My father never ignored me. He always said, "Well, what did you do today that was interesting?" From the time my chin came to the edge of the table I was brought into this good conversation as a person of value who had experiences that other people would like to know about. I traveled a great deal with my family and was brought up as a world citizen. But the world was a different shape for those people. We lived, as it were, on an Atlantic lake; my family knew more about the eastern seaboard and Europe than about our own west. We were very much Europe-oriented. We were internationalists, and when World War I broke out my parents began reading extensively about the causes of it; we read aloud a great deal at home and I was listening.

*With this early knowledge of internationalism and world problems, why did you go on to major in economics rather than something like political science?*

I became very excited about the fact that in the '20's we had the makings of the first affluent society that had not been based on slavery or serfdom in some way. I got terribly interested in all of this affluence and also the under side of it—what happens when the business cycle breaks and you get the depressions and unemployment. I was going to study the labor movement, but I shifted to business cycles because I felt that if we could control the business cycle, then there would be enough for everybody. By this time I had been married a year or two, but this drive for an affluent society—that is a truly affluent society, in culture as well as in this world's goods—was really quite a moving passion with me and also with my husband who

had been in Europe during the year of the terrible inflation. War and poverty were the two enemies that we wanted to destroy with our lives. That's why my husband went into business. He was very torn, very eager to go into international affairs. Some people in international affairs said, "If you really want to have an impact on peace and war in your time, be a businessman, because that's where the power is in the United States."

*Wasn't it highly unpopular for someone in your socio-economic setting to be so liberal at that time?*

Well, my husband went into business with the idea of being a professional in business. We weren't out to keep up the family business; we didn't have some idea of a better mousetrap that we just had to polish off and sell. We were in business as professional people trying to do a good management job. I think you could say that we were a couple of young idealists with a very realistic bent. In other words, we weren't interested in building a utopia that nobody was ever going to live in. We were interested in taking the area where we were and seeing if we could improve it a few notches. These were the ideals that ran through everything we ever did.

*If you were 50 years younger today with these same ideals, do you think you would be classified as a hippie?*

I rather doubt it, because I had so much freedom as a child that I was under no need to rebel. For example, Baltimore girls didn't go to college in 1917, but some of us had deeply resolved that we *were* going and we hoped our parents would be nice and help us get there. We were determined to have an education. The next fall the United States went into the war and one of my friends heard that the Cotillon might be the last because all the young men were going into the armed forces. Her parents wanted her to make her debut and she wanted some of us to go along with her, so we did. We came home from college, bought dresses and went to the Cotillon and parties during vacation. Then we went right back to college and forgot all about this debutante business. At that time people were taking a year to do this. For us it was spare time activity, and we had fun. We were the first debutantes in Baltimore to drink wine and champagne in public, because this was the end of the world, the end of an era. Our boys were going to war, so it was "eat, drink, and be merry for tomorrow we die." It was a very curious psychology.

*Do you think we have somewhat of that psychology today with the young people?*

Yes, very much so. I knew security. My children knew a measure of security because when the atom bomb came they were already 14 and 18. My grandchildren know no security because when you're born after these things have happened, and you have never known a world which couldn't explode, there is a different kind of insecurity. This is why we have a "now" generation. If you can't through your own exertions carve out a little island of security for yourself, then what do you do if you're a thinking person? The easiest thing may be to say, "Well, I've got today, let me use it." If you're an optimist you may say that the world will have changed by the time you're 40, but then anything you are prepared to do now may be obsolete by then. This is a fact that people simply have not taken in. These bright youngsters *have* taken it in. I think that this is probably the first time in the history of mankind that young people finishing college know more about the world than their parents, because what they've got is fresher information, put together in a more realistic manner for today. They know more than their parents do, unless their parents have been in a place where they are very much in touch with what's new. This is something quite revolutionary and our young people have a right to ask for more responsibility and more voice because they know a great deal more about a lot of things than older people do. As for people over 60, if they are not keeping up, their opinions aren't going to be very valuable.

*As a person over 60 who has been keeping up, what's your opinion of the "now" generation?*

Well, I see things through a very sophisticated eye having lived with these college people over the last few years. One thing that bothers the older generation is this business of smoking pot. It would be an experience I would have had, too, if I had not chosen an alternative many years ago—meditation. I suppose it was about 1934 that I started this in an organized way, but it is through meditation or prayer that one can rise into a different atmosphere. Of course, many Quakers sooner or later get into meditation. I happened to get into it 15 years before joining the Friends.

*Then you weren't always a Quaker. What led you to formally join the Society of Friends?*

My husband and I had been interested in Quakerism for a number of years, but in our consulting period we moved so often that it was very difficult to be in one spot long enough to join. We came to Baltimore in 1940 when our country was virtually in the war. We were conscientious people. We had been pacifists for a great many years until 1937. The combination of the rise of Hitler and the Stalin purge of 1937, where he killed a million people, made us feel that there were some things worse than war. So we were not able to hold to the real pacifist position in those years. We have gone back to it because we feel that somebody has to develop some alternatives to war or we're going to put an end to life on this planet. Now we are in the long hard task of being pacifists and trying to find those alternatives—and it's a very slow business.

*Many people are familiar with Mr. Niles' group, the Business Executives Move for Vietnam Peace, but do you think that Quakers in general, being a leading pacifist group, are doing as much as they possibly could?*

Activists in any church are seldom more than 10%. I would say that there are easily 10% in the Society of Friends in the United States that are activists now, either on the war-peace issue or on the race issue, which are the two great issues of our time.

*Did you experience much discrimination against professional women during the early part of your career, or for that matter, does it still exist today?*

Oh yes, I felt discrimination right straight through and I continue to feel it. It continues to be a fact, but I think it is less. Women of ability and will have been able to smash through. Discrimination is everywhere, but I think we're pushing it back. Women have to work so much harder for things a man takes for granted. I'm not sure I would have fought as hard if I had had male children instead of girls. But with two girls coming after me I never missed an opportunity to stand up for women getting what they ought to have. Both of the girls are chips off the old block. The younger one is training draft counselors for the American Friends Service Committee in Chicago and is the author of "We Won't Go." The older daughter is managing director of the Delaware Valley Housing Association located in greater Philadelphia. I've found Baltimore to be a dismal environment for a woman to try to use her powers, but it's better now than it used to be. The thing that absolutely rolls me until I could die is this women's board thing. They have a men's board that runs the thing and then a women's board that dabbles in this and that. I wouldn't serve on a women's board for anything. In some ways we're still living in a feudal society here. I don't know whether I've had any influence on changes in this area or not, but I kind of think maybe I have.

*You've done so much in your life that I suppose you can't help but reassess it. What do you see for the future and what, if any, are your plans for retirement?*

I have had a passion for leaving the world a better place than when I found it. This has been a driving force all of my life. Historically, in management, I feel the thing that my husband and I did was to stress that human relations are always as important as organization and management. As to retirement, I do draw retirement pay from the federal government. But I guess I'm one of those horses who will drop in their tracks, and it looks as though my husband will be too. I imagine that we'll always find a thing or two to do.

---

## WHY BEEF?

### HON. JOHN M. ZWACH

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. ZWACH. Mr. Speaker, for the past 6 months or so, there seems to have been quite a concerted campaign aimed at making the American housewife believe that the price of beef had been increased unfairly and very appreciably and that beef producers were reaping a harvest at the expense of the housewife's budget.

Some restaurants, as I recounted last week, even went so far as to raise the prices of their meals substantially and then note on the menu that the increase was caused by the increased cost of beef.

Mr. Speaker, I am a beef producer myself. I can tell you the producers are not sharing in this bonanza. In fact, I doubt if any bonanza exists.

It appears as though this campaign against the high cost of American beef was originated abroad and is aimed at securing a relaxation of American beef import regulations.

I am not the only one who has these thoughts. They were also expressed by Bill House, president of the American National Cattlemen's Association in an editorial in the American Beef Producer.

Mr. Speaker, with your leave, I would like to insert the editorial by Mr. House in the CONGRESSIONAL RECORD. I highly recommend its reading to all of my colleagues who have read about and are concerned about our beef prices.

The editorial follows:

WHY BEEF?

In a nation that in this year is spending $83 billion for leisure, a sum that is rapidly approaching the total food bill of the entire population, why should our industry be faced with sporadic outbreaks of boycotts zeroing in on the price of beef, and beef alone? These movements are led by women whose husbands are earning far more than the average farmer or rancher can possibly realize by feeding or raising cattle.

With interest rates up 30 percent in the last 12 months; with the biggest price rise in years posted for '70 model automobiles and trucks; with coffee up 4c a pound and restaurant managers predicting a 5c rise in the price of a cup; with 1970-model appliances being marked up 3 percent to 4 percent officially; with construction workers being awarded wage increases of 10 percent to 30 percent—why aren't the boycotters lining up in front of the banks, automobile

agencies, restaurants, appliance dealers, and union headquarters?

Did it all begin with a combined Australia-New Zealand campaign against meat import restrictions planned by Trade Minister McEwen of Australia? The sequence of events in the United States leading up to our present problem with consumers certainly points in this direction.

In the January 23 issue of the "Queensland Country Life," which announced the proposed McEwen campaign it is reported, "There is a long-term prospect of organizing American consumer opinion against restrictions." In March, officials of ANCA became aware of a drive by the Importers' Council to enlist the members of the National Restaurant Assn. in a campaign to lift import restrictions on beef. Interviews with NRA's lobbyist in Washington convinced us that there was a coalition already formed between the two groups and that they planned to attack the price of beef and enlist consumer assistance in driving it down.

This summer the formalized clip-on notices began to appear on the menus in restaurants across the nation calling attention to the price of beef and announcing increases of 50c to 75c for steaks, chops, and roasts, and promising to reduce the charge when beef decreased in price. Then came the "house-wife" boycotts, amply covered by newspapers and television, stirring trouble for the industry primarily along both coasts where the importer's representatives are most active.

The latest development goes back to Australia, their meat board and producer's organizations. Recognizing that 80 percent of their voluntary quota had been shipped already this year (trade papers say 90 percent) the Australian Meat Board as of August 11, ordered shipments to the United States curtailed. ANCA has just received a letter written September 1 by the Australian Beef Producers' Assn enclosing their request to Trade Minister McEwen to propose to President Nixon that the import quotas be raised or suspended entirely. They further are seeking the consent of ANCA officials for such a removal of the beef quotas so that shipments can continue in greater volume through November 15. In the letter to McEwen they are suggesting that we are short of beef in the United States, that our prices are too high, that we are alienating the consumers here and giving the importers reason to ask for a lifting of the barrier. Full Circle?

## USE OF WORDS "POSTAL PATRON" BY EXECUTIVE AGENCIES

### HON. CHARLES E. WIGGINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. WIGGINS. Mr. Speaker, yesterday I introduced a bill which would authorize the transmission of mail by executive departments and agencies of the Federal Government under a simplified form of address in emergency situations.

This bill, if enacted into law, would allow agencies to use only the words "postal patron" and the name of the city, rather than the now mandatory street number and city. This authority, to be used only in emergency situations, is similar to the privilege extended to Members of the House of Representatives.

The need for this type of legislation came to my attention during the recent effort to eradicate the destructive oriental fruit fly which had been discovered in several gardens in the El Monte, Calif. area. The U.S. Department of Agriculture, in cooperation with the county and State governments, wanted to send an important warning mailer to all El Monte residents. In order to do this they had to obtain mailing labels containing the names and addresses of all El Monte residents.

USDA went to the county registrar of voters and used their list. Unfortunately, the mailer went only to those households where there was a registered voter. Another problem encountered in the USDA mailing was that many people no longer lived at the address shown on the envelope, so the mail was forwarded. This meant that the new residents at the address did not have the benefit of a warning notice.

Another course open to the agency would have been to purchase a mailing list from a private supplier. This, of course, is expensive, and private lists for entire areas are not always available.

To assist agencies in these emergency situations, I believe it is important that we give executive departments the "postal patron" mailing privilege. It is true that the situations are few and far between when this type of mailing is needed; however, when the need does arise, it is important that our agencies be able to act quickly, accurately, and inexpensively.

## BIG TRUCK BILL

### HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. SCHWENGEL. Mr. Speaker, my editorials for today are from the El Paso Herald-Post, the Fort Worth Press, the Houston Chronicle, and the Big Spring Herald, in the State of Texas. The editorials follow:

[From the El Paso Herald-Post, July 18, 1969]

THE TRUCK BILL AGAIN

Congress, which last year shelved a bill to permit longer, wider and heavier trucks on the interstate highway system, is engaged now in studying a somewhat modified version.

The new bill would lift the present 73,280-pound weight limit, extend the width limit from eight to eight-and-a-half feet and impose a length limit of 70 feet. This last provision was absent from last year's bill.

The trucking industry argues an axle-spacing formula set out in the new bill would permit more even weight distribution, thus easing the strain on bridges and highways despite heavier loads and greater length.

These factors, the truckers contend, also would promote safety by permitting improved braking ability for big rigs and better road visibility for their drivers.

The industry's primary interest in the bill, of course, is the greater "economic return" larger vehicles would provide for truckers and lower per unit hauling costs for customers—a legitimate interest, certainly.

But that interest must be weighted against the public's interest in the use of the interstate system—a $60 billion taxpayer-financed project—and the other highway arteries onto which it empties.

Executive vice president George Kachlein of the American Automobile Ass'n, which opposes the bill, charges the extra truck weights permitted (up to 108,500 pounds for a nine-axle truck would cost $1.8 billion for road repairs in 10 years.

And even if the bigger rigs could operate safely on the interstate, millions of miles of feeder roads on which some of them would have to travel are far below the interstate's design and safety standards, Congress has been warned by the National Ass'n of County Engineers, the National Ass'n of Counties and other opponents.

Further, the improved safety factors of the bigger rigs are projected rather than proved. And the sight of a passing truck 15 feet longer and tens of thousands of pounds heavier than the 55-foot vehicles now permitted throughout most of the East seems unlikely to steady the nerves of the average motorist.

On balance, the truckers' interests are outweighed by the public interest in safe and economic use of the highways. The new bill should join the old one on the congressional shelf.

[From the Fort Worth Press, July 20, 1969]

THE TRUCK BILL AGAIN

Congress, which last year shelved a bill to permit longer, wider and heavier trucks on the interstate highway system, is engaged now in studying a somewhat modified version.

The new bill would lift the present 73,280-pound weight limit, extend the width limit from eight to eight-and-a-half feet and impose a length limit of 70 feet. This last provision was absent from last year's bill.

The trucking industry argues an axle-spacing formula set out in the new bill would permit more even weight distribution, thus easing the strain on bridges and highways despite heavier loads and greater length.

These factors, the truckers contend, also would promote safety by permitting improved braking ability for big rigs and better road visibility for their drivers.

The industry's primary interest in the bill of course, is the greater "economic return" larger vehicles would provide for truckers and lower per unit hauling costs for customers—a legitimate interest, certainly.

But that interest must be weighed against the public's interest in the use of the interstate system—a $60 billion, taxpayer-financed project—and the other highway arteries onto which it empties.

Executive vice president George Kachlein of the American Automobile Assn., which opposes the bill, charges the extra truck weights permitted (up to 108,500 pounds for a nine-axle truck) would cost $1.8 billion for road repairs in 10 years.

And even if the bigger rigs could operate safely on the interstate, millions of miles of feeder roads on which some of them would have to travel are far below the interstate's design and safety standards, Congress has been warned by the National Assn. of County Engineers, the National Assn. of Counties and other opponents.

Further, the improved safety factors of the bigger rigs are projected rather than proved. And the sight of a passing truck 15 feet longer and tens of thousands of pounds heavier than the 55-foot vehicles now permitted throughout most of the East seems unlikely to steady the nerves of the average motorist.

On balance, the truckers' interests are outweighed by the public interest in safe and economic use of the highways. The new bill should join the old one on the congressional shelf.

[From the Houston Chronicle, July 25, 1969]

TRUCKS ARE BIG ENOUGH

If the bill permitting even bigger trucks on our nation's highways is passed by this Congress, the space for passenger cars and buses on our nation's highways eventually could be denied. There simply must be a limit to the sizes of the motor vehicles which traverse our roads. And while not trying to hamper the growth of this important indus-

try, it must be noted that a practical limit has been reached.

The bill has been denounced as an "anti-safety bill" by the American Automobile Assn., but safety, however important, is not the only factor to be considered. The extra damage some 300,000 trucks larger than those presently plying the highways would do is significant. It has been estimated that the trucks would add $1.8 billion in repair and construction costs to the interstate highway system during the first 10 years. Even if the truckers are willing to pay the taxes to defray these costs, the inconvenience of constant repair to highways would be intolerable to the average motorist.

The bill before the House Public Works subcommittee would allow an increase in maximum width by six inches and contains a formula which would increase the maximum loaded width to almost 110,000 pounds from the present 73,000. The bill, for the first time, contains a length limit—70 feet—but testimony indicates that a "grandfather clause" in the bill would make this limit meaningless.

A similar bill passed the subcommittee and almost made it through Congress last year. It was stopped only by a public outcry at the prospect of non-commercial motorists fighting for a spot on the road with these projected behemoths.

President Nixon, during last fall's campaign, reassuringly promised to "take a hard new look" at the trucking bill to "make certain the interest of the traveling public and the life of our highways are protected." But rather than leave advocacy up to the Nixon administration, better the "traveling public" once again raise its voice and make its feelings known.

---

[From the Big Spring (Tex.) Herald, Aug. 11, 1969]

WHAT OTHERS SAY

The trucking industry is back before Congress this year with a bill to permit the operation of heavier and bigger trucks on the nation's interstate highway system. Congress, as it did with a similar measure last year, should reject the proposed changes.

Foremost among the opponents of the legislation is the American Automobile Association, whose executives testified recently before the House Public Works Committee. The AAA's opposition is based on two points. The first is that bigger trucks will constitute a hazard on the highways because their bulk diminishes the visibility of the other drivers and their length makes passing more risky.

The second point the AAA stresses is that the increased weight of tractor-trailers and tractor-tow trailers will punish pavements and bridges and increase not only the costs of upkeep but also the construction of new roads built to withstand the heavier loads.

Highway costs warrant concern, but the argument Congress should find most persuasive is the likelihood of greater danger on the nation's already unsafe roads. A 70-foot truck, more than eight feet wide and weighing as much as 15 tons, is an intimidating object. To allow such snorting behemoths on the public roads is not in the public interest.—Boston Herald Traveler.

## CHANUKAH

### HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. MINISH. Mr. Speaker, tonight, members of the Jewish community everywhere will mark the start of Chanukah, which in Hebrew means "rededication." This holiday can be traced back 21 centuries, to the time the Syrian King Antiochus defiled the temple at Palestine by stripping it of every vestige of Judaism, enthroning a likeness of Zeus within it, and ordering pagan incantations spoken instead of the customary psalms. The outraged Jews declared war, and after 3 years of fierce fighting, the untrained and outnumbered legion of the Jews overcame the mighty Syrian Army.

The final victory over the Syrians occurred to the eve of the Jewish festival of light, a rite which had been customary during the season of the winter solstice when cold and darkness prevailed. The Judeans would then say in their prayers, "Let us have light," and would kindle tapers in the eight-branched menorah of the Temple.

The Jews decided to rededicate their temple to Jehovah at the same time they would normally celebrate their feast of light. They had but one problem. The supply of oil needed to keep the lamps lit was insufficient to last the day, yet the lamps did not flicker or go out but lasted and blazed for 8 days. To the Jews, this was an impressive sign of God's concern for them.

Chanukah has meaning to all God's children that light, faith, and freedom must always be preserved and appreciated. The candles which will be lit tonight and for 7 days thereafter to mark Chanukah are an impressive symbol to the world that the light must be kept aglow to prevent darkness from prevailing. To which I say: "Amen."

---

## THE OCCUPATIONAL SAFETY AND HEALTH ACT OF 1969

### HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. PATTEN. Mr. Speaker, although it sounds almost impossible to believe, more than 14,000 American workers are killed every year in occupational accidents. Over 2 million other workers are injured and the annual economic loss is also staggering. Workmen's compensation payments alone amount to $2 billion a year and billions more are lost in earnings, medical expenses, production, and time that can never be regained.

I am convinced that if legislation is enacted that would create Federal safety and health standards, many of these shocking and appalling injuries, deaths, and occupational diseases, would be prevented.

A bill that would establish such urgently needed standards was introduced by that able and courageous fighter for progress, the gentleman from Michigan (Mr. O'HARA), and is being cosponsored by many other Members, including myself. Hearings have been held and the measure is now being considerd by the Select Subcommittee on Labor headed by another brave champion of advance, the gentleman from New Jersey (Mr. DANIELS).

The goal of the bill is a challenging, but just one: To assure, as far as possible every working man and woman in the Nation safe and healthful working conditions.

Besides establishing mandatory occupational safety and health standards, the proposal would provide:

Effective enforcement of the standards.

Research relating to occupational safety and health.

Training programs to increase and improve personnel engaged in occupational safety and health areas.

Federal grants to States to help identify their needs and responsibilities in these fields, to develop plans, and to conduct experimental and demonstration projects.

Mr. Speaker, I hope a strong and effective bill will be passed this year that will finally give the workers of America the safety and health protection they deserve. This is a right every worker should have.

---

## TAXPAYERS WILL LOSE BY WILLOW GROVE MOVE

### HON. R. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. COUGHLIN. Mr. Speaker, all of us concerned with effecting economy in Government recognize that our military expenditures must be trimmed if we are to meet our many other commitments. I think we all realize that we must also maintain a strong defense posture.

I am disturbed that some of the proposed economies bear no apparent relationship to the overall economic picture and do not effectively protect previous commitments to military establishments and personnel. I point specifically to the Air Force's proposed inactivation of the 913th Tactical Airlift Group at the Willow Grove Naval Air Station in Pennsylvania.

Pennsylvania, a major urban State, again finds itself tagged for "economy" measures. Whether it is the naval base and shipyard, Frankford Arsenal or Willow Grove, Pa., gets hit while other States with manpower and housing shortages, and already having huge concentrations of military installations and personnel, remain unscathed.

I am vitally concerned with the need for economy in Government.

I am equally vitally concerned that a coordinated, overall national program must not and should not diminish facilities and training in our populous and problem areas and transfer an overload to our "fat-cat" areas.

After a thorough study, I have concluded not only that the reserve training at an existing facility in Willow Grove is in the interest of economy in Government, but also that the proposed transfer and deactivation only compounds other national problems.

I wrote to the Secretary of the Air Force with my concerns. I today received a reply from an Air Force colonel which I find inadequate, perfunctory, and unsatisfactory.

Therefore, I submit for the CONGRESSIONAL RECORD my letter to the Secretary

of the Air Force which states the case against the proposed Willow Grove move which, thus far, has not been answered to any reasonable degree of satisfaction:

NOVEMBER 25, 1969.

Dr. ROBERT C. SEAMANS, Jr.,
*Secretary of the Air Force, Department of Defense Building, The Pentagon, Washington, D.C.*

DEAR SECRETARY SEAMANS: After carefully studying the Air Force's recent economy decisions, I am convinced that it is a mistake to relocate the 327th Tactical Airlift Squadron from Willow Grove and to inactivate the 913th Tactical Airlift Group and remaining Air Reserve units at Willow Grove.

My concern is that such action would be a false approach to the cause of economy and, in actuality, would be a shameful waste of taxpayers' money already expended by giving up dual-usage facilities that house a top-flight combat-ready unit.

Before analyzing the disadvantages or merits of the Air Force proposals, I acknowledge the need for economy—consistent with national defense—throughout the military and in all parts of government. I object, however, to "manufactured economy" which is practiced at the expense of certain areas of the Nation while other sections luxuriate in a proliferation of military installations, bases and expanded programs.

Let me be specific about my reasons for objecting to the proposal deactivation and transfer.

First, the 913th TAG at Willow Grove is "C–1" combat ready. I understand that this means the unit compares with regular military groups in combat ready status. Its capabilities have been cited many times over a period of years by both the regular Air Force and the Air Force Reserves. This kind of reserve units is providing national defense and defense training capability at the lowest possible cost.

Second, the deactivation coupled with other parts of the Air Force proposal means that Air Reserve training will be literally unavailable to men in the most populous part of our whole Nation. Reserves are an economical way of providing defense capability, and the deactivation and transfer represent neither economy nor good sense.

Third, the Willow Grove facility itself is used by both Navy and Air Force units at considerable cost saving to the Government. The Air Force facilities were built at the base at a cost of some $9 million. The transfer and deactivation will mean both abandonment of this investment which is suitable for C–130 use and under-utilization of the base itself which would still be maintained at taxpayers' expense. Transfer to the Air Guard is less than a meaningful justification.

Finally, it always appears that Pennsylvania, a state which needs payrolls and jobs, is one of the first hit by such reductions while other states with actual manpower shortages, Texas and California to name two, wallow in numerous reserve units.

I review for your consideration what has transpired in Pennsylvania over the past several years in eliminating Air Force Reserve units:

The Middletown Air Material Depot was closed and transferred to the western United States with millions of dollars in expenditures to house the facility at its new quarters.

The 912th Tactical Airlift Group at Willow Grove was transferred, reorganized and converted to another program in 1968.

The 512th Troop Carrier Wing headquarters in 1964 was transferred from Willow Grove to Texas, a state which, I respectfully submit, luxuriates in a profusion of military facilities.

The Air Reserve Sectors and Air Reserve Recovery Groups and Squadrons were deactivated and discontinued in 1965 with replacement programs.

Construction of facilities for the 911th Military Airlift Group at Pittsburgh is reportedly delayed and, should this unit be phased out, there would be not one Category "A" Air Reserve unit and facility remaining in Pennsylvania.

I hope you will consider carefully all the evidence available and reverse the decisions relating to the Willow Group units and facilities.

I would appreciate your response when you have studied my request. It is of vital importance to Pennsylvania generally and the Willow Grove area in particular.

With all best wishes.

Cordially,

LAWRENCE COUGHLIN.

## LEGISLATION TO SET UP A NATIONAL DRUG TESTING AND EVALUATION CENTER

### HON. DAVID R. OBEY

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. OBEY. Mr. Speaker, I should like to reintroduce—with 12 additional sponsors—a bill to set up a National Drug Testing and Evaluation Center to scrutinize new drugs submitted for premarketing approval.

I first introduced this bill on November 6 with 18 cosponsors, but I am reintroducing it today with the additional 12 cosponsors because of the considerable interest generated by introduction of the first bill.

This bill, identical to one introduced in the Senate by Senator GAYLORD NELSON of Wisconsin, would make the Secretary of Health, Education, and Welfare responsible for conducting all tests to determine whether these new drugs should be approved for commercial distribution.

At present, the Food and Drug Administration must attest to the safety and efficacy of a drug before allowing it to be marketed, but does this solely by evaluating information supplied by the company seeking to market the drug.

The proposed center within FDA could do some testing itself or contract out such studies to qualified individuals, organizations, or institutions. The sponsor of any drug submitted for testing or investigation would be liable for the expenses incurred, including a proportionate share of the cost of maintaining the center.

The sponsors of the bill are, in addition to myself, Messrs. BROWN of California, BURTON of California, MINISH, MOSS, HECHLER of West Virginia, DENT, HARRINGTON, Mrs. MINK, Messrs. FULTON of Pennsylvania, EDWARDS of California, FRASER, and CONYERS.

Previous sponsors of the bill, H.R. 14716, are Messrs. KLUCZYNSKI, BUTTON, PODELL, GIAIMO, BINGHAM, KOCH, ROONEY of Pennsylvania, TUNNEY, DINGELL, REES, SCHEUER, Mrs. CHISHOLM, Messrs. HELSTOSKI, ANDERSON of California, CORMAN, MATSUNAGA, FRIEDEL, and DANIELS of New Jersey.

## THE PLASTIC JUNGLE

### HON. ARNOLD OLSEN

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. OLSEN. Mr. Speaker, I have today introduced a bill which will require that credit cards be sent by registered mail.

Tony Benitez, of Tampa, Fla., was never able to use either of his unsolicited mailed credit cards. Tony cannot sign his own name. He is 5 years of age. If he had learned to sign his name, his cards could have been used to finance a trip to Europe or buy a new wardrobe. When his mother contacted the bank that sent him his credit cards, they told her that Tony had an excellent credit rating.

Roger Gelpey, of Marblehead, Mass., was able to use his unsolicited credit card, even though the bank turned him down when he and his father asked for a $300 loan. Roger went next door and bought a tie. He is 9 years old.

A Lima, N.Y., widow did not buy anything with her unsolicited credit card. She never received it. But she was billed for $1,661. Someone else had used her card. She is 96 years old and lives on a monthly pension of $114. She leaves her home once a month to cash her $114 monthly social security check.

The theft of unsolicited credit cards by organized crime has resulted in billings as high as $175,000 through the use of only 20 credit cards. Two brothers in Chicago were able to accumulate a profit of $500,000 with stolen airline credit cards.

Unsolicited credit card mailings which run into the millions have become a serious financial threat to thousands of homes. The unsolicited credit cards have fallen into the hands of alcoholics and adolescents, thieves and racketeers. When shocked homemakers receive bills and collection letters from credit card issuers, they often pay the bills to save their credit ratings and prevent garnishment proceedings. There have been estimates that 30 percent of such billings are paid.

Credit card issuers who indulge in this cheap huckstering defend the practice on the basis that this is the only way that they can get people to use their credit cards. Mailed requests for credit card applications have resulted in 1 percent favorable answers, while the mailing of unsolicited and unwanted credit cards has led to 19 percent use within a few months.

Money and credit cards do burn a hole in the pockets of consumers in an inflationary spiral when wages are demeaned by the high cost of living. Obviously the credit card companies could not care less what the results of their funny money financing does to the family budget. It is good business for them. They charge the storekeeper up to 7 percent for membership in their plans and at least an annual rate of 18 percent on the unpaid balance on bills run up on these credit cards. It is good business for them to involve families who can not afford credit

cards in credit card spending. People who can afford credit cards will not pay the 1½ percent monthly rate for an unpaid balance.

I think it is time to demand that credit card companies do their mailing of credit cards by registered mail in order to prevent theft in our larger cities from apartment house and other mail boxes. I think that it is time for the credit card companies to bear the cost of fraudulent use of credit cards from the time of loss until the time of notification of loss. After all, fraudulent checks are the responsibility of banks. The fraudulent use of the credit card is no different than the fraudulent use of the personal check by third parties. The bill I have introduced today will insure the safety of credit card mailings and save mail patrons from unsolicited, unwanted and unnecessary liability.

## TELL IT TO HANOI

### HON. GEORGE A. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. GOODLING. Mr. Speaker, those who condemn our involvement in the Vietnam war and cry out for an immediate disengagement from that conflict are the ones who are very much in the news today.

We must be careful, however, lest we close our ears to other voices that also are speaking out on this important and delicate subject, voices that bring a message different than that of those engaged in the moratorium.

One of the most prominent organizations speaking with such a voice is the Young Americans for Freedom, which is made up of young men and women on the campuses of universities throughout our Nation. This organization points out that a desire for peace is paramount in all American hearts but that the implementation of peace requires some cooperation from the other side. The Young Americans for Freedom extend their full-hearted support to President Nixon, endorsing withdrawal from Vietnam on honorable and practical grounds and urging Hanoi to get down to brass tacks if it really wants to bring this conflict to an end.

On December 12 and 13, the Young Americans for Freedom are going to express their views on campuses throughout America, sponsoring speakers who will comment on some of the vital aspects of the Vietnam conflict. At that time, the organization also will circulate on 400 major campuses several million copies of Tell it to Hanoi, a tabloid which explains the reasons for our involvement in Vietnam, the consequences of an immediate withdrawal, and the need for students and all Americans to unite behind President Nixon at this time.

Mr. Speaker, I heartily support the efforts of the Young Americans for Freedom. Here is another voice in the chorus of voices that fill the air today, a voice that rings out loud and clear, speaking with strength rather than uncertainty. I am certain it will be anxiously listened to by a vast multitude across this land.

## SHALL I OR SHAN'T I?—IS THIS TO BE THE LAW?

### HON. LOUIS C. WYMAN

OF NEW HAMPSHIRE

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. WYMAN. Mr. Speaker, profound problems of the most vital significance to the system of military command worldwide are involved in the suggestion that military subordinates should have the subjective right—and even obligation—to decide for themselves whether a particular military command is right or wrong. Should such a precept be recognized in law—or should civilian law seek to override military law and discipline to impose civilian penalties both civil and criminal for obeying a military command subsequently determined to be unlawful—the foundation of military control will have been destroyed, for no subordinate from the lowliest private will be able to avoid asking himself "should I or shouldn't I?" Obviously you cannot fight a war that way, whatever may be the deplorable horrors of Mylai and its prototypes in the historical past or tomorrow's wars.

In this connection columns by Frank Getlein and William Buckley, Jr., appearing in the Washington Star of December 3, are significant.

The columns referred to follow:

KILLING CIVILIANS A MILITARY "POLICY"

(By Frank Getlein)

They gained entrance to the city by deception, put it to the torch, killed everyone they could, took the women as slaves and became the sources of the first great body of epic and dramatic literature in the West.

That was the Greeks at Troy.

They captured the city after a sustained hate campaign, sacked it, murdered the inhabitants, left not a stone upon a stone and sowed the site with salt to prevent a rebirth.

That was the Romans at Carthage, after which they went on to become the enduring Western model of civic virtue and civic architecture, as the buildings and the rhetoric of this city attest to this day.

Do we really think ourselves the moral superiors of these distant and revered forebears of ours? And if so, on what grounds?

From the White House to the smallest village, Americans are now said to be shocked by the revelation of the massacre of Vietnamese civilians by American troops. The President has denounced the alleged atrocity. Even the Pentagon, after carefully not having heard of the event in its command for 18 months, has moved to severe action of retribution and punishment.

Why the shock and horror? Presumably because the alleged murderers performed their act of alleged murder without a statement of Pentagon policy behind them and they did it face to face on a ratio of one bullet, one death. They saw the people they were killing and this, more than anything else, is what horrifies us all.

And yet, for the last quarter century or more, since about 1943, it has been the military policy of this country to kill women and children, old men and babies. We have killed untold thousands in each category and no one has really raised a serious protest.

The slaughter of civilians as a matter of policy was reintroduced into Western warfare by the Germans in the Great War with Big Bertha against Paris and the Zeppelins against London. These primitive efforts were refined in World War II against London, Coventry and Rotterdam, to name just the outstanding examples.

As is usual in these matters, the Germans won even while they lost, because in beating them, the Allies, including and especially the United States, became German to a degree, killing civilians, as a matter of policy, in Berlin, Dresden and elsewhere in Germany and—with our customary drive to do everything a little bit better—in Hiroshima and Nagasaki.

We are officially and unofficially horrified because a lieutenant, a sergeant and a handful of private soldiers went into a village and allegedly shot down somewhere between 100 and 400 civilian inhabitants. Yet our highest generals, our Air Force's beardless colonels and, yes, our commanders-in-chief have been killing women and children, old men and babies by the thousand, from the air, for years, and no one said a word.

The thing about death by air is that it is abstract. It only becomes real when an abstract painter, Picasso, makes one early incident in the bloody history very real through distortion and symbolism. But even Picasso couldn't keep up with what has been happening since Guernica. What for the Catalan artist was the unspeakable end of the long history of man's inhumanity to man was, for the rest of us, only the beginning.

The point of abstraction, in war as in art, is to protect us from the grime and the blood of reality. If a landscape is really an arrangement of cylinders, cubes and cones, what does it matter if some of these geometrical figures are removed from the equation? Obviously, not at all.

The trouble with the infantry is that its members remain inseparably linked to reality. When they kill people, they kill people. The act is killing and the victims are people. No doubt about it. It is blood and brains on the ground, it is broken bones and broken lives, burned villages and burned babies.

With death by air, we don't even call it death. We call it a certain number of "sorties," that grand, faintly elegant word, redolent of chivalry and Henry V at Agincourt. We don't call it death, we call it "tonnage," as if it were pig-iron production. It's all abstract and insulated from life and death.

We shall hang or shoot the infantrymen for the unforgivable crime of reminding us of reality. We shall continue to promote the beardless colonels to beardless generals, the joint chiefs to superchiefs, for their mastery of abstraction and their discretion in allowing us not to know what they know.

"War is hell," said Sherman, in a one-liner suddenly much in vogue. "Hell," said Dante, who thought about it more than anyone since, "is not what happens to the bodies of those killed but to the souls of those who kill, and most particularly to the souls of those who kill and kill their sense of what they do."

SONG MY RAISES HARD MORAL ISSUES

(By William F. Buckley, Jr.)

The slaughter at Song My (My Lai 4) raises those mind-numbing moral questions which strike one with special force on the eve of a visit to Saigon. I go there, by the way, on official business for the United States Information Agency, but—I take the time to put it into the record—the statute is plain on the matter, the advisory commission of the USIA on which I serve was intended to work in behalf of U.S. information policy, as distinguished from working for the USIA, a distinction which even those senators who accept contributions from labor unions and

then find Judge Haynsworth unfit to sit on the Supreme Court will perhaps recognize.

What should one especially look for in Vietnam? The question plagues the individual who has no pretensions to sophistication in military matters, and who resents efforts by others to reveal what are the roots of public sentiment in a complicated situation, after a short, or even a protracted, visit to a foreign country.

What, for instance, can be said at this point concerning the appalling situation at Song My? What are the principal questions that ought to be asked? James Reston suggests the difficulty of the problem by asking what is the moral logic of a situation that calls for giving medals to pilots who bomb civilians, and court-martialing infantrymen who kill the same civilians with rifles?

A few preliminary observations:

1. What makes a killing especially abominable is the question of the necessity for it. A pilot 30,000 feet high who is ordered to lambaste a city, village, or hamlet because it is a center of enemy activity and not otherwise neutralizable, proceeds with few moral scruples. In any event, those who ponder the deed, worry not about the soul of the pilot who drops the bombs, but about the soul of the general who told him to do so.

In Song My, it was different. There, or so the story goes, individual American soldiers squeezed triggers of rifles aimed at individual civilians who could not realistically be held to be a part of the enemy's war machine. For instance children. Under the circumstances, if we are still inclined to the presumption of innocence, we examine other possibilities.

2. Could it have been panic? What is it that causes panic? It is a commonplace that soldiers who are being shot at, who do not know whether they will live to see another day, who are tired and calloused and excitable, do things which their consciences would not justify when in cool working order. Is there palpable, in the anxiety to denounce the soldiers who took part in the massacre at Song My, that old anxiety to discredit the Vietnam war by any means?

The facts may, and yet may not answer convincingly that question. Thus far it looks like simple barbarism, like bloodlust sadism. The trouble with that explanation is that it does not easily reconcile with what we know about typical Americans.

Were these atypical Americans? Were they the kind of Americans who, if they had not found themselves in Vietnam with Vietnamese to fire at, might have found themselves in Chicago or New York or Los Angeles aiming their guns at bank tellers or enemies of the local syndicate?

3, and most important. Are we perhaps, in our common rage against these soldiers, engaged, however subtly, in a circle-squaring expedition? The same week that President Nixon expressed himself as quite properly horrified at what happened at Song My, he officially proscribed the use of biological weapons by the United States even in retaliation against their use by an enemy.

It seemed so simple, so wise, so humane, that few observers paused to wonder why, if it was so simple, so wise, so humane, it hadn't been done before? By, say, President Johnson? Well, not Johnson, because we all were taught that Johnson wanted to napalm little children. Well, John Kennedy? Why didn't he come to the same conclusion? Or, before that, Eisenhower the Good?

We are, it seems to one observer, engaged, somehow, in trying to make war tolerable—which it isn't, for reasons ontological. It does not follow that war equals the massacre of civilians. But it may follow that war makes inevitable the incidence of Song My—and Hiroshima, and Dresden. The prosecution of the guilty will, then, tell us a lot about them, and not a little about us; and about those who dream of wars fought from the turret of the good ship Lollipop.

## NIXON—FIRST YEAR

## HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. FINDLEY. Mr. Speaker, in all of the concern voiced during the past few weeks over allegedly inaccurate and misleading news reporting, many have lost sight of the truly outstanding job of reporting which has become a tradition among the vast majority of the press. If a few abuse their public trust, most members of the press accept that trust and are in turn justly relied upon by their readers.

Mr. Ray McHugh, the chief of the Washington bureau of Copley News Service, has just completed an analysis of the Nixon administration's first year in office. It is not a misleading, one-sided listing of the accomplishments of the first 100 days or the first 12 months. Nor is it a tirade against the absence of instant solutions to problems which have been years, decades, and even longer in the making. Rather, Mr. McHugh recounts the careful preparations which the President has made during his first year in office to launch a concerted and sustained attack upon the major social, political, and international ills of this decade and the next. Only time will tell whether these plans will yield the fruits of success; whether the innovative ideas of the Nixon administration are indeed the long awaited solutions to many of our problems.

What definitely has been accomplished by President Nixon is that most Americans have become convinced that a serious effort is being made. As Mr. McHugh concluded:

The problems remain unsolved, but they don't seem quite so frightening. Perhaps that was the President's biggest contribution to the country in 1969.

Mr. McHugh's article follows:

NIXON—FIRST YEAR

(By Ray McHugh)

WASHINGTON.—How does one grade the first year of a president?

Is he judged on his legislative record? His appointment? His international negotiations?

Or is he judged on less tangible things—the mood of a people, their response to his policies, their reaction to subtle changes in direction that are more sensed than seen?

Predictably, Richard M. Nixon's first year in the White House has been a time of preparation, rather than final accomplishment.

He has spoken to men on the moon, but he has only begun the painstaking process of communicating with the men in the Kremlin.

He has begun the withdrawal of troops from Vietnam, but not even he can forecast when the last American GI will say goodbye to Saigon.

He has trimmed a whopping $5 billion from the budget, including $3 billion from military outlays, but he has only kept pace with already enacted increases in welfare, social security, federal pay scales, interest payments on the national debt, etc.

He has supported the most sweeping tax reform program in 35 years and preached the evils of inflation, he has forced the bureau of the budget and the departments and agencies of government to face up to an aggressive belt-tightening program, but as 1969 fades away, the cost of living continues upward.

He has made a dramatic move to equalize the draft by resorting to a modified lottery system that will center on 19-year-olds, but even he admits it is only the first step in what must be a sweeping reform of selective service.

He has launched the controversial safeguard anti-ballistic missile system and he has opened preliminary strategic arms limitation talks with Moscow, but the course of both remains in question.

He has traveled around the world. His visit to Western Europe last February breathed new life into a faltering North Atlantic Treaty Organization. His visit to Asian capitals reinforced American interests in the Far East. His stop at Bucharest, Romania, was a dramatic gesture to the captive peoples of Eastern Europe and a bold test of the spirit of independence afoot in some satellite nations.

But these also were first steps on what must be long highways.

In Asia, Europe and Latin America, the president has placed a new emphasis on self-reliance. He has preached partnership and an accompanying lessening of the American presence, that while well-intentioned has sometimes been so massive that it has proved stifling in various parts of the world.

How well friends and allies adjust to this new American policy remains to be seen. It has been easy for many to complain about their dependence on the United States and to criticize Washington policies. It will be less easy for many to face the responsibilities Mr. Nixon is encouraging.

The President's first year in office could be compared to the opening chapters in a book. He has laid the plot and identified the characters, but it is too early to judge their course or fate.

These winter months mark the end of the Nixon beginning and the beginning of the true measure of his presidency.

It is significant that they coincide with a massive confrontation of public views on the Vietnam war. The "moratorium" strategy has been carefully devised to present the President with a continuing series of monthly, escalating crises.

"Quit Vietnam" is the slogan of the protestors, but tangled with the war issue are such continuing topics of civil rights, east-west politics, the revolt of the "new left," student activism, suspected subversive influences, the future role of the federal government in social and urban development.

Mr. Nixon has placed his hopes squarely on what he calls the "great silent majority." He, too, identifies his slogan with Vietnam, but its political scope is much broader.

The Democratic National Committee, urged along by Chairman Sen. Fred Harris of Oklahoma, has moved during the year to an ever closer association with anti-war elements and protestors. Some political observers see the movement as an attempt by Mr. Nixon's opponents to forge a liberal-urban-Negro-campus coalition that would dominate not only the Democratic Party, but would ultimately dictate the choice of a presidential candidate in 1972.

To counter this movement, the President during his first year in office has sought to broaden his own base of support in the moderate center and among conservatives.

The year's only statewide elections in New Jersey and Virginia indicated he is succeeding, both states elected Republican governors, ending long traditions of democrat rule. Mr. Nixon campaigned personally in both states, deliberately making his prestige a factor.

The GOP success, however, was tempered by the net loss of two congressional seats in special elections during the year.

The President is expected to intensify his

political efforts in 1970 in a bid to strengthen Republican ranks in both the house and the senate.

The deliberate, sometimes reluctant, fashion with which the Democrat-dominated house and senate has handled administration bills this year could trigger a 1970 campaign reminiscent of President Harry Truman's 1948 attacks on a "do-nothing" congress.

With the exception of the nomination of Judge Clement Haynsworth for the Supreme Court, Mr. Nixon has avoided most domestic-oriented political turbulence. His White House team put together an impressive performance in the Senate ABM battle. Starting with only 23 declared supporters, it won a hairbreadth 51–49 victory in the face of one of the best-organized, best-financed public relations efforts Washington has seen.

The President's attempt to win more time for hard-pressed southern school districts staring at the reality of desegregation was cut short abruptly by a Supreme Court order for "immediate" action, but the Nixon effort was not lost on concerned southerners.

There has been no noticeable improvement in the President's relations with the Negro community, but neither has there been a worsening. The country was spared a widespread recurrence of racial violence in 1969 and Negro citizens appeared willing to give Nixon programs time to assert themselves.

The President himself acknowledged in a news conference that he had little Negro support at the polls in 1968. He added, however, that he would not make extravagant promises to minority groups, but that he would demonstrate his concern with actions. These will be judged when proposed broad housing, medical, educational and job training programs take shape.

There is a temptation to grade Mr. Nixon's first year in the White House against the background of angry thousands parading on Washington's streets. Certainly his "silent majority" has mustered no counter spectacular of such proportions.

But that is the nature of most Americans. Street politics don't appeal to kind of people who would vote for a Richard Nixon.

His critics will label 1969 as a year of indecision or inaction or even indifference. But to those who support him, the first Nixon year has probably brought a measure of relief. Government is a less overwhelming force in the lives of most citizens. The White House is still a focal point of attention, but there seems to be less urgency, less tension than was associated with the days of Lyndon B. Johnson.

The problems remain unsolved, but they don't seem quite so frightening.

Perhaps that was the President's biggest contribution to the country in 1969.

## POLICE PROTECTION

### HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. BROYHILL of Virginia. Mr. Speaker, under consent to extend my remarks, I would like to call to the attention of my colleagues, a copy of a letter addressed to the Honorable Gilbert Hahn, Chairman of the City Council of the District of Columbia, which is quite similar to many I have received in which citizens and businessmen in the District of Columbia have expressed their concern and fear. In order to protect the signer of this letter from reprisals, I have had his name deleted prior to insertion into the RECORD but you can rest assured he speaks the sentiment of thousands of others. When will our political leaders wake up and acknowledge what is going on and respond effectively?

The letter follows:

Hon. GILBERT HAHN,
*Chairman, City Council,*
*District Building,*
*Washington, D.C.*

DEAR MR. HAHN: I heard you quoted this morning on WTOP Radio as awarding an accolade to Mayor Washington et al., for their wonderful handling of the crowd that was here for Mobilization.

Frankly, I am getting tired of hearing this. From where I sit, I don't think the police did very much except to direct traffic. During the daylight hours the marshals brought here by the various groups did do a good job in controlling their people, but when dusk fell and the Militants got busy, where were the police?

If there were police in the neighborhood, and there should have been, they must have known that window smashing and looting went on in the vicinity of 14th and F Streets (Beckers, Bond's and Garfinckel's). They must, also, have known that other windows were being smashed. One large window was smashed in our National Press Building Office branch opposite the Willard Hotel, and four large plate glass windows were broken on the south side of K Street in our branch at K Street, N.W. These were only isolated instances; most other downtown financial institutions sustained damage (American Savings and Loan, American Security, Home Federal Savings, Riggs, Union Trust and others). I may have missed it in the papers, but I haven't read where one single person was arrested for this marauding. If any were arrested, what penalties were meted out? This information would be interesting.

All of this talk about how well the police handled the situation leaves me cold. What are we supposed to do on December 13? The only conclusion I can draw is that the city government tied the hands of the police.

Very truly yours,

———, ———,
*Chairman & President.*

## DECEMBER 7, 1969—28TH ANNIVERSARY OF JAPANESE ATTACK ON PEARL HARBOR

### HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. GAYDOS. Mr. Speaker, I am sure every Member of the House is aware of the significance of this coming Sunday. It is the 28th anniversary of another Sunday, another December 7, in 1941. It is a date many Americans are not likely to forget.

I am certain they recall, as I do, the shock and horror that swept the Nation when word was received Japan bombed Pearl Harbor, killing thousands of American military and civilian personnel and destroying much of the naval fleet based there. Nor are we apt to forget that solemn moment when President Franklin Delano Roosevelt, in his "Day of Infamy" address, announced the Nation had gone to war. "Remember Pearl Harbor" became the rallying cry for all Americans, joined in a common cause.

Four years later the war ended. The ambitious dreams of Japanese warlords for a military empire in the South Pacific were shattered. America was victorious but it mourned the hundreds of thousands of men who died fighting for their country and for freedom. I found strength, however, in the hope their deaths brought to the world what World War I failed to bring—a lasting peace. Unfortunately, today that hope is stained with the blood of Americans killed or wounded during the undeclared wars of Korea and Vietnam.

December 7 is not an official holiday. Perhaps it should be. But it is a day when Americans, regardless of age, should pause for a moment in memory of what happened on that date 28 years ago. Honor should be paid to the men and women who died at Pearl Harbor and to those who survived the events of the fateful day.

One who survived is David P. Bedell of Irwin, Pa., the president of the Keystone Chapter of Pearl Harbor Survivers Inc. He has called upon the public to recognize December 7, and "Pearl Harbor Day," and asks citizens to display the American flag as a gesture that they do remember December 7, 1941, and those who died first in the defense of America.

In a recent letter to the public, Mr. Bedell wrote:

From those of us who did survive will come a proud kind of feeling and deep appreciation to you who have been so kind. We will remember all of you if you should pause to remember just a few of them.

Mr. Speaker, that is little enough to ask of a grateful nation. I join Mr. Bedell in his appeal and take this opportunity to extend his invitation to Members of the House.

## JUDGE CLEMENT F. HAYNSWORTH, JR.

### HON. WM. JENNINGS BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. DORN. Mr. Speaker, I was thrilled a moment ago with news from the White House that Judge Haynsworth would continue to serve on the U.S. Circuit Court of Appeals. We need Judge Haynsworth with his courage, experience, integrity, and ability.

Those of us who have long admired Judge Haynsworth were never more proud of him than when he displayed such a good sportsmanship and humility when he issued the following statement which appeared in the Greenville, S.C., News, immediately following the vote in the other body:

STATEMENT OF JUDGE HAYNSWORTH

The ordeal of the last two months is ended. The resolution is an unhappy one for me, but, for our country's sake, I hope the debate will prove to have been a cleansing agent which will smooth the way for the President's next and later nominees.

Under the Constitution, the Senate has a duty, as well as a right, and responsibility to exercise the power of consent to execute appointments. In a republic such as ours, this is a wise, and essential check upon Executive power. There is no choice but to accept its judgment, and I hope that my friends and supporters will recognize that the greatness of the Senate as an institution is not diminished by individual disagreement with it.

It was a great honor to have been nominated by President Nixon to a position as an associate justice of the Supreme Court. It is

the greater because the nomination was the result of an appraisal of my performance as a judge in the federal court of appeals. The honor, of course, is tarnished by the Senate's action, but I have a deep sense of gratitude for the staunch and steadfast support of the President, of many Senators, and of a host of friends and others who have worked on my behalf and who have given me great comfort by messages of confidence and support.

I must now consider whether my usefulness has been so impaired that I should leave the Court of Appeals and return to private life. I do not think I should attempt to decide that question in the emotion of the moment. I will reach a conclusion as to my future course in approximately two weeks.

## A LETTER SECRETARY ROMNEY SHOULD READ

### HON. NEAL SMITH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Wednesday, December 3, 1969*

Mr. SMITH of Iowa. Mr. Speaker, as my colleagues know, one of the burdens of public office is reading and replying to mail. I suppose I receive 50 or 60 letters every day, and most of these are pretty routine. Some of them are requests for publications, short and often standardized letters on pending legislation or else correspondence from persons who have a problem with the Government.

Every now and then, however, a letter comes across my desk which is very exceptional. That was the case on October 31 when I received from Mr. Mel Boyd of Des Moines, Iowa, a copy of a letter he had written to the Secretary of Housing and Urban Development. Mr. Boyd, who is concerned about the Department's policy toward the neighborhood development program, summed up in three pages the feelings of many citizens who are working on the local level in an effort to solve the difficult and complex problems in our urban areas.

Mr. Boyd certainly did not write to Secretary Romney in a partisan spirit. In fact, at one point he said:

To assure you that I am not a "leftist," a "hippie," or in any sense a radical, let me tell you a little about myself. I am an elected member of the Des Moines Model City Citizens Board. I am white, 57 years old, and married. I own and operate a small business in the Model Neighborhood—have an income of under $10,000. I am a registered Republican; I voted for Mr. Goldwater in 1964 and Mr. Nixon in 1968.

Later on in his letter, Mr. Boyd said:

With government encouragement and help a nation-wide organization of Model City residents and officials was formed representing over 150 cities. You, sir, are familiar with this organization. I believe you have addressed it . . .

Mr. Romney, at government expense poor people—black and white—have attended meetings of this organization and seminars on housing and relocation and citizens participation. They have gone from shacks and flats and crowded tenements, to comfortable, plush hotel rooms. They have seen for themselves how another part of America lives. They will not forget it.

I thought Mr. Boyd's letter was a well reasoned and eloquent argument for acting now to solve our urban problems. It also came at a time when an increasing number of people believe there should be a greater use of rehabilitation instead of complete demolition in renewing blighted areas. I therefore wrote to Secretary Romney, pointing out that his Department had received Mr. Boyd's letter and that I thought the Secretary should take the time to read it personally. I also enclosed with Mr. Boyd's letter, as background for the Secretary, a copy of the newspaper articles which prompted Mr. Boyd's letter and a later story from the Des Moines Tribune regarding the Des Moines model cities program. The Tribune article, by Miss Julie Zelenka, included a paragraph reading:

And there remains a deep-seated suspicion that the whole thing is a glorious myth to pacify the under-privileged and that the "establishment" won't deliver the promised improvements—a suspicion that intensified when there were delays in federal money needed.

It was my hope that a personal reply from the Secretary would go a long way toward removing such suspicions. Unfortunately, Mr. Boyd's letter never reached Secretary Romney's desk and, on November 17, Mr. Boyd received a four-paragraph acknowledgment, which appears to be nothing more than a form letter.

I want to make clear that I do not blame Mr. Romney for failing to personally reply. I am sure a huge amount of mail arrives addressed to him personally, and, of course, it would be utterly impossible for the Secretary to read and reply to each and every letter. Apparently Mr. Boyd's letter was simply given routine treatment by third- or fourth-level officials in the Department.

I still feel that Secretary Romney should have the opportunity to read Mr. Boyd's letter and think others may be interested. For that reason, I am placing it in the CONGRESSIONAL RECORD.

Mr. Boyd's letter, together with the other correspondence involved, and the newspaper articles mentioned in my letter to Secretary Romney, follow:

OCTOBER 27, 1969.

HON. GEORGE W. ROMNEY,
*Secretary of Housing and Urban Development, Washington, D.C.*

DEAR SIR: Although I had been hearing rumors that the Neighborhood Development Programs were to be scrapped or severely restricted, I refused to believe them until I read what seems to be unquestionable verification in a news item in the Des Moines Register of October 7th. If this report is accurate, I am certain it will prove to be a mistaken and regrettable decision, Mr. Secretary. I want to tell you, briefly, why it is a mistake and just how regrettable it might be.

To assure you that I am not a "leftist", a "hippie", or in any sense a radical, let me tell you a little about myself. I am an elected member of the Des Moines Model City Citizens Board. I am white, 57 years old, and married. I own and operate a small business in the Model Neighborhood—have an income of under $10,000. I am a registered Republican; I voted for Mr. Goldwater in 1964 and Mr. Nixon in 1968.

Mr. Romney, we have been working on our Model City Plan for almost two years. Last Friday, October 17th, we finally received the welcome news that our Model City supplemental grant of $2,065,000 had been approved. This was fine—as far as it went, but you had already cut the heart out of our plan with the announcement that NDP funding is to be discontinued or severely reduced. As you well know, it is NDP funding that makes relocation from unsatisfactory housing possible; it is NDP designation that makes Model Neighborhoods eligible for special FHA programs; it is NDP funding that makes possible the physical improvements which are so needed. The citizens of our area agree that decent housing is their greatest, most immediate need. Our area needs over 1,000 new homes. 1500 homes need extensive rehabilitation if they are to be made livable.

Mr. Secretary, for over a year—day after day, night after night, the residents of our neighborhood have put their needs into words, to furnish documentation to prove the words. Hour after hour we have discussed plans and programs to solve our problems. In the heart of each citizen—moving him to work—was always the hope, the expectation, that here, at last, was a program that would help him escape the neglect and deterioration—the plumbing that won't work—the drafty rooms—the high fuel bills—the rats—the callous slumlords. Representatives of HUD and FHA and financial institutions came to our meetings and told of all the wonderful programs which would help us as soon as we became funded—FHA 235, 236, 237, etc. etc. Oh, they certainly built our hopes high!

At the same time, Mr. Romney, employes of other governmental agencies, OEO and VISTA, were promoting dissatisfaction with the status quo—pointing out the unfairness of our economic system, training citizens in the technique of protest and organization, pointing out the value of demonstration.

With government encouragement and help a nation-wide organization of Model City residents and officials was formed representing over 150 cities. You, sir, are familiar with this organization. I believe you have addressed it. This serves as a line of communication for the people of the target areas across the country. The problems of Des Moines are no longer only our problems; the expectations of Flint are no longer only Flint's expectations. This line of communication can become a great force for good—or retribution (or irresponsible action of a variety of kinds).

Mr. Romney, at government expense poor people—black and white—have attended meetings of this organization and seminars on housing and relocation and citizens participation. They have gone from shacks and flats and crowded tenements, to comfortable, plush hotel rooms. They have seen for themselves how another part of America lives. They will not forget it.

Now, after they have been subjected to these forces for such a long time, news from Washington comes like a killing frost to spoil all the hopes and dreams and aspirations of the people. Mr. Romney, this cannot be!

I don't know whom you have been listening to, but I think there are some voices you haven't heard. I think you should put your ear closer to the grass roots. As you know, sir, the population of Model Neighborhood across the country contain a large percentage of minority people. You must be well aware of the unrest that has been moving them the last few years; the unrest is still there—and growing! America was quite fortunate that this past summer was so "cool". I hope the administration does not build false hopes upon this. I feel that the "militants" were giving America another chance to remove the injustices of the past through the Model City Program and the NDP. America is still sitting on a bomb!

The white community dare not break faith with the minorities again! The white community has lied too many times! It has sold the poor people short too many times! I know that inflation is a pressing problem,

Mr. Secretary. I realize that the action in Vietnam is a big problem, but they are both small problems in comparison to the problems we will have in our impacted area if the NDP programs are cancelled or significantly curtailed. The impatient young people in these neighborhoods are not going to accept another sell-out lying down. How will you control the disturbances in 150 cities at the same time, Mr. Romney—the bricks, the fires, the snipers? I shudder to think of what might happen!

We understand that congress has already appropriated NDP money. We are told the decision to withhold it was made by the Bureau of the Budget. Don't let the Nixon administration be held responsible for the conditions which may result if this decision stands, Mr. Secretary. Keep faith with the people! Keep America "cool"! Help reduce the alienation between our people! Continue NDP financing at its present level.

Sincerely,

MEL BOYD.

DES MOINES, IOWA.

---

NOVEMBER 6, 1969.

HON. GEORGE ROMNEY,
*Secretary of Housing and Urban Development,*
*Washington, D.C.*

DEAR MR. SECRETARY: I am enclosing herewith a copy of a letter, addressed to you, which was sent to me by Mr. Mel Boyd, a member of the Model Cities Planning Board in Des Moines, Iowa.

I am fully aware of the heavy burden of correspondence you have and, since the letter may not have reached your desk through the routine channels, I am sending it to you now. It seems to me that Mr. Boyd, who probably could be considered as one of the "forgotten Americans" of whom President Nixon spoke last year, has summarized in only three pages the feelings of many citizens who are working on the local level to solve our country's urban problems. I sincerely hope you will find time to read his letter.

Also enclosed for your information is the October 7 newspaper article mentioned in Mr. Boyd's letter, as well as a later article concerning the Des Moines Model Cities Program.

Sincerely yours,

NEAL SMITH,
*Member of Congress.*

---

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT, RENEWAL ASSISTANCE ADMINISTRATION,
*Washington, D.C., November 17, 1969.*

MR. MEL BOYD,
*President, Service Saw Co., Des Moines, Iowa*

DEAR MR. BOYD: Secretary George Romney has asked me to reply to your very thoughtful letter of October 27, 1969, concerning the Neighborhood Development Program.

We in the Department of Housing and Urban Development recognize the value of NDP as a tool to revitalize our cities, and this Administration has no intention of abandoning the program. Demand for program funds, however, has been so great that we will be unable to participate to the full extent requested by communities across the country.

The enclosed position paper will give you insight into our problems with the program and will answer many of your questions. Please be assured that as soon as we develop the controls mentioned in the paper we will give the application for Des Moines every possible consideration.

Your obviously sympathetic interest in our programs is most gratifying.

Sincerely yours,

RALPH L. HEROD,
*Acting Deputy Assistant Secretary for Renewal Assistance.*

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT,
*Washington, D.C., November 18, 1969.*

HON. NEAL SMITH,
*House of Representatives,*
*Washington, D.C.*

DEAR MR. SMITH: Secretary George Romney has asked me to reply to your letter of November 6, 1969, on behalf of Mr. Mel Boyd concerning funding of the Des Moines, Iowa, Neighborhood Development Program application presently pending with the Department of Housing and Urban Development.

The Department also received the same letter from Mr. Boyd. Enclosed, for your convenience, is our response to him.

Sincerely yours,

LAWRENCE M. COX,
*Assistant Secretary.*

---

[From the Des Moines Register, Oct. 7, 1969]

HOPES FADE FOR DES MOINES AID OF $3 MILLION

(By James Risser)

WASHINGTON, D.C.—Des Moines has little hope of getting a requested $3 million for physical improvements in its Model Cities area, federal officials said Monday.

The result may be little or no immediate progress on things which would be most visible to neighborhood residents—fixing up existing run-down homes, clearing a square block for construction of housing for the elderly, development of vest-pocket parks.

A Department of Housing and Urban Development (HUD) official, who is working on Des Moines' Model Cities application, said federal approval of the city's $2-million, first-year implementation request is almost certain to come soon.

But that money, he pointed out, is to be used mostly for non-physical programs such as job training, educational programs, medical and dental care.

MASSIVE CUTBACK

The additional $3 million, which the city wants for physical improvements in the area, was to come from a separate, but closely related, HUD program called the Neighborhood Development Program (NDP).

However, a massive cutback in funding for the infant NDP program was announced last Friday by HUD Secretary George Romney, who said:

"Only a limited number of those applications presently pending or under preparation will be funded this year."

In his statement Friday, Romney accused the Johnson administration of encouraging cities last year to file NDP applications far in excess of the available money.

He said HUD cannot come up with anywhere near the $1.2 billion requested by 322 communities. He rejected the idea of approving more programs than HUD can fund in the hope that Congress would appropppriate more money.

Only 35 cities have been approved for NDP grants to date, and they will get "less money than they had hoped for," said Romney.

If the other NDP applications were approved, there would be no money left for other types of urban renewal grants requested by some 900 cities, he said.

As a result, HUD will authorize no NDP program which does not promise to complete 80 per cent of its job in the first year and the entire program in two years, he said.

AWAITING APPROVAL

Des Moines' NDP application has not actually reached Washington yet. It is still awaiting approval in HUD regional offices in Chicago.

Dick Wright, acting director of the Model Cities program in Des Moines, said Monday, "I think the regional office has been slowing us down because they knew something was going to happen to funds at the federal level."

Wright acknowledged, however, that the regional officials also have raised some legitimate questions about Des Moines' "workable program" and other matters. Wright said he believes the "workable program" will be certified soon, now that the city council has approved a housing code enforcement ordinance, and that this normalmly would be expected to speed up approval of the NDP application.

Of the fund cutback, Wright said: "I hate to see the Neighborhood Development Program shot down before it even gets off the drawing boards. This definitely is going to hurt us.

"If we're really sincere about rebuilding the inner cities across the country, then it's not time to do something like this."

Three out of every four houses in the model cities neighborhood are substandard. Clearance of some of those structures and rehabilitation of many more are key parts of the city's effort to upgrade the neighborhood, said Wright.

Without the NDP program, the HUD spokesman in Washington said, the residents cannot qualify for low-cost loans or federal grants for housing rehabilitation.

The plan was to use some NDP money to acquire and clear the block bounded by Twelfth street, University avenue, Thirteenth street and Carpenter street to make way for housing for the elderly, said Wright.

NDP money also was to be used to relocate the persons whose properties were cleared, to make low-cost rehabilitation loans to other residents and to set up vest-pocket park facilities both for the elderly and for youths, he said.

Wright said Des Moines could try to get some of the money through a "grab bag" of other federal programs.

This would result, however, in a more "fragmented" effort and more of the delays which already have area residents discouraged, he said.

---

[From the Des Moines Tribune, Oct. 18, 1969]

U.S. FUNDS AT HAND: SEEDS ARE PLANTED; DES MOINES MODEL CITY TO BECOME REALITY

(By Julie Zelenka)

A 1,000-acre urban neighborhood immediately northwest of downtown Des Moines, with a population of 16,000, is known as the "Model Cities" area.

The incomes are low (31 per cent earn less than $3,000 a year—twice as many as in the rest of Des Moines) and many residents are elderly. About 38 per cent are black.

The area has been described as a "decaying" neighborhood, but it's not yet a slum.

That's the idea behind the federal Model Cities program—to stop decaying neighborhoods from becoming slumns, and to make them more livable. But it isn't easy.

"We're just poor people, we're not very smart," many residents say as they struggle with the new jargon of Model Cities planners with backgrounds in economics, education and urban development.

And there remains a deep-seated suspicion that the whole thing is a glorious myth to pacify the under-privileged and that the "establishment" won't deliver the promised improvements—a suspicion that intensified when there were delays in federal money needed.

But last week, the federal government—after 15 months of planning and organizing—decided to spend $2 million to help the families in the area.

If all goes according to plan, local, state and additional money will boost this aid to about $3.2 million.

In five years, again if all goes according to plan, the total cost could reach $40 million.

WHAT IT WILL BUY

What will all this money—most of it from taxpayers—buy?

The biggest chunk of money—and Model Cities officials call it the most important—

will be a $300,000 program to help residents find better jobs, or jobs in which they have a chance to advance.

It isn't that the people there aren't working now.

"Any idea that there is idleness in this area is simply inaccurate," says Jim Booth, an economics specialist on the Model Cities staff.

He quotes studies to show that 96 per cent of the employable people in the area are working, but that 60 per cent of them have the lowest paying jobs—laborers, service and household helpers.

CAN'T DO IT ALL

But the government can't solve all the problems.

Richard Wright, acting director of the Model Cities project, described the federal grant this way:

"It is supposed to be seed money. To get the most out of this money we will be seeking assistance from private sources and from volunteers."

Where will these seeds be planted?

Education programs will get $561,440 from Model Cities funds and commitments from other sources will bring the total to $882,500. Individual projects will include expanded use of schools for recreational and cultural activities, vocational training to rehabilitate houses, assistance to a Des Moines Public School program to keep dropouts in school, and a work-study program.

DELINQUENCY

Delinquency prevention—including a youth police cadet program, a project to rehabilitate law violators without sending them to prison and a public defender program—will get $153,200 from Model Cities, with other revenue boosting it to $283,720.

A housing and relocation project costing $130,000 in Model Cities funds will be used to help residents avoid financial pitfalls in buying, renting or selling a home.

Employment and economic development will get $428,280. Other funds will raise this to $490,215, not only to create better jobs, but to find jobs for the elderly and to establish small businesses in the neighborhood.

About $200,000 is earmarked for health projects—other sources will boost it to $376,922—including a family planning service; alcoholism treatment; dental, eye and hearing treatment for adults; speech therapy for pre-schoolers, a health insurance program and health education.

SOCIAL SERVICES

Income maintenance and social services will get $144,140 from Model Cities. Other sources will increase it to $438,518. Projects will include establishment of a service center for the elderly, children's day-care services, counseling for the elderly, a foster grandparents program, food stamp plans and services to single-parent families.

Recreation and youth activities will get $9,500 in Model Cities funds for operation of a series of black forums and a day-camp program.

Physical environment and urban design will get $104,000 from Model Cities and additional funds from the city of Des Moines for a total outlay of $269,000. The funds will be used to improve street maintenance and solid waste disposal.

Administration and jobs for residents on the Model City staff organization will cost $330,000. Residents of the neighborhood will be hired as field workers and evaluators of neighborhood problems.

JOB NEED

But Model City officials keep returning to the need for better jobs—or occupational upgrading in official language.

Says Wright: "We don't want people going into what we call dead-end jobs. We want them to have an opportunity to advance. If we employ people in the schools as paraprofessionals and teachers aides, we want them to have some opportunity for advancement and additional training.

"This could include earning college credits so they could advance to better jobs. We also want on-the-job training. We want them to have increments in salary and fringe benefits, including vacations. We want to be certain they are part of these programs and not some separate entity."

OTHER FUNDS

Model Cities cash won't actually be in hand until the city signs a contract with the federal government, which may take several weeks.

Nonetheless, some projects have gotten under way with funds supplied from other sources participating in the Model Cities program. These projects are:

A children's day-care program that permits mothers to work and to enroll in job-training programs.

A family planning program that includes general health education aimed at improving the health of mothers and their families. This is being operated by Planned Parenthood.

A Greater Des Moines Education Center, designed to prevent youngsters from dropping out of school. It is being operated by the Des Moines Public Schools.

Extending the New Horizons junior high school work-study program into the high schools. The project is designed to prevent students from dropping out of schools and is operated by the Des Moines Public Schools.

Vocational training and housing rehabilitation at North High School.

The Model Cities contribution of $40,000 is to be used to purchase homes for the students to rehabilitate for resale. Money from such sales will finance the continuous purchase of other homes to be fixed and sold.

Still another major program, known as the Neighborhood Development Program (N.D.P.) is aimed at the physical rehabilitation of the sprawling Model Cities neighborhood.

This, say officials, would have "visual impact."

The cost of the program has been set at $3.2 million, but this undoubtedly will be cut back by President Nixon's austerity drive.

Officials here have been told that some money from N.D.P. may be available after Jan. 1. How much depends upon appropriations by Congress.

Funds for some of the projects that had been planned with N.D.P. grants may be available from other federal programs, officials said, somewhat hopefully.

## LUTHERVILLE, MD., GI DIES IN VIETNAM

### HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. LONG of Maryland. Mr. Speaker, WO Charles J. Armstrong, a fine young man from Maryland, died recently in Vietnam. I wish to commend his courage and to honor his memory, by including the following article in the RECORD:

LUTHERVILLE GI DIES IN VIETNAM—HELICOPTER CRASH FATAL TO CHARLES J. ARMSTRONG

A 21-year-old helicopter pilot from Lutherville has been killed in a crash in Vietnam, his parents reported yesterday.

He was Army WO Charles J. Armstrong, son of Mr. and Mrs. Charles T. Armstrong, of 15 West Seminary avenue, Lutherville.

Warrant officer Armstrong, in Vietnam two months, died last Monday when his helicopter crashed because of a malfunction. He was serving with the 118th Assault Helicopter Company, stationed at Bien Hoa Airbase, 20 miles north of Saigon.

He was a native of Camden, New Jersey.

He graduated from Towson Senior High School in 1966.

Mr. Armstrong enlisted in the Army after graduating from Catonsville Community College in 1968. He studied electrical engineering there.

He received his pilot training in Georgia and at Fort Wolter, Texas.

In addition to his parents, he is survived by a sister, Maria Armstrong, at home.

## HYPOTHETICAL HAPPINESS — OR HALLUCINATIONS FOR POOR PEOPLE

### HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. CLAY. Mr. Speaker, yesterday, my colleague in the House, the Honorable Mrs. EDITH GREEN, who is a member of the Education and Labor Committee with whom I serve, rendered a statement on the floor of this House which startles the imagination of concerned Americans. In nine short paragraphs, Mrs. GREEN completely dispelled the notion that funds for combating poverty are inadequate. She concluded, in fact, that the Congress has little reason to concern itself with more money for the poverty stricken. Mrs. GREEN has shocked me by her total lack of knowledge of poverty or her insensitivity to the problem. I am most concerned that my distinguished colleague has served to reinforce the distorted and naive view of poverty which makes a national commitment to alleviate poverty so difficult.

My colleague presented us with a "hypothetical" case of a poverty-stricken family in Portland, Oreg.—and skillfully pointed out, hypothetically, of course, that this family—if it "wanted to take advantage of" all the programs available to them "would be able to have an $11,513 income for the year."

At last, the Members of this august body no longer need to postulate why it is impossible to agree on poverty programs. Some obviously view poverty totally as a hypothetical condition while others see it as a real one.

Those of us who have experienced poverty, who have lived with the tragic deprivations which are perpetrated upon 12.8 percent of our Nation's population—deal with the reality of it. Those of us who have seen children eating dog food or searching garbage cans for food, find it difficult to envision the hypothetical family. Those in need of medical service who cannot afford a doctor know the problem is a real one. Those who live in rat-infested houses that have no heat, no hot water, and who share a bed with three other children, who do not attend school because they are hungry or have

no shoes—those people could care less about the hypothetical.

What a very real problem it is to be denied a job because you lack the qualifications—then discover that you lack the qualifications because the school you intended was inferior. You also discover that the books used in your school were outdated, some 40 years old. And your attendance record was poor because you were shoeless or without warm clothing. The depth of your learning was impaired because your exposure was so limited. In a real sense, you have been denied employment because you are poor. You had no father because he was jobless, and his desertion made it possible for you to receive public assistance.

I do not know about poverty in Portland, Oreg.—where the hypothetical family supposedly exists—but I wish my collegue from Oregon would produce even one family anywhere in this country who can or does collect $11,513 annually from government-assisted programs.

Naturally, I limit my challenge to poor families. We can all produce thousands of rich families who receive much more annually from Government-assisted programs. The classic example is that of Senator JAMES EASTLAND of Mississippi, who received $166,000 last year from this Government for not growing food on his farm. If my colleague, Mrs. GREEN, cannot construct in reality what she purports to be the truth in hypothet, then her example is as meaningless as her arguments against the committee-reported poverty bill.

My view of poverty is not hypothetical. It comes from experience. It is fair to say that my view of poverty is quite realistic. I have lived with it, and I now serve a constituency which battles daily with the problems of poverty on the ground level. There is not any family in St. Louis receiving $11,513.00 annually, and I dare say there is not any poor family anywhere in the country who can testify to such glorious and profitable benefits for their poverty.

Let me point out, first, the extent of poverty in this country. According to official figures, there are 22 million poor people in the Nation and an additional 13 million near-poor. Of this number, 5.1 million people are classified as the very poor since they have no cash income at all.

If we are providing the kinds of funds asserted by the hypothetical view of Mrs. GREEN, this Nation, to provide $11,000 to a conservative estimate of 6 million families—would have to be appropriating and spending $66 billion annually on these programs now.

Some 9.3 million of these poor people are in the category of "hard-core" poor—which means they live in families whose incomes are less than $2,400 per year for a family of four. The "remaining poor" are the 10.6 million people whose incomes are between $2,400 and $3,600 per year.

We are not reaching these people. Public assistance programs serve only 40 percent of the poor people. Mrs. GREEN'S "hypothetical family" would have to be within that fortunate 40 percent. The assistance payments provided in some States are less than 50 percent of what the State itself considers a necessary standard. In Oregon, AFDC payments for a family of four are $226 per month. In the State of Missouri, the allotment for a family of four is only $124 per month. And, in the State of Alabama, it is $89 per month or in Mississippi, it is $55 per month.

There are indeed, great discrepancies among the States, great discrepancies in welfare payments which are, no doubt, representative of the priorities those States place on poor people. And yet, my colleague would have us accept her poverty program which turns the administration of all poverty programs over to the individual States. And she insists that we have no reason for claiming the programs would, in that way, be effectively destroyed.

The average child assistance payment in the United States is $40 per month. There are an estimated 4½ million children receiving aid through AFDC. There are at at least another 6 million children in families who are eligible—but who are not receiving any assistance. Only 45 percent of those families receiving AFDC receive food stamps or food commodities—whereas the "hypothetical" example has this Portland family receiving generous assistance payments and food stamps.

There are two basic Government programs intended to improve the diet of the poor—the sale of food stamps and the distribution of commodities. The current food stamp program reaches ony 16 percent of the people who need the food. Local counties choose to participate in the food stamp program, the commodity program—or in neither program. The food stamp and commodity program each serve only 3.2 million poor persons—or a total of 6.4 million of the currently estimated 22 million poor and 13 million near poor people.

Of the 3,098 counties in the United States, 1,125 choose to participate in the commodity distribution program. But fewer than 12 percent of those counties serve as many as 60 percent of the poor people in their areas who need the food.

There are 1,139 counties participating in the food stamp program—and the participation of poor people in this program is even worse. Only 20 of those counties manage to serve even 60 percent of the people who need stamps. On the average, food stamp counties reach fewer than 20 percent of the people eligible.

There are seven States in the country which refuse to participate in the food stamp program. And there are 413 counties in the United States which have no food program at all.

Recently, the State of California passed a law to require that all counties in California participate in the food stamp program. The good Governor of that State vetoed the bill. But the substitute poverty bill offered by Congresswoman GREEN, Congressmen QUIE and AYRES—asserts that each State should have the reins of control over poverty programs. I suggest that my colleague name the Governors who have demonstrated sensitivity to and understanding of the problems of the poor.

A poor family does not have much going for it in America. Unlike the comfortable family of five in the "hypothetical" Portland, Oreg., case—a family which is poor has only one chance in three of living in a county which has a food stamp program—and if it happens to live in such a county, it still has only one chance in six of participating in the program. It is clearly not just a matter of "wanting" to take advantage of programs—which keeps them from collecting any income of consequence.

The "hypothetical family" is said to be receiving $75 per year in legal services under OEO. If that is so, then the "hypothetical family" is fortunate to have been among the 6,010 being handled by the legal services program. I have great hopes for the program—but there are many obstacles in the way to achieving legal representation for all the poor people who need it. Presently, there are 265 projects in the United States—but there is only one office in the State of Virginia, only one office in Maryland, in the city of Baltimore, and there is no program in the State of North Dakota. Many legal services programs are just getting underway, just becoming fully operational. Still, there are not enough programs or personnel to handle the legal defense needs of the poor.

The Portland, Oreg., "hypothetical child" who is in high school is participating in the Upward Bound program valued by my colleague at $1,440, to the hypothetical family. If so, this "hypothetical child" is, indeed, fortunate—since there are only 2,400 Upward Bound enrollees in the entire country. Last year OEO was forced to reject 150 proposals for programs which could have served an estimated additional 7,000 youth. Reason for these rejections—lack of funds.

The "hypothetical family" picks up $3,000 when the mother decides to participate in the "job opportunity program." Whether or not such an opportunity may be available to her, the mother of four has a job at home. Why should she take a job which pays less than the minimum wage and then spend a large portion of her inadequate salary to hire a babysitter?

The "hypothetical child" in college is not only said to receive an educational opportunity grant—but to receive an NDEA grant of $520 by taking advantage of the forgiveness clause. This assumes, of course, that this student elects to pursue a teaching career if the loan becomes a partial grant. And for his loan to be completely forgiven, he must decide to teach in a poverty area or to teach handicapped children.

Both NDEA and EO grants are programs feeling the fiscal squeeze as well as the effects of inflation on the costs of higher education. This year, there are 442,000 youth receiving NDEA assistance—but based on the President's budget, there can be only 393,000 participating in the coming academic year. This comprises only 6.4 percent of the total estimated higher education enrollment for the coming academic year.

The "hypothetical family" is calculated to receive $125 in services from the comprehensive health program. But there are only 49 comprehensive health programs in the Nation serving an approximate 300,000. These centers operate in only 23 of the 50 States. Fortunate for this "hypothetic family" that they live in Portland, Oreg., where there is such a center.

It is documented fact that the total poor population of the Nation, 22 million poor and 13 million near-poor, all go without necessary health services. The family in question is among the few people being reached at present. There is hope that the program will be expanded to enable it to serve at least 1 million poor people—but these are cautious hopes which rest upon congressional action on poverty programs.

The "hypothetical preschool child" is enrolled in Headstart. There are 2 million poor children between the ages of 3 and 6 years who are eligible and in need of Headstart training. But only 600,000 youngsters are now receiving the benefits of this program. As luck would have it, "our hypothetical poor child" is one of those 600,000.

Moral of the story is "better that we should be only hypothetically poor than to suffer the realities of poverty." Hypothetically, we can have the mother of these four children marry the doctor at the comprehensive health center who will then go into private practice where he will enjoy the financial rewards of medicare and medicaid—and this family can live happily and comfortably ever after.

We are here in Congress not to deal with hypothetical situations—but with real problems. Poverty is real. We must look at the real people when we consider the poverty bill which will come before the House. The present magnitude of the problem inevitably stems from the lack of truth, the lack of reality in our "hypothetical" discussions of poverty. It must not continue.

Americans cannot and must not rest on the archaic notions of poverty—that a man who is in rags should—except for his own laziness—be on his way to riches, the American way of life. Americans must learn the truth. Until Americans spend as much time trying to understand as trying to condemn poverty and poor people—this country cannot become a great nation.

## CHILDREN'S PRAYERS

### HON. RICHARD L. ROUDEBUSH

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. ROUDEBUSH. Mr. Speaker, this week's children's prayers are offered in order that the public schools of our Nation may have a source for morning devotionals.

The Supreme Court has outlawed prayer and Bible reading in our public schools, but it has not yet had the temerity to ban prayers from Congress.

Therefore, I believe these prayers can be read by our Nation's schoolchildren at the start of their day without interference from the Supreme Court.

The prayers follow:

I

We give Thee hearty thanks for the rest of the past night and for the gift of a new day, with its opportunities of pleasing Thee. Grant that we may pass its hours in the perfect freedom of Thy service that at eventide we may again give thanks to Thee.

II

Lord, as Thy mercies do surround us, so grant that our returns of duty may abound; and let this day manifest our gratitude by doing something well-pleasing to Thee.

III

Let us take hands and help, this day we are alive together, look up on high and thank the God of all.

IV

O Heavenly Father, Who has filled the world with beauty, open, we beseech Thee, our eyes to behold Thy gracious hand in all Thy whole creation, we may learn to serve Thee with gladness.

V

O Lord, grant that I may do Thy will as if it were my will, that Thou mayest do my will as if it were Thy will.

## ADDRESS OF PRIME MINISTER EISAKU SATO

### HON. WM. JENNINGS BRYAN DORN

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. DORN. Mr. Speaker, Prime Minister Sato of Japan is one of the great and distinguished leaders of the modern world. It was my great honor and pleasure to meet him during his recent visit to Washington.

I believe Prime Minister Sato will join hands with our country in moving the free world forward into an era of strength, peace, brotherhood and understanding.

Mr. Speaker, I commend to the attention of my colleagues in the Congress and the people of the United States the outstanding address of Prime Minister Sato before the National Press Club here in Washington on November 21.

The speech follows:

SPEECH BY PRIME MINISTER EISAKU SATO OF JAPAN

President Heffernan, distinguished members and guests: It is the third time that I am addressing you here at the National Press Club. Looking around me, I see quite a number of familiar faces. On this occasion, it is my great privilege and pleasure to speak to you about the new development in international politics and the new relationship between Japan and the United States—what can almost be called the New Pacific Age—which has been brought forth by the current talks between President Nixon and myself.

It is hardly necessary to mention that, for Japan, its relations with the United States are much more important than its relations with any other country. At the same time, I am firmly convinced, not only that the relations of mutual friendship and trust with Japan are immensely important for the United States, but also that the maintenance and promotion of such relations of mutual friendship and trust between Japan and the United States are indispensable conditions for the peace and stability of the Asian-Pacific region. Such being the case, it gave me the greatest pleasure to be able to hold these talks with President Nixon—who is not only an old acquaintance, but is also, of all American Presidents, the best acquainted with Japan, having visited our country six times.

In my talks with President Nixon, we had a frank exchange of views not only on relations between our two countries but also on a wide range of international political problems in general. The results were most satisfactory, and it is perhaps superfluous to mention that the most important result was the solution of the Okinawa problem. As you are aware, the problem of Okinawa has been the major outstanding issue in postwar relations between Japan and the United States. President Nixon and I were, at these talks, at last able to reach basic agreement that Okinawa would be returned to Japan during 1972 and the two governments would proceed to work out reversion agreement. The details of the agreement are set forth in the Joint Communique.

For a territorial status resulting from war to be changed, in a manner satisfactory to both parties, by peaceful negotiation, is a rare matter in world history. It may be said that Japan and the United States, by solving the problem of Okinawa in such a fashion, have shown a new method of solving international problems in step with the progress of the times, and have blazed the trail towards a new order based on friendship and trust and the way of true peace in the handling of international affairs. I am convinced that through the solution of the Okinawa problem, Japan and the United States have been able to build the firm foundations of a lasting mutual cooperation necessary for the future of the world from 1970 onwards.

There are a few things that I should particularly like to stress on this occasion. These are, the background which enabled this historic negotiation, how the return of Okinawa will shape the Japan-United States relations to come, and how it will affect international politics from 1970 onward.

In 1953, in the immediate postwar period, the Amami Islands, and in 1968, the Ogasawara (Bonin) Islands, were respectively returned to Japan through talks between Japan and the United States. However, Okinawa, with its 1 million Japanese inhabitants, has been left under the administration of the United States as a strategic stronghold for the maintenance of peace in the Far East. The biggest problem in the negotiations between Japan and the United States for the return of the islands was nothing more nor less than the role that Okinawa was playing in the maintenance of peace. Japan and the United States agree in their basic recognition of the importance of United States military bases on Okinawa. The peacekeeping function of the bases on Okinawa must continue to be kept effective. However, the fact that our territory, Okinawa, and the 1 million Japanese who live there have been kept under the administration of the United States since the end of the war has left an unresolved feeling in the hearts of the Japanese people—in other words, it has remained in our thoughts as a symbol of defeat, and this mental block has been exerting a subtle influence on the relations between Japan and the United States.

President Nixon and I have agreed on the return of Okinawa on the recognition that to maintain and promote the friendship and trust of the peoples of Japan and the United States, and to take this opportunity to greatly strengthen the partnership gradually built up, over the twenty-odd years of the postwar period, and based on mutual inter-

ests and common ideals, would serve the national interests of both countries and would also contribute toward the peace and development of Asia. In other words, the return of Okinawa has only been possible because Japan and the United States have points of agreement in the various basic democratic ideals such as personal liberty, equality, the respect for human rights and the realization of social justice. For the trust and the forbearance shown to us by the members of the United States Administration and Congress, and the friendship and good will shown to us by the people of the United States during these negotiations, I should like to express my deepest gratitude, and I was impressed even further by the strength of the ties between our two nations. On the other hand, it is a matter of deep regret that our Northern Territories, of which we were deprived as a result of the same World War II, have still not been returned to the homeland. Heartened by the shining example of Okinawa, I am determined to continue my efforts to realize, by peaceful means, the just demands of the Japanese people.

It is natural that, with the return of Okinawa, Japan should gradually assume the responsibility of the local defense of the islands. Japan's self-defense capabilities are already filling an important role in securing the primary defense of Japan and it is our policy to continue to consolidate such capabilities. For my part, it is my expectation and conviction that the United States, in response to the hopes of the free nations, will continue to maintain its function of deterring war in Asia along the lines of President Nixon's pronouncement at Guam.

In connection with this point, President Nixon and I both reaffirmed our intention firmly to maintain the Japan-United States Security Treaty. Of course, the first objective of Japan in continuing this treaty is to ensure Japan's own security by filling the gaps on its own capabilities through cooperation with the United States. However, in the real international world it is impossible to adequately maintain the security of Japan without international peace and security of the Far East. This is where the second objective of the Japan-United States Security Treaty comes to the foreground—the cooperation of Japan and the United States in the form of the use of facilities and areas in Japan by United States forces under Article VI thereof for the security of the Far East in a broader context. And it would be in accord with our national interest for us to determine our response to prior consultation regarding the use of these facilities and areas in the light of the need to maintain the security of the Far East, including Japan.

In particular, if an armed attack against the Republic of Korea were to occur, the security of Japan would be seriously affected. Therefore, should an occasion arise for United States forces in such an eventuality to use facilities and areas within Japan as bases for military combat operations to meet the armed attack, the policy of the Government of Japan towards prior consultation would be to decide its position positively and promptly on the basis of the foregoing recognition.

The maintenance of peace in the Taiwan area is also a most important factor for our own security. I believe in this regard that the determination of the United States to uphold her treaty commitments to the Republic of China should be fully appreciated. However, should unfortunately a situation ever occur in which such treaty commitments would actually have to be invoked against an armed attack from the outside, it would be a threat to the peace and security of the Far East including Japan. Therefore, in view of our national interest, we would deal with the situation on the basis of the foregoing recognition, in connection with the fulfillment by the United States of its defense obligations. However, I am glad to say, such a situation cannot be foreseen today.

I pray that peace will return to the Indo-Chinese peninsula as soon as possible, and that the peoples of the area will be able to work again for stability and prosperity; at the same time, I am earnestly exploring what role Japan could play to cooperate with such efforts. I believe that Japan's role should be, naturally, to cooperate in the rehabilitation and development of the economy of the Indo-Chinese peninsula, and if we are asked, to participate in, and to cooperate with, in a manner best suited to Japan, any international peace-keeping machinery which may be set up after the cessation of hostilities. I express my deep respect for the sincere efforts being made by President Nixon and all those Americans concerned toward the realization of a peaceful and just settlement of the problems of Vietnam and Loas, and also for the sacrifices that the United States has made to assure the people of South Vietnam the opportunity to determine their own political future without outside interference. At the same time, I have a deep understanding of the position of the United States and sincerely hope that such efforts will bear fruit.

At the beginning of my remarks today, I mentioned a "New Pacific Age". This is the age where, having put an end in name and in fact to the "postwar" era with the return of Okinawa, Japan, in cooperation with the United States, will make its contribution to the peace and prosperity of the Asian-Pacific region and hence to the entire world. Again, this may be seen as a transition from a "closed" relationship between Japan and the United States, confined to the solution of bilateral problems which concern the two countries alone, to an "open relationship, where both countries will now be able to work together to further promote broad international cooperation.

In order to facilitate such a transition, it is first necessary to formulate a projection of the 1970's. I believe that the 1970's will not mark a radical change from the 1960's, when the United States and the Soviet Union were shouldering the primary capacity and responsibility for the maintenance of world peace, but when other countries were also enlarging their spheres of independent action in accordance with their respective objectives.

In other words, this means that, first of all, we place great expectations on the two major powers, the United States and the Soviet Union. That is, it would be necessary for the United States and the Soviet Union to devote even greater efforts than they did in the 1960's towards such problems as further relaxation of tensions, peaceful settlement of local disputes such as are seen in the Middle East, and the realization of various arms control measures, all for the maintenance of world peace. In this sense, the Japanese people strongly hope that the negotiations between the two major powers for the limitation of strategic arms, which have recently begun, will become the starting point for future general disarmament.

It could also be said that the 1970's will be a decade when the various major countries other than the United States and the Soviet Union should assume greater responsibilities. We have a profound concern over the future of Communist China which is at present devoting great efforts to the development of nuclear arms, and the relationship that the United States and the Soviet Union will have, respectively, with Communist China. Having the United States, the Soviet Union and Communist China as our neighbors, Japan strongly hopes that in the 1970's Communist China will live in peace with the United States and the Soviet Union, in the same way as the efforts for maintaining peace between the United States and the Soviet Union have developed. It is to be hoped also that Communist China will revise the rigid posture that it has been taking, and participate in international society as a country that will carry out its responsibilities in a constructive manner in the cause of international peace. For this purpose, I consider that both the United States and Japan should always keep their doors open towards Communist China.

The responsibilities that must be shouldered by Japan and the Western European countries in the 1970's will also be great. The role that these countries could be expected to play for easing international tensions or for the harmonious development of the world economy is expected to increase in the future. When we realize that the North-South problem is one of the greatest tasks which mankind will have to face and endeavor to resolve for a long time to come, we strongly feel the necessity for the industrial nations to transcend their short term interests and to make further concerted efforts to assist the developing countries in their nation-building. An age when Japan and the United States, the two great countries on both sides of the Pacific, cooperate with this perspective in mind; this is what I would call the New Pacific Age.

Next comes the problem of what form such cooperation between our two countries should take. As far as the bilateral relations between our two countries are concerned, it is quite obvious that with the settlement of the Okinawa problem, one of the most pressing issues facing us would be in the economic field. This involves various issues related to capital transactions and trade, and efforts to ease the relations between the United States and Japan are already being exerted by responsible persons in each country. It is my intention to exert my further efforts on this matter. In the 1970's, it is expected that both the cooperative and the competitive aspects in the economic field between our two countries will increase not only in our bilateral relations but also in other parts of the world. In this respect some friction may tend to arise between our two countries. However, compared with the magnitude of the benefits which will accrue through the deepening of mutual dependence as seen in the immense amount of trade between our two countries, the friction which may occasionally arise from competition is hardily important.

What is more important is to always understand the other country's position, and in the spirit of give and take, to make the necessary considerations within the framework of international rules so that localized frictions do not harm the broader, political ties between our two countries.

It is with this in mind that I have pursued the policy of liberalization of both trade and capital. As a matter of fact, in December, 1968, the Japanese Government in a Cabinet decision decided to conduct an overall review of the import quota items at an early date and to liberalize, within two or three years, a substantial range of those items. Last month the Japanese Government followed it up with the decision to have the number of the existing import quota items by the end of 1971, and to render utmost efforts to liberalize the remaining items under control. In the field of foreign capital liberalization, efforts have been made to widen the scope of the industries in which foreign capital can profitably invest.

I am determined to further promote this policy of trade and capital liberalization, and, at the same time, it is to be hoped that the United States will continue her stable economic growth and preserve her liberal economic policy.

In Asia, where Japan and the United States have a common concern, efforts being made

by the countries in the region for self-help, regional cooperation by countries with common interest, and economic and technical assistance from industrialized countries have combined to bring about a gradual increase in the speed of development, and in many areas progress may be seen in the establishment of a stable national system and in the initiatives taken in economic construction. In spite of all this, poverty in Asia has yet to be overcome, and we can hardly say that the foundation has been laid for the sustained development of the Asian countries. This situation in Asia is not expected to change significantly in the 1970's.

It is here that I find one of the greatest challenges for my country as the leading industrialized nation in Asia. The national goal that we have to pursue in the 1970's is to cooperate, in nonmilitary fields, with the Asian countries that differ in race, religion and culture, in their efforts to secure prosperity through mutual cooperation while preserving their freedom and independence. Since the United States plays the central role in preserving global peace and also holds great responsibility for the security of Asia, I believe that it is Japan rather than the United States that should take the leading role in such fields as economic and technical assistance towards the nation-building efforts of the Asian countries.

Although Japan has become the second economic power in the free world, the gap in economic potential between my country and the United States is still very large, and the fact remains that Japan's per capita income is only the world's twentieth. We also face the difficult task of overcoming the great insufficiency in social capital and public investments. At the same time, however, there is emerging among the Japanese people a desire to play a meaningful role in making a positive contribution to the world. There is no doubt that the settlement of the Okinawa problem will give confidence to the Japanese people and that it will become the turning point in directing the constructive will of the nation to the aim of bringing stability to Asia.

We have already set our goal for the 1970's to make it the decade for Asian development, but Japan alone cannot hope to secure the peace and prosperity of Asia. Along with the efforts of the Asian countries themselves, both the material and moral cooperation of the industrialized countries that have a great interest in this area are required. This is because in the construction of a new Asia, not only the material aspects such as the eradication of poverty, famine and disease but the attainment by the Asian people of freedom and social justice must also become one of the goals. Here again I find the shape of a New Pacific Age, where a new order will be created by Japan and the United States, two countries tied together by common ideals.

The cooperation between Japan and the United States is not confined to our two countries or just Asia. As this cooperation is one between the first and second ranking economic powers in the free world, it would extend over a wide range of global problems which I dealt with earlier in my projection of the 1970's, such as the easing of general tensions, the strengthening of the function of the United Nations, arms control and the realization of disarmament, the settlement of the North-South problem, the preservation of the free trade system and the securing of a stable international monetary system.

Now, in order to establish such a wide range of cooperation, what should we bear in mind? It is essential that the peoples of both countries increase their understanding of each other and foster mutual trust. Exactly one hundred years ago, forty Japanese immigrants came to the United States for the first time, but now, over one hundred thousand Japanese visit the United States annually, and more than two hundred thousand Americans visit Japan each year. As the contacts between our peoples deepen through such direct contacts or by means of the mass media, the erroneous image that our peoples sometimes had of each other will be corrected, and they will begin to understand that both Japan and the United States have their own culture and tradition, and that both are countries facing a multitude of complex problems. And it is in this way that a proper evaluation on the unique roles that each of our two countries has to play will become possible.

The United States is a country of wide open spaces, a multiracial nation, a Federation of States, and, above all, a superpower. On the other hand, Japan is a country confined to a limited land area and inhabited by a homogeneous race, and it is also one of the many countries of Asia. Both are leading industrialized countries and share the common democratic ideals of liberty and the respect of human rights, but there are these fundamental differences of which I have spoken.

On the other hand, Japan and the United States are surprisingly similar in some aspects. Nowhere is there such a high degree of social mobility nor is the rule of fair competition, applied so universally than in our two countries. We can also find some similarity in the rapid adaptation of our various domestic systems to our increasingly mass information-oriented societies and the wide diffusion of higher education. We are also able to see a similarity in the national characteristic where both the Japanese and the Americans are never satisfied with the present, and their tendency to constantly endeavor to bring about a better society in the future.

The role of preserving freedom and stability that the United States plays at the center of a wide range of international organizations covering political, economic and security fields is unique, and can be replaced by no other country. Japan's way of life of dedication to peace also has its unique aspects. I am convinced that if we each recognize the national sentiment and the national characteristics of the other, and respect each other's position although our immediate interests may not always coincide, a system of truly subsubstantial cooperation can most certainly be realized.

From this viewpoint, I believe that our two countries should widen the range of policy options in both their bilateral and multilateral relations. It is desirable to maintain a state of affairs where it is always possible to engage in a broad and flexible dialogue.

If Japan and the United States can bring off this kind of cooperation, it is then that the New Pacific Age will become rich in substance. I personally have high expectations and strong belief in the future of this New Pacific Age. The American people, who once developed the New World in the face of tremendous hardship and want, and in our own time, succeeded in the Apollo project through brilliant organization and personal courage, will certainly conquer the present problems they face in the political, economic and social fields, and this will exert a stabilizing effect on the entire world. Her partner, Japan, has achieved an economic growth during the twenty-odd post-war years which is outstanding in the world, and having become a power for stability in Asia, is a country that is about to tackle, with vigor, the problems of the future.

It can be said that the two great nations across the Pacific, of quite different ethnic and historical backgrounds, are on the verge of starting a great historical experiment in working together for a new order in the world, on a dimension that transcends a bilateral alliance. Although this experiment has just begun, I have full faith that this experiment will surely be successful due to the good will, mutual trust and efforts of our two nations. I am especially pleased that it was President Nixon and I who set this experiment in motion by bringing about the return of Okinawa.

Thank you for your attention.

---

## SMITHSONIAN INSTITUTION CALENDAR FOR DECEMBER 1969

### HON. JAMES G. FULTON

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. FULTON of Pennsylvania. Mr. Speaker, it is a pleasure to place in the CONGRESSIONAL RECORD the schedule for the month of December at the Smithsonian Institution. As always, the Smithsonian has a variety of events planned for this month, as well as special presentations for the holiday season. It is pleasant to note that there are a number of events especially for children during this Christmas holiday, particularly the programs of yule folksongs and the puppet show, "The Wizard of Oz."

During this holiday season, I hope everyone will take advantage of the excellent, high-level events scheduled at the Smithsonian Institution. There is something for each member of the family to enjoy.

The schedule follows:

CALENDAR OF THE SMITHSONIAN INSTITUTION, DECEMBER 1969

WEDNESDAY, DECEMBER 3, 1969

*The Clowns Never Laugh: the work of Walt Kuhn; John Marin; this is Ben Shahn; Charles Burchfield.* Smithsonian Film theatre presentation. This quartet of award-winning films suggests how the experiences of four modern American painters are expressed in their works—ranging from brillant brush strokes depicting the world seen through nature's prisms to stark, dynamic cityscapes and introspective figure studies. 2 p.m., auditorium, National Museum of History and Technology; 8 p.m., auditorium, National Museum of Natural History. Introduction by Mrs. Adelyn Breeskin, curator of contemporary art, National Collection of Fine Arts.

*Concert.* Informal performance using instruments from the national collections. 4:30 p.m., Hall of Musical Instruments, National Museum of History and Technology.

THURSDAY, DECEMBER 4, 1969

*The Creative Screen. Jiri Trinka.* Produced in Czechoslovakia. Behind-the-scenes views of the fantastic fairy tale world created by the famous puppet-animator. *Light.* How different kinds of light can change the way we see things and the many ways artists have used light to achieve their purposes. Films will be shown every half hour from noon until 3 p.m. Free admission at the National Collection of Fine Arts.

*In the Company of Artists.* Smithsonian Film Theatre repeat. Noon, auditorium, National Museum of History and Technology.

*Stratified Sites of Early Archaic Periods.* Lecture by Dr. J. L. Coe, University of North Carolina. 2 p.m., Room 43, National Museum of Natural History.

FRIDAY, DECEMBER 5, 1969

*32 Washington Artists.* Sales exhibition of graphics, paintings, and sculpture by artists currently represented in the 1970 appointment calendar, *Art in Washington.* Museum shop, National Collection of Fine Arts. Through January 31.

*Candle Making Workshop,* under the direction of Joyce Cooper. Sponsored by the Smithsonian Associates. By subscription only. For information call 381–6159.

SATURDAY, DECEMBER 6, 1969

*Misfortunes of the Immortals: A concert with Morton Subotnick and the Dorian Woodwind Quintet.* Open Rehearsal from 11 a.m. to 3 p.m. Natural History auditorium. Donation $1.00 (with concert ticket). Co-sponsored by the Smithsonian Associates and the Division of Performing Arts. For information call 381–6158.

*Candle Making Workshop.* Repeat. See December 5 entry for details.

*Perceptions II/World Premiere—Misfortunes of the Immortals: A concert composed and performed by Morton Subotnick with the Woodwind Quintet.* 8:30 p.m., auditorium, National Museum of Natural History. Tickets, $4.00. For information call 381–6158.

*Young People's Macrame Workshop,* under the direction of Mary Walker Phillips. Sponsored by the Smithsonian Associates. By subscription only. For information call 381–6159.

*The Creative Screen. Repeat of Jiri Trinka* and *Light.* See December 4 entry for details.

*The Camera and the Human Facade.* Special exhibition of 200 photographs and photographic albums showing aspects of man and giving insights into the human character. National Museum of History and Technology. Through March 8, 1970.

*The Scotland Project.* Lecture by architect Rurick Ekstrom. 3 p.m., National Collection of Fine Arts.

SUNDAY, DECEMBER 7, 1969

*Composer's Workshop,* with Morton Subotnick: Description and discussion of simple control systems. 3 p.m., auditorium, National Museum of Natural History. Tickets, $5.00. Limited to 50 persons. Co-sponsored by the Smithsonian Associates and the Division of Performing Arts. For information call 381–6158.

*Young People's Macrame Workshop.* Repeat. See December 6 entry for details.

*Perceptions II: Misfortunes of the Immortals.* Repeat performance. See December 6 entry for details.

MONDAY, DECEMBER 8, 1969

*Uganda and Kenya—Lands and Peoples,* illustrated lecture by international lecturing and film-making team, W. Gurnee Dyer, Vice President, American Museum of Natural History, and Mrs. Dyer. Sponsored by the Smithsonian Associates for members and their guests. 8:30 p.m., auditorium, National Museum of Natural History. Doors open at 8 p.m. Public admitted at 8:25 p.m. as seats are available.

WEDNESDAY, DECEMBER 10, 1969

*The Eye of Picasso.* A Smithsonian Film Theatre Presentation. In this French-produced tribute to Picasso, the artist discusses his work, describing how he seeks to impress the mind as well as the eye. 2 p.m., auditorium, National Museum of History and Technology; 8 p.m., auditorium, National Museum of Natural History. Introduction by Mrs. Jan Keene Myhlert, National Collection of Fine Arts.

THURSDAY, DECEMBER 11, 1969

*Encounter With DDT—Persistent Biocides in the Environment.* Third in a series of panel discussions, in which the audience is asked to participate, on critical issues of today. Dr. Richard Cowan, director, National Museum of Natural History, will chair this session. Panel members are: Dr. Roy Hansberry, Shell Development Company; Dr. Raymond Johnson, Bureau of Sport Fisheries; Dr. Thomas Jukes, University of California Space Sciences Laboratory; and Dr. Robert Riesborough, University of California Institute of Marine Research. 8:30 p.m., auditorium, National Museum of Natural History. Sponsored by the Smithsonian Associates and directed by Dr. William Aron, Smithsonian Office of Oceanography.

FRIDAY, DECEMBER 12, 1969

*Milton Avery.* One of America's modern masters is here accorded the first major retrospective of his works since his death in 1965. One hundred paintings and 27 graphics have been selected for this exhibition by Adelyn D. Breeskin, who calls Avery "the American artist whose color and general approach is closest to that of the great French artist Henri Matisse." At the National Collection of Fine Arts through January 30, 1970.

*Perceptions II/World Premier: Game Opera No. 1,* composed and directed by Loran Carrier, and featuring an outstanding company of total performers. 8:30 p.m., Hall 10, National Museum of Natural History. Co-sponsored by the Smithsonian Associates and the Division of Performing Arts. Tickets, $3.00. For information Call 381–6158.

SATURDAY, DECEMBER 13, 1969

*Sing out for Christmas,* children's yule folksongs. All children in the Washington area are invited to participate. Banjo and guitar accompaniment by special guests. 4 p.m. to 5 p.m., first floor Pendulum area, National Museum of History and Technology. Sponsored by the Smithsonian Division of Performing Arts.

*Perceptions II/World Premiere:* Game Opera No. 1. Repeat performance. See December 12 entry for details.

*Composer's Workshop, With Loran Carrier: Game Theory and Music Composition.* 3 p.m., Hall 10, National Museum of Natural History. Limited to 50 persons. Tickets, $2.50. For Information call 381–6158.

SUNDAY, DECEMBER 14, 1969

*Rediscovered American Painters.* Lecture by Theodore E. Stebbens, Jr., Yale University Art Gallery. 4 p.m., at the National Collection of Fine Arts.

*Perceptions II/World Premiere:* Game Opera No. 1. Repeat performance. See December 12 entry for details.

MONDAY, DECEMBER 15, 1969

*A Program of Christmas Music,* directed by James Weaver, 8:30 p.m., Hall of Musical Instruments, National Museum of History and Technology.

WEDNESDAY, DECEMBER 17, 1969

*Marc Chagall and Shalom of Safed: The Innocent Eye of a Man From Galilee.* Two Smithsonian Film Theatre presentations. The emergence of a primitive artistic style is revealed through an analysis of the background and philosophies of two contemporary foreign painters. Introduction by Donald R. McClelland, National Collection of Fine Arts. 2 p.m., auditorium, National Museum of History and Technology; 8 p.m., auditorium, National Museum of Natural History.

*Christmas Music.* Informal performance using instruments from the national collections. 4:30 p.m., Hall of Musical Instruments, National Museum of History and Technology.

THURSDAY, DECEMBER 18, 1969

*The Creative Screen. Serenal.* Award-winning film-maker Norman McLaren salutes the West Indies in a flow of abstract color images with exciting background music by Trinidad's Grani Curucaya Orchestra. *The Americans: Three East Coast Artists.* Visit with Jack Tworkov and Hans Hoffman as they work in their Provincetown studios. View the last film taken of Milton Avery in which he expresses his thoughts from his New York apartment studio. Continuous showings from noon until 3 p.m., at the National Collection of Fine Arts.

*Marc Chagall and Shalom of Safed: The Innocent Eye of a Man From Galilee.* Smithsonian Film Theatre repeats. Noon, auditorium, National Museum of History and Technology.

*Functional Aspects of Photosynthetic Lamellae.* Lecture by Dr. E. Moudrianakis, Department of Biology, The Johns Hopkins University. 2 p.m., Room 43, National Museum of Natural History.

SATURDAY, DECEMBER 20, 1969

*The Creative Screen:* Serenal and The Americans: Three East Coast Artists. Repeat. See December 18 entry for details.

*Sing Out for Christmas.* See December 13 entry for details.

SUNDAY, DECEMBER 21, 1969

*Sing Out for Christmas.*

MONDAY, DECEMBER 22, 1969

*Sing Out for Christmas.* See December 13 entry for details.

TUESDAY, DECEMBER 23, 1969

*Sing Out for Christmas.*

THURSDAY, DECEMBER 25, 1969

*All Smithsonian Buildings are Closed.*

FRIDAY, DECEMBER 26, 1969

*Sing Out for Christmas.* See December 13 entry for details.

SATURDAY, DECEMBER 27, 1969

*Last Saturday Jazz,* featuring the Eddie Gale octet. National Museum of National History auditorium. 8:00 p.m. Tickets at $2.00 may be purchased at the door. Presented by the Left Bank Jazz Society in cooperation with the Smithsonian Division of Performing Arts.

MUSEUM TOURS

*National collection of fine arts*

Daily tours at 11 a.m. and 1 p.m. Weekend tours 2 p.m., Saturday and Sunday. For advance reservations and full information, call 381–5188 or 381–6100; messages 381–5180.

*National Zoo*

Tours are available for groups on weekdays 10 a.m. to 12 noon. Arrangements may be made by calling—*two weeks in advance*—CO 5–1868 Extension 268.

Visitors may purchase animal artifacts and specially designed souvenirs and books at the KIOSK, which is operated by Friends of the Zoo volunteers as a public service and to raise funds for educational programs. Open daily 11 a.m. to 4 p.m.

*Musem of History and Technology*

Free public tours of the National Museum of History and Technology during weekends are sponsored by the Smithsonian and operated by the Junior League of Washington. They will be conducted on Saturdays and Sundays through May 1970.

The tours begin at the Pendulum on the first floor, and each tour lasts for approximately one hour. Saturday tours begin at 10:30 and at noon, and at 1:30 and 3:00 p.m. Sunday tours begin at 1:30 and 3:00 p.m.

Tours are available to anyone who wants to join the docent stationed at the Pendulum at the above-specified times. However, if you would like to plan a special group tour, call 381–5542 to make arrangements.

*National Portrait Gallery*

Tours are now available for adults and children at 10:00 a.m. and 11:00 a.m. For information on adult tours call 381–5380; for children's tours, 381–5680.

FOREIGN STUDY TOURS, 1970–71

The Smithsonian has organized several special tours concerned with archeology, architectural history, art museums, private collections, and natural preserves.

*1970*

*Mexico and the Yucatan Peninsula.* January 9–23. Dr. R. H. Howland and Dr. Franklin K. Paddock will accompany a group of 30 through the historic sites of the Yucatan Peninsula and Mexico, $1,900 of which $200 is tax deductible. (Itinerary available.)

*Nepal, East Pakistan, Thailand, Cambodia, Hong Kong, Taiwan and Japan* based in

Kyoto for the Osaka's Expo 1970, returning via Tokyo). March–April 3. $2,350 of which $400 is tax deductible. Dr. Howland and Mr. Roger Pineau will accompany. (Itinerary available.)

*Classical Greece.* July 6–27, for teachers, students and those making their first visit in this area; an exceptionally inexpensive tour. A yacht has been chartered for 5 days to sail among the islands. $700. (Itinerary available.)

*Greek Islands and Byzantine Greece.* A deluxe tour, which will include a visit to the island of Crete. Dr. Howland will accompany. (Itinerary available shortly.)

*Northern Italy* (in the footsteps of Palladio). Venice, Verona and Vicenza. September 12 for three weeks . . . $1,600 of which $350 is tax deductible.

*1971*

*Asiatic Turkey.* This tour has been carried forward to April of 1971 to benefit more favorable climatic conditions.

Contemplated tours to Ireland in June; Africa; and Russia under snow just before Christmas!

Red China. Negotiations to take a group to Red China are under way. Possibly in the Fall of 1970.

For reservation and details contact: Mrs. Susan Kennedy, Smithsonian Institution, Washington, D.C. 20560 or call 202—381–5520.

MUSEUM SHOPS AND BOOK SHOPS

(Open to public during all regular hours)

*Museum shops*

1. National Museum of History and Technology—Rotunda.
2. Natural History Building—Constitution Avenue Entrance.
3. Arts and Industries Building—Mall Entrance.
4. Freer Gallery of Art—Mall Entrance.
5. National Museum of History and Technology—Mall Entrance.

*Books shops*

1. National Museum of History and Technology—Constitution Avenue Entrance.
2. Natural History Building—Mall Entrance.
3. National Collection of Fine Arts—Main Floor, 8th and G.
4. National Portrait Gallery—F Street Entrance.

CHRISTMAS GIFT SUGGESTIONS FROM THE SMITHSONIAN

The Museum Shops is featuring a Christmas display in the Rotunda of the National Museum of History and Technology.

There are dolls from 14 countries, puppets from Germany, India, Sweden and the United States and Christmas ornaments from Mexico, Germany, Thailand, Taiwan, and the mountain communities of Appalachia.

Creche groups done by American Indians are available along with ones from Sweden, Poland, Czechoslovakia, and Denmark.

The Christmas Shop, designed as the magical interior of a vast Hansel and Gretel house, includes a gingerbread house made for the Smithsonian by Braun's Catering Service. Braun's will also prepare unique decorative cookies, some almost a yard high, from a collection of early 19th century cookie molds.

Dolls, creches, games, toys and decorations are all combined in the exhibition to illustrate the origin of America's Christmas traditions.

THE SMITHSONIAN ASSOCIATES

You are invited to participate directly in the Institution's far-reaching education and research activities by becoming a member of the Smithsonian Associates. Through numerous programs for members, the Associates provide infinitely varied opportunities to explore the arts, sciences, and humanities. Call 381–5157 for information on fees and programs.

URBAN TRANSIT: PROBLEMS AND PROMISE

Special exhibition sponsored by the United States Department of Transportation. On the balcony of the West Hall of the Arts and Industries Building. The exhibit will feature sixty-two panoramic drawings and several working models of innovative urban transit facilities and methods. Through February.

CHRISTMAS CARDS

The Museum Shop in the National Collection of Fine Arts is currently offering Christmas cards featuring reproductions of paintings in the collection by James McNeill Whistler, Agnes Tait, Raphael Peale, Childe Hassam, John Twachtman, and Charles Burchfield.

MUSEUM HOURS

Smithsonian Museums are open to the public 7 days a week. Hours: 10 a.m. to 5:30 p.m. daily.

CAFETERIA HOURS

Open 10:30 a.m. to 5:00 p.m. (Located in the History and Technology Building, 12th Street and Constitution Ave. N.W.)

HOURS AT NATIONAL ZOO

Gates open 6 a.m., close 5:30 p.m. Buildings open 9 a.m., close 4:30 p.m.

NATIONAL GALLERY CALENDAR OF EVENTS

For a Calendar of Events at the National Gallery of Art, which is separately administered, please write to the Office of Information, National Gallery of Art, 6th Street and Constitution Avenue, N.W., Washington, D.C. 20565, or call 737–4215.

## VICTORY FOR COLLECTIVE BARGAINING AND THE AMERICAN PEOPLE

### HON. MARVIN L. ESCH

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. ESCH. Mr. Speaker, I am sure that all Members of the House of Representatives join me today in applauding the resolution of the railroad labor dispute without a national strike. Today's announcement of a new contract is a victory for the collective bargaining system and for the American people. The threatened strike has been averted through skillful negotiation and conciliation and without the threat of undue executive interference.

We should all be proud of the tremendous contributions which the Honorable George P. Shultz, Secretary of Labor, and the Honorable Willis J. Usery, Jr., Asisstant Secretary of Labor for Labor Management Relations made to the resolution of this dispute.

This entire procedure has shown once again the strength of our collective bargaining system and its ability to function in the exchange of views and positions between labor and management. It has shown that the legislation under which the collective bargaining process works is helpful in providing a vehicle for the exchange of positions and for resolving differences without undue Government interference. The rights of the workingmen to improve their situation and the rights of management to control the future of their corporations have both been preserved and enhanced by the mutual agreement on the terms of a new contract.

## THEODORE ROOSEVELT SHRINE IN BUFFALO IS BOUGHT BY THE UNITED STATES; RESTORATION WORK TO BEGIN

### HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. DULSKI. Mr. Speaker, just a little more than 3 years ago, on November 2, 1966, then President Lyndon B. Johnson signed into law legislation which I sponsored to preserve the Ansley Wilcox Mansion in my home city of Buffalo, N.Y., as a national historic shrine.

The Wilcox House is where Theodore Roosevelt took the oath of office as President September 14, 1901, after the tragic death of President William McKinley.

This week, the National Parks Service purchased the mansion under the law which permitted the Government to spend $250,000 toward purchase of the building, plus $50,000 toward its restoration.

The effort to save and arrange for restoration of this famous edifice has been long and hard. I am indebted to many of my colleagues now and previously in the Congress for their help to me in this community project.

In order to provide the balance of the funding for the restoration, the Roosevelt Inaugural Site Foundation was formed in Buffalo and now has assembled nearly all the financing needed to complete the restoration.

We have had truly a community-wide effort. Indeed, as was pointed out during the announcement meeting this week, this is the first for the entire Nation involving such coordination between the National Parks Service and a community group.

Mr. Speaker, the following story from the Buffalo Courier-Express details many facets of the local fundraising effort and the key participants:

U.S. PURCHASES MANSION

Restoration of the Ansley Wilcox Mansion as a National Shrine to Theodore Roosevelt was officially cleared Monday with the announcement that the National Parks Foundation had formally purchased the building at Delaware near North, from the Liberty National Bank and Trust Co.

"This is a first for the entire nation," Walter S. Dunn Jr., director of the Buffalo Historical Society, said. "Never before has the National Parks Service worked with a community group in the restoration of a national historic shrine.

MAY SET NEW PATTERN

"This pilot project is being watched by the federal government and may set a new pattern in the United States.

It was pointed out that the federal government cannot afford to buy and restore all of the historic sites communities wish to preserve.

"In the past some citizes have requested shrines just to channel federal funds into their communities," said Dunn.

Dunn was authorized by William K. Kimmins Jr., chairman The Roosevelt Inaugural Site Foundation, to contact the regional office of the National Parks Service for permission to go ahead with the work on a local level.

SPINK COMMENTS

E. Perry Spink, president of the Liberty National Bank and Trust Co., and a member of the Foundation, said that local management would be "cheaper and more effective" than having the work done through national channels.

One of the first moves will be to hire an architect, Dunn stated, and recommended Olaf Shelgren, who already has done considerable planning on the building on a voluntary basis.

One of the requirements of the National Parks Service was that in addition to funds already allocated $80,000 more should be raised locally.

"We now have all but $28,000 of this quota," said Frank D. Leavers, chairman of fund raising. "Now that we have this project off the ground and the Wilcox Mansion is now in the possession of the Foundation and the National Parks Service, we should be able to collect this sum in 30 days.

CITES A FACTOR IN LAG

"One reason we have had trouble collecting money is that a lot of people have been under the impression that this project would never get off the ground."

Leavers also suggested that the Parks Service accept donations and service in lieu of cash.

The Banks of Buffalo have pledged $11,000 annually and the Erie County Legislation $15,000 for the operation and maintenance of the shrine.

More than $2,000 has been received in Owen B. Augspurger memorial contributions. Augspurger, who was a former chairman of the Foundation, was killed in an accident last summer.

DULKSI IS PRAISED

During the foundation meeting high praise was offered for Rep. Thaddeus J. Dulski, who headed the long and bitter battle in Congress to have a bill approved for the purchase of the property by the Parks Service.

The congressional bill appropriated $250,000 for acquisition of the property and $50,000 toward restoration. The current estimate for restoration and rehabilitation is $267,000.

OTHER AVENUE

The New York State Historic Trust has appropriated $87,000 and the Junior League of Buffalo, with its donation of $50,000 is the highest local contributor.

"This certainly is a joint endeavor—federal, state and local governments and the local community," said Kimmins.

Theodore Roosevelt took the oath of office for president in the Wilcox Mansion in September, 1901. The mansion will be the only national shrine in the state west of the Hudson River.

## DRUGS—FOR OR AGAINST YOU

### HON. J. HERBERT BURKE

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. BURKE of Florida. Mr. Speaker, this week I received an encouraging letter from a young constituent of mine in Fort Lauderdale, Miss Susan Seger, concerning the dangers of drug use by young people.

Miss Seger's comments are concise and to the point, and reflect, I feel, a great deal of wisdom on the part of someone who is only in the 10th grade.

At this time, I would like to bring her remarks to the attention of my colleagues in the House, for they were made by the kind of young American who represents the real future of this Nation:

DRUGS—FOR OR AGAINST YOU

Drugs, a simple five letter word that is used almost every day. Not just used in pronunciation but in the form of acid, pills, grass and many others you can name. I feel that anyone who buys, sells or peddles any kind of a harmful drug should be institutionalized where they can receive medical help or understanding where needed.

Anyone who cannot realize the dangerous risks involved in the usage of narcotics is in need of help. I see no great reward in having brain damage come sooner or later. It has been proven over and over what drugs can do. Just because one person says "It's the greatest, do it" someone does. What happens to one person does not mean it will happen to all. No two people are alike. Why try and find out the hard way. Just think, are drugs for you or against you?

SUSAN SEGER,
*Stranahan School.*

## FIGHT THE GOLD FLOOR PROPOSAL

### HON. RICHARD T. HANNA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. HANNA. Mr. Speaker, the enlightened and courageous leaders of our international monetary policy have just delivered us out of the hands of gold zealots and gold speculators. The latter were trying to force an artificial increase in the price of gold and were foiled. Now they are back seeking an artificial but officially supported floor for gold. "A pox on their house," I say. We should send them packing once again.

What the bullion dealers, their clients, and the gold extractors want is a secure and sheltered market supported and risk limited by official governments, especially the United States. Let the gold suppliers of South Africa and the U.S.S.R. have the responsibility for the "free" market of gold. For once the law of supply and demand should function with full risk for the fat cats of the bullion market. They have enjoyed the greatest artificially cushioned, sweetened market condition in the experience of modern times. They had the gold pool to underwrite their borrowing for speculation and the $35 floor to safeguard serious losses. Let them go it alone for awhile.

The assurance for protection of value for presently held gold reserves do not—I repeat, do not—require a floor on gold. All that is required is honor among established governments to maintain an agreed price reference for reserves to be used in settling accounts at the $35-per-ounce figure. Leave the private gold market to its own devices. I assure one and all that, as painful as the move will be for the gold suppliers, the bullion brokers, and the speculators, the commercial gold users will not find the circumstances strange nor harmful.

The gold overhang resulting from the shakeout of gold hoarding by the worst of the speculators is a temporary phenomena. For the time being it is painful for the hoarder—a fact that illicits no tears from me. It is worrisome to the gold extractors, which is a humbling but not disastrous experience for those who a short while back had a throttle hold on key currencies. It provides a loss of undeserved haven for the bullion brokers of London, Paris, Frankfort, and Zurich but they have been around for 50 years and can be expected to not only survive but continue to prosper.

Having gained a well-deserved freedom from the gold manipulators and dealers, please, I beg, let us not now blow it.

If governments keep their powder dry; if bankers do not venture to rush in where governments declare they will not tread then bullion dealers will wait and market management and prudent promotion will fall to South African gold producers and their colleagues which is where commodity market responsibilities should lie. We would then see a clear future for the freedom of the international reserve system from the importunings and costs of the industrial and speculative gold trade. A goal devoutly to be desired—a condition clearly within reach.

Treasury officials of these United States take note. IMF representatives of the United States mark well.

Mr. Speaker, I would like to have a recent article on the gold market from the London Economist included after my remarks. Also, I would like to have included two excerpts from the Washington Post. I know this subject matter is considered by most of my colleagues as beyond their ken but I would hope that all would take the time to review these materials. It is, in my view, exceedingly important that we realize our past policies have served a passel of international parasites. We have rid the international monetary body of their debilitory attachment let us not be parties to a voluntary reattachment.

The material follows:

[From the Washington (D.C.) Post, Nov. 23, 1969]

GOLD SPECULATORS GLUM

(By Hobart Rowen)

The spectacular slide in the price of gold is a happy development—happy, that is, except for South African gold producers trying to prop up the price and speculators who have been betting that the producers would win out.

As an indication of how things change in this fast-moving world, today's big question in gold is whether the price will have to be supported to prevent it from moving below the "official" $35 an ounce level!

In addition to the South Africans and speculators, there are some banks hurting too—notably the usually canny Swiss private banks that bought large amounts of gold well over $40, and lately have been unloading their hoards.

The drop in gold from a peak of nearly $44 earlier this year is a triumph for intelligence over mythology, for planning over taboos. But it also involves an element of luck associated with the student revolution in France last year.

Essentially, the price of gold is lower because confidence in the international monetary system—incurrencies—is greater. When paper money is suspect, people want to get rid of it, and stuff gold—although it earns no interest—under the mattress. Essentially, but the more sophisticated do the same thing, but because they expect to make a profit on a rise in the price.

That, in a broad way, was what was happening in 1967 and early 1968, when gold speculators raided central bank reserves—through the London gold "pool"—for about $3 billion in gold at $35 an ounce. The British pound had been devalued and the smart money in Europe was betting that the dollar would go the same way.

Finally, in a historic move, the seven major financial powers cut the flow off on March 17, 1968, and established a two-tier system: the $35 price was maintained for official transactions, but the price was free to fluctuate in private markets (the other tier) in response to demand and supply.

That was the big step: in essence, it was the beginning of demonetizing gold, a process of letting the monetary function of gold fade away. What the seven powers were saying was that the $40 billion in the existing gold reserves was "money" gold, but that newly mined gold would become a mere commodity, good for such things as filling teeth, jewelry and industrial purposes.

Not everybody believed it, notably France—which had dropped out of the London gold pool, and therefore did not join in the Washington agreement. With total reserves of $7 billion, including nearly $4 billion in gold, the French government was a leading advocate of doubling the price of gold. (Fifteen months later, France had almost run through that seemingly fat reserve cushion.)

And the South Africans, who wanted both an assurance of a $35 floor, plus freedom to play the private market for the highest possible price, held onto their gold. This was an attempt to frustrate the intention of the Washington agreement: the authors of the two-tier system calculated that if the central bankers bought no more gold for "money" purposes, the South Africans would have to sell all of their newly mined metal in the private market, depressing the price.

For a time, the case for the speculators looked fairly good: gold prices rose steadily, and suspicion of currencies was heightened by the collapse of the French economy under an assault led by Danny Cohn-Bendit.

But a weaker franc took pressure off the dollar; moreover, the crisis in France stilled one of the loudest voices pressing for an increase in the price of gold. Despite a continuing U.S. balance of payments deficit, there was a steady drift toward reliance on the dollar as the standard of the international monetary system.

The coup de grace was given by the Euro-dollar market: when average interest rates in London rose from 8.41 per cent in mid-May to 11.44 per cent in mid-July, it killed the gold market. Gold no longer was a good speculation, and the speculators cut and ran. With Euro-dollar rates at those levels, expert Edward M. Bernstein points out, gold would have to go up about $4 an ounce to produce a comparable profit. But in the same two months, while Euro-dollar rates were booming, gold hit a peak and never got back to it.

All of this made it apparent that the U.S. could persevere in a tough attitude toward South Africa. And if a world anxious to improve its holdings of reserves (the French lesson was a shock) could no longer depend on the barbarous relic of the past, it had to look to something else.

If gold alone couldn't fulfill its old role as a reserve cushion, what could? The answer was ready-made and available, the Special Drawing Rights (SDR) system, sometimes called "paper gold," that this country had been trying to push down the throats of the gnomes of Zurich for a couple of years.

The victory over the gold speculators was nailed down early this summer by Treasury Under Secretary Paul Volcker when he won agreement from his counterparts in Western Europe for creation of an astonishingly high volume of SDRs, $3.5 billion the first year, and $3 billion each in the second and third years.

This decision, ratified in September by the International Monetary Fund executive directors, assured an adequate growth of reserves without (1) new gold or (2) marking up the price of gold. I can report from my own conversations with Swiss bankers during the Copenhagen meeting of the American Bankers Association in May that they were thinking that an annual volume of $1 billion in SDRs would be desirable, and that in no case should the figure go over $2 billion. When the $3-plus average for the next three years was assured, the gold game was over.

Confidence in the international monetary system has been helped not only by the SDRs and the success of the two-tier gold market, but by the re-alignment of exchange rates, especially the up-valuation of the German D-mark which followed the devaluation earlier this year of the French franc.

And when it came to boosting IMF quotas by about $7 billion, some of the same clever heads who figured out the two-tier system and the SDRs, found out a way to do it without requiring a new supply of gold.

There would seem to be a good chance, now, of a period of calm ahead on the international monetary front—at least by comparison with the crises of the past two years. The new parities appear to be a better reflection of their real values. Moreover, there are studies under way of how to introduce more flexibility into the exchange rate system that will avoid the kind of crisis for which the gold bugs light candles.

Ironically, at the very moment that the dollar is strong and gold is weak, some Europeans still express worry that the dollar might be affected in future years by a large capital outflow, once high interest rates in the U.S. settle back.

But for the moment, that is only a gnawing concern, and for the somewhat distant future. As of now, officials can relish the repeated bulletins from the London market that show declines, instead of advances. With the overhang resulting from the speculative hoarding of 1967–68 still to be worked off, the South Africans would do well to get an agreement that gives them a floor price.

In all probability, the dollar today is worth more than 1/35 of an ounce of gold. Or, to put it another way, gold is probably worth less than $35 an ounce. But to prove that point, bankers would have to mark down their own $40 billion hoard—and that they're not likely to do.

---

[From the Washington (D.C.) Post, Nov. 28, 1969]

## U.S. Mulls Floor Price for Sliding Gold Market

(By Hobart Rowen)

A behind-the-scenes debate is taking place at high levels in the U.S. government on whether or not to place a floor price under the sliding gold market.

Pressure for such a floor, presumably at the "official" $35 price, is coming not only from South Africa, the major producer, but from European governments who allege that if the price drops below $35 an ounce, it would be unsettling to their citizens who own gold, and to some extent, to their own treasuries.

The unofficial market price for gold has dropped from nearly $44 an ounce this past spring to within pennies of the $35 official price. It closed in London Wednesday at $35.60.

Key U.S. Treasury officials have had sporadic talks with the South African government for almost a year on whether a floor price should be instituted, and if so, at what level. There has been no agreement.

### ADMINISTRATION HOPEFUL

But contrary to the view of some influential congressmen and other experts, the position of the Nixon administration is that it is possible to reach an agreement with South Africa that would be beneficial to the U.S.

"I am not taking the position that no agreement (with South Africa) would be desirable," a high official told The Washington Post. Presumably, the U.S. would have a quid pro quo for a floor price: South African agreement to push the bulk of its newly-mined gold into the unofficial, non-monetary market.

But this willingness to consider a deal with the South Africans draws the ire of Rep. Henry Reuss (D-Wis.), who heads the Joint Economic subcommittee on such matters.

Reuss says an agreement would be "stupid." The U.S., he says, should accept the opportunity provided by the lowered gold price "to be cool and correct." In that case, he argues, the South Africans "will have to sell their gold on the free market, and the price could drop to $28 or even lower."

### KENNEDY TRIP

Despite Reuss' objections, the U.S. will outline its conditions for a gold price deal to its major continental allies, when Treasury Secretary David M. Kennedy goes to Europe for a NATO conference next month.

Reuss also condemned the Treasury's failure to criticize West Germany for including $25 million in South African rand in its recent $540 million drawing of currencies from the International Monetary Fund.

Eventually, Germany will exchange the rand with South Africa for gold, which Reuss regards as a technical violation of the March 1968, agreement not to add to gold reserves.

Most U.S. officials are annoyed, but not upset by the movement of South African currency out of the IMF, subsequently to be traded for gold.

But direct sales of gold to either the IMF or major central banks would be a different issue, and while the preference of the U.S. government is to maintain the tough attitude toward South Africa it has held since March, 1968, there are those who feel they must make concessions to the edgy European point of view.

Moreover, as a practical matter, it is conceivable that leading European central banks, anxious to see a floor for gold, may provide it, themselves, regardless of U.S. reservations or conditions.

And over and above these considerations, some U.S. government officials argue that it is not very important, anyway, whether a floor price is provided. "The significant thing," said one man, "is that we are living in an SDR (Special Drawing Rights) world. The growth in reserves is going to be in SDRs. We don't have to be concerned, because whether or not there is a gold price floor, the importance of gold is going to diminish over time."

Critics say it would be a mistake to give in now to the "ill-conceived" concern among Europeans that the value of their reserves might drop. Reuss suggested that any central bank worried about the value of gold could sell official *holdings* to the IMF for SDRs.

The IMF maintains a discreet silence, since its governing board is the creature of individual governments not yet in agreement on the issue. But within the IMF staff, there is known to be a feeling that it has some obligation to buy gold from any country offering it at the official $35 price.

Those who oppose this think it an unnecessary concession. "We shouldn't give a damn what happens in the (unofficial) gold market," says an official who helped create it last year.

Reuss revealed that a report by his committee, to be issued in a few weeks, will condemn any step toward providing a support price as weakening the two-tier system.

SDR SYSTEM SUCCESSFUL

Behind the slide in gold prices, precipitous in the past several weeks, has been the successful institution of the Special Drawing Rights system, which makes it evident that the principal growth in monetary reserves in the next many years will be from that source, not gold.

Speculators' interest in gold has also been diminished by stronger currency markets, and the high-level of interest rates, especially in the Euro-dollar market, which makes gold hoarding unattractive.

The net effect of all of this, however, has been to force the South Africans to build up a stock of about $1 billion in gold, for which the monetary reserves of the major nations are no longer an outlet

Since March, 1968, when these nations agreed that it was no longer "necessary" to buy newly-mined gold for their reserves, South Africa has been lobbying for an agreement which once again would allow its gold to move to central banks and into the IMF.

There are strong emotions on both sides of the issue. Some Europeans, backing the South African desire for a floor price, insist that the March, 1968, agreement establishing the two-tier system did not guarantee that central banks would never buy additional gold for monetary reserves.

But Reuss argues that if the South Africans can "stockpile" some of their excess gold in official reserves, it will force the unofficial reserves, it will force the unofficial price up, thus putting pressure on the dollar.

"Why should we give this racist country a floor for its gold," asks Reuss, "when the needy countries of the world cry for and do not get stabilization of cocoa, coffee, and other commodity prices?"

---

[From the Economist, Nov. 15, 1969]

GOLD BETWEEN TWO POLES

Up to March 15, 1968 the marketing of gold was child's play. The price was underpinned at the bottom end by the fact that central banks were willing to take unlimited quantities at $35 an ounce, and encountered an equally impenetrable barrier at the top end—just a few cents up—an account of the willingness of the same central banks, and especially the Federal Reserve Board, to supply unlimited quantities as well. That appeared to be the basis of the international monetary system, and was apparently immutable. Towards the end there were doubts about the bankers' ability to maintain the supply, even with the mechanism of the gold pool, devised in 1961 to facilitate the flow. But that was scarcely a problem for the entrepreneurs who had built up and conducted the markets over a period of centuries. Indeed, it made life extremely easy for them: turnover soared on a one-way speculation that the price might be forced up.

It was even better than that. The bullion merchants were free to take a position themselves and there is no reason to suppose they failed to do so. In the event the speculators—a polygot of governments, dealers and faceless men—came within an ace of bringing off one of the most spectacular financial coups of all time. They failed, but still they did not lose. The price of gold has not doubled but in the subsequent experience of the market it has at least at all times been higher than $35. The fat cats did not audibly purr, but for several months they did complain cheerfully of "indigestion," and indeed had every reason to be contented.

For a while. As long as gold was bought and sold at roughly $35, participation in the market amounted to the comfortable occupation of buying gold in order to sell it—sometimes re-refined, often reshaped—for a relatively modest margin. As long as it had been bought for $35 and could be sold for more (the situation after mid-March last year), the market, though potentially less cosy, was rather more profitable. Up to and for much of 1968 the market lacked a serious challenge to its skills. But for the interruptions of war, the shape of the market had been reasonably stable for some 50 years. London was much the maine centre, its dominance assured by the supply arrangements of the biggest producer, South Africa, and of the gold pool, both of which entrusted their disposals to the Bank of England, which in turn was represented in the London market by one of the five participants (Rothschild).

Under this dispensation the other markets were neatly complementary. The freight advantage enabled Hongkong to attract the bulk of Australian gold for sale in the Far East, giving it an unassailable but limited base. The Zurich banks, having organised themselves into a market in 1947, were unbeatably placed to meet the requirements of smugglers supplying Italy's important jewellery industry; and, relying on London as a source, did not immediately threaten its turnover but in fact helped to expand it. Markets in North America, Paris, Beiruit and elsewhere, both officially-blessed and clandestine, were able in some measure to cater to local needs, but in one way or another tended to operate as extensions of the London market. There the competition consisted of drumming up business in a gentlemanly way, sometimes on price but more often on service and product differentiation.

The morning and afternoon "fixings" (the latter introduced to offer a guidepost for trading in North America) have never implied an absence of price competition, nor has the system meant that dealers reveal their turnover to each other. The opportunity for product differentiation occurs not only in shapes and sizes, but surprisingly enough in the cultivation of brand loyalty. This has been proved by Johnson Matthey (known over large tracts of the Middle East as "John Matthews"), whose mark is demanded by some of the wealthiest traditional hoarders.

The bullion dealers did not have to worry about supply at all, and there is not a great deal of evidence that they worried much about the composition of demand. Indeed, they hardly needed to: there is ample evidence that increasing amounts of gold found their way into private hands year by year for at least a decade. The International Monetary Fund put the offtake at 520 metric tons in 1957, 1,031 tons in 1962 and 2,654 tons in 1967.

The profound change which occurred last year was, of course, the freeing of the price—flowing from the decision of the big central banks that they would not again participate in the market, either as buyers or sellers. This left the market without firm guidelines, except perhaps for the assumption (which, strictly speaking, is still no better than an assumption) that $35 an ounce is the floor price below which gold cannot fall. Not even the decision itself was taken at face value, hence the substantial premium on March 18th. In that moment the bullion dealers lost whatever chance they might have had to keep the market firmly under control. Had the price settled at about $35, and had it been established that it was underpinned at this level, the dealers would at least have had an opportunity to put their stamp on subsequent developments. As it was, the situation immediately became too big for them to handle. For there has ever since been a large speculative element in the price, involving risks which no private bank or banks could think of running.

GAMBLING ON THE OVERHANG

Recent unofficial estimates, prepared for Consolidated Gold Fields, underline the point. They suggest that of 7,485 metric tons of gold falling into private hands in the four years to end-1968, perhaps 4,691 tons were acquired by industrial end-users of various kinds (of which, 1,296 tons in 1968, see chart). This left 2,794 tons with hoarders, speculators and middlemen at the beginning of the current year, worth some $3½ billion at $40 an ounce. It has obviously been impossible to take a view (i.e. to buy gold at ruling prices, which in point of fact have fluctuated between $39½ and $43¾ without gambling on the firmness with which the bulk of this overhang is held. And that is only one of the speculative features to be set against the prospect of an industrial offtake of perhaps 1,300 tons this year (the estimate offered by the Gold Fields economists in September—itself some 80 per cent higher than projections of the IMF's calculations, which were all the market previously had to work on). The others are that newly-mined gold from western sources (mainly South Africa) is arriving, potentially on the market, at the rate of 1,280 tons a year; and that Russia's output and intentions are unknown but significant.

The immediate aftermath of mid-March was that London shut up shop for several days while the market in Zurich was promptly reorganised with central bank approval by the formation of a three-bank pool, in which form it has continued to function ever since. For several months it published its turnover (see chart). The initial reaction was a sharp burst of speculative buying, which the Swiss banks sought to discourage by quoting a marked differential between buying and selling prices. This was soon followed by a disgorging of speculative hoards, a lot of which had evidently found their way to Switzerland for safe keeping. Sources close to the gold mining industry have surmised that the Zurich market achieved an edge over London in terms of turnover in the ratio of perhaps 60 to 40. Except for small test sales, South Africa kept its gold off the market for much of the rest of 1968, thereby preserving the premium and also, in effect, taking on its shoulders full responsibility for the management of the market.

The South Africans were confident in mid-1968 that a rise in the official price of gold could not be long delayed. They were not alone in that as the free market premium continued to show. And as came to be demonstrated early in 1969, when it transpired that the Swiss pool had bought a substantial quantity of South African gold. This surprising development implied that the Swiss were bidding to take over the job of judging the market—for which they were variously described as arrogant and courageous. It was a long shot even if, as is probable, they had agreed only on short-term strategy: having done no more about consumer research than their London counterparts, they must surely have been gambling on such factors as a resumption of speculative buying and the settlement of South Africa's dispute with the United States (under which, to date, with minor exceptions, South Africa has been unable to use its gold in transactions with the IMF and central banks at the old price of $35). In this they were sorely disappointed.

The upshot is that bankers in general have abandoned the attempt to assert their mastery over the gold market. As with commodity markets the world over, the major producers (in this case the South Africans) have little choice but to carry the costs of management—as to rationing supply, as to establishing who the customers are, and (which has yet to be seen) as to promoting their product. It is neither a bankers' market, nor a free market.

Circumstances could change. Adopting the projections of Consolidated Gold Fields, a few years of rising demand and dwindling supply could restore the markets and the bullion dealers to their former glory. That might equally well be achieved, though more drastically, if declining prices caused a shake-out of dispirited hoarders and returned gold to its floor. Life has been full of surprises for the bullion dealers. It is little wonder that in celebrating, this year, the fiftieth anniversary of the daily London "fixing," they have been anything but despondent.

## THE GREEK TRAGEDY

## HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. FRASER. Mr. Speaker, on November 18 I placed in the RECORD two articles detailing the attempts of the ruling colonels to stifle the Greek press. Another aspect of the colonels' campaign was reported on November 26, 1969, in the New York Times. The article follows:

GREEK PROVINCIAL POLICE BAN SOME ATHENS PAPERS

ATHENS, November 25—Most of the daily newspapers of Athens were prevented today from circulating in north and central Greece.

The ban was apparently imposed by local security police Greece's military-backed government, which recently issued a new law attesting to "freedom of the press," had no official comment.

For the last six weeks, newspaper publishers and distributors have reported police obstruction in the provincial sales of Athens newspapers not actively friendly toward the Government.

It began with ban on the sale of specific issues of national newspapers. On an apparently haphazard basis, newspaper distributors in some provincial towns were ordered to ration the sales of Athens newspapers that did not support the regime. This was later changed to a system of quotas sometimes representing 20 percent of the newspapers' normal sales.

Today's measures were enforced differently and more drastically. Technically no newspapers were seized and no quotas were set. The police visited news vendors in the Thessaly area of central Greece and ordered that the bundles of all but three Athens dailies were to be returned unopened to the publishers. The sale of newspapers friendly to the regime, Eleftheros Kosmos, Nea Politeia and Vradyni, was permitted.

The battle between the Government and the press started soon after Premier George Papadopoulos abolished preventive censorship on newspapers on Oct. 3.

The press reacted cautiously but with wit. There were cartoons ridiculing the Portuguese elections or of Spain that were easily translated by readers into comment on Greece.

Headlines were often calculated to irritate the Government, and two Athens dailies published series on the attempt of exiled King Constantine to topple the military-imposed regime.

Athens publishers were called in by Government officials and told to mend their ways. But officially the Government denied any attempt to harass the press.

Deputy Premier Stylianos Patakos said early this month: "What has happened is that readers are so disgusted with what newspapers print that they naturally refuse to buy them."

Under the new press law, which goes into effect Jan. 1, any interference with newspaper distribution not authorized by judicial authorities is punishable by a minimum three-month prison term.

Nothing has been more characteristic of the junta than their attempt to end the free press in Greece unless it is the colonels' periodic announcements of reform timetables. The latest was reported by the Times on November 24. The following day an excellent editorial put the latest "reform" in its proper perspective:

GREECE REPORTS TIMETABLE FOR REFORM

ATHENS, November 23.—Greece's military-backed Government said today that it had set a firm timetable for the restoration of representative government, which was abolished in a coup d'état 31 months ago.

This assurance was given by Foreign Minister Panayotis Pipinelis in an article published today in the Athens newspaper Acropolis. In the article, which did not disclose any dates, Mr. Pipinelis said:

"I can assure the Greek people that the actual Government under its present leadership is in a position to carry out unfailingly the program for a phased application of the whole Constitution within a predetermined time limit. Then the Greeks will be called upon to express their opinion on its accomplishments, in order to consolidate them or even smash them if so they wish."

The Foreign Minister's statement marked a step forward from earlier vague declarations that full constitutional rule would be restored "only when the revolution's goals have been accomplished." One of these goals is the civic re-education of the Greeks, which could last a generation.

ALLIES PRESSING GREECE

Most civil and political liberties of the Greeks have been in abeyance since the army coup in April, 1967.

Greece's Western allies have been pressing the leaders to commit themselves to a timetable for evolution toward democracy. The United States even "selectively suspended" military aid to Greece as leverage for political changes.

The Greek leaders have so far resisted this pressure on the ground that they alone "shall determine when the time is ripe for democratic evolution, bearing in mind the interests of the Greek people."

Mr. Pipinelis's statement that a timetable does exist comes at a time when most of Greece's allies and friends are reviewing their attitudes toward the Greek Government in view of the slow progress toward a return to democratic government.

A crucial decision is expected in Paris Dec. 12 when the 18 foreign minister of the Council of Europe meet to consider the motion to oust Greece for suspending democratic freedoms and parliamentary rule.

Earlier efforts to avert an ouster, by inducing Athens to pledge itself to an irrevocable timetable for democratization, failed last September when the three-phase program submitted by the Greek Government, covering the period to the end of 1970, fell short of promising either the lifting of martial law or the holdings of free elections.

CHANGE IN ATTITUDE IMPLIED

Mr. Pipinelis's statement implied a change of attitude. If a guaranteed timetable leading to elections were announced. Greece's explusion from the Council of Europe might be averted.

The Scandinavian countries, Belgium and the Netherlands which have led the movement to expel Greece, were joined this week by Britain. Britain made it clear that unless definite proof of good faith were produced by Athens at once Britain would support the ouster movement.

GREEK'S PREDICTABLE JUNTA

One thing can be said about the Greek junta: Its international political maneuvers are entirely predictable. It invariably begins to make noises about restoring freedoms or returning Greece to representative rule when it is facing the threat of international censure or condemnation.

Thus, almost on the eve of the meeting of Atlantic Alliance ministers in Washington last April, Colonel Papadopoulos proclaimed "restoration" of three articles of the 1968 Constitution relating to civil liberties. With this meaningless gesture he was trying to head off a threat of NATO action against Greece.

And thus, with a move to expel Greece from the Council of Europe coming up at the meeting of foreign ministers next month, Foreign Minister Pipinelis discloses that the junta has a definite timetable for elections and a return to representative government. Mr. Pipinelis gives no dates—just assurances that the regime will apply the Constitution in phases "within a predetermined time limit," and that the Greeks will then be given the opportunity "to express their opinion on its accomplishments." They can vote to consolidate those accomplishments "or even smash them if they so wish."

Mr. Pipinelis at seventy is a pathetic figure: the only political leader of any prominence to serve the colonels since King Constantine's abortive countercoup of 1967; the only political name the junta has been able to flaunt abroad in the vain attempt to garner respectability.

Mr. Pipinelis is the foreign minister in name only, as he certainly discovered long ago; and not even he can really believe that Papadopoulos, Patakos and Company have a timetable for legitimate elections or any intention of submitting themselves to a free judgment of the Greek people.

Finally, the European Commission for Human Rights has concluded its study of the Greek regime. They reportedly have found that torture and ill-treatment are "an administrative practice" that is "officially tolerated." Those who defend the colonels' government should carefully consider this report and the effort which will be made later this month to expel Greece from the Council of Europe.

At this point I include in the RECORD news reports of these developments:

INQUIRY ON GREECE REPORTS TORTURES: EUROPE COUNCIL STUDY ALSO FINDS MANY FUNDAMENTAL RIGHTS ARE BEING DENIED

(By Alvin Shuster)

LONDON, November 28.—The European Commission for Human Rights has concluded that Greece's military-backed Government allowed torture of political prisoners and denied many fundamental human rights.

Its 1,200-page report, the result of more than two years of investigation, found that torture and ill-treatment were "an administrative practice" that was "officially tolerated." It charged that Greek authorities had taken no effective steps to stop the practices.

The commission, an agency of the 18-nation Council of Europe, also found that, contrary to contentions of the Greek regime, there was no danger of a Communist takeover at the time the army colonels seized power on April 21, 1967, and imposed martial law, still in effect.

"There is evidence indicating that it [a Communist takeover] was neither planned at that time nor seriously anticipated by either the military or police authorities," the commission said.

Its still-confidential report, in four volumes, is likely to bolster the case of govern-

ments that will push for the expulsion of Greece when the ministers of the Council of Europe meet in Paris on Dec. 12. The council has postponed action awaiting the commission's findings, which have now been submitted to the member nations.

Apart from the blow to Athens' prestige, expulsion from the Council would also mean removal of Greece from the Parliament of Europe, which sits in Strasbourg and prepares social and economic programs for its members.

BRITAIN TO BACK EXPULSION

Britain has decided to vote against the regime at the meeting and is trying to influence others to do so. The United States, although not a member of the council, has indicated concern about Greece's expulsion, fearing, in part, that it might lead to pressure to expel her from the North Atlantic Treaty Organization as well.

Some United States officials also worry that such council action might lead the colonels, out of pique, to withdraw from participation in NATO.

Greek leaders have sought to give the impression of movement toward democracy. They are expected to defend themselves at next month's meeting by citing steps they have taken, including recent talk of a still-vague timetable for the restoration of representative government.

But the regime will be presenting its arguments against the background of the most detailed and official condemnation of its actions yet. The report represents the efforts of lawyers who took hundreds of hours of testimony and even traveled to Greece for on-the-scene investigation. Some have called their work the weightiest international legal inquiry since the Nuremberg trial of war criminals after World War II.

Technically, the council cannot take any steps on the basis of the report until three months after its submission. But such countries as Britain, Norway, Sweden and Denmark believe there are sufficient grounds for action now anyway.

CHARTER VIOLATION CHARGED

The conclusions—that the use of torture had been established "beyond doubt," that human freedoms are violated and that no Communist threat existed at the time of the coup—go to the heart of the case. The report concludes that the Greek regime has thus violated the conditions of membership, in particular Article 3.

That article in the charter of the council, founded 20 years ago, states that members "must accept the principles of the rule of law and of the enjoyment by all persons within its jurisdiction of human rights and fundamental freedoms."

Such rights may be suspended under the charter in "time of peril or other public emergency threatening the life of the nation," but the commission found that these conditions did not exist at the time of the coup.

The report said that while there was a period of "political instability and tension" in Greece, this did not constitute a "public emergency." While there were demonstrations in the streets, it said, the situation did "not differ markedly from that in many other countries in Europe."

It also rejected the Greek Government's argument that continued suspension of rights was necessary because of bomb incidents and the growth of "illegal organizations."

"The commission does not find, on the evidence before it," it said, "that either factor is beyond the control of the public authorities using normal measures, or that they are on a scale threatening the life of the Greek nation."

CONFRONTED GREEK AUTHORITIES

The report said that competent Greek authorities, "confronted with numerous and substantial complaints and allegations of torture and ill-treatment," failed to take any effective steps to investigate them or to insure remedies for "any such complaints or allegations found to be true."

Moreover, the report said that Greeks were being denied such fundamental rights as freedom of expression, association, a fair trial, and free elections at regular intervals, such rights, it noted, are required under the council's charter.

The report, prepared by a subcommission of the Human Rights Commission, was adopted by the parent group earlier this month. It was submitted to the member countries nine days ago.

The council, primarily an advisory organization, was organized to further political, social and economic unity of Europe. Its other members are Austria, Belgium, Cyprus, France, West Germany, Iceland, Ireland, Italy, Luxembourg, Malta, the Netherlands, Switzerland and Turkey.

---

GREECE: TROUBLE AHEAD FOR THE COLONELS

LONDON.—The regime of the colonels in Greece will shortly face one its more difficult diplomatic tests since the 1967 coup that brought it to power. The Council of Europe, meeting in Paris a week from this Friday, will consider suspending Greece from membership because of her undemocratic military government. The expectation here is that the council will vote for the suspension.

The move against Greece has more than the usual potential of mere name-calling motions in international organization. This action might have a real political effect in Greece. And it is also noteworthy because it has aroused a rare difference of diplomatic opinion between Britain and the United States.

Britain is going to vote against the colonels, and the Foreign Office is playing a leading part in trying to persuade others among the 18 council members to do so. The United States, which is not a member of the Council of Europe, has indicated to its European allies its uneasiness over the British move.

The American concern is with Greece's position in the North Atlantic Treaty Organization. The growing number of Soviet ships in the Mediterranean, the coup in Libya and the unending Arab-Israeli tension have all intensified the view in Washington that Greece is vital as a military ally.

U.S. MILITARY AID

American military assistance, which was cut off after the colonels' revolution in 1967, was resumed in part after the Soviet invasion of Czechoslovakia last year. Some aircraft, minesweepers and other items especially useful for NATO support are now going to Greece. And the United States again has an ambassador in Athens.

What worries American officials is that the colonels, in pique at a slap from the Council of Europe, might suspend Greek participation in NATO's operations on the southern flank of Europe. Diplomats here report that various Greek sources have been voicing threats of that kind in an effort to prevent an adverse council vote.

British officials are skeptical at the notion of Greece's withdrawing from NATO in pique. They argue that the Athens regime needs NATO more than the alliance needs it—especially because the colonels depend for their power on support from the army, which greatly values the NATO role.

European sentiment against the colonels will doubtless be further stirred by a report of the European Human Rights Commission. A massive study of repression under the military regime, in four volumes, it began leaking out here over this weekend. The study concludes that the regime has made a practice of using torture and has denied most of the fundamental rights of man—of expression, association, fair trial and free elections.

The charter of the Council of Europe, an advisory body created in 1949, says that members "must accept the principles of the rule of law and of the enjoyment of human rights and fundamental freedoms." It is because the council has that political basis that Michael Stewart, the British Foreign Secretary, has insisted on dealing with Greece.

At the last meeting of the Committee of Ministers, in May, Greece was in effect put on probation. A resolution warned that she would be suspended unless the Government took steps to restore democracy and the rule of law.

British officials see no sign that the colonels have rule since then. No date has been set for any elections. The press is still gagged. The colonels dismissed the President of their Council of State last summer when he found that they had gone beyond their powers in acting against some judges; for good measure the colonels exiled the lawyers who had handled the case.

American diplomats say the United States has persistently urged the colonels to get the country back to representative democracy. But the United States is plainly reluctant to apply direct pressure.

One American worry is that successful action against Greece in the Council of Europe would lead to demands for her expulsion from NATO. The British argue that NATO's purpose is altogether different. They also say that failure to do anything in the Council of Europe might bring pressure in three NATO countries—Norway, Denmark and the Netherlands—for a move against Greece in NATO.

The members of the Council of Europe are Austria, Belgium, Britain, Cyprus, Denmark, France, West Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Malta, the Netherlands, Norway, Sweden, Switzerland and Turkey. At least 10 of the 18 must vote for expulsion for the motion to prevail.

The council's purpose is to further the political, economic and social unity of Europe. It has sponsored a large number of treaties on legal, social and practical communications questions. One of the treaties is the European Human Rights Convention, which is accepted by many European states and has a court to enforce its provisions.

Exclusion from the council would bother the Greek regime primarily as a symbol—a blow to the prestige that the colonels have carefully tried to foster. Loss of council membership would also deprive Greece of her seats in the Parliament of Europe, which sits in Strasbourg and acts as an advisory legislative body for Europe.

---

## DR. WILLIAM MASON, OF TRUESDALE HOSPITAL

---

## HON. MARGARET M. HECKLER

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

*Friday, December 5, 1969*

Mrs. HECKLER of Massachusetts. Mr. Speaker, few human relationships are nobler and more endearing than that of the physician and the families he serves. In this day of the medical specialist, however, the traditional family physician has become a vanishing breed.

It is fitting, therefore, to pay high tribute to a man like Dr. William Mason, of Truesdale Hospital, in Fall River, Mass. He typifies the traditional family physician. I think for many of us this article, which I am inserting in the RECORD, will bring back "memories that bless and burn" of our own family doctors.

In his years as a family physician, Dr. Mason has earned the love and respect of innumerable families in Fall River and throughout my district. I know him personally as a delightful individual and as a great humanitarian. His "joy" in his relationship with his patients is the quality of a family physician most frequently cited by the author of this moving article. It is also the attributes which has made Dr. Mason so successful in his field.

I feel certain that many will enjoy the article from the Spectator, of Somerset, Mass., which reads as follows:

[From the Somerset (Mass.) Spectator, Nov. 13, 1969]

A POIGNANTLY, BEAUTIFUL MEMORY

(By Ruth Howland)

Many of you, my older readers, I know, will enjoy these memories and I am sure you have your own lovely remembrance of the same man—Dr. William Mason, of Truesdale Hospital.

A recent, brief visit there, when he popped in one morning to see me, brought back many of the "memories that bless and burn". Dr. Mason was for years our family physician and although not an old country doctor, still had many of the qualities of those dear people.

The especially lovely and sometimes sad memories were of his care of my dear mother even to her last breath, at 88. She as I have written before, was a pretty, little woman and always extremely clothes conscious. When she was due for a visit to Dr. Mason, she would primp and polish as if she were a young girl going out with her beau. He always repaid that and it was a delight to see them together. He would help her up onto the examining table, and then stand back in admiration as if she was of his own creation. "Now, I ask you. Did you ever see a prettier little woman for her age, in fact for any age?" Mother would blush and almost simper; while our hearts were warmed by his sincere joy in her and we would grin, on the side, that "she still kept the tilt to her kilt".

Until the last few weeks of her life, although she had to give up many of the joys—her church work, Sunday School teaching, even attendance at church and as a diabetic the sweets which she loved, she never complained. Her Bible was her constant companion and she was a truly devout Christian woman, in word and deed.

Finally, about two months before her death, she was in Truesdale and had a completely paralyzing shock, which left her in a coma. Jessie and I were both teaching in Taunton and it was late before we could get down to the hospital. Dr. Mason said "Try it. Come in and see what her reaction is." She did not know us and was in a coma most of the time. After our visit, Dr. Mason called to say "Keep away. She cried all night after you were here. So just leave her in peace."

You have no idea how difficult that was, because for several years she had been "our baby" physically and we had a guilty feeling. But we had also the relief of knowing that our good Dr. Mason was in, morning and night to see her. Unless you have lived through such a situation, you cannot know how wonderful it was to be assured that he was watching her in his loving way!

I have several newer friends among the Truesdale doctors—but I think that the roots of my love of my mother and his joy in her, still leave him top place!

When he dropped in to see me the other morning, I began to relive those days and the bitterness of losing her was somewhat alleviated by the memory of their reaction to each other when she went for an office call. We love him, as I know many of you do. Somehow, although I never called him "Bill"—I was reminded of the old song—was it of Ethel Merman's?—I can't recall all the words, but part of them so perfectly describe him "He's just an ordinary kind of guy, but he's just my Bill". To those of you who have reason to feel the same way, doesn't it describe him as perfectly as any words can?

## STATEMENT ON MORATORIUM

### HON. JOEL T. BROYHILL

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. BROYHILL of Virginia. Mr. Speaker, under consent to extend my remarks I would like to call your attention to a statement made by Charles Majer, member of the Fairfax County Board of Supervisors, on Wednesday, October 15, 1969, the date of the first moratorium demonstration in Washington, D.C. The first two resolutions presented by Mr. Majer were adopted unanimously by the board of supervisors and the third suggestion was adopted with one dissenting vote.

The statement follows:

STATEMENT OF CHARLES MAJER AT BOARD MEETING, OCTOBER 15, 1969

I hesitate to involve this Board in a matter which is essentially national, but today has been designated as a moratorium day on the war in Viet Nam. I am not sure what this so-called Moratorium is designed to do. It can be either good or bad, and I would guess that there are many, many groups involved in it that hold widely varying motives.

If it is to renew a dedication in this country to peace, with honor, good—if it is to give support and encouragement to our President and the Government to continue seeking and striving for peace and the end of the Viet Nam conflict, fine—if it is to express support for the job being done by our fighting men in Viet Nam, and to express our appreciation and gratitude for the personal sacrifices which they and their families are making, excellent—but if the effect is to give aid and comfort to the enemy in Hanoi, it is reprehensible. When I read that the North Vietnamese government in Hanoi has strongly endorsed this moratorium today, and when I further see that one of the principal sponsors of the activities has been the outspokenly pro-Viet Nam Students for a Democratic Society, and other equally militant organizations, I am, to say the very least, suspect of the results.

Certainly objective discussions of the whys and wherefores of the Viet Nam war together with collective thinking seeking means to end the war can be useful. However, demonstrations for the purpose of demonstrating are useless. Surely no intelligent people are naive enough to believe that our government is unaware of the public sentiment on this matter, or that delicate international policy and negotiations can be conducted on the basis of street rallies.

However, if we can impress on Hanoi that the means to the end of the conflict lies with good-faith negotiation and not unilateral demands, I believe a really constructive purpose to the events of today will be accomplished. But if Hanoi interprets the events of today as weakness or sympathy to the enemy, then I can see only further delays in peace.

I would, therefore, like to suggest that this Board express our support and heartfelt thanks and appreciation to the American military in Viet Nam and to their families. Secondly, I would like this Board to express our support to the President of the United States for his efforts to end the war in Viet Nam, and urge him to continue to vigorously seek the peace which we all want. Finally, I think this Board should request all those groups within this County holding activities and functions today to direct their criticisms to the apparent complete lack of willingness on the part of the enemy to negotiate in good faith and not to the vigorous efforts being made to end the war by our Government.

And I so move, Mr. Chairman.

## SCOTLAND COMMUNITY OF ROCKVILLE, MD., WINNER OF LANE BRYANT VOLUNTEER 1969 AWARD

### HON. GILBERT GUDE

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. GUDE. Mr. Speaker, since 1948 Lane Bryant awards have been made annually to carefully selected groups and individuals representing the unsung hero of the unique American phenomenon—voluntaryism. The Lane Bryant Awards were conceived to recognize those who were trying to help make things better without thought of reward or recognition.

It is encouraging that both public and private sectors today participate so actively to provide a climate in which this voluntary action can achieve much notable success. The spirit and interest is so well described in the Lane Bryant Award statement of 1969, as follows:

THE LANE BRYANT VOLUNTEER AWARDS

The historic flight of Apollo 11 has given a whole new meaning to the word impossible. That which for so many centuries stood as a symbol of the unattainable now is a shining beacon of man's potential for achievement. And, while illuminating the magnificent heights to which man can aspire, the very success of the moon landing cast a harsh glare on the so-called impossible tasks we still face here on earth.

The Age of the Moon must give way to the Age of Man as the world faces its mounting social ills. Through the centuries, man has efficiently and successfully sought out physical boundaries to conquer. Now he must apply the same determination in seeking out the answers to some of the most compelling questions he has ever faced: how to rebuild decaying cities, feed the hungry, curb overpopulation, restore the purity of the atmosphere and the waters, heal the sick, revise crumbling educational systems, and initiate learning where there has been none. The list is long; the task is great.

For many quiet Americans around the world and in the United States, these *impossible* conditions do not present a new challenge, but rather a rededication to solving problems they have been successfully battling for years. It is these Americans that the Lane Bryant Volunteer Awards have sought out and honored from their inception in 1948.

In reading about the work of the winners and finalists, an important common denominator emerges—self help through mutual involvement. True, each provided aid and support to those in need. But, wherever possible, they have gone a step further . . . they taught others how to begin working toward their own support and a life of self-reliance and dignity.

The purpose of the Lane Bryant Volunteer Awards is to bring this work to the public attention—not to "whitewash" social ills, but to highlight them and the positive action combatting them. Raphael Malsin, founder of the Volunteer Awards, said of them: "They serve as a kind of x-ray into the inner workings of our society. They illuminate the trouble spots, they highlight the symptoms, they show us the best and the worst. They are a kind of laboratory where we can see healing ideas being tested. They are a tribute to the power of individuals, the best kind of individuals."

The 1969 Volunteer Awards are a tribute to those who would not—could not—be thwarted by the *impossible.*

The 1969 Lane Bryant Awards being made here in Washington today, I am pleased to say, are honoring as the top group award winner, Scotland Community Development, Inc., of Montgomery County, Md. The Scotland community in its recent history exemplifies the power of "individuals, the very best kind of individuals who would not—could not—be thwarted by the impossible."

Mr. Speaker, I would like to share with my colleagues the following description of the 1969 group award as presented in today's Lane Bryant Volunteer Awards:

Ramshackle houses on rutted dirt roads, surrounded by junked cars, mountains of rubbish and other debris of poverty. Shanties without indoor plumbing, running water, electricity, modern heat or trash removal. Crumbling homes. Helpless squalor. This was the community of Scotland in Montgomery County, Maryland.

An enclave of 50 Negro families whose median income of $80 a week had to be stretched to cover the expenses of families of six, seven, eight or more. These were the residents of Scotland.

A fast-growing, progressive county, where affluent white suburbanites enjoy lovely park lands, expensive new homes and one of the highest median incomes in the nation. This is the rest of Montgomery County.

Since the turn of the century, the residents of Scotland, mainly descendants of slaves, heeded the advice of their ancestors and held onto their land even when they had nothing else. But, in 1965, the roots of their rural community were severely strained by land speculators who sought acreage to house Washington's upper middle class. The future was indeed bleak for Scotland's citizens, who had no resources for relocation. The Save Our Scotland (SOS) Committee was set up by county, civic and church leaders, as well as some sympathetic Bethesda neighbors, to investigate avenues of action for the area. SOS moved the county to repair the town well and extend water and sewer services to the local church, and organized an ambitious clean-up campaign. As the community began to take on more and more responsibility for itself, the Scotland Community Development Corporation (SCDC) was formed.

The basic concept behind SCDC was that the local residents pool their combined land holdings, sell some of them, and build new housing on the remaining acreage. Then began the tortuous process of titlesearching. Volunteers uncovered extremely complicated systems of ownership, to the extent where one resident was found to own 1/108 of his quarter acre plot. As the process of land buying progressed, model communities were designed, with the main requirements drawn by Scotland's citizens to conform with their own life-styles. An example is the inclusion of front porches on the townhouses, a rarity today. The final result is a plan which includes six basic types of townhouses, ranging in size from two to five bedrooms.

With the aid of a Housing and Urban Development (HUD) grant of $78,400, the 100 units are now being completed. As they become ready, families will take possession, and their old shacks will be demolished, thus avoiding the trauma of forced relocation. Seventy-five of the units will be low rental, the others will be for sale through the life insurance industry's billion dollar housing fund.

Residents who owned land in Scotland have traded it for equity in housing. Others, such as Melvin Crawford, president of the SCDC, can gain equity in their homes through their own labor. Mr. Crawford, a maintenance man with a wife and seven children, spent 42 years in a "dilapidated four room house not fit to live in." He and his family have chosen their new three bedroom home in the development—with available room for expansion.

Along with the task of building new homes, the SCDC has accomplished many other goals. Anticipating some of the problems of the first year of residence, they held a benefit which raised over $8,000 to hire a full-time social worker. They have instituted such services as tutorials, community newsletters, emergency legal help and a highly successful furniture drive. The Scotland Teen Health and Beauty Workshop, instituted this past year, offers girls a variety of activities dealing with fashion, dieting, cosmetics, creative exercise and modeling. A "mod fashion tour of Georgetown" and a tea with informal modeling are highlights of their activities to date.

The Scotland Community Development, Inc. saw a problem, studied it, and went into action. Using their own resources, hundreds of people from diverse backgrounds worked together to create in Scotland a climate of opportunity in which individuals can become economically and socially viable citizens—all within the familiar and comfortable surroundings of Montgomery County. *This* is the Scotland of today . . . and tomorrow.

## ARTHUR F. BURNS SPEAKS ON HOW TO END INFLATION

---

### HON. JAMES M. COLLINS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. COLLINS. Mr. Speaker, a few months ago I talked with a leading publisher in New York City. He described himself as a liberal on social matters and a conservative on fiscal responsibility.

When I asked his advice on congressional policy, he said:

This Country will be in great shape if they have the courage in Congress to follow Arthur Burns' policies.

Burns just made a speech in New York City that lays it on the line.

I recall the word "courage," because Congress is called on to vote for the good of the country—and not on a political voter appeal basis. Burns stresses the need for expenditure reform and realistic fiscal commitments on social problems. Burns also made the suggestion of an over-all ceiling on total appropriation spending for the year.

Here is a full text of the speech by Arthur F. Burns:

THE CONTROL OF GOVERNMENT EXPENDITURES

This year the Congress has devoted a great deal of attention to tax legislation. Besides aiding the fight against inflation by extending the income tax surcharge temporarily, the Congress has been heavily engaged in writing a tax reform bill that is of major significance to the American public. If the bill survives in something like its present form, some troublesome inequities under existing law will finally be corrected. However, the relative tax burden borne by individuals and corporations will also be changed, with corporate income tax liabilities gradually going up about 5 billion dollars by 1975 and individual income taxes coming down 12 billion dollars.

This projected shift in the tax structure will favor consumption at the expense of capital formation. Such a development will be useful in the short run by helping to cool off the business investment boom that is still under way, but it may damage prospects for the long-term growth of our economy. We surely cannot afford to take capital formation or economic progress for granted. If our economy is to grow and prosper in the future, as it both can and should, business enterprise may well need the stimulation of an improving tax climate.

In recent times, our nation has moved rapidly towards the welfare state, such as various European countries previously developed. Unlike these countries, however, we also devote an enormous part of our resources to meeting the needs of an intricate and far-flung defense system. Thus far, the prodigious productivity of American industry has made it possible to finance liberally both our defense needs and the social services of government. But in order to continue to support the growing scale of our public consumption without doing injury to private consumption, the productivity of our factories, mines, farms, construction enterprises, and service trades may have to improve more rapidly than in the past. This will not be accomplished without substantial and increasing investment in new and better tools of production. The projected shift in the structure of taxation therefore seems undesirable to me, and I trust that the President's Task Force on Business Taxation will soon point the way to a better balance in our tax system.

I do not know at precisely what point the burden of taxation will materially serve to check our nation's economic progress, but I also do not think it wise to test this issue too closely. The trend of governmental spending and taxes in the past forty years has been sharply and inexorably upward. In 1929, government expenditures at the Federal, state, and local levels amounted to about 10 percent of the dollar value of the nation's production. This fraction rose to about 20 percent in 1940, to about 30 percent in 1960, and to about 35 percent this year. The broad trend of taxation has been very similar. With over a third of our nation's output already moving into the hands of the tax collector, it seems hardly prudent to contemplate any further increase in the level of taxation. And yet, unless we bring government expenditures under better control than we yet have, the modest over-all reduction of tax rates that the tax reform bill projects will prove abortive and further increases in the level of taxation may become unavoidable.

As our nation's economy has grown and as our political democracy has widened, the responsibilities assumed by government have kept increasing. In fiscal year 1962, the rising curve of Federal expenditures first crossed the 100 billion dollar mark. It now appears likely that the 200 billion dollar mark will be crossed the next fiscal year; so that we will be adding as much to the Federal spending rate in a mere nine years as it took nearly two centuries to achieve previously.

The explosive increase of Federal spending during this decade is commonly attributed to the defense establishment, or more simply to the war in Vietnam. The fact is, however,

that civilian programs are the preponderant cause of the growth of the Federal budget. When we compare the budget of 1964 with the estimates for this fiscal year, we find that total Federal spending shows a rise of 74 billion dollars, when defense outlays are larger by only 23 billions. If we go back to 1953, when the Korean war ended, and take into account state and local expenditures as well as Federal, we find that defense outlays have been responsible for only about one-sixth of the vast increase in the cost of government that has occurred since then.

Thus, the basic fiscal fact is that spending for social programs now dominates our public budgets. Although the Federal government's direct involvement in problems of social welfare is a recent development, it is already huge and is growing at a fast rate. This fiscal year, programs for education, manpower, health, income security, housing, community development, and crime prevention will cost over 80 billion dollars—a sum that exceeds all the spending done by the Federal government in the peak year of the Korean war. Federal aid to the poor will alone cost 27 billion dollars this year, in contrast to 12 billion in 1964. Grants in aid to states and localities will cost about 25 billion dollars, in contrast to 15 billion in 1967, 10 billion in 1964, and 5 billion in 1958.

This upsurge of Federal spending is a response to the economic and social difficulties that afflict many of our communities—witness the slums, ghettoes, racial strife, poor public schools, teenage unemployment, drug addiction, poor health, student disorders, inadequate transportation, traffic congestion, air and water pollution, and unsafe streets and parks. The Federal government has tried to solve these complex problems by spending large sums of money on projects that have often been hastily devised. Hundreds of grant-in-aid programs dealing with health, education, welfare, and other local needs were established in quick succession. Several regional commissions were established to seek better balance in economic development and social improvement. An Economic Development Administration was established to aid local communities, both urban and rural, that suffer from excessive unemployment or inadequate incomes. More recently, a Model Cities Program was established, aspiring to achieve what our best city planners can contrive. By proceeding in all these directions, we have created a costly governmental maze that involves much duplication and waste, that often hampers the constructive efforts of local officials, and—perhaps worst of all—that practically defies full understanding or evaluation.

Nowadays, many local government officials, instead of grappling with the most urgent needs of their communities, devote their finest energy to maximizing and husbanding the Federal grants that happen to be available. With over 600 categorical programs of Federal aid to choose from, there is plenty to keep them busy. Many of the programs involve tedious procedural steps extending over a number of months before a community can learn whether Federal funds are to be granted for its proposed project. Each program is equipped with its own set of administrative requirements involving endless forms and reports. If a local official attempts to draw upon several funding sources to help finance a neighborhood project, he may be confronted with a mass of complex application forms weighing several pounds, with Federal processing steps that may take well over a year to elicit a "yes" or "no" response, and with stringent requirements for hundreds of detailed reports. Further, this official will usually have to work with Federal representatives scattered in a number of different cities in order to arrange the project.

I am informed by the Bureau of the Budget that one Federal program requires over a hundred different kinds of forms and reports; that a grant involving $1,000 may require over 30 major Federal agency steps, including review by a 15-man advisory committee and headquarters approval; that a department of one state has counted 120 different reports that it is required to submit to a particular Federal agency, many of them on a monthly or quarterly basis; and that there are numerous instances in which Federal, state, and local governments make independent studies of the same community without one agency knowing what the other is doing or having an opportunity to share in the results of the other studies. The mere listing of all Federal requirements imposed on states and communities would be so voluminous that it has never been done.

As a result of this administrative morass, various Federal programs are half smothered in paper. Employees at all levels of government are required to devote time to detailed paper work which would be better devoted to rethinking program objectives or assessing the extent to which present objectives are being met. More important, help may not reach the people who need it until months—sometimes years—after it should, with much of the money meanwhile siphoned off by the bureaucracy. To give only a few outstanding examples, neither the achievements of the compensatory education program, nor of the urban renewal and slum clearance programs, nor of the public assistance programs have come very close to the expectations of our lawmakers.

In view of the explosive growth of Federal spending and the ineffectiveness or inefficiency of much of it, I am inclined to think that the need for expenditure reform may be even greater than the need for tax reform. One of the advantages of a new Administration is that it can move with energy to change the direction of governmental policy. President Nixon responded to this opportunity by taking major steps to win control over Federal spending. Needless to say, the rapid rise of the consumer price level has been the most troublesome economic problem facing the nation this year. In view of the inflationary pressures in our markets for goods and services, it was clearly important that the Federal government curb its spending beyond the earnest move to frugality that the previous Administration made in its closing days. In all, reductions of 7½ billion dollars from the January budget were therefore ordered by the President for this fiscal year. These reductions were widely distributed among government agencies, with 4.1 billion allocated to the Defense Department and 3.4 billion to the rest of the government. Moreover, when Congress later passed or considered legislation that foreshadowed an expenditure total well above the revised budget of $192.9 billion that the President had submitted, he firmly announced that he would try his utmost to see to it that Federal finances continue to be subject to the ceiling that he had imposed. Later in the year, in order to deal with the special problem of runaway construction costs, the President ordered a cutback of 75 percent in Federal construction contracts.

Administrative steps were also taken by the President to achieve greater efficiency in government spending. In March a carefully planned effort to cut red tape got under way. As a first step, the several agencies most closely concerned with human resources were directed to adopt common regional boundaries and to locate their regional offices in the same cities. Further, a review was started of the several hundred Federal assistance programs, with the objective of simplifying procedure, cutting down on the paper work, and shifting responsibilities to the field so that decisions could be made both more expeditiously and by officials who are in closer touch with the local problems.

The Administration has also sought legislation to correct the deficiencies of the grant-in-aid programs. In order to give local officials greater flexibility to meet their priority needs, the President has requested authority to consolidate existing grant-in-aid categories, subject to a Congressional veto within 60 days. Moreover, as legislation has moved through the Congress, the Administration has been alert to the opportunity of converting narrow categorical grants into block grants for broad functional areas. In line with this policy, proposals for grant consolidation were advanced in connection with legislation on hospital construction, on elementary and secondary school education, and on manpower training services, as well as through the appropriation route.

But by far the most important as well as the most dramatic step that the President has taken to reform expenditure policy is his proposal to the Congress to inaugurate a system of revenue sharing. This proposal marks a milestone in Federal-State relations. It seeks to decentralize governmental power. It seeks to restore the balance that existed in earlier decades between the state capitals and the national capital. Or to be more precise, while it seeks to extend additional Federal assistance to state and local governments, it insists that this be done in a manner that will enable local officials to attend to urgent problems within their own jurisdictions as they deem best, without being subjected to rigid Federal controls or requirements.

The leading features of the Administration's revenue sharing proposal are as follows: First, in view of budgetary constraints, the revenue sharing fund will be limited in fiscal 1971 to a half billion dollars, but will subsequently grow fairly rapidly and reach 5 billion dolars by the mid-seventies. Second, the distribution of the fund among the states will be based on a simple formula that assigns primary weight to population, but also gives some weight to tax effort. Third, the distribution within each state between the state government and the localities will be likewise based on a formula, so that each unit of government within a state will be assured a share that is proportionate to its own tax revenues. Fourth, no restriction will be placed on the use of the funds made available by the Federal government; in other words, each state, county, city, or town will rely on its own judgment and use the money for education, health services, parks, law enforcement, or some other way, as it deems best.

The precise details of this revenue sharing plan grew out of detailed discussions among members of the Administration, Congressmen, Governors, Mayors, and county officials. In the course of these discussions the argument was sometimes encountered that revenue sharing may lead to fiscal irresponsibility, since local officials may be careless in using funds that they did not have to raise from their own constituents. This argument cannot be dismissed. It might in fact be decisive if the practical choice were between levying local taxes or Federal taxes. By all indications, however, Federal financial assistance to the states and localities will continue to grow, and the only real question is whether Federal grants will lead to more or to less centralized control. In taking a definite stand for decentralization, the Administration has enunciated a policy whose wisdom is now widely recognized by liberals as well as conservatives within our two major political parties.

As a result of the careful preparation of the Administration's revenue sharing plan, it has already won the general approval of the Governors Conference and also of the leading national organizations of mayors and county officials. The Administration's own thinking on the subject is not rigid, and it will entertain any reasonable proposal for

change that would facilitate Congressional approval. In particular, the Administration would welcome an enlargement of the projected revenue sharing fund, provided categorical grants were correspondingly curtailed. If that happened, revenue sharing would grow more rapidly than presently contemplated, and the decentralization of government—which has become so vital to order and efficiency in the public economy—would be speeded.

This sketch of recent progress toward Federal expenditure reform should be reassuring to responsible citizens, but it certainly leaves no room for complacency. Much of the needed legislation has yet to be passed. Many of the administrative improvements are still in an early stage and remain to be tested. The ceiling of $192.9 billion on this year's expenditure is not entirely secure. True, the curve of Federal spending is now rising at a much slower pace than in recent years, but the improvement would be less impressive if the various government-sponsored financial agencies were all included in the budget. And, as far as I can judge, the growth of population, the need to improve our social and physical environment, and the widening concept of governmental responsibility will almost inevitably lead to large additions to Federal as well as state and local expenditures in the future. There will therefore be a continuing need to control governmental spending, first, in order to avoid strain on our physical resources of labor and capital, second, in order to assure the continuance of a vigorous private sector, and, third, in order to maintain pressure for discriminating judgment on priorities as well as for economy of execution in the public sector. These are difficult requirements and they will not be met without further significant expenditure reform.

One major step toward reform was taken last year and again this year by Congressional enactment of a ceiling on expenditures. A legislative budget is a radical departure in budget-making, and its significance should not be minimized by the rubbery texture of the ceiling. In the first place, the vigorous discussion surrounding the legislative ceiling has of itself served to dampen enthusiasm for larger spending. In the second place, the rubbery ceiling of today can become a rigid ceiling tomorrow. If the Congress moves in this direction, its fragmented approach to appropriations, which will doubtless continue, need no longer run up Federal spending as it has commonly done in the past.

To be sure, the individual appropriation acts may imply a much larger expenditure total than had previously been legislated. In that event, the Congress would in effect say to the President: "You are the manager of our national finances. We fixed a ceiling on expenditures earlier in the year, after considering your budgetary recommendations and making our own best judgment of what the national interest requires. But there are several hundred of us; each of us is subject to heavy pressure for appropriations that seem vital to our constituents, and we find it impossible in the time at our disposal to trim individual appropriations so that they be consistent with the expenditure ceiling. In view of our inability to agree on priorities, we assign this responsibility to you; but we naturally reserve the right to challenge your actions by new legislation." Such a mandate by the Congress would, of course, not make the President's job any easier; it could well lead at times to uneconomical cutbacks; and it might even mean that we will have only one-term Presidents in the future. However, by enabling the members of Congress to satisfy both their conscience and their constituents, such a mandate would probably assure that total expenditure is kept under decent control.

A second reform of vital significance would be adoption of the concept of zero-base budgeting. Customarily, the officials in charge of an established program have to justify only the increase which they seek above last year's appropriation. In other words, what they are already spending is usually accepted as necessary, without examination. Substantial savings could undoubtedly be realized if both the Budget Bureau examiners and the Congressional appropriation committees required every agency to make a case for its entire appropriation request each year, just as if its program or programs were entirely new. Such a budgeting procedure may be difficult to achieve, partly because it will add heavily to the burdens of budget-making, and partly also because it will be resisted by those who fear that their pet programs would be jeopardized by a system that subjects every Federal activity to annual scrutiny of its costs and results. However, this reform is so clearly necessary that I believe we will eventually come to it. I regard President Nixon's request of the Budget Bureau this year for a list of programs judged to be obsolete or substantially overfunded as a first step toward zero-base budgeting.

Several other reforms that I can only mention also deserve serious attention. First, earmarking of funds is often a dubious practice and should be carefully reappraised by the Congress. Second, agency heads should be subject to a Presidential requirement that if they request additional funds—whether for new or old programs—after the budget has been transmitted to the Congress, they must as a rule give up an equal amount of money from their ongoing activities. Third, new programs should be typically undertaken on a pilot basis and not launched on a national scale until their promise has been reasonably tested. Fourth, the law requiring that the cost of new programs be projected five years ahead when they are first presented to the Congress should be strictly enforced. In addition, comprehensive five-year budgetary projections should be constantly maintained by the Budget Bureau for the President's guidance. Fifth, I think that it would be useful to rotate the personnel of the Budget Bureau among its major divisions, so that the key examiners can periodically shed their preconceptions or frustrations and approach with a fresh eye the financial concerns of the agencies that are newly assigned to their scrutiny.

In addition to institutional reforms such as these, effective control of public expenditures will require larger reliance on volunteer efforts for dealing with our great social ills. It will also require thorough, realistic, and penetrating study of the promises, costs, and achievements of individual governmental programs. Although Federal agencies, particularly the Bureau of the Budget, need to augment their evaluative work, some doubt will always surround research that is carried out by agencies which originally advocated or subsequently supervised the programs under study. There is a great need, therefore, for expenditure studies by organizations that are independent of government and have no direct stake in any of the programs. In view of its preeminence in fiscal research and public education, the Tax Foundation is especially well equipped to organize teams of economists, accountants, political scientists, and management experts for the concrete study and evaluation of some of the major branches of Federal expenditure.

I hope that the Trustees of the Tax Foundation will be able to find a way of making this additional contribution to good government. If you undertake to do so, I assure you that the evaluation teams you send to Washington will receive a very warm welcome.

## TRUCKERS WAX ELOQUENTLY OVER DEATH OF TRUCK BILL

### HON. FRED SCHWENGEL

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. SCHWENGEL. Mr. Speaker, a recent publication of the Private Truck Council of America, Inc., has come to my attention, and causes me to have a mixed reaction to its contents.

The text of the trucker publication to which I refer follows:

REQUIEM: TRUCK SIZE AND WEIGHT BILL DEALT A DEATH BLOW

Taps are being played in Washington today over the barely warm body of the legislation known as H.R. 11870. It, you will recall, would have *authorized the States* to legislate trucks from 96" to 102" in width, provide a formula for establishing more sensible weight restrictions and allow a manageable increase in lengths. To repeat, it would have authorized *the States* to do such things. It would have authorized *no changes* in and of itself.

Our mournful announcement emanates from the fact that the Subcommittee on Roads met this week and reported out H.R. 11870 to the Committee on Public Works *without recommendations*. Such a lack of recommendation doesn't always have this chilling effect, but in this instance, the "without recommendation" amounted to a virtual kiss of death.

At the same time it was revealed that the DOT had told the leading congressional enemy of H.R. 11870, Fred Schwengel (R-Iowa), that all of the amendments to the bill suggested by the DOT had to be accepted or the DOT would be opposed to it. Such a position was tantamount to the hammering of several solid nails in the well constructed coffin.

There's a moral behind all this, if the American people will just take heed. The AAA, Congressman Schwengel, the railroads, all too many of the subjective reporting type journalists whose prejudice, bias and arrogance is worn on his sleeve, and whose supercilious intellectualism appears to be vaporously draped from his body like the tinkling bells and colorful cloths of a typical 17th century court fool, and various other temporary or permanent miscreants, have once again trotted out the wondrous phrase "highway safety," dusted it off, polished it up a bit and thrown it at Congress and the public. Both seemed to have unquestionably swallowed it, lock, stock and barrel.

First, it is enlightening and reassuring to learn that the truckers themselves, now openly accept the fact that the "big truck bill" is dead. Second, the belittling attitude taken in the publication toward highway safety greatly disturbs me. Indeed it is reason for disgust. The publication, in an attempt to belittle and ridicule opponents of the legislation, refers to them as "miscreants." Webster's dictionary defines a miscreant, among other things, as being "destitute of conscience; unscrupulous; villainous." Thus, I take the comment of the truckers as a direct personal affront, and highly resent it. I am certain that the several hundred editors and reporters who editorialized and wrote stories in opposition to the bill likewise consider it an affront to be referred to as "supercilious intellectuals" and "court fools."

In addition, I am certain that the use

of this terminology is very much resented by the many capable, reputable and competent witnesses who testified in opposition to the bill. They included such respected people as: Mr. George Kachlein and Charles Brady of the AAA; Mrs. Walter Varney Magee, president of the General Federation of Women's Clubs; Mr. Richard Boccabella and Warren G. Davison of the National Association of County Engineers; Mr. Joseph Coupal, Iowa's director of highways; Prof. John O'Mara of the University of Iowa's College of Engineering; Douglas Fugate, first vice president of AASHO; and Congressmen JOHN KYL and RICHARD MCCARTHY.

The overwhelming majority of the opposition to the big truck bill was generated by those citizens of this country who do have a sincere and justifiable reservation about the impact of the proposed legislation on highway safety. Granted, there are varying degrees of understanding of the safety problem. Some have studied the problem in depth and are firmly convinced there are safety problems which should not lightly be brushed aside as supercilious. It is true that some oppose the legislation on grounds which are more emotional in nature, but none the less sincere. It is typical of the high-handed arrogance of the truck lobby to lightly disregard the desires and feelings of a clear majority of the citizens of this country, just as they have continually done in their past efforts to steamroller this legislation through the Congress.

If safety is in fact no real problem with the proposed increases in size and weight, then I challenge the Trucking Industry to join in support of the legislation to establish a Presidential Study Commission which I have introduced. The Commission proposed by my bill, H.R. 15051, would constitute a study group representative of all groups affected by the proposed increases in size and weight. If, as the truckers indicate, there is no safety problem, my proposed Commission should be able to report that fact to the Congress in short order. In which event, the big truck bill would undoubtedly sail through the Congress. However, the truckers will probably disregard this suggestion as mere "supercilious intellectualism."

## MAYOR-ELECT OF ATLANTA SPEAKS OUT ON THE MURPHY AMENDMENT

### HON. WILLIAM (BILL) CLAY

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. CLAY. Mr. Speaker, recently the mayor-elect of Atlanta, Ga., Sam Massell, testified before the Senate Subcommittee on Employment, Manpower, and Poverty. He voiced his opposition to the Murphy amendment which would give Governors a veto power over the legal services program.

Mr. Massell stated in his testimony:

The legal services program is distinguished from many other "poverty programs" in that it is designed not merely as a bandaid on the carbuncle of poverty but as a sharp surgical knife of judicial and legislative reform, aimed at the laws and regulations that are the very heart of the discrimination that so effectively keeps poor people "in their place."

The legal services program demonstrates to the poor what a lawyer can be. A lawyer—to a poor man—is a person who keeps rich people out of jail. It is precisely because lawyers and legal services have never been possible for the poor—that poor people believe laws are written for the rich. The impact of this law has been significant in showing poor people that they, too, have legal rights. With lawyers to represent them, they have seen equal justice under the law become more than a convenient cliche. By providing disadvantaged Americans with an experience within the established system, the legal services program enhances the chance that these people may someday become a part of the system. It makes a difference—not only in the lives of the poor—but in the outlooks of the poor.

Support of the legal aid program in Atlanta comes from such local groups as the NAACP, the clergy, the Urban League, and the chamber of commerce.

I agree wholeheartedly with Mayor-elect Massell. Implementation of the Murphy amendment will put a halt to the legal services activity by virtue of a Governor's veto. The poor in America will lose their right to justice and not be served at all.

Mr. Speaker, I insert Mayor-elect Massell's testimony in the RECORD at this point:

STATEMENT OF SAM MASSELL, MAYOR-ELECT OF ATLANTA

Mr. Chairman and Members of the Committee: I am Sam Massell, mayor-elect of the City of Atlanta. I am appearing here today on behalf of the U.S. Conference of Mayors and the National League of Cities, to register our opposition to the Murphy Amendment to the Economic Opportunity Act of 1964. At present, I am serving as vice-mayor of Atlanta, and as secretary to the Human Resources Development Committee of the Conference of Mayors.

If enacted, the Murphy Amendment would give state governors an absolute veto over all or part of any legal services program. The Amendment would thus splinter the final authority over legal services into 50 separate parts, removing legal services from the protected niche it has enjoyed as a part of OEO's national program, under the national guidance of OEO's Director. The Murphy Amendment might very possibly annihilate legal services.

Mr. Chairman, the legal services program as it has existed for the past four years has been in many ways the finest jewel in the crown of the poverty program. It has brought together a coalition of groups and funding sources that have never been joined together before. Under its roof lawyers and other heretofore solid buttresses of the establishment have been willing to combine their education, energy and talent with the financial resources of the Federal government—(and in many cities, including Atlanta, with the financial resources of the local community)—to work with poor people for the collective benefit of our cities and towns. Through legal services even the chamber of commerce has come to the assistance of poor people, and in Atlanta has paid for these dramatic and effective posters—posters that have appeared throughout the city in busses, churches and schools.

Surprisingly enough, the legal services program is distinguished from many other "poverty programs" in that it is designed not merely as a bandaid on the carbuncle of poverty but as a sharp surgical knife of judicial and legislative reform, aimed at the laws and regulations that are the very heart of the discrimination that so effectively keeps poor people, "in their place." It is a program that really does something.

Our Legal Aid Society has earned acceptance by its clients—which is no small task for an agency with establishment ties. In many respects it serves as an ombudsman—an office governmentally empowered as a citizens' advocate—an office that will lose much of its power and prestige if its independence is deflated by superimposing political considerations. The authority over the program at the federal level—the purse string—is understood, and is not likely to cause any dilution of the Legal Services Program.

I think I can speak with some authority when I identify agencies that have the confidence of the citizenry, and I am here to tell you that the poor people have found a friend in the Legal Services Program. And I am just as certain that any effort to shift the management of affairs to the Governor's Office will surely be read as code language for the end of a meaningful relationship between the poor and their lawyers.

We in Atlanta have had ample opportunity to observe the operations of a fine Legal Services Program. The Atlanta Legal Aid Society, an OEO program with five offices and approximately 30 full time lawyers, has produced a number of significant changes in my City—changes which in my opinion were long overdue and were accomplished by the force of reason instead of the force of violence.

A good example of the work of legal services is Atlanta Legal Aid's representation of a public housing tenant group known as TUFF (Tenants United for Fairness), a group that came into being because of tenant dissatisfaction with the management of public housing in Atlanta. (You may better understand the seriousness of that dissatisfaction if I mention that one of the few social disturbances we have ever experienced occurred in 1967 when Mr. Stokely Carmichael spoke at one of our public housing projects.)

The tenants were upset and in my opinion rightfully upset because all of the decisions affecting their tenancy were being made without regard to their wishes.

Tenants, for example, were evicted without being afforded any opportunity for a hearing. They were subjected to arbitrary rules including a rule in one project against feeding pigeons and a rule in another against keeping lawn furniture outside. They were humiliated in some projects by having their electricity turned off if their rent was overdue.

And they were constantly subjected to a variety of arbitrary charges and assessments over which they had no control.

In one project—indeed at the very project where Stokey Carmichael spoke—every new tenant was obligated to purchase a "grass cutting set" for $3.95 consisting of a pair of hand clippers and a small wooden-handle scythe. Even the elderly residents of the project were assessed and charged and were obliged to keep their grass trimmed—or to pay an additional charge for failing to obey the project rules.

The tenants were also angry because the authority included the earnings of minor children in the computation of the family's income, thus forcing a family to evict a working child or confiscate his earnings.

These grievances, along with many others, were sufficiently distressing to motivate approximately 800 tenants to come to a protest meeting on a cold winter night last March. Obviously the situation was highly unsatisfactory—and potentially dangerous.

Fortunately for Atlanta, the tenants turned to the lawyers of the Atlanta Legal Aid Society instead of the streets.

By the month of August, after six months of negotiation and discussions—and law suits—the attitudes and policies of the Atlanta Housing Authority had changed so drastically that the tenants were able to claim a complete victory in their battle with the authority. The authority agreed to the following policy changes: (1) The creation of a tenants' grievance panel with complete jurisdiction to determine questions arising between tenants and management including project rules and charges, (2) to forego all income from minor children, (3) the creation of a housing authority advisory board designed to advise the authority of the needs and wishes of the tenants. This Board, with membership drawn from the tenants' association, community groups—and legal aid—now meets once a month and has proven an articulate and effective means of communication between the tenants and the authority.

The Atlanta Housing Authority is now in many ways a model of responsiveness to tenant needs. The change that has occurred over the past year is one that we in Atlanta find thrilling, for an established and conservative institution has now been made responsive to the needs of its low income clients, and the potentially dangerous situation has been defused—largely by an OEO Legal Services Program. This change has been accomplished throughout the traditional American procedures of negotiation, advocacy and legal action.

But let me tell you about another road that was being traveled during the same period in response to the grievances of the public housing tenants. At their request, our Board of Aldermen recommended to our local delegation in the Georgia General Assembly the addition of a tenant representative on the Atlanta Housing Authority Board and the reduction of the term of office of authority board members from 10 to 4 years. These amendments to Atlanta's Charter were subsequently recommended by the local delegation and adopted into law by the Georgia House and Senate—only to be vetoed by the Governor. Need I say more. Need I say more.

Legal aid's representation of TUFF is merely one example of the important work that legal services programs do on the local level; work that involves discovering the problems of poor people, bringing them to the attention of the authorities, and vigorously advocating changes in the system. In Atlanta, as in other cities, legal services programs represent many groups like TUFF and have produced major changes in the operations of public and private organizations who deal with the poor.

We in the Conference of Mayors and the League of Cities are concerned about the future of legal services because of the significant and beneficial impact legal services has had on our cities, and the reduction of future value which could result from the pending legislation. Legal services programs are our programs—for they are local programs created and designed by local people to deal with local problems. In Atlanta the Legal Aid Society receives federal funds, but is governed by a local Board of Directors and is sponsored by the Atlanta Bar Association *NOT* a State Bar or the ABA.

A sizeable percentage of Legal Aid's income is derived from our local united appeal campaign, NOT from any State campaign, and its work is supported by volunteers from the Atlanta Junior League and by the Atlanta Bar Association. It is also supported by such local organizations as the Atlanta NAACP, the Atlanta Concerned Clergy, and the Atlanta branch of the Urban League.

In my opinion it is inappropriate for any Governor to be able to veto—in whole or in part—a program that is such an entirely local entity. And it is even more inappropriate for legal services lawyers in Atlanta to be required to worry about whether any specific suit they choose to bring might offend the interest of the Governor of the State.

It would be foolish of me to state that the work of the Atlanta Legal Aid Society would definitely be brought to an end in the event the amendment becomes law. But the Murphy Amendment would clearly endanger the Atlanta Legal Aid Society and would require every attorney in that organization to pause before advising a client, and to think twice and then to think again before filing a law suit against the State agency, a powerful political figure, or a person or organization known to be friendly to the Governor.

I hasten to explain, however, that to the best of my knowledge no legal services program in Georgia has ever had a disagreement with our Governor. If a legal services program is doing its job, however, that is, if it is actively defending the interest of the poor and vigorously fighting against the landlords, merchants and government agencies with whom poor people have to deal, it seems inevitable that the program will at some time conflict with the Governor's views. I know of one case in Georgia that might cause such a conflict; The Atlanta Legal Aid Society has brought a suit to force the state to increase the welfare grant given to AFDC mothers, and if legal aid should prevail in its suit the state welfare budget will be greatly increased. It goes without saying that my governor or your governor going through such a situation might be tempted to consider retaliation against the legal services program that had caused the administration such expense.

One of the beauties of the legal services program is that it has been able to represent its clients without deferring to such political considerations. When Atlanta legal aid began its representation of TUFF it was not obliged to pull its punches because the Board of Commissioners or the Housing Authority included distinguished, powerful and conservative members of "the establishment." When it brought its suit against the State Welfare Department, it did not first pause and wonder whether such a suit might endanger its support in the capitol building. It brought these lawsuits because its client's interest demanded the suit, and because it adhered to the position that the fate of poor people can and should be changed in the courtrooms of our country.

Legal services programs throughout the country are in a situation similar to that of the Atlanta Legal Aid Society. Their ability to fight fearlessly on behalf of their clients—indeed, their very ability to attract the kind of committed and excited young lawyers who are working for legal aid in Atlanta—depends on their continued freedom from political pressures. The Murphy amendment jeopardizes that freedom.

Legal services has demonstrated a profound and comprehensive understanding of the problems of poor people and an ability to do something about them. It correctly understands that the way to deal with the problems of poor people is to bring the people into our system and make them a part of it—not to isolate and segregate them from the system that supports and assists the rest of us.

By seeking to expand our present social and legal system to incorporate the demands of the poor, legal services has taken a long step towards the total American dream of equal justice for all. On behalf of America's mayors, on behalf of the cities, and on behalf of our too-long forgotten poor people, I urge you to reject and repudiate the Murphy amendment.

Thank you for giving me the opportunity to appear before you today.

## "PLEBISCITARY DEMOCRACY"—WHAT?

### HON. F. EDWARD HÉBERT

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. HÉBERT. Mr. Speaker, Mr. Bruce R. Hoefer, a constituent of mine, has called to my attention an editorial which appeared in the November 17 issue of the New Orleans Times-Picayune.

The editorial, entitled "'Plebiscitary Democracy'—What?" concerns itself with the recent antiwar demonstrations which were held here in Washington.

The situation as discussed by the Times Picayune shows knowledge, objectivity, and insight. I only wish that more newspapers would have had similar editorials following the so-called peace march.

There are those who will be suspect, I am sure, because the Times-Picayune is published in the South. But this paper has been in New Orleans for more than 100 years, and I am sure it will be there more than 100 years from now.

Mr. Hoefer suggested that it be made a part of the RECORD so all Members of Congress could read it and think about its content. I heartily agree with Mr. Hoefer and am inserting the editorial in the RECORD at this point:

"PLEBISCITARY DEMOCRACY"—WHAT?

Some folks have a knack for hiding the truth with jargon and catch phrases—of imputing to things a character they don't have. Some columnists have been talking about "plebiscitary democracy" and they infer that demonstrations by vocal minorities, such as last week's New Mobilization, constitute something of a plebiscite.

If the coined phrase means anything, it would have to be that the will of the people—all who let themselves be counted—has been expressed in a referendum of sorts, and that a democratic government has received its mandate from the majority.

But there is a strange element of intellectual intolerance in certain liberal circles, which arrogate to themselves the clear knowledge of truth and right and wisdom. They look down their noses at those not blessed with this inner light—moreso if the "unitiated" happen to be in the majority. Such people preach democracy only when and if the majority can be won over to their point of view. Then only is democracy sacred.

We do not impugn the motives or sincerity of all anti-Vietnam adherents. But we believe there are some whose bile is eating away at their innards to such a degree that in their secret hearts they pine for the United States to be humiliated and for the non-Red population of Vietnam to be drenched in a Communist blood bath after American disengagement.

What might the reaction of some after such a catastrophe be? It served the South Vietnamese right for being "corrupt," or being "puppets of U.S. imperialism" . . . or any number of other rationalizations which would prompt one to be outraged at the reported liquidation of a Communist double agent while feeling no anguish for the civilians of Hue whom the Reds callously slaughtered and buried (some while still alive) in mass graves.

But does the massing of a quarter of a million protesters—which is 1-800th of Americans—really represent plebiscitary democracy? Or must it be viewed in relationship to a less vocal majority who concur with

President Nixon's position for ending the war and who do not organize a "spectacular"? And would a quarter million crowding the Washington Monument in support of current U.S. policy be any more a plebiscite?

A genuine barometer of plebiscitary democracy on the Vietnam issue, we believe, was the overwhelming bipartisan support for a report which the House Foreign Affairs Committee issued on a resolution cosponsored by 307 of the 432 House members backing the President's effort's for peace.

For the offices of congressmen, who by and large reflect the convictions of their constituents, are the best places to go to put your finger on the pulse of America. That pulse is beating strong and fast for an honorable peace in Vietnam—against a sellout to the Reds.

Columnist Thomas B. Ross's report from the Paris "peace talks," on this page, gives testimony on the importance of unity among the "silent majority" of Americans, so that Hanoi's illusions, fostered here by a small vociferous minority of chronic dissenters, may turn to disillusionment and to reason.

## GRUBSTAKE, INC.—PITTSBURGH YOUTH REHABILITATION PROGRAM

### HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. MOORHEAD. Mr. Speaker, it is an established fact that drug abuse, particularly among the young, is one of our major national problems.

In our larger cities, it is calculated that addicts must raise in the neighborhood of $500,000 per day to support their habit, resulting in their turning to such crimes as robbery, shoplifting, burglary, forgery, and prostitution.

Beside the financial cost, the real cost of abuse of drugs and narcotics to the users in alarming, as they live in half-alive, half-free states, without hope or meaning to their lives.

In Pittsburgh a unique program has been established by an Episcopal priest named Father Dom Orsini, to aid and rehabilitate these young offenders, and give them a "grubstake" on life. While they need more money at the moment to continue their fine work, some real progress has been made to date, largely due to the commitment, philosophy, and efforts of Father Orsini himself.

An article from the Pittsburgh Press and a letter to the editor of the New York Times, by Father Orsini himself of November 16 are included at this point in the RECORD for the thoughtful attention of my colleagues and for all who are concerned with finding meaningful solutions to the drug dilemma. The articles follow:

[From the Pittsburgh Press, Nov. 16, 1969]

GRUBSTAKE NEEDS ONE TO AID YOUTH

(By Roger Stuart)

When Father Dom Orsini, an Episcopal priest, first began to help pospecting young criminals search for a richer life he did so with "a dream and a degree of hope."

Now, five years later, he still nurses his dream of giving faltering youth a lift into the mainstream of life with a lot of hope and "a lot less ignorance" of just how tough that job really is.

"We've made mistakes," he concedes. Especially at the outset in dealing with youths hooked on drugs and largely because he lacked knowledge about the problem.

"But you learn fast," says Father Orsini. "We no longer take heroin addicts. We failed with every one of the 11 sent to us."

There have been other failures, too, which have become discouragingly obvious when young men he thought he had helped got "busted" all over again by police.

CONTRIBUTING NOW

Still, Grubstake, Inc. on the South Side, which gave substance to Father Orsini's dream, has had more success than failure, with about 80 of its more than 100 "graduates" going on to become contributing rather than leeching members of society.

They're holding jobs now, he says. They pay taxes. Some are married.

Such success is in direct contrast to the national success ratio in rehabilitation of young delinquents, Father Orsini contends.

And in achieving it, Grubstake has stamped its own imprint on the Pittsburgh district's youth corrections program as indelibly as Father Orsini has stamped his own black eye-patch trademark on Grubstake.

Among local judges—two are members of the Grubstake board—who have sent wayward youths to Grubstake, it has inspirted confidence.

PATCH INSPIRES CONFIDENCE

And to at least one youth—a black who wound up there—Father Orsini's eye patch (which he's worn since he put a lighted match to a gasoline tank at age 10 to see what would happen) has inspired confidence.

"I like you," the youth told Father Orsini. "I can trust you."

"Why?" asked the priest.

"Because," said the youth, "you wear that eye patch. And with it—like me—you carry a certain mark."

But for all its success, Grubstake—unless it soon gets its own new six-month, $65,000 lease on life—will run out of funds and die.

To Father Orsini, such a death knell would come "when all our plans are just about ready for picking" and be like falling "two inches short of our goal."

"BACK TO JAIL"

To Nate, 21, a Wilkinsburg Negro enrolled there for burglaries committed to help sustain his marijuana-smoking and pillpopping, Grubstake's demise can mean only one thing.

"Back to jail," he says.

And though Nate says "it's tougher here (at Grubstake) than in jail," he wants to stay, because "they can't help me in jail."

His view is born of a certain amount of experience, including three months in the County Workhouse and four months another time in the County Jail.

Right now Nate is just one of the 15 youths at Grubstake, where enrollment has been cut from 25 because of the financial squeeze.

DAILY CONFERENCES

But at Grubstake, he says, he's coming "face to face with myself" through the help of almost daily conferences with Innocenzio Gregnano, a consulting psychologist, and Dr. Ken Whipps, a Duquesne University sociologist.

And one of the things he admits about himself now is that "I started messing around with drugs because I was afraid of getting drafted and going to Vietnam."

Somebody told him once that drug-taking is a good draft dodge because the service won't mess with anybody who's fooled with them.

"I was going to leave them alone later," says Nate. "But I couldn't."

Indeed, just a week ago he was discovered "messing around with goofballs" that had been supplied to him by another Grubstake resident.

"Where's that resident now?" asked Father Orsini.

"In jail," said Nate.

And Nate?

Grubstake gave him another chance. He was placed in its Tender Loving Care (TLC) program—a misnomer which, Father Orsini contends, could be described more adequately as "the old monastic mortification of the body to sanctify the soul."

From 7 a.m. until 10 p.m. every day for six to eight weeks, Nate will scrub floors, walls, cupboards and the like. And if he doesn't have anything else to scrub, he'll scrub the same things again.

But in Grubstake's big barn of a building at 2400 E. Carson St., which used to house the Lutheran Service Society on the South Side, there are many rooms.

Every 15 minutes a supervisor checks up on him. He's subjected to periodic shakedowns and at least every two days—sometimes more often—he's given a urinalysis examination to determine if, somehow, he's gotten more drugs.

LIKE BEING ON A LEASH

TLC, in short, says Jim, 18, a white Penn Hills youth who became its first subject, is "like being on a leash."

Arrested a year ago and three days after he started pushing pills in school, he says he was sent to Grubstake without the authorities knowledge that he had smoked marihuana, and "tripped" on Speed and LSD.

"We just weren't alert to it," says Father Orsini. "The records didn't indicate it. There was suspicion, but how far can you go on that?"

As it turned out, Jim and a couple of other Grubstake residents, who normally are given great amounts of freedom, got some LSD on a visit to Shadyside.

But becoming frightened after a bad trip, "they busted themselves," says Father Orsini.

Grubstake's TLC component was devised as a result.

MAKING RESTITUTION

And in Jim's case, at least, it seems to have worked.

He's been off all drugs and narcotics for three months now, he says. He's confronted his guilt of burglaries and voluntarily confessed to his victims and has started to make restitution.

This week he will leave Grubstake, hopefully to complete his last high school year in prep school and then enroll in college, where he will take an architecture course.

In the meantime, however, Father Orsini's financial dilemma with Grubstake remains.

Government agencies are likely candidates to provide financial buttresses.

Charitable fund-raising groups, too, reasonably can be expected to provide some help in the future.

Applications to local, State and Federal agencies are being or already have been prepared.

UP TO COMMUNITY

But right now the foundations which provided Grubstake's original "seed money," can help just so long, says Father Orsini, noting:

"Once a project proves itself, the foundations figure it's up to the community to support it the rest of the way."

So Grubstake Inc. is campaigning among Pittsburgh district people—average citizens—for a grubstake. Donations may be mailed to Grubstake Inc., Post Office Box 9107, Pittsburgh 15224.

Speed is critical, says Father Orsini.

Meanwhile, various public administrators, including State Attorney Gen. William Sennett, are pulling out the stops to see what kind of emergency help can be provided.

But regardless of the outcome of these

efforts or the longer term hopes for government support, Father Orsini says:

"The measure of our greatest success will be if the community accepts us. If the average citizen doesn't accept us, we're lost; we're dead—no matter how much other money we get in the bank."

---

[From the New York Times Magazine, Nov. 16, 1969]

CRADLE-TO-THE-GRAVE BUSINESS

To the Editor:

Gertrude Samuels' article "A New Lobby—Ex-Cons" (Oct. 19), is a masterful portrayal of long ignored and shameless attitudes and practices of the "law abiders" in this nation. I know nothing of the Fortune Society—which may be my shame—but the statements about the problem are accurate.

I am not an ex-con but I am the son of one. My father spent time in the Comstock State Prison. His charge was murder. I was 2 months old when he began "pulling his time"; I met him for the first time when he was released (I was 8 years old). Jail and the fate of an ex-con made him less than human. I am an Episcopal priest, the founder and director of Grubstake, Inc., a community treatment center for the young adult offender. Ours is a work with the ex-con and the pre-con.

In our society, crime is cradle-to-the-grave business. From the earliest stages sufficient deprivation guarantees a tragic emptying of individual lives. It is like a self-fulfilling prophecy. When the crash occurs, and jail becomes a part of one's personal history, those who are not crushed in spirit and hope by our penal ssytem need but wait upon release for the final touches: official suspicion and hounding are added to the personal insecurities, inferiorities and fears. These, plus the social, political and economic ostracism, work to erode further the remaining spirit until either recidivism or death. If recidivism occurs, then society says "See, no good," and the screws of the system are tightened. If death—the record is expunged by the grave.

Few, if any, ex-cons survive this whipping without deep and permanent scars. The chances of overcoming these forces are small and life is a bitter, uphill battle for mere survival.

Considering the impetus to new solutions offered by the Federal Government by way of the Omnibus Crime Bill, and the pioneering work being done by the Federal Bureau of Prisons, there is hope. In Pennsylvania an alert and sensitive Attorney General, William Sennett, has brought into being a constructive crime commission to "re-think" the entire approach to the criminal justice system. The Pennsylvania Bureau of Vocational Rehabilitation has for several years offered its resources to help meet the vocational and educational needs of the social deviant. The Department of Corrections and the Board of Parole are now energized by a young breed which lacks the jailor concept. In Pittsburgh, foundations and corporations have provided generous seed money to organizations such as ours to investigate, program, staff and innovate. The Criminal and Family Courts of Allegheny County actively support our efforts. Our push was provided by the Hon. Ruggero Aldisert, formerly of the Court of Common Pleas and first chairman of the Grubstake board. He is now a member of the U.S. Court of Appeals. His successor at Grubstake, the Hon. Joseph Weis Jr. of the Court of Common Pleas, carries on by leading an expansion of our effort.

I feel that if the states would set aside 10 per cent of their corrections and parole budgets for innovation and if this were matched by Federal funds, we would see a dramatic change in our crime cost and an upsurge of hope and productivity among those now deemed "dead."

FATHER DOM T. ORSINI.

PITTSBURGH, PA.

## TO MUCH OF THE WORLD SONGMY SIGNIFIES AN AMERICAN TRAGEDY

---

## HON. DONALD M. FRASER

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. FRASER. Mr. Speaker, on Wednesday, December 3, 1969, the New York Times printed a story by Henry Tanner detailing European reaction to the Songmy tragedy. The second paragraph summarizes the feelings of many:

Apart from the predictable exploitation by the Communists, the atrocities allegedly committed by American soldiers have moved the world to feelings of sorrow, shock, anger and a deep fear that the continuation of the war will have a corrosive, brutalizing effect on American youth and American society as a whole.

Mr. Speaker, I share this fear. The complete article follows:

[From the New York Times, Dec. 3, 1969]

TO MUCH OF THE WORLD SONGMY SIGNIFIES AN AMERICAN TRAGEDY

(By Henry Tanner)

UNITED NATIONS, N.Y., December 2.—In much of the world's press and for many ordinary citizens the village of Songmy has become the symbol of an American tragedy, even more than a Vietnamese tragedy.

Apart from the predictable exploitation by the Communists, the atrocities allegedly committed by American soldiers have moved the world to feelings of sorrow, shock, anger and a deep fear that the continuation of the war will have a corrosive, brutalizing effect on American youth and American society as a whole.

These feelings emerge as the main theme from reports by correspondents of The New York Times from some 30 countries.

Although comparisons with wartime Nazi crimes and with crimes committed by Communist forces in Vietnam were being drawn by some, the survey showed that the great majority in most countries do not see Americans in a similar light.

JUDGMENTS VARY

Most persons, the survey showed, apply one set of moral judgments to dictatorships, both Communist and Nazi, and another to the United States. Although an implied tribute, this only deepened the anger and the sorrow of those who have considered themselves the friends of Americans.

"What is happening to America, arbiter of the world, with its high moral standards," an Italian university professor asked. "Are you fighting the war by the standards of your enemies?"

The reports also showed that in Europe and Asia the Song-my affair has rekindled sharp public concern over Vietnam, reversing a trend toward growing indifference that an earlier survey had found a few days after President Nixon's speech on Vietnam of Nov. 3.

THREAT TO AMERICANS SEEN

Many people linked the alleged massacre in the settlement of Mylai No. 4, which is a part of Songmy, to what they saw as the inherent evil of the Vietnam war. They renewed their criticism of Mr. Nixon's Vietnam policies and renewed their appeals for the United States Government to end the war.

American withdrawal now is "both a necessary act of state and a human imperative," wrote The Spectator, the conservative-inclined London weekly, in a typical comment.

"Continued war now means a deadly threat not only to Vietnam but to the American people," an editorial in Dagens Nyheter, the respected Swedish daily said.

From Oslo a correspondent reported that the common theme of virtually all available comment was "the war has to stop" and one of the most urgent reasons for stopping it "is to save American youth from slow moral poisoning."

In several countries Songmy awakened memories of other wars and other atrocities—atrocities committed as well as atrocities suffered.

OTHER VILLAGES RECALLED

"The Americans have learned that the Americans in Vietnam have become the equal of the French in Indochina, Madagascar, Algeria and of the Germans at Oradour," wrote the Paris weekly L'Express, whose publisher, Jean-Jacques Servan-Schreiber, first gained prominence abroad by writing a book about a young lieutenant—himself—being caught up in the "vicious circle of violence" in Algeria.

Oradour-sur-Glane was a village in central France that was razed and its entire male population killed by the Germans in reprisal against an attack by partisans in 1944.

In Germany too, newspaper editorialists recalled not only Oradour, but also Lidice, the Czechoslovak village, and Filetto di Camarda, a village in Italy, both of which suffered atrocities.

In Spain an official remarked: "Perhaps if American writers were dealing with the civil war now they would not be so quick to draw moral conclusions from the terrible things that happened then," referring to the Spanish Civil War of 1936 to 1939.

"I am shocked," a grocer in Athens said. "If atrocities like this are tolerated by the United States Army and we are simply told that the Reds are doing worse, one wonders what it is the Americans are fighting for in Vietnam."

REDEEMING ASPECTS

"Almost every army has its killers, but these Americans have done away with the American dream of being different," said an official in Belgrade.

And in The Hague, an editorial in the Socialist daily Het Vrije Volk wrote: "The American's have been killing the people they wanted to protect. This means the bankruptcy of United States Vietnam policy."

Many persons abroad noted that the American press had given detailed coverage to the eyewitness accounts. This public debate and the Administration's promise to investigate and mete out justice are the only redeeming aspects of the tragedy, in the view of foreign public opinion, the survey showed.

Aldo Rizzo, an editorialist in the Bologna Daily Il Resto del Carlino condemned the alleged massacre and added:

"All this must be said explicitly and without mental reservation, but it is necessary to add that the war crime of Songmy is being examined, evalued and discussed in America today with a frankness and sincerity that has no precedent in the sad history of such things."

La Stampa, the respected Turin daily, wrote in a front-page editorial: "But the civilization of a people is judged above all by the courage and the severity with which it isolates certain individuals and denounces their crimes. The American press has done and is doing its duty."

Government officials in most countries have refrained from making statements. Among the exceptions were those in Britain, Sweden, Norway and West Germany.

Prime Minister Wilson, six days before the White House issued its statement, said that it would be a grave atrocity if the charges made thus far turned out to be only a quarter true.

Efforts are under way to bring the issue into the House of Commons for formal debate or at least before a meeting of the

Parliamentary Labor party prior to Mr. Wilson's departure for Washington in January.

The British press, politicians and people were quicker than their American counterparts to sense the full horror of the affair, a correspondent wrote from London, adding:

"Why should this be so? Perhaps it is easier for outsiders to see horror. The British admire us so much, and still have so many illusions about the United States, that our wounds make them bleed. And they are less inured to violence than Americans now."

TERMED HORRIFYING EXAMPLE

Foreign Minister Torsten Nelsson, of Sweden said in a speech in Malmoe last week: "World opinion cannot be silent about the American war crimes in Vietnam. We must say clearly what we think."

In Norway, Songmy was described during a debate in the Storting, or Parliament, as a horrifying example of the atrocities of war. It was the main reason why Gunnar Garbo and Olaf Kortner, respectively chairman and vice chairman of the Liberal party, which is part of the Government coalition, came out for recognition of Hanoi.

Guttorm Hansen the spokesman for the Labor opposition, which is spearheading the move for recognition, said: "This war is a heavy weight on America's relations with its friends around the world, and from the dead-end street this great nation has driven itself into, there is only one way out: the way back."

In Bonn, Chancellor Willy Brandt was asked about Songmy at his first news conference since taking over the Government, and refused to draw a parallel with Nazi war crimes. He replied:

"If I were still a private citizen or a newspaperman I know what I would say. I can see how heavily the burden weighs on the American people and I feel it inappropriate for me to comment as if to put two things in the same pot that do not belong together."

## BILL TO RAISE PERSONAL EXEMPTION RATE

### HON. JOSEPH G. MINISH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. MINISH. Mr. Speaker, as the sponsor of H.R. 7331, a bill to raise the personal exemption rate per dependent from $600 to $1,000, I was pleased by the Senate vote on Wednesday to increase the rate to $800. The Senate action, while inadequate, nonetheless constitutes a major step toward alleviating the heavy tax burden borne by low- and middle-income Americans.

Over the past three decades the cost of living has more than tripled in the United States. Yet, during this same period, the personal exemption rate, originally designed to relate to the cost of living and the cost of rearing a child, has been increased only once and then by only $100.

Justice and equity demand an increase in the pitifully low and antiquated exemption rate. The Senate has acted correctly and courageously by boosting the rate in the face of vigorous opposition from the administration, and the Congress should act quickly to ratify the increase. I am confident the President will respect the wishes of overtaxed citizens by signing the exemption rate increase into law.

## CAMPUS UNREST: A STUDY OF WHO AND WHAT IS INVOLVED

### HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. DULSKI. Mr. Speaker, there is much concern and interest about what is going on in our colleges and universities today.

Why is there unrest? What can we do about it? Is it a single problem or a combination of problems? Is it a matter of lack or of collapse in communications?

The questions are endless. The answers are not so easy.

Mr. Speaker, the Buffalo, N.Y., Evening News in my home city sent an able young member of its Washington bureau staff, Ronald Maselka, on a study tour of 10 key colleges and universities in the Northeast and Midwest.

On this tour he produced a series of stories of his findings which I believe merit wider circulation because this basic matter is of such broad interest.

As a part of my remarks today, I am including the first four stories in Mr. Maselka's excellent series:

CONFLICT ON CAUSE, CURE HINDER SOLUTION OF UNREST ON CAMPUSES—I

(By Ronald J. Maselka)

WASHINGTON, September 22.—As signs of autumn reappear, so do the renewed pangs of a gnawing national tummyache—campus unrest.

Like its related agony—the Vietnam war—trying to forget about it doesn't make it go away. And while the wrong medicines might only inflame the pain, the right ones are hard to find.

However, there is a growing conviction that student disorder is but a symptom of a larger national ailment. "Campus unrest is not just a passing thing," said U.S. Education Commissioner James E. Allen Jr., but part of the nation's undergoing "turbulent social change."

This echoes the interim report in June by the National Commission on the Causes and Prevention of Violence that "the problem on campus unrest is more than a campus problem. Its roots lie deep in the larger society."

Addressing a conference of student leaders and university officials over the week-end, Dr. Allen compared this unrest to a mild heart attack, which signals a need—while leaving time—for corrective action.

EXPERTS DISAGREE ON FUTURE

But how much time is left? What steps should be taken? Experts disagree on the problem's future, as they do on the underlying causes and the diagnoses for cure. There is agreement on the magnitude of the problem, the need for concern that it may envelope the high schools.

But these are tough questions, this student talk of war, hunger, poverty, militarism, racism. What is a university? What is the purpose of education? Of government?

To Prof. William S. Stanmeyer of Georgetown University Law School these questions add up to: "What is the good society? What is the good life?" These are issues that have posed intellectual headaches for philosophers since Plato. Now they pose some real headaches for America's politicians, who also have no clearcut, immediate answer.

THE SEARCH CONTINUES

Throughout America, however, in Washington, in state capitals, in college dormitories and living rooms, the search continues. And there lies the hope, the difference between an evolution and revolution.

As President Nixon noted in a meeting with campus leaders Saturday afternoon, there is a need for students to listen as well as talk, a need for more tolerance between the community at-large and the vast majority of rational students.

How tolerant, how patient will the students be this year, no one can say for sure.

Dr. Allen, for example, has been criticized for his public optimism that "there are signs that the worst may be over." Some say this is wishful thinking, or an attempt at reverse psychology.

OPINIONS DIFFER

FBI Director J. Edgar Hoover has predicted that it "will not subside in coming months." And Dr. Richard Peterson, a research psychologist who conducted national surveys in 1965 and 1968 on organized student protests, said: "I don't think it's going to decline. All the issues are still alive. While reform efforts are going on at many schools, these are not fast enough to counteract."

While campus reforms have brought "more channels for students to communicate their views" and "conditions exist for an exchange of trust and responsibility," New York University President James M. Hester acknowledges: "We will have continuing confrontation with various groups."

Reports indicate that institutions generally are better prepared for protests. A tightening-up trend is indicated in beefed-up campus police forces, improved campus disciplinary machinery, codes of conduct and willingness to use expulsion and court injunctions to keep order.

LONG, SHORT RANGE VIEWS

But as one federal educator noted: "You can't document a prophecy."

Is Dr. Allen, then, looking at the campuses through rose-colored glasses? It would seem not. Apparently, he is looking through intellectual bifocals for long- and short-range views.

He is soft-pedaling the symptom, hard-selling the long-range cure.

Acknowledging that unrest is a pressing immediate problem, he urged the week-end conference of students and educators to put emphasis "not on patching up the cracks but in building a whole new structure." This means "looking beyond the moment," he said, to the long range goal of improving the university and the nation.

The short-range view sees the need for controlling and preventing campus violence this year. Long-range, it sees the task of answering the larger questions.

AWAIT LEGISLATIVE ACTION

This dual perception also clearly shows that some issues are intramural—like curriculum, student participation, minority admission policies—and can be solved by universities and their students on a campus-by-campus basis.

It also shows that some issues—Vietnam, the draft, race relations, aid to education—await action in Washington, in state legislatures and in the larger public opinion.

Keeping these differing views in focus will depend on distinguishing between what the National Commission on the Causes and Prevention of Violence called "peaceful protest and violent disruption, between the nonconformity of youth and the terror tactics of the extremists."

Studies on campus unrest generally note that only a tiny minority—around 3 per

cent—of the students are the revolutionary radicals, the anarchists, the nihilists. Between these committed to violent confrontation and the 70 per cent or more moderates are the discontented, who can be aligned with the radicals on an issue-by-issue basis.

MUST BE CONTAINED

It is apparent that the violence of the few has done violence to the reasonable complaints of many more.

Campus administrators face the task of distinguishing between the unreasonable demands of the disrupters and the legitimate complaints of the dissenters. It is a task that requires a kind of walking-on-eggs statesmanship to prevent the escalation of incidents sparked by a tiny minority.

In short, the disrupters must be contained. The dissenters must be communicated with.

But student impatience sometimes makes communication difficult.

And according to one Bureau of Higher Education official, "one factor is worse this year." Noting that an estimated 250,000 students are affected by congressional failure to pass an emergency guaranteed student loan program—providing an incentive allowance to lenders to make loans to college students—he said: "By the time Congress enacts this, it will be too late for most of the kids. . . .

ECONOMIC ISSUES CITED

"Sure students are refusing to fight the old men's war. But they're also making some very valid complaints about the rising costs of education and about the decline in the quality of teaching . . . students as individuals and universities as institutions are both caught in this economic crunch.

"As federal funds are being cut drastically, costs are rising for both. The economic issues on the campus are just as serious as these others that get more publicity."

In a widely circulated report based on a spring tour of campuses, 22 House Republicans stressed the need for increasing aid to education.

Led by Rep. William E. Brock (R. Tenn.), the group has been pleading with Nixon administration officials to implement some of their recommendations, ranging from draft reform to lowering the voting age to 18 and ordinating all federal youth programs in one agency.

SEEK INTERN PROGRAM

There are reports the administration is considering establishing a blue-ribbon Commission on Higher Education to study the complex issues from ROTC to government research on campus.

The GOP group is also working toward obtaining funds for the congressional intern program to get more young people involved in politics constructively. Federal funds for the program were cut off two years ago.

From its own party and elsewhere, the Nixon administration has been criticized for "moving in the right direction but not fast enough" on campus problems.

But Henrik N. Dullea, special assistant to State University of Buffalo President Martin Meyerson, criticizes the administration's contradictory policies.

CITIES PEACE DIVIDENDS

A delegate to last week-end's student-educator conference here, Mr. Dullea stressed that this was his personal opinion. While encouraging volunteer student action social programs, he said, the administration sponsored a meeting in Washington on the subject but didn't invite any students.

Evidence of de-escalation of the war and troop withdrawals, he said, are counterbalanced by reports that the peace dividend of post-war funds available for domestic programs won't be very large.

While the administration's school desegregation policies are also an irritant to students, Mr. Dullea said they also question education fund cutbacks in the light of the size of the military budget or the space exploration program.

Seeking to dramatize its concern, the administration has announced its proposal to drop the November-December draft quotas and seek congressional approval of a lottery system.

NEED DRAFT REFORM

While this was viewed as a hopeful gesture, even moderate students at the week-end sessions sponsored by the Association of Student Governments were not particularly enthusiastic.

"We need real draft reform, not a stop-gap measure," one said. "Besides, the war is a bigger issue."

Mirroring the nation, Congress too is divided on how to respond to campus disorders. Some would attack the social issues fueling the unrest. Others would react harshly with repressive legislation.

One federal education official said: "So far, we in the administration and the agencies involved have been successful in blocking repressive measures. We hope we will continue to be successful."

LAWS ON BOOKS

But a congressional aide was more pessimistic. "If there's another blowup, anything can happen," he said in discussing possible Capitol Hill reaction.

There are already federal laws that call for aid-cutoffs to students convicted in civil courts of crimes linked to campus disorders or who have been found administratively guilty by university procedures.

In the opinion of some, these laws are really unnecessary, or at least superfluous. "These laws are more a statement of public concern," one agency expert said. "Congress showed that it acted. But it's easier for a university to expel somebody."

Blocked so far—but available if there is public outcry for more campus violence—are legislative proposals to cut off all federal aid to institutions, not just individuals, and to make campus violations punishable by federal fines and jail terms.

---

"SILENT MAJORITY" IN THE COLLEGES IGNORES NEW PATHS OF RADICALS—II

(By Ronald Maselka)

COLLEGE PARK, MD., October 1.—Four asphalt paths intersect the grassy mall in the heart of the University of Maryland's main campus.

When classes end on the hour, most students follow those paths. But scores of others are carving out a fifth path, already a yellowish brown trail, and a handful just cut across the lawn.

These cross-campus walking patterns parallel the political breakdown of today's collegiate student bodies. Those following the paved paths, for example, symbolize the so-called "silent majority" of students, concerned about current, pressing issues but immediately more concerned about their studies.

Dr. William E. Sedlacek, assistant director of the University of Maryland's Counseling Center, said his student behavior studies indicate this majority "is just trying to get through."

The reform minded minority is represented symbolically by the group forging the new path, while student radicals might be compared to the independent lawn crossers.

CLAIM NEED FOR NEW WAY

According to Dr. Sedlacek, the vocal group of new pathmakers is legitimately concerned about the society and about changing it." They are saying there is a need for a new way of doing things by registering their protests through traditional or modern channels.

The radicals are that small group of hard-core revolutionaries who carry violence as a tool in their portfolio of protest. For Dr. Sedlacek, the radicals include members of the SDS (Students for a Democratic Society), who believe the "whole thing is no good" and want to tear down the society without offering a pragmatic alternative. Not only would they walk on the university's grass, they would stomp on it, burn it, uproot it. They are the extremists.

In between the reformers and radicals are what Dr. Sedlacek calls "the blenders into the liberal environment." These don't always stick to the same path. Today, they may be liberals, tomorrow—who knows what.

The "blenders" would include the faddists, those who grow beards and don't wear shoes, for example, Dr. Sedlacek explains, but "when they leave school, they shave off the beard and go straight, so to speak, right away."

33,000 AT MARYLAND

But long hair and short skirts, bare feet and beards are not the exclusive uniform of any of these groups, which accommodate any number of subgroups with political variations from ultra conservative to ultra radical.

The University of Maryland and nearby Georgetown and George Washington Universities are physically different but they share this diverse student spectrum.

Maryland has about 33,000 students on a campus dotted with majestic trees and red-bricked, white-pillared colonial-style buildings. It is the fourth largest single state university campus in the nation.

Georgetown's 7600 students have a lot less green area, which is offset by quaint shops and cobblestone streets. It is the oldest Catholic university in the country.

OPINIONS ON SILENT MAJORITY

George Washington's 14,000 students share a concrete campus that covers a large area in downtown Washington with no visible boundary lines. Its buildings, classrooms and town houses are spread over an urban campus that is nearly across the street from the State Department on one side, four blocks from the White House on another and 14 blocks from a ghetto.

On these three very different campuses, as elsewhere, there are differences of opinion on how loud this "silent majority" of students is. Some call the silence apathy, indifference. Others attribute it to a heavy work load rather than a lack of concern for non-academic issues.

Stressing that "most college students are concerned about the fundamental problems of our society," George Washington's president, Dr. Lloyd H. Elliott, said that most are also "moderates who are knowledgeable about these problems and concerned with their solution, and to a considerable measure are changing their own goals and career plans because of them."

WORKS IN SILENT WAYS

For instance, he points to increased interest medical students are showing in assignments to neighborhood health centers, law students in legal aid work, business schools in re-examining social responsibilities.

Another defender of the "silent majority" and the belief that it works in many silent ways is Francis P. Hyland, a Maryland junior, who wrote in a letter to the campus newspaper: "This campus does have a conscience. It gives blood for transfusions, it bounces basketballs for heart disease, it holds trash bashes, it sells daffodils for cancer research, it pays welcome visits to shut-ins, it collects food and clothing for the poor, and it takes children, who otherwise could not go, to the zoo and the circus."

Responding to another student who had found some merit in SDS protests, the letter added: "You seek a neatly compartmented, homogenized student body, which, pray God, will never exist."

While "any dissent is carried on by a minority," Dr. John Portz, head of Maryland's

honors program, stressed that today's student activism is "being carried on with at least the tacit consent of the majority."

THE ACTIVIST STUDENTS

And while the majority "may not have the oomph" to overcome the natural inertia of the non-reformer, Dr. Portz added: "They're certainly not indifferent. I've been teaching for a quarter-century and this is the most involved, committed generation of students I've seen."

But then, how do you explain a turnout of 75 in a student body of thousands for a meeting to plan a peaceful anti-war protest?

Activist students—even the SDS types—usually the student government leaders, the newspaper editors, see this moderate majority "going to class and going home, period."

That's partially explained because so many students are commuters, off-campus residents with outside interests. Many have jobs to support their cars and their education. This type of student population cuts into organizing ability.

FRATERNITIES FADING

But Ira Allen, associate editor of Maryland's daily student newspaper—the Diamondback—said: "I don't underestimate the apathetic people. They are concerned about things but there's this thing about showing it. A large majority are respectably against the war, for example." One indication that the wave of concerned students is growing is the reported decline of fraternities and sororities.

Noting that the number of students who sought admission to fraternities was down, one George Washington junior said: "Fraternities are fading. Students don't see fraternity life as meaningful enough." Or as a Maryland senior put it: "Did you get drunk Friday night and who did you date Saturday night are no longer the important questions."

Largely, however, the "silent majority" seems to mirror the larger society. Generally for example, students are notoriously lax voters.

CONSIDERED PRISON

And like many adults, they don't get concerned about an issue until it affects them personally. It's like the student who explained that he was concerned about the draft "in general" but "when the draft comes to me, then I'll have to make a decision."

The thin line between unconcerned moderate and very concerned radical was drawn when he recalled that he was out of school for a semester and worried about getting drafted.

"I considered going to prison rather than be drafted," he explained, adding that he was still determined not to accept induction if called to fight in Vietnam.

"If it were a question of defending this territory," he said, "sure I'd go. But in Vietnam . . . the objectives aren't clear there."

Occasionally, like when a group of veterans at Maryland helped thwart an SDS building takeover, the silent majority asserts itself. But indications are that short of total crisis situation, it apparently cannot be regularly expected to counter campus violence.

OTHER WAYS OF CHANGE

One of the acknowledged tasks of student governments this year will be an effort to motivate this bulk of the campus population.

Robert L. Liebersohn, a junior at Maryland, in an interview noted that he's concerned about the big issues but "I'm concerned about my grades, my personal problems . . . There are other ways of change besides protest." He plans to be a teacher.

What would get him to protest?

If there were a threat of a campus takeover, he said, I'd protest that and demand my rights to an education be protected."

And an engineering student watching an SDS Teach-In said: "I wish they'd put that energy to use trying to make the bookstore more efficient . . . But if the government cuts off money because of jokers like that, I might get a little violent myself."

RE-EXAMINED ISSUES

But sometimes there are undramatic transformations, Robert X. Morrell, a Georgetown sophomore from Los Angeles, explained that he was "a gross example" of non-involvement last year.

Noting that he used "to take a lot of long naps," he recalled working on a scholarship drive for inner city students. "And wait a minute I said to myself. All these kids at other schools wouldn't be doing this for no reason at all. So I re-examined the issues all by myself."

Which way will this current freshman class go?

FEELING THEIR WAY

They are still an unknown quantity basically. One Georgetown spokesman voiced a consensus why he said: "Each incoming class seems to have been more volatile than the other. On that basis, we'd expect some more activists but we don't really know."

Upper classmen generally seem to have the opinion that the freshmen are "amazingly tuned on to what is going on." Random talks with some freshmen indicate a "just feeling my way" attitude.

Take John C. O'Keefe, a Georgetown freshman from Dayton, O., who said: "Around here, everyone expected or suspected the freshman class to be vociferous on boisterous or active . . . But I don't know if everyone's all that fired up about ripping things up. I'd like to find out what I'm tearing up first."

SDS GLAMOR ATTRACTS STUDENTS BUT FAILS TO HOLD MOST—III

(By Ronald J. Maselka)

WASHINGTON, OCTOBER 2—"Never in the history of human conflict was so much owed by so many to so few."

In the context of campus unrest, Winston Churchill's tribute to the Royal Air Force could be read as a censure of the violent student minority. For the violence of this comparatively small group has cast a pall over American higher education and besmirched the public image of thousands or students.

Spurts of campus violence already have added credence to the educators who had predicted renewed trouble and those who refused to predict. "We never speculate on the future," one University of Maryland administrator said. "You only need one to start trouble."

One reason for the impact of the radical Students for a Democratic Society (SDS) is that for any specific planned protest their relatively small hard-core of members on one campus is swelled by members from other campuses and non-student outsiders. This is the view of both administrators and students, looking back at the disruption of a talk by San Francisco Mayor Joseph Alioto last spring at Georgetown University and two building seizures at George Washington University.

CERTAIN EXOTIC APPEAL

The SDS charter at Maryland was revoked until next February by the student court for repeated violations of campus regulations. But it still functions.

But the mere facts that they proclaim themselves to be revolutionaries and that revolutionaries are different afford a certain exotic appeal for the SDS.

This, plus their truly committed individual determination, gives them a capacity for disruption far exceeding their numbers.

Sometimes, this makes them appear sophomoric.

For instance, about 20 SDS members waving red books temporarily disrupted a recent orientation meeting at George Washington University, chanting "Mao Tse-tung, Mao Tse-tung."

At the very least, they were advertising that they were still around.

STUDENT COURT TRIAL

"SDS has tremendous color," explained Dr. John Portz, a Maryland University English professor who formerly headed the Faculty Senate Committee on Student Life. "And they are prepared to engage in fantastic actions. It's not enough for them to carry a sign. They want to be the focus of attention by glaringly unusual human behavior."

This was documented last week at a student court trial at George Washington of two students charged with disrupting a faculty meeting last spring.

During the proceedings, SDS members or sympathizers alternately hummed, belched and yelled to be recognized. At one point—when a faculty adviser consulted with the student court members—three students crawled around the classroom on their hands and knees moaning: "Grovel, grovel, grovel."

One student explained that this was a reference to the SDS allegation of a slave-owner relationship between student and faculty.

ATTRACTED LISTENERS

Another example of the electric appeal of the SDS also came out last week on the patio of the University of Maryland library.

In a pre-announced teach-in, a handful of SDS members succeeded in attracting several hundred student listeners, who became arguers and hecklers.

Richard Fox, a Maryland SDS leader, says that the organization is a social magnet. "It makes people take sides," he said, noting that the teach-in drew the curious, the patriotic, the apolitical troublemakers and agitators, the bullies and the people looking for excitement.

RELUCTANT TO PREDICT

One student ripped down a Viet Cong flag carried by the SDS and a fist throwing brawl erupted for a few minutes.

It's this type of incident that explains the reluctance of administrators to predict the temper of their campus. The potential tensions are there. And the SDS is waiting for someone to accept its dare.

But campus police are becoming more sophisticated about accepting that dare. At the height of the minor disturbance at Maryland last week, for example, there were no uniformed police evident.

And ironically enough, the presence of police uniforms adds strength to the SDS generally, for example, might be cast in the role of SDS supporter because of their intervention when SDS members are being carried away by police.

BECOME CELEBRATED

Noting that if SDS members are hauled off to jail they simply become "more celebrated" on campus, Dr. Portz explained that "students today have a sense of peerage of their own age group, that they never had before. Students respect their right to be different." With outside police intervention, he added, student support could grow because of this "we're all in it together" feeling.

Conversations indicate that students generally acknowledge the right of fellow students, who are SDS members, to state their beliefs publicly.

RIGHT TO SUSPEND

"It's all right for them to have their say here, as long as they are students," one Maryland junior said. "But it's not right for the outsiders."

"Throwing them out is not the answer," one faculty member argued.

The court injunction and the student judiciary system are two tools university ad-

ministrators have evidenced they will use to counteract violence.

The George Washington Student Court, for instance, has the right to expel, suspend or reprimand a student charged with a campus violation. This type of reaction to violence does not draw the ire of other students toward the administration building.

Asked why the majority of students attending last week's first Student Court trial at George Washington seemed to be either SDS members or their allies, Columbian College Dean Calvin D. Linton replied: "This group is not representative of the student body . . . I have the distinct impression that the majority is disenchanted with this kind of thing."

A LOT ARE BORED

Maintaining that the lack of attendance should not be confused "with apathy or indifference on the part of the majority," he said he felt it was more "a desire of students to see their judicial machinery operate properly and speedily, without fanfare.

"I get the impression also that a lot of students are bored with this kind of thing. They would rather be in the library studying, for instance, rather than sitting in here."

Between currently divided SDS factions, there is disagreement on whether to accentuate their appeal to youth or blue-collar workers. So, typical SDS appearance is a compromise. The long-hair might appeal to the youthful hippie, for example, but the blue denim shirts and dungarees apparently are meant to relate to the workers.

HOW TO DISTINGUISH

One SDS faction at Maryland plans to aim its key thrust this year at the unionization of the university's service employes, the housekeepers, maintenance personnel and cafeteria workers. Georgetown's housekeepers have twice voted down such unionization.

One way reporters can distinguish between the two main SDS factions is that one will talk to them, the other won't.

For instance, one SDS member, who visited the University of Maryland for last week's teach-in was confronted by the campus police afterward because her license plates had expired.

Confronted by a Buffalo Evening News reporter, she said: "We don't talk to the Establishment press. You've fouled us up too many times."

And when Jim Stark, an SDS leader at George Washington University, was asked by an intermediary to discuss the coming issues and SDS plans with a News reporter, he said: "I don't want to rap (talk) with him about that."

CHANGE IN GENTLE WAY

On the wider philosophical question of "What this all means," Jim Stark said: "You know, the people who are involved in it don't know what it all means or where we are going."

Noting that the meaning of campus unrest won't be gauged for several years, and probably by historians, he added: "When the Depression came in 1929, people didn't know what it meant right then. Some people thought it was the end of the world."

A similar uncertainty of directions was voiced by Maryland's SDS leader, Richard Fox. "I have difficulty trying to figure out what I am going to do," he said. "But I don't want to be happy at the expense of someone else's pain."

Noting he became involved in SDS because of his sister's involvement in civil rights work, he said: "I dislike violence. I opposed the Vietnam war initially because of the violence . . . But violence is something that is used to achieve political ends. Most like to see change in a gentle way. So would I."

Some students noted they could "admire the goals but can't relate to these guys in SDS" because the group attacks "the system rather than trying to improve the university."

REALLY BADLY SPLIT

Recalling that SDS had wider student support at George Washington last year, Greg R. Valliere, managing editor of the Hatchet, the student newspaper, said: "This year, it's completely different it seems to me. There's a lot less support for them generally . . . They're doing stupid things, like disrupting some meeting the students came to hear. They do a lot of idiot things. They're getting too unreal and losing their appeal . . . with their endless rhetoric of imperialism and racism."

Reporting that SDS members are required to detail where they went and who they spoke with that day at evening discussion groups, another student said SDS "is becoming paranoid . . . they're hurting themselves. And they're really split up badly."

Whether SDS can cause as much trouble divided remains to be seen.

But Ave J. Saunders, a Maryland student government leader who dropped out of SDS after being a charter member at the university, said: "So you take over a building, what do you accomplish? You have to convince people you are right. You can't force anyone to agree with you."

---

STUDENTS PURSUING GOALS BEYOND END OF VIET WAR—IV

(By Ronald J. Maselka)

WASHINGTON, October 3.—A flight path into Washington's National Airport brings commercial jets thunderously close to the sky above Georgetown University.

While the jets are not a campus issue, their speed and sound echo the intensity of the changes occurring at Georgetown and other universities. Plans for larger, louder jets mirror the depth of the campus changes and issues ahead.

While the Vietnam War and the draft are overshadowing, indications are that the end of the war and reform of the draft will not end campus discontent.

Discussions with liberal student leaders—interested in campus and off-campus issues—reveal a depth of concern about the structure of the university, academic reform, and the values of the greater society.

"If the war ended," said Donald J. McNeil, editor of Georgetown's student newspaper, The Hoya, "I think the (student) emphasis would switch. Like the war's over, fine. So let's put the money to work here."

Why is this collegiate generation raising these questions? Why are they different from their predecessors? There were always liberals on campus, but why so many now?

"The war was a big catalyst for all this," explained Michael Gold, president of the University of Maryland's Student Government Association. "But the civil rights movement was an even bigger catalyst. That showed that this country is not what it's cracked up to be. The rhetoric does not approach the reality. The war just fueled this awareness, providing concrete evidence of this hyprocrisy."

PROVIDE NO ANSWERS

Noting that "there's more knowledge today" and that the assassinations of President Kennedy, Martin Luther King and Sen. Robert F. Kennedy added more fuel for student concern, Ave J. Saunders, a cabinet member in the Maryland student government, added: "I think students today just have a greater awareness of people and the world around."

As an example, he said: "If you live in a $60,000 house and go to school with a black student who lives in a ghetto in something less than a shack, you start to ask yourself: Why do I have it so good and he has it so bad?"

Responding to the criticism that "smart-aleck" kids are raising a lot of questions but providing no answers, he added: "Students don't have the answers. We're not saying we do. We are saying let's face the questions, like when the government says things are fine and yet millions of people in this country live at or below the poverty level."

BE MORE PATIENT

Acknowledging his idealism, Robert X. Morrell, a Georgetown sophomore, who was working to get signatures for an anti-war petition, said: "Maybe if we all got together and admitted that we don't have the answers, we can do something."

Urging that "we give this feeling of community a chance," he suggests "being more patient with alternatives, not taking it for granted that the established ways to get things done are necessarily the only ways or the best ways."

Administrators in public and private universities throughout the country are moving in a number of directions to respond to the genuine depth of this student concern.

Changes range from better food and lower food prices to coeducational dormitories, student voices on faculty committees, improved student disciplinary procedures and judiciary systems.

TOO CONSERVATIVE

Pointing out that the day of the dictatorial dean is gone, one administrator said: "The emphasis today is on due process, on fair treatment."

There are still students who think administrations are too slow, too conservative.

While the University of Maryland's President, Dr. Wilson H. Elkins, has stressed the institution's reputation for scholarship during his 15-year tenure, one student said: "But the trend today is toward student life . . . Show us how to live, not how to make a living."

And another student credited Dr. Elkins with "building this into a fine institution," but added: "There's a new breed of students today, a new level of interest. He wants to continue change at the same pace. We want to move faster." Noting that Negroes represent only about 2 per cent of the university's population, he said: "If we can solve racism on the campus, it will in great measure affect the community around us."

LIQUOR IN DORMS

The University of Maryland is in the process of complying with an order from the Department of Health, Education and Welfare to institute programs aimed at increasing integration on campus.

The rate of change varies from campus to campus. Georgetown, for instance, allowed liquor in dormitories since 1966, but Maryland's Board of Regents just dropped its total ban on alcoholic beverages a week ago.

There are more similarities though. Georgetown, Maryland and George Washington Universities all have groups of students working for campus involvement in the Oct. 15 moratorium on normal scholastic activity as an antiwar protest. And all three are reacting to demands for "relevance" with programs or plans for urban studies.

At all three, black students are a tiny minority—less than 200 among Georgetown's 7600 students, less than 800 among George Washington's 14,000, less than 500 among Maryland's 24,500 full-time students.

SEEKS BETTER BALANCE

Explaining student reaction to this distribution, one George Washington student said: "We are aware that we are a white school in a predominantly black city and we believe the university should do something about it."

One George Washington spokesman said that administrations are trying. "There is a feeling," he said, "that educational institutions must do what they can to equalize educational opportunity for black students."

Part of this is the growing development of black studies programs and university efforts to recruit inner city students and devise special programs to upgrade their qualifications so they remain in college and compete effectively.

INFLUENCE WILL GROW

At many campuses, the Black Student Union is the key magnet for organized, nonviolent Negro protest. At George Washington, for instance, the BSU last spring proposed that the university devise a way to recruit 100 black students, tuition free, for the next school year. The university found funds for about 40.

Carolyn Jones, a BSU member at Maryland, said that the influence of the Negro population will increase with their size and their ability to agree on objectives. As reflected nationally, black students are gravitating toward themselves and their special concerns, while accepting white student support.

A key issue at both Georgetown and Maryland this year is student interest in getting representation on the university governing body—variously called trustees, board of regents or board of directors.

LACK DIRECT CONTACT

Many experts point out that these boards, usually comprised of prominent citizens and alumni, merely rubber-stamp administration policies. Some of the student efforts, however, seems aimed at revitalizing these boards' functions.

Why do students want a voice on the university board? One argument is that the trustees lack direct contact with the students and are generally ignorant of campus problems.

But more importantly, as one Georgetown student said: "If this is going to be a true community, like everyone keeps saying it is, it needs everybody's voice in it."

This question of student participation, of course, is the subject of endless debate. How much is beneficial? How much is necessary? Weakening the student case are reports that once the students get the right to vote on a certain committee, for instance, it is difficult to get full-time interested student participation.

CONFUSED ROLE

On faculty-student committees on parking, security problems or educational opportunity, students can play a large role.

But Dr. John Portz, an English professor at Maryland, noted that in some cases—like committees on faculty hiring, firing, pay and tenure—there is no obvious student role. Citing a committee on scheduling and admissions—a complex subject—he said students are relegated to a sort of confused role of observer because the work is done by faculty who have gone through this scheduling process for years.

He suggests that students might better set their sights on committees where they can make a genuine contribution. Naming Maryland's committee on the future of the university, he said: "This is essentially a think tank, where students might perform more satisfactorily."

## AMERICAN YOUTH IN FIGHT TO PROTECT ENVIRONMENT

### HON. JOHN BRADEMAS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. BRADEMAS. Mr. Speaker, I wish to call my colleagues' attention to an article entitled "American Youths Find New 'Supercause'," which appeared in the South Bend Tribune on Sunday, November 30, 1969.

Lynn Sherr, who wrote the article, points out that a new activism surrounds efforts to protect our environment. The activism is not rooted in anarchy, since ecology is a system, and anarchy is against all systems. It is, rather, a growing movement on the part of our Nation's young people to take positive steps to prevent the destruction of our ecological balance.

I am particularly interested in this article, since along with Congressmen SCHEUER and REID of New York, and HANSEN, I have introduced H.R. 14753, the Environmental Quality Education Act. Our legislation would establish programs of environmental education from elementary school through graduate school.

It appears to us that legislation of this type is necessary if we are to begin to meet our obligations to protect the environment in which we live.

At this point I insert in the RECORD the text of the article from the South Bend Tribune:

AMERICAN YOUTHS FIND NEW "SUPERCAUSE"—DRAW BATTLELINES AGAINST POLLUTION OF LAND, SEA, AIR

(By Lynn Sherr)

American youths have found a new supercause and—maybe—those over 30 may be invited to join.

They are trying to save the world—nothing novel with the young—but this time the threat is real and widely recognized.

The young are mobilizing with some of the same intensity that had gone into antiwar movements against the pollution of air, land and sea.

It's a new movement, just taking shape, but given the receptivity of today's youth to causes it seems almost destined.

Their concern over pollution is understandable said William E. Felling program officer of the Ford Foundation's Resources and Environment Department. "They can see it, they can feel it, they can smell it, and they think they can change it."

"It" has already inspired a new vocabulary.

As Stewart Udall, former secretary of the interior, told a standing-room-only student audience, "The word 'eco' is like 'mini.' Add it on to anything and you get a new word."

Thus the talk of "ecocastrophes" and irreversible air pollution imbalance, for instance, "ecogroups."

TALK OF "ECOLOGY"

But mostly the young talk of "ecology"—the comparatively young science which studies living organisms in relation to their environment:

Man against such deadly byproducts of his technology as poisonous DDT in the body, sulfer dioxide in the air, foul detergents in forest streams and the overcrowding of three-and-one-half billion fellow earthlings.

So far, the young ecologists are not a full-fledged movement. They are unorganized, largely unknown. Although the West Coast has generated the most vocal advocates, they have no real headquarters, no national president. They are not all scientists. They do not all understand the finer points about ecology.

But their passionate concern has caused Francois Mergen, Dean of Yale's environmentally-oriented School of Forestry, to comment: "Sometimes I think the students who earn degrees in ecology here should be ordained. They're so serious."

And they are beginning to act.

YOUNG PEOPLE TESTIFY

Mostly through local groups, young people have variously testified at congressional hearings on the pollution of Lake Erie, chained themselves to bulldozer-threatened redwood trees, met with state senators to discuss antipollution tax incentives.

Already, student ecology organizations exist at some of the nation's most impressive colleges. Among them: Berkeley, California Institute of Technology, MIT, Reed, Stanford, University of Minnesota, University of Wisconsin, Yale.

The Associated Students for Cal Tech (ASCIT) has begun its third year of an air pollution research project that was granted $18,500 from the Ford Foundation and $68,500 from the United States Department of Health, Education and Welfare.

Wisconsin's Science Student Union last spring picketed DDT hearings in the state capitol and is currently protesting the U.S. Navy's Project Sanguine—an electronic communications center which conservationists say may threaten forest life in northern Wisconsin.

At Yale, one student group is trying to mobilize the community to clean up New Haven's unswimmable harbor waters; another takes ghetto children on Saturday field trips to show them "that there are natural areas in the world."

Off campus, eco-groups have hit both coasts, the underground press, peace people and prep schools.

Ecology Action, an independent organization in Berkeley, Calif., sees its mission as informational, and insists that would-be activists treat ecology action as "something you do, rather than something you join." Along with extensive brochures and reading lists, they have devised a pilot ecology course which is now being taught in a local high school.

The War Resisters League devoted an entire issue of its monthly "Win" magazine (pipeline to some 8,000 members of the underground) to "ecological consciousness—yanking ecology out of the context of pure science and using it to describe the ways that man relates to his natural environment."

WRITE TO LEGISLATORS

One-hundred eighty girls from the Thomas School in Rowayton, Conn., wrote letters to state legislators, aroused the community, urged the introduction—which ultimately passed—of a state bill to survey and preserve Connecticut's coastal wetlands which were being used as a dumping ground by contractors.

On the other side of the generation gap, university, school board and other established officials have started making changes of their own to accommodate the burgeoning interest.

Professors from dozens of universities have reported new courses in ecology (for non-science students) and, in some cases, doubling and tripling of enrollment in existing courses. In addition, some science departments have begun combining biology, architecture and sociology, for instance, to offer inter disciplinary majors—or even new departments—in ecology.

FORD GRANTS FUNDS

The Ford Foundation last year granted nearly $4 million, mostly to colleges and universities for research in environmental subjects.

The University of Wisconsin's new branch at Green Bay is organized entirely around man and environmental problems in a radical academic experiment.

The American Assn. for the Advancement of Science has, for the first time, invited 40 students to participate in its annual Christmas meeting. Subject for an entire after-

noon session: Undergraduate Education in Environmental Science.

Sen. Gaylord Nelson, D-Wis., longtime advocate of conservation, has proposed a national environmental teach-in on college campuses this spring.

The antiwar movement started with teach-ins, too.

In many ways, ecology activity is largely an outgrowth of The Movement—antiwar, anti-ghetto, anti-Establishment.

THREATENS TO END LIFE

In their own terms, both groups see the status quo which they define as war or pollution as threatening to end life on this planet. Both see "the system" (which they consider government or giant corporations) as the adversary. Both reject old values, old politics, piecemeal solutions. Both talk of revolution.

And both blame the profit system.

Indeed, to the young ecologists, capitalism is Ecology Enemy No. 1. They criticize the growth motive—America's annual attempt to push the Gross National Product higher and higher.

"We've got to get away from the notion that growth is a good thing," emphasized Dr. Paul Ehrlich, director of graduate study for the Department of Biological Sciences at Stanford. Ehrlich has had a vasectomy—an operation to make himself sterile—and is one of the youth's most-quoted environmental heroes.

FORMS ECOLOGY ACTION

"Capitalism is predicated on money and growth," explained Cliff Humphrey, 32, who was building California freeways before he turned on to the problem, received a bachelor's degree in ecology and helped found Ecology Action.

"And when your only interest is to maximize your profit, you maximize the pollution. We need a system that takes maximum care of the earth," he said.

And yet, that system, the young activists feel, is not necessarily the political opposite of captialism.

"I don't think either right or left or center has the ecologically sane answer," said Keith Lampe, 38, a cofounder of the Yippie movement, whose first environmental activity was to join the conservationist Sierra Club.

EDITS UNDERGROUND LETTER

Lampe now edits a biweekly underground newsletter from Berkeley called "Earth Read-Out," in which he has published "econotes" urging "a rapid evolution from competition to co-operation; in the U.S. specifically this means shucking capitalism and evolving a community for which there is yet no label, a community within which the notions of ownership and money no longer have meaning or appeal."

During a trip to New York this fall, Lampe elaborated. "Capitalism may be more antagonistic than Marxism, but both share the man-against-nature thing, the growth motive," he said.

NONE HELD BLAMELESS

More important, most of the young activists believe that although some individual polluters can be singled out for spilling oil or destroying wildlife, no one—not even the ecologist—remains blameless in the massive assault on the earth. They like to quote Pogo, the cartoon 'possum, who said: "We have met the enemy and he is us."

Us: Everyone who rides in automobiles that spew deadly exhaust fumes into smog; everyone who buys shampoo in undemolishable plastic containers; everyone who adds unwanted children to the crowded world.

"There's a role for everyone in ecology," according to Lampe. In a recent column of advice to his underground followers, Lampe suggested that they should not close the door to rifle club members, Boy Scouts, or John Birchers.

"Since everybody is still groping for effective roles and tactics, people with widely different styles and widely different politics within the old context can talk to each other with no more tension than a Presbyterian talks to a Methodist."

DEPENDS OF MUTUAL TRUST

Thus, many members of the new eco-groups are beginning to understand that unlike seizing the dean's office, ecology action will depend on mutual trust among all ages and groups.

A group of peaceniks in New York recently were debating whether to approach older groups to protest jet noise.

"Talk to the Queens housewives, get them involved," said an earnest young girl.

"I don't want to talk to them, replied a barefoot youth with a three-day beard, "I just want to get them picketing."

"We're trying to leave behind the polemical solutions," said Cliff Humphrey. "Ecology provides the means and articulation of doing something positive."

Steve Berwick, 28, a stocky wildlife ecologist at Yale, reflected, "I doubt if you'll find many anarchist ecologists. Ecology is a system, and anarchy goes against that."

PERTAINS TO ALL GROUPS

It pertains as much to the rock music festival fans who dump garbage in the fields as it does to the industrialists who destroy marine life in lakes.

Joe Rhodes, 22, former student body president at Cal Tech who established their air pollution project, summarized: "Pollution is like the war, like the ghetto. They all became a problem invisibly, slowly. We must start paying attention to the gentle changes. We've got to start connecting what happens now with later consequences . . . start listening to the warnings."

He cut short his rapid-fire delivery and reflected on the commitment of the ecology-minded of his generation.

"I hope that this cause is close enough to everyone that they won't be confused because they don't like young people," he said.

Jim Beck, Rhodes' successor at Cal Tech, put it another way: "We don't want to revolutionize society—we want to live in it."

---

## VETERAN HOME LOAN PROGRAM DRYING UP FOR LACK OF FUNDS

### HON. OLIN E. TEAGUE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. TEAGUE of Texas. Mr. Speaker, as part of the GI bill of rights, Congress created a program to assist returning war veterans in financing the purchase of a home. This program was a great success following World War II and the Korean conflict, but it has fallen victim of the tight money market. At the present time the home loan provision can be considered nothing more than an empty promise.

The Veterans Affairs Committee has been considering legislation to use $5 billion from the NSLI trust fund, and such a proposal is also under consideration in the Senate. In this connection, Mr. Harold A. Pollman, a builder from Dallas, Tex., with great experience in home building and financing for veterans, appeared before the Senate Finance Committee and delivered a very pertinent statement on this proposal. I feel that Mr. Pollman's statement will be of interest to Members of this body. It appears below:

TESTIMONY TO THE COMMITTEE ON FINANCE, SUBCOMMITTEE ON VETERANS LEGISLATION, U.S. SENATE, HEARING ON S. 3008

(By Harold A. Pollman, Representing Texas State and Dallas Home Builders Association)

Honorable Senator Talmadge, Chairman, and gentlemen of the committee, my name is Harold Pollman, I am a builder in Dallas, Texas. I appear before this committee at the invitation of your chairman, Senator Talmadge, and our Senior Senator from Texas, the Honorable Ralph Yarborough, the sponsor of this legislation today coming under your pervue and study.

My official capacity in testifying to this committee is that of a Texas State board director and Dallas director of the Home Builders Association.

Please permit me a valuable moment of this morning's time to bear to you greetings from both the Texas State Board of Directors and the Dallas Board of the Home Builders Association and also to state to you that both Boards have asked me to express to you their commendation for your knowledgeable awareness of the economic plight of the returning veteran seeking a home in which to establish himself and his family upon his completion of military service.

I am aware, both by the presence at this hearing before you today of numerous experts in the field of finance and economics, as well as by submitted transcripts for the committee's study, that a very substantial amount of studied economic and technical data will be provided for your consideration in this matter.

A most capable understanding of this matter from the viewpoint of home builders throughout the Nation will be provided by Mr. Larry Blackmon a past national president of the National Home Builders Association who is accompanied by various staff economists of that association. These gentlemen are most learned in statistics and studies germane to the questions involved in this legislation. I also note with interest the testimony of most knowledgeable economists as well as the general counsel for the Treasury, the president of the National Mortgage Bankers Association, officials of the Veterans Administration, officers of the National Association of Real Estate Boards and many other highly qualified and competent witnesses. With the availability to you of this necessary and properly highly informative type of testimony I can only believe that I have been requested to appear here today to testify to you on a more "grass roots sense of feeling" concerning this proposed legislation.

My company in Dallas is a medium volume tract builder in the price range of a low of $19,900 to our top home at $42,500. We build between 135 and 200 homes per year. Our annual dollar volume is between 4½ million and 6 million dollars. These homes are financed approximately 95% of our total annual volume by FHA and VA guaranteed loans and of that percentage 70% of our homes are sold to veterans.

You are of course aware that the legislation we have under study here today concerns itself with approximately 6 billion dollars of national service life insurance reserves. These reserves have been generated by the veteran's payment of his life insurance premiums. As you know these funds are currently loaned to the Treasury on an "inside the family" type loan at a yield to the National Service Life Insurance Fund of approximately 3.77%.

The veterans home loan program has an eligibility of 10½ million veterans. Soon, hopefully, many more young men will be returning from service in Viet Nam. These men will be returning to their community seeking

to make a home for themselves and their families.

While Congress has acted appropriately (and I cannot use the word magnanimously as these are the men who have served their Nation) in providing the necessary legislative vehicle to provide housing for the veteran, the veteran has returned home to find that the congressionally established vehicle for home ownership is totally immobilized due to a complete lack of economic fuel.

The entire climate of money availability has changed since many of us returned from service after World War II. At that time we found awaiting us very substantial funds in savings and loans and life insurace companies. These funds were accumulated through substantial war time earnings and with very little real goods of value to purchase and thus dissipate these savings. Thus the returning veteran found substantial savings in savings and loans anxious to be invested in government insured GI home mortgages. The insurance companies were anxious to place large insurance reserves in government guaranteed real estate home mortgage loans. Thus under prior economic conditions the returning veteran with no economic wherewithal to make a down payment on a home and economically disadvantaged by his time in military service, found that Congress had provided legislation for a *readily acceptable* and *marketable* government insured home loan.

This economic climate resulted in $72 billion of loans to 7 million veterans. By the way, I am informed that the loss rates on these veteran mortgage loans has been less than conventional lending programs.

Today's returning veteran finds a *totally different* home loan climate awaiting him.

I. THE INSURANCE COMPANIES

Almost all major insurance companies in the country have abandoned the financing of the single family G.I. homes. Today's money managers for our insurance companies have chased "yield" (for inflationary protection) into the highly questionable practice but for, at least this time, highly remunerative yield of apartment, shopping center, and commercial loans premised upon various formulas of:

A. Participation actually in the venture with the project developer, or of gross or net rental yields.

There is, of course, no logical way that the individual home owner can compete in the mortgage money market for this type of insurance company money against that formula of yield attraction.

II. THE PUBLIC MORTGAGE MONEY MARKET

A. The historically unparalleled *corporate expansion* in the last decade has engendered the corporate debtor who can pay 10 and 12 percent interest, which when adjusted for 52 percent tax rates and 7 percent investment credit nets an effective cost to the corporate borrower of 4 to 6 percent for his 10 to 12 percent rate commitment. Again this makes the 7½ percent veteran loan unattractive to the investor.

B. Unparalled *Municipal, State, and school District Expansion* carrying tax favored exemptions and being issued at 4%, 5% and 6%, giving investors an effective yield of double these rates, again significantly undercut the funds once called upon for home ownership.

III. PENSION TRUST FUNDS

The character of saving the last 20 years, certainly until the last decade, was primarily individual in nature. Each individual held his own passbook saving account. He provided the bulk of his personal savings for his old age, his retirement, or an emergency sickness, reserved in his saivngs and loan account. These savings were invested by savings and loans almost totally (by virtue of the very premise of their charter) in home loan mortgages. However, today by far the very substantial majority of our savings from individual earnings take the route of: Payroll deductions, with an automatic holdout from salary and a moving of these holdout savings into tax favored employee pension trust funds. They only seek for their entrusted funds "maximum yields"—of course, that is their job.

Those of us who have addressed ourselves to the current money resources for home financing find some peculiarly anomalous creatures in the pension trust fund investments. For example, numerous carpenter, plumbing, electrical, etc., union pension trust funds with their employees livelihood geared to and dependent upon the residential construction industry, hold not one dollar in their investment portfolio in federally guaranteed home loan mortgages. They, of course, also are chasing "yield". The better "yield" of glamour electronic stocks, corporate bonds, tax favored municipals, etc.

I beg your indulgence but for another graphic example. We have found that in a large majority of all states, some as tremendously important as California, not one dime of the teacher pension trust funds—or for that matter, any other state employee trust funds—not one dime of the investment portfolios were held in federally insured home ownership. It must, of course, be shocking to you as it was to us to find in a vast majority of all of our teacher, professorial, professional, and trade association tax favored pension trust funds these are the teachers and mentors, the very people who stand before our young people and teach and exhort for our American way of life and who avow the fundamental foundations and sociological importance of a good family home, and thus a solid family life, find not one cent in their multi-million dollar trust funds—which by the way, in some states grow at the rate of several million dollars each year—not one cent for home ownership loans in their portfolio. The glamour stocks the piece of the action and participation of shopping centers and apartment loans, the tax preferred municipals and in fact we have actually found pension trust funds in glamorous yield investments of these tax favored funds in Las Vegas motor hotel facilities makes the returning veterans' home loan mortgage a totally unattractive package.

Thus the vehicle of your Congressional legislation permitting home ownership can only be funded by the veteran stacking up exorbitant points of brokerage. High enough to make his interest rate, set by Congress, attractive. Thus the veteran competes in the money market place with points as high as 5, 6, or 7 on new housing and 9, 10, and 11 points on existing housing.

On a $20 thousand home the veteran may pay anywhere from $1500-$2000 to get his 7½ percent loan.

Herein lies a double economic tragedy when:

I. Firstly the veteran returns from service and finds himself in the market place competing with an undesirable loan at 7½ percent and paying 8 to 10 points—$1600-$2000 on his $20,000 home, while his veteran's insurance fund has $6 to $8 billion of his reserve insurance funds loaned out to the general citizenry through Treasury at approximately 3.77 percent. Unable to borrow from his own life insurance reserves, the 8 to 10 points of brokerage he pays, when added to the 7½ percent stated rate, yields depending upon the true historical life of this mortgage—(approximately 8½ to 10 years) yields 12% to 14%. Certainly this is a grave disadvantage to him when his insurance reserves are being loaned out at 3.77 percent.

II. Secondly to compound the veterans injury I understand that Treasury has taken a position that the brokerage points of $1600-$2,000 which the veteran pays to get the loan interest rate up to a competitive yield is not considered interest for tax purposes. Of course that is all it really is. This disallowance of considering this an interest further injures the veteran whereby if we recited his true cost for financing at 12 to 14 percent this would properly reflect his interest cost in his computation for taxes.

We are not unmindful of the necessity for restrictive fiscal and monetary policies to curb the ultimate calamity of unbridled inflation. Certainly the housing industry, standing virtually alone, as it now does, in the application of economic restraint is most aware of this unpalatable but necessary medicine for our economic health.

I am not unmindful of Treasury's contention that to call 1 billion dollars of their note per year out of their 3.77 percent "sheltered family loan" puts them out on the street to seek the replacement of that money. This it is asserted can contribute to our economic inflationary pressures. It is true that the economic climate is cold and harsh in the open money market. None of us could blame the Treasury from not wanting to leave their comfortable, warm, and sheltered loan position "inside the family" and go out in the cold market climate to replace that money. But that is the very climate in which the veteran is asked to seek his loan today. In answer to the Treasury's view that they would contribute to inflationary pressures by seeking this $1 billion a year in the open market, we must not overlook the fact that when the veteran funds his loan through the $1 billion dollars returned to his national service life insurance fund, he thus, to the identically correlative amount of $1 billion removes his demand of that billion dollars of mortgage funds from the money market. Thus it really becomes a question of who gets out into today's harsh money climate to the extent of $1 billion a year, the Treasury or the veteran. The dollar effect on the economy should be the same save and except the interest rate differential which Treasury would have to pay to the open market rather than the sheltered loan they hold. We believe that all of us as general citizens, and by the way the veteran included, must share this burden. We must not call upon this veteran, who has already borne services to its country, to again ask this veteran to subsidize the general citizenry with a preferred interest rate loan from his life insurance funds—while he is unable to borrow these funds and pays exorbitant rates at a non-competitive disadvantage in the open market place.

In conclusion, please permit me to state that shortly after World War II when more than 10 million men returned to their homes they found awaiting them your congressional commitment and their Nation's commitment to house the returning veterans.

The housing industry was capable of fulfilling this commitment. Shortly after World War II our housing industry was providing 2 million homes per year.

Today after a quarter century of vastly improved technological ability, of marvelously expeditious mechanical improvement and a quarter of a century of improved industry know-how for volume production, in which we have doubled and perhaps tripled our production ability, our industry finds itself this year barely providing between a million and a million two hundred thousand homes.

Thus from a population of 130 million when we showed the capacity to build 2 million homes we have moved to a 200 million population and will deliver less than a million and a quarter homes. This comes at a time when Congress has directed our industry to a need for 26 million homes over the next decade. Thus we are building into our already multi-faceted burgeoning crises the additional problem of a construction

deficit of approximately a million and a half homes per year.

I can assure you that it is only the fiscal and monetary restraint on our industry, which completely shuts us down and then attempts to start us up when it is economically expeditious to do so, which has created the critical housing shortage throughout the Nation today and spells out impending new multi-faceted sociological problems for tomorrow.

Gentlemen, we must make a commitment to innerspace as well. Innerspace is living space. You gentlemen have seen what such a commitment can do for us in almost infinite and limitless accomplishments in outer space. While perhaps not as glamorous a *short range impact*, an equal commitment to inner space must be made and fulfilled.

The pending legislation before you is just one small stepping stone along this important journey to the accomplishment of better housing for all Americans. It does not purport to solve but a small part of the problem of housing Americans.

I can find no valid reason for denying to veterans the access to their life insurance savings for home loan mortgages. It appears perfectly appropriate and timely that the life insurance savings generated by veterans be made available by veterans in need of home mortgage funds.

Again, Mr. Chairman, permit me to extend to you and your committee colleagues and the Senate, as well as the House through Honorable Olin Teague of Texas who is sponsoring the parallel legislation, the commendations of the veterans in our community and yours; as well as our housing industry for your consideration of this valued and necessary legislation.

## MAYFLOWER COMPACT DAY CELEBRATION

### HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. CARTER. Mr. Speaker, on the evening of Friday, November 21, 1969, the Society of Mayflower Descendants in the District of Columbia, celebrated the 349th anniversary of the signing of the world-famed Mayflower Compact. This is an annual event of the society, and this one, with an excellent program, had one of the largest number of members and guests in attendance that the society has ever known. Addresses by distinguished speakers, bestowal of awards, installation of newly elected officers of the society—by Lorenzo S. Winslow, assistant general of the general society—and a fine musical of songs by the Army Chorus—were prominent features. The addresses of high order were warmly applauded.

The society was organized in 1897, and has since flourished as a patriotic society which seeks to keep alive the lives and deeds of the Pilgrim group that landed at Plymouth Rock on December 21, 1620 (N.S.).

The addresses were made by John Jay Daly, a distinguished journalist and author, and Maurice H. Thatcher, former Congressman from Kentucky, and former Civil Governor of the Canal Zone and member—now only survivor—of the Isthmian Canal Commission, which had charge of the construction of the Panama Canal; and former governor of the society, and now honorary life counsellor general of the General Society of Mayflower Descendants.

The introduction of Mr. Daly was made by John Russell Whitney, deputy governor general of the general society; and the governor of the society, Col. Frederick I. Ordway, presented Mr. Thatcher.

Under leave granted, I am including herewith, as part of my remarks, the indicated addresses:

ADDRESS OF JOHN JAY DALY

Governor Ordway, Members and Guests. In the course of my newspaper career it became my good fortune to interview many noted historians. Occasionally I was invited to attend round-table historic discussions at the Cosmos Club. One day they took up the story of the Mayflower, its outstanding voyage across the Atlantic, one hundred and two passengers buffeted about in all sorts of weather, and the landing at Plymouth December 21, 1620—the 350th anniversary of this event now coming up, next year, 1970.

Louis Sears, professor of history at Purdue University, started the discussion on this subject. Dr. Sears, a real conservative, said he thought the story of the Mayflower should be told, re-told again and again and again wherever school children gather. In this he had the concurrence of Dr. Charles Tansill, another famed historian. This talk, and what I learned from these eminent scholars, enabled me to write the story of the Mayflower—Flight to Freedom—which is just off the press.

That day, in one burst of supreme assurance, Dr. Tansill, author of "Back Door to War", and other monumental works, declared: "It is no exaggeration to say that the Voyage of the Mayflower and the Landing at Plymouth rank with Hannibal's Crossing of the Alps, back in the third century."

Dr. Sears said, "I agree. It could be compared also with the overthrow of the Persian Empire by Alexander the Great, with the destruction of Carthage by Rome, with the conquest of Gaul by Clovis I, King of the Franks and founder of the French Empire."

Hearing all this gave me, an amateur historian, the courage to ask, How would the Voyage of the Mayflower compare with the taking of Constantinople by the Turks?—and the answer was, by Dr. Sears, "You might even compare it with the discovery of America by Columbus."

General Bonner Fellers, U.S.A., Ret., a friend of these historians, likened the dangers of the Mayflower adventure with that of Marco Polo, the Venetian traveller and author who set out to find China—and did. No one ever knew or ever will know how he accomplished this feat. It remains one of the great mysteries of all times. Marco went up against barbarians. The Pilgrims faced savages. So there is a comparison there, too. Marco Polo and the Pilgrims; of the same caliber.

You asked me to tell about my writing of the poem, "The Toast to The Flag." Believe it or not, this verse was written and published for the first Flag Day, June 14th, 1917.

At that time I was the youngest editor of a full-fledged Associated Press newspaper in America—The New Britain Herald, in Connecticut. From the moment the European War broke, and up to the time we entered the fray, there has been turmoil in this vicinity. Factories were blown up, by German sympathizers, to prevent war material from reaching the British. In order to get some patriotism going I decided to place an American flag at the masthead of the Herald. Under it each day we ran a well known saying from one of our patriots, like: My country, right or wrong—Decatur, Damn the torpedoes, go ahead—Farragut, Entangling Alliances with none—George Washington. Came the day that Congress set aside June 14th as Flag Day and I looked around for a Toast to the Flag; but inquiry at the local library and the New York Library gave no clue. So I called my old friend, Dr. Putnam, Librarian of Congress. He could find no such toast, either.

In the room where I slept was a great chandelier. Under it was a silk American Flag. As I started to slumberland, the light was turned off and I saw Old Glory fade out, the colors glorious beneath the dimming light. At about 2 a.m. I awoke with the Toast in mind, dashed it off on a piece of stationery, typed it at the office that morning—and it appeared in the afternoon edition—on the first Flag Day. From then on it went places. Editor at The Hartford Post wrote an editorial about it, the Boston Post spread it across the front page, the old New York Tribune re-printed it—and within a year it had been printed in practically all the national newspapers—and in some magazines throughout America. It was spread about by the Vigilantes, a patriotic society of writers and artists. Eventually it got into Edwin Markham's anthology—and today it is in 18 such books, along with about one or two million school books. Also, it has been set to music about 65 times, once by the great march king, John Philip Sousa—but, and here is a story never published—Sousa's music was rejected by his publisher, saying it was not up to his standard. "T'was not his fault. None of the other compositions made the grade, either; because of the shortness of the lines in this lyric. Originally I had only three verses, and these were never copyrighted on account of my joining the Army in the First World War. In order to get a copyright and prevent others from selling these verses I added a fourth verse. Here, then—at your request—is the present product: and, as you have asked, I now recite it:

"A TOAST TO THE FLAG

"Here's to the Red of it—
There's not a thread of it,
No, nor a shred of it
In all the spread of it
From foot to head
But heroes bled for it,
Faced steel and lead for it,
Precious blood shed for it,
Bathing it Red!

"Here's to the White of it—
Thrilled by the sight of it,
Who knows the right of it
But feels the might of it
Through day and night?
Womanhood's care for it
Made manhood dare for it;
Purity's pray'r for it
Keeps it so White!

"Here's to the Blue of it—
Beauteous view of it,
Heavenly hue of it,
Star-spangled dew of it
Constant and true;
Diadems gleam for it,
States stand supreme for it,
Liberty's beam for it
Brightens the Blue!

"Here's to the Whole of it—
Stars, stripes and pole of it,
Body and soul of it,
O, and the roll of it,
Sun shining through;
Hearts in accord for it
Swear by the sword for it,
Thanking the Lord for it,
Red, White and Blue!"

ADDRESS OF MAURICE H. THATCHER

Governor Ordway, Members of the D.C. Society, and distinguished guests: when my good friend, John Russell Whitney, former Governor of the Society and now Deputy Governor General of the General Society, in arranging this program, asked me to deliver this address, he left it to me to designate the subject and the title. I told him that I

would choose the title of "The Pilgrim Contribution", for what I had to say.

At the outset I take advantage of the moment to advise this assemblage—and particularly those, like myself, of Elder Brewster descent, of the fact that on the 7th of last September, I presided at the formal dedication of the Cenotaph to Elder Brewster, and his wife Mary Wentworth Brewster, which was erected by the Elder William Brewster Society of which I am the President-Treasurer. On that Sunday afternoon there was so much fog and rain in Plymouth that there was eliminated the customary program of the General Society's on Burial Hill Cemetery I proceeded there, nevertheless, with the dedication which was attended by a goodly number of Brewster descendants and others. While it is known that Elder Brewster and his wife found burial in Plymouth, yet there is no marking of their graves, but possibly their unknown burial sites were either in or near Burial Hill Cemetery, on which the combined Fort and Meeting House of the Pilgrims was established at the beginning of the founding of "The Plimouth Plantation." The memorial stone is of the best Barr Granite, appropriately inscribed, and of early colonial design.

I may add that the Elder William Brewster Society will continue its campaign for funds for the erection in Plymouth region of a more adequate and separate memorial to Elder Brewster and wife.

Now, I wish to pay tribute to the unique and outstanding remarks of my long-time friend, John Jay Daly. He has brought to us a splendid and inspiring designation of the Pilgrims, and his observations have included new and fresh material of great historical value through the evaluations furnished by eminent historians of a recent generation. It was fortunate indeed that Mr. Daly was present at the time these historians gave their united judgments as to the Pilgrims and their success—in the face of obstacles absolutely overwhelming.

Many thanks, Brother Daly, for what you have thus contributed to this occasion; and we are also deeply indebted to you for telling us the most interesting story of the genesis of your famous and universally popular poem, "A Toast to the Flag." If your career had as its principal feature the writing and dissemination of this poem, this of itself would have been sufficient to carry your name to future generations of Americans; but in journalistic labors and in poetic and prose efforts you have distinguished yourself.

In addition to the high tributes to the Pilgrims made by great historians, mentioned by Mr. Daly, I would also refer to similar tributes paid by some of our most eminent authors and statesmen, and among them (see Stoddard's "Truth About the Pilgrims"): Daniel Webster, 1820, Edward Everett 1824, Robert C. Winthrop 1839, Rufus Choate 1843, Charles Sumner 1953, William M. Evarts, 1854, William T. Davis 1870, George William Curtis 1885, Edwin D. Mead 1893, Governor Roger Wolcott 1897, George F. Hoar, 1897, Charles W. Elliott 1910, Henry Cabot Lodge, Sr. 1920, and Calvin Coolidge 1920.

Who were the Pilgrims? and what did they do?

The Pilgrims were high-class, middle-class Englishmen—men and women. They were dissenters of the Established (English) Church, which in that era, under a narrow and tyrannical hierarchy, had set up a policy of proscription and persecution of all those who, in England, dared to doubt or dissent from Church authority. Thus, the Church made it unlawful for any of its members—except the elect—to hear the Bible read. Thus, those listening to such readings received punishment as high as twenty-seven months of imprisonment. Such intolerable practices brought about many dissenters, the chief of whom, perhaps, were in the Scrooby neighborhood in northeast England. The leader of the Scrooby group was William Brewster of Pilgrim fame. Upon the death of his father he succeeded the latter in charge of the Post in Scrooby, with other added duties of public character, and lived in the Manor House which had succeeded the more pretentious Manor at Scrooby. Pilgrim Brewster was a man of education and culture. At Cambridge University he had been a student for three years, when he was selected as a member of the diplomatic staff of Sir William Davison, the representative of Queen Elizabeth at Antwerp. Because of his education and Christian character and conduct Sir. William found in young Brewster a most valuable assistant and advisor.

At this time Holland was at the zenith of its historical record. It was the most tolerant of the European nations as regards the rights of worship by all denominations, and the Established Church of Holland interposed no objections. Although Spain was nearing the end of its political contact with the Netherlands, that nation had become the most enlightened of all the nations of the world, and was first in education, commerce, shipping industry and naval power. Fronting England—a short sea-distance away to the westward—the latter country, following the example of Holland, was changed from an agricultural country to one of factories. Also, the policy of religious tolerance in Holland became increasingly understood and followed by dissenters in England. Brewster as a young man was exposed to all he saw and heard in the land of the Dutch and was greatly influenced then and there; indeed throughout his subsequent life. Later when he returned to Scrooby after his diplomatic career he carried lasting memories of the Dutch and the excellence of their institutions. He organized a church of dissenters in Scrooby and the Manor House in which he lived became the site of worship. Pastor Robinson became the ordained minister of this congregation, and later the church leader of the Pilgrims in Holland. William Bradford of nearby Austerfield, became a member of the dissenting church at Scrooby, and proved himself a completely dedicated Pilgrim. The Established Church of England prosecuted and brought about the imprisonment of Brewster and other dissenters. The effect of this persecution caused the Pilgrims to flee their native land for a sojourn of exile in Holland which lasted from 1607 to 1620.

During this era of exile, after an unsatisfactory year in Amsterdam, the Pilgrims established themselves in Leyden, a city of education and culture with manifold industries which yielded employment and livelihood to the Pilgrims, and provided for the Pilgrim youth education in its public schools. Brewster taught English in the university at Leyden; and also published religious books and tracts. The city is near the mouth of the River Rhine, by which it is encircled. Thus the Pilgrim group was welcomed with open arms in Leyden; but as Englishmen they nourished the hope that ultimately they would establish in the New World on the eastern seaboard of North America a permanent home dedicated to civil and religious liberty under English authority. Their faith and determination were not only outstanding—they were truly epochal. The larger portion of the Pilgrim group in Leyden accordingly left Delfshaven in August 1620 for South Hampton and southern England on the sailing vessel, the Speedwell. Pastor Robinson and some others of the Pilgrims remained in Holland expecting to follow later; but he died in Holland.

The story of the voyage of the Mayflower with these valiant passengers crowded aboard, needs no retelling at this time. It is sufficient after a stormy passage which ended in the waters of Cape Cod Bay at presentday Provincetown. The Pilgrims had a charter from the English crown to establish a colony in "the northern parts of Virginia," but storms seem to have driven them farther north away from the mouth of the Hudson River where they had expected to have as neighbors Dutch colonists. Attempt was made to take the Mayflower to the mouth of the Hudson, but shoals and other difficulties involved caused the return of the ship to Cape Cod waters and a later landing of the Pilgrims at Plymouth Rock. Here on December 21st, 1620, for better or worse, as Heaven might ordain, the Pilgrim group landed and established immediately there a permanent colony, "Plimoth Plantation." Before landing certain persons—non-Pilgrims—who had been employed by the Pilgrims in England, as mechanics, laborers and the like, for the proposed colony, on learning—some of these—that the colony would be founded north of the northern parts of Virginia, boasted that when they came ashore they would do as they pleased, and would not submit to Pilgrim rule. The result of this rebellious conduct caused the Pilgrims to formulate the famous "Mayflower Compact" (probably composed by Brewster & Bradford) in the cabin of the Mayflower before its permanent landing. This famous document is believed to be the first public enunciation for the establishment of a free political and representative government anywhere in the world. As I pointed out a few moments ago when I read the Compact, as a feature of this program, I explained that the instrument (signed by 41 of the Pilgrim group) contained all of the essentials necessary for the intended colonial government of civil and religious liberty. By extention and elaboration these simple but comprehensive provisions were later embedded in the Declaration of Independence and the Federal Constitution. Under the Compact the Plymouth Colony was succesfully governed from the time of its adoption (O.S.Nov. 11th, N.S.Nov. 21st, 1620) until the Colony was merged with the Massachusetts Bay Colony in 1691.

The text of the Compact, in modern English, follows:

"MAYFLOWER COMPACT

"In the name of God, Amen. We whose names are underwritten, the loyal subjects of our dread Sovereign Lord, King James, by the Grace of God of Great Britain, France, and Ireland King, Defender of the Faith, etc.,

"Having undertaken, for the glory of God and advancement of the Christian Faith of our King and Country, a Voyage to plant the First Colony in the Northern Parts of Virginia, do by these presents, solemnly and mutually in the presence of God, and one of another, Covenant and Combine ourselves together into a Civil Body Politic, for our better ordering and preservation, and furtherance of the ends aforesaid; and by virtue thereof, to enact, constitute, and frame such just and equal laws and ordinances, acts, constitutions, and offices, from time to time, as shall be thought most meet and convenience for the general good of the colony: unto which we promise all due subjection and obedience. In witness whereof, we have hereunto subscribed our names, at Cape Cod, the 11th day of November, in the year of the reign of our sovereign Lord, King James of England, France and Ireland the eighteenth, and of Scotland the fifty-fourth, Anno Domini 1620."

It was wisely fashioned. It provided for a Colony under the English King (James) who was unfriendly to the Pilgrim concepts, but who permitted the group to organize and govern Plymouth Colony as they pleased. As to the other English Colonies of the New World they always had crown governments. Not so with the Plymouth Colony; it always elected its own Governors and other officials, and made its own laws, with exception of what was deemed best of applicable English

laws. Their policy of civil and religious liberty was never destroyed or abridged. The Pilgrims never adopted primogeniture nor tolerated a belief in witchcraft. They were indeed an enlightened aggregation and brought with them to their colony the best of England and Holland. The colony was founded on the Christian home—as were the other colonies of the northeastern seaboard. They brought to the New World Christian character and conduct, and free conscience of the first degree. They paid promptly their debt, incurred for their voyage and colony needs, to the English Adventurers who had furnished the money. They possessed a great and unwavering faith for the success of their great undertaking; and that they were guided throughout by a divine destiny of what was true and good, they believed, despite all trials and tribulations. Their colony was the oldest continuing colony throughout the northeastern seaboard, since that of Jamestown was removed from its original site. The inauguration of Thanksgiving Day was perhaps brought from Holland where it was well established. Virginia makes some claim of priority in the New World; but be that as it may, the Plymouth group had a better practice of public relations; they dramatized the occasion, garnished it with elaborate menus, prolonged it three days and had 60 Indians as guests. In the course of time, the observance of Thanksgiving has come to be, under Federal proclamation, a fixed event.

As was well stated years ago by a distinguished South American to an eminent North American who, in substance said, "The Conquistadores came to the Latin American lands for gold, but those who colonized English North American regions came to find God; and to worship Him as they desired."

The greatest gift bestowed by Heaven on man is the moral principle. From that principle everything must flow. The Conquistadores were a brave and resourceful lot, but for the most part they were cruel in their conquests. They did not bring with them their families, though in their wake there followed from Spain Christian faith. Later there came Christian families, and in time the native populations were converted, in general, to Christian faith, under complete Spanish dominance.

The Mayflower is indeed the most notable waterborne vessel of history since Noah's Ark, except the tiny ships used by Columbus on his voyage of American discovery.

The Pilgrims constituted a group distinctive from the Puritans who were the original settlers of Massachusetts Bay Colony. The latter, though dissenting from the English Church, never left it. Of course, in time, that Church became fully tolerant, and later throughout the nation had wide acceptance in the English colonies of America. The church at Plimouth Plantation is considered the first of Congregational Churches.

The Pilgrims are credited with the establishment in their Colony the laws on wills, estates and inheritances; and in time the other English colonies largely followed these "firsts" of the Pilgrims. In many ways the Plymouth Colony was a fine exemplar, and its policies and practices did ever so much in establishing the moral basis of our nation. In all this the companion colonies established like policies. The Plymouth Colony government was the first of all these colonies in the official declaration (about 1627) that "Taxation without representation is tyranny."

Except for the fact that King James trusted the Pilgrim group, it never could have established an enduring colony. The King, though narrow in his religious interpretations, was a scholar of no mean ability; and under his reign the King James Version of the Bible was promulgated, and it constitutes, as many of us believe, the most noble and beautiful employment ever made of the English tongue; and that it and the works of Shakespeare hold within their bounds the most glorious language known to man.

The Pilgrims were possessed of abundant common sense and broad experience, and were able thereby to deal with practical situations in a practical way. They were especially succeessful in dealing with the grave and difficult problems that confronted them. All in all, the Pilgrim Movement was of vast sequential benefit.

As illustrative of the tolerant attitude and practices of the Pilgrims in religion may be noted that when Roger Williams was banished from the Massachusetts Bay Colony because of his alleged radical views and sermons, he sought and found in the Colony at Plymouth a satisfactory haven of refuge. During the three years he remained there he was permitted to preach to the Pilgrims; and was treated with the utmost kindness and hospitality; for all of which he expressed his gratitude. On a certain occasion he was reproached by Elder Brewster for the hostility of Williams to members of the English Church who might be altogether worthy in their everyday lives, saying, as has been related, that he would not take communion with them. The Elder was indeed more tolerant, at that time, than was Williams who came to be famed for his spirit of tolerance.

Brewster, by the way, served as Ruling Elder from 1609 (Holland) until his death at Plymouth in April 1644—a period of something like thirty-five years.

I must not fail to say something more about William Bradford, a protege of William Brewster, and always the latter's faithful friend. Elder Brewster was the wise counsellor of Bradford from first to last. Bradford was a fine executive and a most capable historian. His History of Plimouth Plantation was and yet is—a most famous of American Histories. For about one-hundred years it was lost in oblivion—having disappeared from New England during Revolutionary Days, but, ultimately found in the library of the English Church in England. Thereupon it was generously given by the proper church authorities to the Commonwealth of Massachusetts where it is safely kept.

Another interesting reference can be made to Bradford. In time it became current in England the belief that Bradford's birthplace was Ansterfield, and not Austerfield, as had theretofore been believed. Of course, his birthplace was Austerfield. Scholars and students in England, through the years, looked in vain to find the place in England called Ansterfield. Finally, someone of greater wisdom pointed out that the letter "n" had been substituted through error for "u" in Austerfield; and that the latter was the true name involved. Thereupon, Bradford received greater acclaim in the world at large. Thus a little typographical error played an important part in the life of Bradford. Austerfield is near Scrooby.

I give you this story as I have read it.

It is interesting to note that through trial and error the Pilgrims learned that under a communal industrial system the Colony would fail, while under a free enterprise and incentive system the Colony would prosper; and accordingly they were thenceforth governed.

The faith and grim determination to make their Colony a lasting success is shown by the historic fact that after the cruel winter of 1620–21—during which more than half of the Colony died, Captain Christopher Jones of the Mayflower which had remained in Cape Cod Bay, in April 1621 just before sailing for England, offered to take back to that country all or any of the Colonys survivors, but not a single one returned.

The nations and peoples of the Earth are in the greatest crisis ever known. For years the human race, in preponderance, has preferred entertainment to instruction, with the inevitable result. The crisis is not only political, but it is also moral and economical and physical. It is accelerating with great cumulative effect. The Pilgrim Example, if followed, would greatly aid in changing the fatal trends. Without righteousness the people perish. This is a law eternal, and cannot be flouted if the race is to survive.

These enumerations indicate some of the outstanding achievements of the Pilgrims; and in sum they constitute the Pilgrim contribution which has blessed the world. I would conclude by quoting Bradford as set forth in his reknowned history of Plimouth Plantation, and as the text has been inscribed on the monument over his grave in Burial Hill Cemetery, to wit:

"Do not basely relinquish that which the fathers have with such great difficulty attained."

---

## DEATH OF WARREN JAY VINTON, MAYOR OF SOMERSET, MD.

## HON. CHARLES McC. MATHIAS, JR.

OF MARYLAND

IN THE SENATE OF THE UNITED STATES

*Friday, December 5, 1969*

Mr. MATHIAS. Mr. President, on November 19, 1969, Maryland suffered the loss of one of her finest citizens. Warren J. Vinton, of Somerset, had a record of public service spanning four decades. His work in housing and environment stands as a lasting memorial to this colorful and outstanding civic leader. I express my deepest sympathy to Mrs. Vinton and the entire family.

I ask unanimous consent that a Washington Post article, dated November 20, describing Mr. Vinton's distinguished career, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

W. J. VINTON, MARYLAND MAYOR, DIES

(By Kirk Scharfenberg)

Warren J. Vinton, a thoughtful and articulate spokesman for a better environment in his neighborhood community of Somerset, in Montgomery County and across the country, died at his home early yesterday after a long illness. He was 79.

Mr. Vinton's death followed by only a few hours his attendance at the first "Vinton Lecture," established in his honor at Montgomery Junior College this year by the Montgomery County Citizens Planning Association.

Whether helping to design the country's "greenbelt" towns or attempting to protect his shaded residential community of Somerset from commercial encroachment, Mr. Vinton always sought what the Housing Act of 1949, which he helped write, called "a decent home and a suitable living environment for every American family."

A native of Detroit, he graduated in 1911 from the University of Michigan after studying astronomy and mathematics.

At 21, he became secretary and director of the Vinton Company, at that time the largest general building contractors in Detroit.

During World War I he left the contracting business and became scientific attache at the U.S. Embassy in Paris.

In 1928 he returned to New York and Social Security, which did the groundwork

for the eventual adoption of Social Security legislation.

In 1934, Mr. Vinton was appointed field research supervisor for the newly formed Federal Housing Administration, and it was in this job that he developed the basic research tools now used by the Census Bureau in evaluating housing in the country.

When the Resettlement Administration was established in 1935, he was put in charge of economic and sociological studies for greenbelt towns and helped select the locations for Greenbelt, Md., Greenhill, Ohio, and Greendale, Ohio.

From 1935 to 1937 Vinton worked on drafting the legislation that became the 1937 Wagner Act, the country's first major housing act.

In addition to his regular agency duties, Mr. Vinton served as chairman of the Bureau of the Census advisory committee on housing when it made the nation's first housing survey in 1940.

As chief economist, he was responsible for the economic and social studies that led to the public housing legislation adopted as part of the Housing Act of 1949.

With the passage of that legislation, Mr. Vinton became assistant commissioner of the new Public Housing Administration. He continued in that position until his retirement in 1957.

The next year he was elected mayor of the small, incorporated community of Somerset, located on the west side of Wisconsin Avenue, just north of the District line. He continued as mayor until illness forced his retirement last April. He was then appointed to the Town Council.

As mayor, he led his community's fights against several attempts to build commercial buildings in the area. His attacks on those he opposed were often couched in colorful language that left no doubt about the point he was making.

He was joined in this effort by his wife, Mary P. Vinton. Mrs. Vinton, known as Molly, is generally considered the county's most informed citizen on issues of planning and zoning. She was a regular fixture at planning board meetings until recently, when the declining health of her husband kept her away.

Vinton lived to see the resolution of the last major zoning battle that Somerset fought. On Nov. 10, the Town Council reached an accord with developers who at one time wanted to build 30-story apartment towers just outside Somerset.

Survivors include his wife, of the home, 4718 Cumberland Ave., Somerset; a son, Jay Emerson, of Bethesda; a daughter, Mary V. Erlich, of Washington; and a sister, Elizabeth Rankin, of Royal Oak, Mich.

A memorial service for Mr. Vinton will be held at 3 p.m. Saturday at the Washington Ethical Society, 7750 16th St. N.W.

## ADDED PACIFIC AIR SERVICE NEEDED

### HON. THOMAS M. PELLY

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

*Friday, December 5, 1969*

Mr. PELLY. Mr. Speaker, the recommendation of a CAB examiner, Robert L. Park, in the Pacific Northwest-California case recognizes the need of added competition between Seattle and Portland on the one hand and Los Angeles and San Francisco areas on the other. This added service would call for nonstop flights and would assign to Northwest Orient Airlines a route from Seattle to the bay area including one satellite and including two such satellites in the Los Angeles area.

This report makes real sense to me because after all Seattle is the gateway to the Orient which Northwest Orient Airlines now serves with its short-cut circle route to Tokyo via the North Pacific.

Seattle has enjoyed excellent competitive Pacific coastal service but the marked growth and needs of Seattle air network improvement fully justifies and supports Examiner Park's recommendation.

## THE IMPORTANCE OF SMALL BUSINESSMEN: AN ADDRESS BY GENERAL GOLDSWORTHY

### HON. JOSEPH M. MONTOYA

OF NEW MEXICO

IN THE SENATE OF THE UNITED STATES

*Friday, December 5, 1969*

Mr. MONTOYA. Mr. President, recently I sponsored a Business Opportunity/Federal Procurement Conference in Albuquerque, N. Mex., on November 13, 1969, and in Las Cruces, N. Mex., on November 14, 1969, to bring to the attention of the small businessmen of my State of New Mexico the opportunities which are available to them in Federal procurement.

I, and the several hundred small businessmen and Government officials assembled in Albuquerque on November 13, had the great pleasure of listening to Lt. Gen. Harry E. Goldsworthy, Deputy Chief of Staff, Systems and Logistics, HG USAF, speak on the importance of the small business community in the Nation. I believe that the General's remarks deserve the attention of the Senate. Therefore, I ask unanimous consent that the text of his address be printed in the RECORD.

There being no objection, the news release was ordered to be printed in the RECORD, as follows:

THE IMPORTANCE OF SMALL BUSINESSMEN

(By Lt. Gen. Harry E. Goldsworthy)

I always look forward to a visit in the West with pleasure. Since I was born in the State of Washington and raised on a farm, I have more than the usual affinity for the great western land. I am sure many of you who grew up on a small farm will agree with me that we gained an early appreciation of the work and problems associated with running that kind of small business.

The purpose of this meeting, as you know, is to stimulate local participation and competition in government contracting. It is an attempt to make better use of the production and service facilities of this area of our country.

I wish to thank you, Senator Montoya, for your invitation to come here today. In this connection, I never cease to be amazed at the tremendous responsibilities that being a member of Congress involves. Before my first assignment to Washington, I did not have a full appreciation of the staggering workload of our elected officials; nor, frankly, did I know what a general in the Pentagon was up against. I don't know which is worse.

Seriously, however, there is a "need to know" if the Congress is to act and legislate wisely and there is no better place to gain a grass roots feel for our National Small Business Program than a meeting like this.

As for myself, I have learned much about small business and the part it plays in our national economy since assignment to the field of logistics. For example, I've learned:

There are about five million businesses in the United States and approximately 4.8 million of them, or 96%, are small firms.

I've learned: These small business firms account for 40% of the business activity of the United States.

I've learned: It's the livelihood for 60% of our population.

I've learned: It accounts for over 70% of the dollars in the construction, retail, wholesale and service industries.

So, one can see, small business is a very important segment of our economy. What a contrast this is to a century ago when there were about 300,000 businesses in this country—nearly all of them small by today's standards. They served a population totaling 29 million people.

Not long ago, I read a statement which summed up the importance of small business in these words:

"Every American community draws its base of leadership, its stability, its continuity, and its drive for progress from responsible and progressive small businessmen. Leadership at the local level will decide the quality of our cities, our classrooms, our countryside; in fact, the quality of life in our country for a century to come."

Our tradition of free enterprise is simply the economic application of the ethical concept of freedom. The right to compete is the oldest thread of our country. It came with the earliest settlers and far ahead of nationhood.

Small business has continuously flourished as a pillar of competition—the American way of life. It has done so because, as a people, we have always believed—and still believe—that competition must prevail in the market place. Indeed, few Americans today would question the importance of small business in our way of life or the wisdom of helping to maintain and strengthen its influence in the economy.

Although it can be seen that throughout the history of our country, the small businessman has played a major role, there are times when he is hard pressed. He neither has the resources of the large corporation nor does he have the market research and management controls that larger businesses generally have. On the other hand, his decision-making process is less cumbersome. A good, small firm can provide flexible and responsive engineering, low administrative costs and first rate products.

We have heard it said that every small business wishes to become big business. This, of course, is not always true and neither will nor should it happen across the board. A better statement might be that, with rare exceptions, every big business was once small.

SBA EXPERIENCE WITH SMALL BUSINESS

The question often arises as to how our government should treat small business in carrying out the policy of the Congress as expressed in the Small Business Act. The act reads, in part: "It is the declared policy of the Congress that the government should aid, counsel, assist and protect, insofar as is possible, the interest of small business concerns in order to preserve free competitive enterprise, to insure that a *fair proportion* of the total purchases and contracts or subcontracts . . . be placed with small business enterprises." (15 USC 631, Sec 2a).

I am never sure of what is meant by the term "fair proportion."

* * * * *

The federal government follows policies that foster growth during the early—and sometimes critical—years in the life of a new business.

Small companies should know that there will be reasonable safeguards to protect them from unfair competition, and that they can prosper if they are creative and efficient.

In the event that a reduction of requirements makes necessary the termination—in whole or in part—of a contract, there must be a prompt and fair settlement with the contractor. This is equally true whether the contractor is doing business directly with the government or as a subcontractor at any level.

This might be a good point at which to comment on observations I—in fact, probably all of us—have heard about doing business with small business.

We have all heard the remark, "It costs more to do business with small business concerns." It just isn't so. Of course, there might be isolated instances one could cite, but they would be the exception.

While talking on this subject, let's get rid of another of the old wives' tales. This one is that small business gets favored treatment. Again, it isn't so. If the words were changed to read "fair treatment," then I'd say that is what we seek to do.

In general, it seems that small business problems fall into three areas of major need and concern:

Obaining a fair share of government procurement.

Gaining access to adequate capital and credit.

Obtaining competent management, technical and production counsel.

Let me hasten to say that large business shares some of these same problems.

Incidentally, if notice has been taken that I have not discussed large business, the omission has been intentional. It is not that large business doesn't play an important role as a supplier of government's requirements, for it, too, makes tremendous contributions to our defense posture. That fact is, most people here today are small businessmen.

Let's consider for a moment an area of national concern—it has been called the problem of employment. There is no question but that socio-economic problems exist in this nation. The government has launched programs to mobilize the resources of private industry and the federal government to help find jobs and to provide training for thousands of America's hard core unemployed. The Department of Defense is making positive contributions to the social needs of the country which, in turn, contribute to our national strength.

One area where we are helping is by awarding contracts to the Small Business Administration under the provisions of Section 8(a) of the Small Business Act. The SBA, in turn, places these requirements on a preferential basis with concerns that agree to hire and train the disadvantaged.

In making these awards, our purpose is to establish self-sustaining, competitive small businesses. A potential recipient of such an award, commonly called "8a contracts," will be required in the future to have a business plan, approved by the Small Business Administration, which will permit the Department of Defense to determine the extent of its commitments and the degree to which DOD contracts will assist in bringing the company to a competitive status and, thus, eliminate further use of "8a" contractual support at a discernible time.

I do not wish to appear redundant, but let me try to capsule some thoughts and observations. The Congress has made it abundantly clear that our resources must be used in every way possible to increase the contribution of small business to the general welfare. In economic terms, this is a command to help strengthen the competitive structure by helping small business offer America the highest quality and the greatest variety of goods and services at the lowest fair and reasonable price. In social terms, this is a mandate to preserve and strengthen the small business community as an outlet for the imagination, initiative and individualism we in DOD understand and fully support.

The concern to keep economic power distributed among many independent proprietors is one that goes back to the nation's beginning. It was a favorite theme with Franklin and Jefferson who feared that industrialization might lead to a propertyless labor class.

Today, there is a continuing need to evaluate the place of small business in our economy, as well as the actions necessary to create and maintain an economic climate in which small business may be virile and significant.

In closing, let me say that there is one link in the chain of small business and government relationship which can be strengthened. Let's call it a need for better communication which, in turn, results in knowledge. This meeting today will put us considerably further down the road toward that happy marriage of industry capability and government utilization by piercing and destroying, so far as possible, that which has been referred to so many times as "a communication barrier."

I appreciate the invitation and interest of Senator Montoya and others which made possible our joining with you in this meeting.

---

## THEODORE ROOSEVELT HISTORIC SITE'S SHUTTERS COME HOME

### HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. DULSKI. Mr. Speaker, yesterday I had the pleasure of informing the House of the formal acquisition by the Federal Government of the Ansley Wilcox mansion in Buffalo, N.Y., which was where Theodore Roosevelt took the oath of office as President in 1901.

This was authorized under legislation which I sponsored in the 89th Congress.

Now comes new word which indicates the wide and sympathetic interest in this historic project.

The grandson of a previous owner of the mansion had taken the shutters with him when he moved from the city, believing that 1 day he might find an appropriate use for them. They do not fit into the pattern of today's buildings and he never had the heart—thankfully—to trim them down.

The other day, he bundled them in his automobile and returned them to Buffalo prepared to turn them over to the local foundation which has taken on the job of restoring and refurbishing the mansion.

The story of this incident is told in intimate detail in an article by Karen Brady in the Buffalo, N.Y., Evening News as follows:

KAREN'S KORNER—THE MAN WHO LIVED IN WILCOX MANSION

(By Karen Brady)

Ollie brought the shutters back.

Six pairs of them, wrapped in blankets.

Age way over 100, made of cedar, he thought. Brought all the way from Pittsburgh; a daughter, Tricia, sleeping on top.

All done by hand, one pair of them five feet tall. Once they were white. Now they're ivory. And hardly peeling at all. Even the round ones, that once covered a historic door.

Ollie's had them nearly 10 years, sort of a keepsake he'd hoped to use. But a keepsake that would never fit modern windows or doors. Unless he cut them and then they'd never be the shutters Ollie knew—when he lived in the Wilcox Mansion.

"Which is where the shutters are from," says Ollie, "and when I heard the house was going to be restored, I said: 'OK, shutters, you're going back.' "

Now Ollie is, as he tells it with proud jocularity himself, Oliver Lawrence Poppenberg, the handsome young father of four.

GRANDMOTHER RAN RESTAURANT

The first time I met him he'd just become engaged to my efficient, most beautiful classmate, Mary Kay Pepe (now Poppenberg). And Ollie was jolly: A blond, witty young man who made people feel comfortable at parties.

A rare art he may have learned from his remarkable maternal grandmother, Kathryn Lawrence—the wonderful, also witty, white-haired proprietor of the Kathryn Lawrence Tea Room, then Restraurant—house for over 20 years in the Wilcox Mansion.

A rare art he may also have inherited from his paternal grandfather Gustav Poppenberg—for whom Poppenbergs Inc. (organs, pianos, television) was named, the man I'm told was responsible for most of the church organs in Buffalo, and who served as the first violinist with the Philharmonic here.

At any rate, Ollie was always enchanting. When he could have been a snob about the fact that he and his family lived in a mansion—the nationally-famous Wilcox Mansion.

HERE COME THE SHUTTERS

And that's probably why most of us never heard much about it from Ollie until this week-end—when he breezed in from Pittsburgh by car, with the calm, beautiful Mary Kay, plus Ollie Jr., Kate, Tricia-on-the-shutters, Karen and the Poppenberg pup, Schatz.

They were all here to see Ollie's parents—Mr. and Mrs. Arnold C. Poppenberg—and Mary Kay's—Mr. and Mrs. Alphonse P. Pepe. The former of Poppenbergs Inc., the latter of Hodge Liquor.

And when they'd done away with Poppenberg-Pepe turkey, they came by to talk shutters with us: An extraordinary evening that included childhood visions of Ollie, age 12, creeping upstairs alone from the restaurant at night. An impressionable boy who knew the house' foundations had been used as barracks in the War of 1812, and that the cellar had housed part of the Underground Railway at the time of the Civil War and that Theodore Roosevelt had taken the oath of office in the house, after McKinley was assassinated here. And that the ghosts of all of them were crawling upstairs after him.

OLLIE LIVED THERE

"I heard the doors screaming on their hinges, and the silver ringing, and the crystal singing. But subtly. It happened every time," said Ollie, who lived with his family in the celebrated 641 Delaware Ave. manse from 1949 till the early '60s, when Mr. Lawrence died and the house was sold.

"I was the only person in the world," he

informed us to our delight, "who could make a turkey sandwich—with all the trimmings—right down to finding the sharpest knife and slicing the bread pencil-thin—in the late night, pitch-black when my grandmother was in charge of the kitchen."

Ollie, who still wakes up and dreams of those turkey-sandwich specialties, had more to tell of the Wilcox: About the huge, harlequin great dane that used to lie by the fire in the East Room, where there is a giant marble fireplace. Ollie was scared of the dane.

MOW IN SUMMER; SHOVEL IN WINTER

Ollie recalled the long summer hours cutting the mansion lawn—and the brisk winter mornings he shoveled "that horrible slate walk." He said he knew where the underground railroad must've gone through—over 100 years ago.

"It's all boarded up now," he said, "but I've been through the iron vaults, where they kept furs and jewels, and I've ridden on the elevator that was put in for a Wilcox who was crippled, and, during high school, I studied on the roof. It was scary, too, but I did it, crawling up through a trap door . . ."

The "tragic thing about the mansion to Ollie though is the inconsistency of its owners: "A couple of generations, and a family moved out," he explained his feeling. "When my grandparents moved in, in 1939, I don't think anyone'd been there for at least 20 years. But I loved it. That's why I wanted a keepsake. That's why I took the shutters."

NO HEART TO CUT SHUTTERS

So Ollie and Mary Kay took them to their Richmond Ave. apartment, their Williamsville home, their Franklin, Pa., house, their Pittsburgh residence . . . "I could never bring myself to cut them," said Ollie, "People kept sending me clippings about the house—about to be torn down, about to be saved. Saved and more than saved. Now it will be restored . . ."

A Buffalo native, and a graduate of School 16 and Bennett High School, Ollie always wanted to be an architect but holds a degree in engineering from Case Institute and a master's in business administration from UB.

His first job was as bus boy at Kathryn Lawrence's—something he did in the sixth grade that mainly gave him a taste for his grandfather's finest cigars. His second job was as life guard, at several area beaches, a pleasant Tarzan-like occupation that introduced him to Mary Kay and kept him out of shoes till he was in college.

Formally, he's been an industrial engineer for Republic Steel here; an operations research engineer for Symington-Wayne locally, and data processing manager for the Joy Manufacturing Co. here, which later sent him to Franklin, Pa., from where Ollie went on to Pittsburgh and his present situation, as vice president for Computer Processing Inc., a software, Pitt-based firm.

HISTORIC SITES AWESOME

Wordwise, that's more than a mouthful—but Ollie-wise, it's only a little less than the little boy who once waited for Joanne, the tea room then restaurant baker, who always made two extra pies-in-miniature: one for Ollie, one for his brother, Arnold.

We asked Ollie if he cooked himself (oh yes, great Sunday breakfasts and oysters Poppenberg although I'd rather call them oysters Ollie) and we asked him where he'd take the shutters, now he'd wrapped and brought them back.

"I don't know," said the little-boy-grown-up who once lived in the manse that's brought Buffalo an extra name in history. "I don't know who's in charge of that sort of thing. Because of course, historic sites are awesome, even if they were once 'home', and that's just about the point where we found out the other thing Ollie's kept from the Wilcox: The great big front-door key. And he may return that next year. If he found out whom to give it to."

---

## AMERICAN ASSOCIATION OF MUSEUMS MOVED TOWARD ACCREDITATION

## HON. RALPH YARBOROUGH

OF TEXAS

IN THE SENATE OF THE UNITED STATES

*Friday, December 5, 1969*

Mr. YARBOROUGH. Mr. President, the American Association of Museums has been making significant efforts toward principles of museum accreditation. This is an important matter of museums both for public confidence and also in easing judgments which have to be made by governmental agencies and private agencies in connection with contributions, grants, and contracts.

To illustrate the steps that have been made, I ask unanimous consent that the special report on accreditation, dated August 4, 1969, from the American Association of Museums be printed in the RECORD. The special report includes a letter from Kyran M. McGrath, director of the association, and an Interim Report from the Committee on Accreditation dated May 26, 1969.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

SPECIAL REPORT: ACCREDITATION

AUGUST 4, 1969.

At the General Business Meeting of the American Association of Museum May 26, 1969 in San Francisco, the membership approved the following resolution on the important subject of museum accreditation:

"Resolved, that the Council of the American Association of Museums reconfirms the desirability of a system of accreditation of museums, accepts the report of the Accreditation Committee appointed by President Parkhrust at the 63rd Annual Meeting and recommends that the membership: (1) adopt the principles of that report, (2) authorize the committee to continue in session in order to define the methods to be followed, and (3) authorize the Council to implement the resulting action of the Committee."

Charles E. Buckley, chairman of the Accreditation Committee, reported on the efforts of his Committee during the previous fiscal year and explained the contents of the report delivered to the A.A.M. Council preceding the business meeting. The Council had discussed the report in detail and had unanimously approved adoption of the resolution above.

The report is recognized as incomplete, and the Council and membership wanted assurance that it would be submitted to the membership for study and comment. Originally, distribution to the membership was to be made through Museum News. However, this magazine is not published during July or August, and its first appearance in the September 1969 issue would not afford time for timely consideration and discussion and feed-back of opinions and suggestions prior to the annual meetings this Fall of the Regional Conferences or the continuing meetings of the Accreditation Committee. So this Special Accreditation Report is being mailed to all A.A.M. members to inform them of the action taken at the 64th Annual Meeting and to afford them an opportunity to offer their suggestions and comments for developing the most meaningful and workable system of museum accreditation.

Some comment has been received about the procedure by which this report was brought before the members at the San Francisco meeting. Authority for accreditation rests with the membership of the A.A.M. which was assembled May 26, 1969, and which would not have been assembled again until June 1, 1970 in New York. If implementation of accreditation was to begin before 1971, authority had to be obtained from the membership at this past meeting to allow the Committee to continue meeting and to authorize the Council to approve the steps of implementation at its mid-winter meeting January 28, 1970. If the Council takes exception to the steps recommended by the Accreditation Committee, it will take the steps necessary to meet the objections. For this reason, the Accreditation Committee, and the Council which now contains full voting representation from the six regional conferences, look forward to your comments and suggestions on the contents of the report printed below.

In order to appreciate the significance of timely action for the A.A.M. to implement a meaningful program of accreditation, understand the pressures upon the Internal Revenue Service, other federal agencies, Congress, and private foundations to have a means of identifying museums which indeed meet objective standards of cultural and educational service to the public. With the momentum generated by the message in America's Museums: The Belmont Report and recent demands for equal tax and funding treatment for museums as presently afforded universities, colleges, libraries, churches, etc., museums are being looked to for a system by which institutions are measured against objective, acceptable standards. If museums did not undertake this task, other organizations would, especially on the governmental level. For the sake of timely progress, the vote "on the principles of that report" was sought, taken, and unanimously approved. To assure the fullest possible informing of the membership, this report is now being distributed along with a call for your expression of opinion, comments, and suggestions. For reasons set forth above and in the report itself, accreditation is one of the most important matters that will ever come before the American Association of Museums. Your help and support is vital.

KYRAN M. MCGRATH,
*Director.*

---

INTERIM REPORT FROM THE COMMITTEE ON ACCREDITATION FOR THE AMERICAN ASSOCIATION OF MUSEUMS

In May 1968 Charles Parkhurst, President of the American Association of Museums, appointed a committee to study the question of accreditation by the AAM of individual museums throughout the United States. Members of the committee are William T. Alderson, Director, American Association for State and Local History; Charles E. Buckley, Director, City Art Museum of Saint Louis, chairman; W. D. Frankforter, Director, Grand Rapids Public Museum; Richard Grove, Associate Director, Arts in Education Program, JDR 3rd Fund; Hugo G. Rodeck, Director, University of Colorado Museum; William C. Steere, Executive Director, The New York Botanical Garden, ex officio; Holman J. Swinney, Director, Adirondack Museum; and Vernal L. Yadon, Curator, Museum of Natural History, Pacific Grove, California.

Financing for the work accomplished by the committee to date was provided by a grant in the amount of $10,000 from the Smithsonian Institution (Grant No. SFC–9–

2016). Applied against this grant to date are the travel and per diem expenses of the committee and certain minor administrative expenses starting August 1, 1968.

The committee was instructed to meet at regular intervals throughout 1968–69 and to prepare a report for consideration and possible action by the President and Council of the AAM meeting in San Francisco on May 26, 1969. The committee met at City Art Museum of Saint Louis for two-day meetings in July, November and February. A fourth meeting was held at the Asilomar Conference Grounds, Pacific Grove, California, on May 24 and 25, 1969.

A. DEFINITION OF A MUSEUM

As a first step the committee recognized the need to establish a definition of a museum. While it was aware that on several occasions in the recent past other attempts to arrive at a definition have been made within the American museum world, it was agreed that for the purposes of the report it was worth attempting another, one that would be more concise and hopefully acceptable to the majority of our colleagues. This definition is as follows:

For the purposes of the accreditation programs of the AAM a museum is defined as an organized and permanent non-profit institution, essentially educational or aesthetic in purpose, with professional staff, which owns or utilizes tangible objects, cares for them, and exhibits them to the public on some regular schedule.

The committee believes this definition of a museum to be accurate and suitable for general use throughout the United States; for further clarification the key words in it are defined as follows:

1. Organized institution: A duly constituted body with expressed responsibilities.
2. Permanent: The institution is expected to continue in perpetuity.
3. Professional staff: At least one salaried employee who commands an appropriate body of special knowledge and the abiilty to reach museological decisions consonant with the experience of his peers and who also has access to and acquaintance with the literature of the field.
4. Owns or utilizes: Has legal title to or authorization for the possession of its collections.
5. Tangible objects: Things animate and inanimate.
6. Care: The keeping of adequate records pertaining to the provenance, identification and location of a museum's holdings, and the application of current professionally accepted methods to the minimizing of damage and deterioration.
7. Schedule: Regular and ascertainable hours which constitute substantially more than a token opening, so that access is reasonably convenient to the public.

B. REASONS FOR ACCREDITATION

The committee next considered why it is desirable, necessary and beneficial for institutions which can be reasonably described by the above definition of a museum to be accredited by the AAM. In recent years it has become ever more apparent to many of our museum colleagues throughout the country that some definite method must be devised for evaluating the quality and performance of institutions operating in the broad museum field.

Heretofore, museums in the United States have been governed according to widely varying standards. While recognizing that uniformity of operation is neither possible nor desirable, there is nevertheless a compelling need for the formulation by the AAM of specifically defined guide lines and attainable professional standards to which a museum should conform. Acceptance by the AAM of accreditation and the development of the machinery necessary to implement it are of first importance.

Evaluation is the prerequisite for accreditation and is a process that should encourage improvement in the quality of all museums. It should be helpful in creating a climate of aspiration so that a museum not yet prepared for accreditation or one that fails in its first effort in this direction can work toward professional standards of quality and performance, as defined by the AAM, which must be met to assure accreditation.

1. Accreditation will help to develop public confidence by certifying in a visible manner that in the opinion of the AAM professional standards have been met.
2. Accreditation will significantly strengthen professional respect and cooperation between museums.
3. Accreditation will further promote institutional self-confidence and engender professional pride of accomplishment on the part of the staff and the policy-making body.
4. Accreditation will be important in guiding private and governmental agencies which need expert opinion as a basis for qualitative judgment in connection with contributions, grants and contracts.

C. PROCEDURE FOR ACCREDITATION

The committee believes it will be necessary for the AAM to create an ultimate authority, such as an Accreditation Commission, to consider all matters having to do with accreditation.

The committee is unanimous in its opinion that evaluation is the first step to be taken. Museums aspiring to accreditation must first willingly apply for accreditation and cooperate with the AAM throughout the valuation proceedings.

A museum will not be accredited without having been visited by an evaluation team. The committee recognizes, however, that such visits will be difficult to arrange as accreditation becomes a reality even if the procedure is well organized. Visits to museums throughout the United States will inevitably be time consuming and it may well require a period of several years before the task can be accomplished. Some method of granting provisional accreditation to a substantial number of museums should therefore be considered. A long step forward in this direction may be accomplished by a carefully constructed questionnaire to be filled out by the applying museum. The completed questionnaire would be submitted to the Accreditation Commission for study and, if approved, passed on to a regional visiting committee. If the questionnaire is properly prepared and thoughtfully answered, it can provide an accurate profile of the institution, defining and describing its philosophy, collections, conservation, staff, exhibitions, activities, finances, housekeeping, record, maintenance, et cetera. On the basis of the questionnaire the committee believes that many museums will qualify for provisional accreditation.

Even though provisional accreditation is granted, it must be emphasized that the need remains for a museum visit from a regional visiting committee which will be assigned to this task. It is on this visit and the drawing up of a final report that accreditation will be granted or withheld by the Accreditation Commission.

The committee recommends that, concurrently with the preparation and distribution of questionnaires, procedure for committee visits be perfected and put into operation. It is suggested that visiting committee members be drawn from the regional conference. It seems obvious that it will be necessary to create a sizable body of committee members so that the burden of service does not fall too heavily upon a small group of individuals. Each committee, consisting of at least two, but of not more than seven, members, depending on the size and complexity of the museum to be visited, will spend sufficient time studying and observing the museum under consideration. The visiting committee chairman will be briefed in advance by the Accreditation Commission chairman, and all committee members will be furnished copies of the questionnaire answered by the museum. On conclusion of the visit each committee chairman must develop a written report, modeled on a form to be developed by the AAM, concluding with a recommendation to the Accreditation Commission that the museum be either accredited or that accreditation be withheld. A copy of the report will also be sent to the President of the Board of Trustees of the museum. A museum failing in accreditation should have an opportunity to correct deficiencies in quality and performance and to request reconsideration at some later date without further expense.

It is recommended that the accreditation commission prepare a guide for use by visiting committees in evaluating individual museums. The following points, however, should be considered by visiting committees even though some of the answers will already be available through the questionnaire.

1. Administration:
(a) Physical plant and allocation of space.
(b) Duties and qualifications of museum staff.
(c) Organization and functioning.
(d) Fiscal responsibility.
(e) Maintenance.
(f) Public relations.
(g) Security.
(h) Trustee organization, policy and delegation of authority.
(i) Salaries.
(j) Fringe benefits.
(k) Other considerations.
2. Curatorial:
(a) Quality and suitability of collections.
(b) Care of collections.
(c) Acquisition policy and practices.
(d) Record keeping.
(e) Research.
(f) Identification services for the public.
(g) Qualifications for loans.
(h) Other considerations.
3. Exhibition program:
(a) Relevance of exhibitions.
(b) Quality of exhibitions.
(c) Design and interpretation of exhibitions.
(d) Other considerations.
4. Educational and interpretive program:
(a) Docent program.
(b) Activities.
(c) Organized classes.
(d) Circulating exhibitions.
(e) Lectures, films, television and radio.
(f) Publications.
(g) Organized school programs.
(h) Graduate student training.
(i) Cooperative programs with colleges and universities.
(j) Other considerations.
5. Future plans:

In the opinion of the committee, not all accreditable museums are expected to give attention to each of these objective points, or to all of them to an equal degree. Recommendation regarding eligibility for accreditation will be made by the visiting committee on a subjective basis after consideration of answers to the questionnaire following a museum visit. Museums which do not fit these pre-conceived criteria will still be eligible for accreditation if in the opinion of the visiting committee and the Accreditation Commission their quality and performance are of such caliber as to warrant accreditation.

Financing AAM accreditation will require more study than the committee has been able to devote to it thus far. It has been suggested, however, that museums be re-

quired to pay an administrative fee, but in order to prepare the necessary machinery and to implement accreditation, foundation and government support may have to be sought.

The committee recommends to the President and Council the adoption in principle of the above report and further recommends the drawing up at the time of the Council meeting of a resolution to be placed before the membership in San Francisco to the effect that the concept of accreditation by the AAM of museums throughout the country be formally reconfirmed. Although recognizing that much work remains to be done, the committee further recommends that the AAM, through its Council, proceed to implement this program. The committee is of the opinion that the machinery of accreditation needs further study and perfecting of detail. It is here proposed that the committee prepare an article regarding accreditation for publication in Museum News. The committee also recommends that a major address on accreditation by a figure of national importance be featured at the 1970 meeting.

## NEEDED: MORE AIR TRAFFIC CONTROL

### HON. VANCE HARTKE

OF INDIANA

IN THE SENATE OF THE UNITED STATES

*Friday, December 5, 1969*

Mr. HARTKE. Mr. President, I ask unanimous consent to have printed in the RECORD an article which will appear in the January 1970 issue of Plane & Pilot, a widely circulated magazine in the field of aviation.

The article, entitled "Who's Afraid of ATC?" deals with the mounting problems of air traffic control throughout the United States, and suggests again the need for a constant updating of air safety requirements. There are now more than 700,000 licensed pilots in the United States, and most of them fly private planes for pleasure, business, or both.

The article leads one to the inevitable conclusion that an expanded and more rational program is needed for air safety and a growing reliance on the qualified controller to safeguard us against future traffic accidents.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WHO'S AFRAID OF ATC?

Hugh Riddle, president of Air Traffic Control Association: "The general aviation scene is perhaps the most interesting at the present time because of the increase in the number of general aviation operations at so many airports. The ATCA sees the controller's role as trying to accommodate all types of aviation—military, airline and general aviation. I think we are reaching the point where we need some special facilities even at our larger metropolitan airports, shorter runways or what have you to help take care of the general aviation operations. In my own experience I think that airline operations tend to generate general aviation operations at the same airport . . . private or corporate aircraft bringing passengers in to catch other flights. To completely try and isolate the two entirely probably is not a practical approach."

Thousands of pilots among the nearly 700,000 in the United States have a common fear—ATC. To the majority of private pilots air traffic control is a mystery—the men in the towers are government agents dedicated to take away the licenses of pilots who make mistakes. The men in the towers, the centers, the Rapcons are remote voices who must be tuned in on specific radio frequencies. A high percentage of pilots consider the controller a traffic cop of the airways.

Pilots by the thousands shy away from tower-controlled airports as if the facility were some kind of giant electrode projecting an anti-aircraft barrier to be penetrated only by a chosen few. Often the non-tower fields in some areas are busier than the prime tower-guarded airport until the Federal Aviation Administration decides the non-tower field is busy enough to have a $600,000 tower that most of the pilots don't want. Airports honored with new towers often suffer business declines if pilots have a nearby non-tower field that they can use.

FAA officials try hard to convince pilots at airports planned for new towers that safety is sharply improved by having skilled ATC specialists in the tower cabs directing traffic with the help of radio, radar and computers. But most of the midair collisions of 1968 happened within control zones during VFR weather. What many pilots refuse to realize is how much worse the traffic problem would be without controllers.

But at the same time the FAA tells the pilots that they can fly from uncontrolled airports if visibility is estimated at one mile. But at the controlled airport, the pilot can't just hop in his bird and fly unless the visibility is at least three miles.

Four or five miles from a controlled airport pilots may be flying without restrictions in one-mile weather while at the controlled airport the pilot must receive a special VFR clearance that he has to repeat to the controller and then wait in line while IFR traffic arrives and departs. True, the special VFR clearance does allow flying on the same basis as at an uncontrolled airport, but at the same time many pilots consider they are being penalized by being forced to receive a clearance and forced to endure delays while at the nearby uncontrolled airport local traffic possibly is heavier and the pilots probably are cheating a little on the minimums.

This is the concept that turns thousands of pilots off on ATC. They see their flight freedoms disappearing into the hands of faceless men in a glass cab overlooking the airport like a giant stop and go signal. Pilots at controlled airports often sit around flight lounges, pacing the floor, calling time after time for weather reports, looking at the sky, muttering about the controllers and ATC while waiting for the sky to turn VFR, because they don't want to ask for a special VFR clearance. It happens somewhere almost every day at one of the 315-plus controlled airports in the United States.

Pilots see more restrictions in the future as air traffic control spreads across more of the airspace. Private pilots realize that soon they will need better equipped airplanes and higher skill levels to fly into about 120 of the nation's airports. Hundreds of the pilots who might have used these 120-plus airports now will select alternates that are nearby and non-tower controlled.

Pilots by the thousands don't realize that technicians in the towers aren't there to catch them making errors or to appraise their flying skills. The ATC men in the towers, the centers, the Rapcons are willing to help any pilot who asks for help. Tower personnel at some airports do extensive public relations jobs to convince pilots that using FAA services is as easy as talking to a friendly next door neighbor. The basic assignment of a controller is to help pilots keep out of trouble, not to get them into trouble and demand explanations for mistakes.

Most of the pilots in the United States are private pilots. They don't want to be commercial pilots or instrument rated. They want to fly without too many restrictions. They want to fly for business or pleasure and go where they want to go without looking up a lot of contact frequencies for ground control, approach control, tower control, right runways or left runways. Every tower chief, every ATC specialist or radar controller in an air route center realizes that they must work with private pilots, commercial pilots and ATR rated pilots with wide varieties of skill levels.

During a recent meeting of the Air Traffic Control Association at the Stardust Hotel, Las Vegas, Nevada, a cross-section of controllers talked about how general aviation pilots can make use of ATC . . . make it work for them, make their flights easier and safer by being prepared to ask for help if problems develop and recognizing the man in the tower as a friend, not an enemy.

WHY PILOTS AVOID CONTROL TOWERS

Control Towers are on the negative list for thousands of general aviation pilots and the controllers know it. They don't like being snubbed and some of them try to change the image. The men of ATC don't want to drive light planes out of the skies, they want to make the skies safer for light planes by having better control of all traffic through automation and types of radars that will track light planes without transponders as well as bigger planes with transponders. Automation that the controllers want will give them more time to provide better service to the increasing numbers of light, general aviation aircraft being flown by pilots who want to keep the fun in flying. If you think that ATC men are inhuman or FAA cops, or pro-airlines, here's what some of them had to say in *Plane & Pilot* exclusive interviews:

*Charles Meng, Ft. Columbus Control Tower, Columbus, Ohio*—"One thing I feel good about is our relations with all groups at Columbus. We have military, air carrier and much general aviation operating in and out of Columbus. There is as much mix there as anyplace I know of in types of traffic and different levels of pilot skills.

"We have quite a few transient pilots who own airplanes. They'll have to come to Columbus for a meeting of some kind and they'll land at a satellite airport or take some other form of transportation to Columbus to keep from landing at a controlled airport. Quite a few of these individuals have come up to the tower and start talking about owning airplanes and we'll say why didn't you land here and they say, We avoid these control tower airports like the plague. This always makes me feel like some place along the line we've let them down because the only thing we are there for is to serve the flying public.

Some of these people who have been flying at non-controlled airports, even though they may have been flying 20 years, some of them do cause problems when they come in that the students who have learned to fly in the controlled environment don't have. You can't expect everything to go 100 percent just like you want it to go from our standpoint in handling the traffic or from their standpoint in complying with what we are trying to get them to do."

WHY RADIO CONTACT IS IMPORTANT

New terminal area requirements are moving rapidly into the general aviation picture. Controllers working with the new systems believe that most private pilots need more training or self-discipline to cope with precision demands that will be made on their skills. This is especially true of using the com side of the radio, an area where most pilots are left by instructors to learn for themselves.

*Edward Morrow, Atlanta, Georgia Tower data systems coordinator*—"As far as general aviation, we pioneered the TRSA (an automated radar system). For the general aviation pilots not familiar with procedures, in the beginning we had trouble with them and we still do. We would establish them on a heading and they would deviate from

this heading sometimes en route. They weren't used to being tied down. Training in this respect is important to teach them to generally comply with ATC instructions and how to work in the system. By this I mean for an air carrier who is coming in and out every day it is the same thing over and over again he gets to the point where he can make one word suffice for 10 or 15 words and this is not true in general aviation we don't expect it. We know the condition but still as for suggestions as to how they could improve this is one of the problem areas to reduce the communications—better radio procedure—and other than that we don't have any major problems in Atlanta. Most of us are private pilots ourselves.

"Seventeen percent of our traffic is the general aviation VFR pilot and while if they don't have a transponder we may lose tracking on them when they pass abeam the antenna on the tangential still we track them everyone of them. Because this track in that area is a reminder to us that he is there even though we don't see him. And so for that reason I don't advocate that all general aviation airplanes have beacons. I didn't intend this in the meeting or otherwise. The point that I was trying to make was that we should go back and re-evaluate this thing (requiring transponders) and provide radar tracking. This is necessary even if everybody had beacons."

*James R. Daniels, Spartanburg Tower, a low activity VFR facility at Spartanburg, South Carolina*—"We have a number of private aircraft, corporation aircraft based at our field and one of the main things we want the pilot to do for us is communicate so we can provide the service a tower is supposed to do—provide him with concrete to land on—provide him a safe entry into and departure from the traffic pattern.

"We tell the private pilot we want to know who you are, where you are and what you want to do. First whether you are on the ground asking for takeoff instructions or in the air. You call Spartanburg Tower, this is Bonanza 23 Victor, eight miles east, landing Spartanburg. At that time we have the complete picture. He knows where he is and we know where he wants to land. We know what type service he needs and we can provide it—exchange traffic that he might be meeting or anything approaching him that might overtake him. These are the kind of things we try to get to the private pilot. *Don't be afraid to talk to the tower.* A lot of pilots are a little skeptical, especially the new private pilot. But we are just people and we are there to serve him. This is one of the problems we have to overcome first is to get him to be able to talk to us.

"A lot of times we have pilots call into the tower and say this is Aeronca 792 three miles east of the field. We look three miles east of the field in five miles visibility and we don't see the aircraft. Usually we make a 180 and look to the west of the field. We have traffic controllers who have become accustomed to this. We don't belittle the pilot, we don't run down the pilot on his errors or even if he violates some of our rules, we don't do this. We just say Cessna 279, taxi to the ramp and call the tower when you have time. Then we'll talk to him on the telephone or invite him up for a cup of coffee and we explain the error of his way and how he could avoid it and why we need to straighten him out because we are up there for his service and the more we can communicate with him as to his need and our need the better off we'll be."

WHY PILOTS NEED TO UPGRADE SKILLS

Most private pilots don't want to fly into the giant metroports like Los Angeles International and O'Hara at Chicago. However, sometimes flying a light plane into one of the big airports may be a convenience or a necessity. A key FAA official spells it out frankly when he says that skill levels need to go up for pilots who want to mix with jet traffic.

*John Munds, Western Region, FAA*—"Every private pilot who wants to fly in an area like Los Angeles where there's quite a bit of traffic is going to have to upgrade his qualifications if they aren't already up there and then keep them up. This seems a particular problem. The pilot who either wants to fly into a congested area or wants to fly in there as a regular operation, he must be up on what the rules are and also his piloting technique and his ground technique. And this requires more than most of us private pilots are willing to do. We want to go out once a month or once every two months and have a good time without really keeping up on what a pilot should be up with. To this end we recommend such things as have already been recommended by the FAA since then of periodic checks on your flight proficiency whether these are written exams or compulsory attendance at courses to upgrade the pilot's understanding and techniques. My personal feeling is that the FAA could do more in this regard too. If they make this sort of thing available to the pilot, he'll avail himself of it. The private pilot needs to know where to fly in order to avoid high performance aircraft."

*Vern Baran, O'Hare Tower, Chicago*—"The private pilot who operates in and out of Chicago O'Hare is a highly professional type pilot if he is flying a Cessna 172, an Apache or what have you. Maybe the other ones are scared to come in there but we have no problems in general with the private pilots who use O'Hare facilities. These people are real good, just as good as the air carrier types. The other ones that fly in and around the general metropolitan area of Chicago, there are some problem areas. This I think is evident in any area you go to. I blame this on possibly their schooling when they obtain their private ticket, their lack of knowledge about the system. At one time I ran a private pilot course at a private field and I got very good participation for four weeks. *The private pilot is hungry for information how to fly in and around large metropolitan areas.*

"Some of the problem perhaps is with the agency itself. It does not have a firm enough program for the private pilot to show him certain things he should know prior to flying into a metropolitan area and I think it is a two-sided coin. The private pilot should try to obtain as much information locally and if he can't get it there, he can try some other media. But I think an overall general aviation program is necessary for the private pilot so he can be made aware of the operations in particular areas, something that can help him out and the pilots I have run across are very receptive. They want to know this information. It is just a matter of who is going to provide this information. So once we can get a program of this type out, whether it be on a voluntary basis at FAA facilities or local, or what, but we have to get some cooperation so a pilot won't transition through an approach course to O'Hare or some heavy density area. I think if he would realize where he was and made aware of this, he wouldn't be there. He doesn't want to get himself knocked out of the sky anymore than an air carrier does. I think it is a matter of education. It could be in microphone technique or it could be in general navigation or just by making themselves aware of the local operation that's in effect.

"We are getting more and more airplanes in the system . . . they are building more and more so lack of education is going to lead to nothing but a chaotic situation in the metroplex complexes it's just going to reach an area where it is possibly dangerous. But I think we can alleviate this if everyone is aware of what to expect, where not to be and what to do when they get themselves in a certain situation."

*Vito Borrello, Rochester, New York*—"It's getting mixed traffic that is the problem—jets and light aircraft. They (private pilots) have to learn more about ATC. They should not have to be told. And that's it, it's getting to learn to fly with the big boys, and being able to take care of themselves in the pattern and learn more about terminals. I think instructors are making instruction too easy. A guy three months ago didn't know how to fly and now he's an instructor. We have three flying schools in Rochester and they pretty regularly visit us. They get to know the controller. They believe that a controller is bad, that he's not there really to help 'em. That's the impression they get until they come and visit us. And then you have people learning to fly where there are no towers. Radio is their big problem, they're afraid of the radio and the proper use of it. And they are afraid to say repeat."

WHY PILOTS NEED EDUCATION, PLANNING

Pre-flight planning is an area of weakness among the men and women who make up the average of general aviation pilots. This situation may lead to some problems in metroplex areas where reporting points become essential and knowing where you are keeps you out of trouble.

*Pete Nelson, common IFR Room, New York*—"We have expanded radar which provides VFR traffic service to pilots landing and departing at the airports of New York and traffic overflying New York. This is a real work-horse of a position either due to poor communication technique of the general aviation pilot or due to his lack of planning on just where he is located. He knows he is somewhere, but he's not just sure where and his position reports are usually inaccurate. You can tell real quickly when you are dealing with a competent aviator. He knows where he is and he knows that he is not cutting someone out when he transmits. Items like that I think are not hard to correct with a little training and a little thought and not just jumping in the plane . . . let's take off for here or there without thought about what radar service you can work and not listening on the frequency before you call. I think these are basic things that if corrected would make the controller's job a lot easier.

"*Basically the general aviation pilot needs a little more education.* I think there are times when some people ask some questions that you just can't believe a pilot would ask on the air as to either services that are available that he doesn't know about, which he could have found out before he took off and it just shows an area of poor flight planning, let's put it that way."

*Joe Shirley, Tower Chief, Spartanburg, South Carolina*—"I believe the main thing about pilots in general aviation should be a better educational program. Too many of them don't know how to enter the traffic pattern at small airports. A lot of it would be the instruction they're getting. Lots of times they have regulations on the big airports where they make big changes. For instance, this inverted wedding cake they are talking about. We have a lot of pilots that object to that for the simple reason it is a restriction. The thing about that restriction is this, the pilots say we are taxpayers, we should be able to use the big airports. Well, like the expressways, there are farmers who drive horse and wagons. They are taxpayers, too, but they can't use the expressways either.

"So I believe general aviation should go more toward airports that are definitely for general aviation where they will be a lot safer. Where they won't have to worry about airline traffic and big airports can stick to airline traffic. They need more training on radio procedure. Pilots go into these controlled airports and they have no conception about what to do. But general aviation pilots are under the impression that we

in the tower are a police force. Well, we are not a police force, we are just interested in getting aircraft on and off safely. I believe general aviation pilots would be a lot better off using general aviation airports because we are more geared to general aviation than the bigger airports are. Take Atlanta, a lot of pilots want to fly into Atlanta, well, they have Fulton and Peachtree that are built for general aviation and the expressways are just as close to the downtown area."

That's the way some airtraffic controllers from across the nation look at general aviation from their tower cabs and IFR rooms, obviously realizing that they pose a fear image for thousands of pilots. But the undertone of sentiment favors the private pilot, urging only that he make better use of FAA facilities and keep himself educationally aware of the hows and whys of air traffic control.

---

## HON. W. R. "BOB" POAGE SALUTES A GREAT TEXAS LADY AT WOOTAN WELLS HISTORICAL DEDICATION

---

## HON. RALPH YARBOROUGH

OF TEXAS

IN THE SENATE OF THE UNITED STATES

*Friday, December 5, 1969*

Mr. YARBOROUGH. Mr. President, on November 30, 1969, I was privileged to give the dedicatory address at the dedication of the Wootan Wells Historical Marker near Bremond, Robertson County, Tex. Wootan Wells was a famous health resort in Texas in the latter years of the 19th century and the early years of the 20th century.

It was a fine day, and a large crowd was in attendance at this program to dedicate the marker to identify the site of the former spa.

In my opinion, the highlight of this day was an address given by the Honorable BOB POAGE, chairman of the House Committee on Agriculture and a Representative in the U.S. Congress from the 11th District of Texas. Mr. POAGE paid an elaborate tribute to Miss Ima Hogg, the daughter of Texas' great populist Democratic Governor, Jim Hogg. Miss Hogg has been generous with her time, efforts, and personal resources to preserve historical buildings of Texas, and its past, so that they may be passed down to succeeding generations of Texans. I want to share BOB POAGE'S speech with others.

I ask unanimous consent that the text of the program of the dedication ceremony at Wootan Wells, the text of the address by the Honorable BOB POAGE, and the well-written historical article "Wootan Wells" by L. W. Baker, published in the Waco Tribune-Herald of November 23, 1969, be printed in the Extensions of Remarks.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

WOOTAN WELLS—OFFICIAL HISTORICAL MARKER DEDICATION

(Texas State Historical Survey Committee; Texas State Historical Foundation; sponsors: Robertson County Historical Survey Committee; Mr. and Mrs. J. L. Turner; Mr. and Mrs. C. M. Campbell)

Famous early health spa and resort. First well was dug 1878 by landowner Francis Wootan. Water tasted good, but turned dishes yellow and clothes red. Even so, it seemed to possess amazing curative properties.

Wootan soon built a hotel and in 1879 a resort town made its debut. He formed promotion company with T. W. Wade and more hotels, a bottling works, dance pavilion, and school sprang up. Leading socialites came for miles to "take the waters."

Disaster struck in 1915 when fire swept the town. In 1921 the last buildings also burned.

DEDICATION PROGRAM—NOVEMBER 30, 1969, 2 P.M.

*Wootan Wells—Intersection State Highway 6 and Farm Road 1373 3½ miles west of Bremond*

Presiding: Mrs. Jud Collier, Chairman Robertson County Historical Survey Committee.

Invocation: Rev. Gary Munion, Grace Methodist Church, Bremond, Tex.

Introduction of out-of-town guests: Dudley Jaggar, Bremond Chamber of Commerce, vice chairman, Robertson County Historical Survey Committee.

Introduction of speaker: Hon. William T. Moore, State senator.

Dedicatory address: Hon. RALPH YARBOROUGH, U.S. Senator.

Tribute to Miss Ima Hogg, early spa visitor; Hon. BOB POAGE, U.S. Congressman.

Unveiling of marker: J. L. Turner.

Reading of marker inscription: Hon. Dan Kubiak, State representative.

Acceptance of marker: G. D. Reagan, Robertson County judge.

Benediction: Rev. Louis Wozniak, St. Mary's Catholic Church, Bremond, Tex.

---

MISS IMA HOGG AND WOOTAN WELLS

(Comments of Congressman W. R. POAGE)

Mr. Chairman, there are probably not a dozen people in this audience who personally knew James Stephens Hogg, the 17th Governor of Texas.

He took the oath of office as Governor about 80 years ago, and probably did more to change the emphasis of government than any single man. Every school boy, who has his hair cut, knows that Jim Hogg believed that government exists to help the people. He lived in an era when the power of corporations was growing faster than the power of the people. He did much to reverse that trend. He lived in an era during which the railroads held a life or death power over communities and individuals. Today it is hard for us to understand this power of the railroads. They are now seeking enough business to stay in business and they have long since lost the control of our economy which they once held.

It avails us little to speculate on what might have been, but had Governor Hogg come on the scene 20 years earlier we might have avoided many of the abuses and scandals in connection with the gift of 30 million acres of public land to railroads many of which were never built. The railroads might have made a more serious effort to develop the country rather than to develop the directors, and in the long run they might well have prospered far longer, but I realize that "of all sad words of tongue or pen, the saddest are these: 'It might have been.'"

Enough of Governor Hogg and the railroads—suffice it to say that the Governor was the friend of Texas—the people of Texas so long as he lived, and at his death he passed this love of the people on to his children, and we, today, seek to express our respect and admiration for the only surviving member of the Governor's immediate family. We had hoped to have Miss Ima Hogg with us today. Unfortunately, her health would not permit. We do, however, have her assurance of interest and best wishes. Miss Ima, we hope that with the coming of the flowers of Spring you may again visit the site of old Wootan Wells where you and members of your family once enjoyed the hospitality of Central Texas. You will always be welcome.

It was never my privilege to know any of the members of the Hogg family except for a short association with Honorable Mike Hogg while we were both members of the 40th Legislature, but I am aware of their long and constructive association with our State. If Jim Hogg had done nothing more than developed a statewide interest in the pecan tree, our people would be in his debt. If his wife had done nothing more than to give this State three outstanding new Texans, she would deserve our plaudits. If Will Hogg had done nothing more than to develop the great corporation which carries the name of Texas to the far corners of the earth, he would have established his place in history. Had Mike Hogg done nothing more than to present the needs and wishes of Harris County in our Texas Legislature, he would have rendered a great service. Had Miss Ima Hogg never aided in another public service than the construction, furnishing and gift of the home at Bayou Bend, she would be known as one of our States' greatest philanthropists. Of course, each member of this remarkable family did a great deal more.

But this afternoon, we are not gathered to honor this great Texas family. Their works speak for them louder than any words of ours. We are here to take note of this family's connection with Wootan Wells.

I like to think that the family of Governor and Mrs. Jim Hogg was a typical Texas family of the eighties and nineties. They came here as typical Texans to enjoy the best Texas had to offer, and while it was a far cry from the great institutions of the Bayou City of today—the culture of which has been so liberally endowed by Miss Ima Hogg, it was pleasant and wholesome recreation. I can envision the little boys and their sister riding two mule drawn cars to and from the railroad junction at Hammond. And I can imagine that from their childish experience it was a great adventure. I can envision a few years later when the young men and the young lady were leading figures at the soirees and dances on the grounds and at the hotels.

I doubt that these young people were concerned with the water—they were more interested in the beaus and the belles, but even then as today, the natural beauty of the spot and the curative powers of the water provided the setting and opportunity for social contacts. In any event, I hope that Miss Ima has only pleasant memories of Wootan Wells.

This seems to me to have been an ideal spot for the leading family of the State to visit, because it was so representative of the State. It was not a spot reserved for those of great wealth, nor was it a gathering place of riffraff. It was visited by the kind of people who were making an empire out of a wilderness and those are the people who Miss Ima Hogg personifies today.

Her whole life has been devoted to the building of her State and the betterment of her fellow citizens, just as was her father's life devoted to the needs of the people of his day and generation. Fortunately, Miss Ima has had far more of the material wealth of the World with which to work, and she has used that wealth generously and judiciously. Texas is a better place because she has passed our way.

We are all proud that this community had a small part in shaping the character of one who has done so much for the State we all love so well.

---

[From the Waco (Tex.) Tribune-Herald, Nov. 23, 1969]

WOOTAN WELLS

(In a bustling time in Cen-Tex history a health resort glittered, then Wootan Wells became a ghost town, recalled in legend and memories, pleasant, intriguing, mysterious. On November 30 an official state historical marker will be dedicated at the site of the old town and resort of Wootan Wells at the intersection of Highway 6 and Farm Road 1373 about three and a half miles west of

Bremond. High ranking officials from over the state have been invited. J. W. Baker, superintendent of schools at Bremond, has been collecting stories and data about old Wootan Wells for many years. He has been assisted in this by many people who had memories of the once-famed resort. Baker put the facts, the myths and the legends together to make this story.)

(By J. W. Baker)

Wootan Wells, near Bremond, became a nationally famous health resort in the 1880s, glittered brightly for a few decades, then became a ghost town. One old timer said the spa began "in roaring fun" but that when it died its death was so complete "it seemed the place had never existed."

Its only traces today are a rubble of brick foundations barely visible in the grass, some old cisterns, and an opening through the woods where its famous mule-drawn rail cars once traveled.

A BUSTLING TIME

The town of Wootan Wells came into existence in a bustling time in Texas history. The Civil War had ended, men had become bored with Reconstruction, and there was a new awakening in the South.

The first real interest in northwest Robertson County came when the Houston and Texas Central Railway extended lines northward from Bryan in 1868, passed through Hearne and Calvert, and came to a stop at Bremond in June, 1869.

When Bremond became a town in 1870, people flocked "to the end of the railroad" by the hundreds. By 1871 Bremond's population exceeded 2,500. But when the railroad pushed on northward the boom town died down, some of the terminal merchants moved away and a great number of former laborers and railroad officials became farmers on the land surrounding Bremond.

TEXAS FRONTIER GONE

The telephone was a year from invention; Thomas Edison had started manufacturing electric lights, ox-wagons were disappearing, and the Texas frontier was gone. Travel by railway was convenient, and people who had been confined by economic conditions for years were moving about, seeking opportunities for an improved life.

Among the fads of the day was taking health treatments with mineral waters at fashionable spas.

It was a time for enterprising men looking for ways to push chance discovery into big business.

And into such an arena stepped Francis Marion Wootan, a native Alabaman.

STARTLING WATER

He came to Texas in the 1870's, stopped for a time at Bremond, and in March, 1873, bought 51.5 acres of land from William Hamman and J. C. Roberts, planning to become a farmer. Wootan moved his family to the Davlin League land in 1874 and built his home and barn on a hill overlooking a grove of beautiful oak trees.

After four years of cotton farming, Wootan decided to dig a well to supply his family and livestock with water. He dug the well 75 feet deep, completing it in 1878.

The first water he drew from the new well startled him, so he filled a barrel and took it home. When Mrs. Wootan washed the dishes after supper the plates turned a bright yellow. The following day she washed clothes and the garments turned red.

These mysterious actions of the water fascinated Francis Wootan.

CURATIVE MINERALS

Next day he invited friends to his home, and all of them sampled the water. Wootan remarked later that "the water tasted good and seemed to be filled with curative minerals."

He drew another sample from his well and sent it off to Dr. W. M. Mew, a U.S. Navy chemist. Dr. Mew sent part of the sample on to Professor C. F. Chamber of New York.

When results of the analysis came back to Wootan, he took them to the editor of the Bremond newspaper. The newspaper ran an account of the analysis, ending with this sentence: "The water contains several minerals making it suitable for drinking and for baths in a health resort."

VALUABLE 51.5 ACRES

Instantly, the 51.5-acre Wootan farm became valuable. Rumors spread that many sick people had gone to the well and after consuming the water "became whole again." The demand for small plats of land grew, and Wootan accommodated buyers, dividing most of the land over and over until there were several hundred owners of parcels of the original farm.

An article in the Bremond Sentinel, in 1878, explained about mineral baths as follows:

"Mineral water and bathing has become fashionable throughout the nation. It seems there are great possibilities here, west of town where the Francis Wootans live. Mr. Wootan's well positively has curative properties as those in ancient times had. It will be well to remember the ancient Romans maintained famous mineral water baths and in later years Germans found water a great treatment for body ailments. Mineral water is the greatest cure for rheumatic disorders, heart disease, skin and muscular ailments, fatigue and exhaustion, and for nervous conditions. The water is helpful both internally and externally."

FREE WATER ENDED

For more than a year people interested in health restoration were free to visit the Wootan well, but in 1880 Wootan put an end to free water.

He formed a partnership with a promoter, T. W. Wade, who organized a company to bottle the water and convert the property into a health resort.

In 1881, Wade proposed developing the area into a resort of hotels, cottages, stores and entertainmnet spots. Wade was made manager of the company and within months three additional wells were dug and four spacious hotels were built.

QUICK SUCCESS

Wade also built a mule-drawn train car and railway to take water to the main rail line south of Bremond for shipment over the country, and to bring visitors from the main line to the resort.

The resort became a quick success, and in 1883 the company was reorganized with four stockholders: T. W. Wade, R. H. Wade, William McKinney, and Francis Marion Wootan. Wade then supervised the building of two long rows of cottages, a large dance pavilion, and additional bath houses.

The spa became the most fashionable in the state.

By 1890, Wootan Wells was known over the nation. It had more than 200 permanent residents and the summer population exceeded 2,000. The Texas Business Directory had this listing: "Wootan Wells derives its name from the celebrated wells located there which have gained an enviable reputation throughout the country."

Every day of the summer months guests from many states took rooms in the hotels and engaged in the pleasant life of drinking the water, bathing, eating in the hotels, dancing to the music of a band imported from Mexico, and riding the mule-drawn train from the railroad junction south of Bremond to the Wootan Wells depot.

BUSINESS BOOMS

Business in Wootan Wells soared.

Western Union built a station there; Wells Fargo took charge of receiving supplies and shipping both mineral water and soda water over the nation.

Not all visitors arrived by train. Many came in wagons and by carriage. In June and July each year hundreds of wagons and carriages were parked among the tents and cottages scattered over the vast park area.

The U.S. Post Office at the resort was a busy place, and Wootan was postmaster.

Before 1900, there were more than 30 business establishments in the town including offices of at least six physicians. G. H. Higginbotham had the billiard and games concession; A. S. Lane operated the largest general merchandise store; William Goodwin was a wagon-maker; Edward McGlaun ran a grist mill and cotton gin; Willis Martin was assistant to the postmaster and part-time operator of the mule train.

HISTORIAN FOR TOWN

A. C. Walker went to the resort in 1883 as a carpenter's helper in building hotels and cottages. He remained until 1894 as the operator of a store, then moved to Bremond in 1895. Walker's daughter, Miss Lottie May Walker, is now in the insurance business in Bremond and has been the town's historian for many years. Miss Walker has many letters and articles about old Wootan Wells and life there.

Mrs. C. C. Hill, sister of J. L. Turner who now owns the land where the resort was located, told about her father who spent a week at the old Wootan Hotel in 1884. He described the town: "Wootan Wells was but a beginning and an ending, the beginning was of roaring fun, and when its day was over it seemed the place had never existed."

Willis Martin described early days when he worked at A. C. Lane's store at the resort, and sometimes worked at Skorpinski's cotton gin.

A WONDERFUL PLACE

"Wootan Wells was a wonderful place," he said. "It was spread out among pretty trees and there were attractive cottages surrounding the shops, hotels, wells, and bathhouses."

"I attended dances at the pavilion and parties at the hotels. I remember Governor Hogg and his daughter, Ima, and the people who gathered to greet them. They were wonderful, friendly people.

"The men enjoyed riding fine horses. Women and children had picnics, parties, games and singsongs. People came to the Wells with plenty of money, and they spent it fast. Big dances were common, and the Chatauqua was attended by hundreds. Mr. Wade once told me the place was worth over a million dollars and I believed him," said Martin.

"I guess the thing I enjoyed most about the place was driving the mule-drawn train from the depot to the main railway line and back, with laughing children, old folks, and curious fellows who had heard of the Wells and decided to give it a try."

DEPRESSION OVERCOME

In 1893 an economic depression hit the nation, and business began to decline at Wootan Wells. But the directors, to offset losses, began an advertising program to promote the place as an entertainment resort.

When the depression lifted in 1897, more people than ever before began to come. For three years it seemed the place would become a great city. In the wave of prosperity, directors improved buildings and facilities.

There is one story that Buffalo Bill Cody registered at the Wootan Hotel in the summer of 1898, and another that the great marksman met George Washington Holland in a shooting match on the grounds. Cody had retired from show business in 1894, but according to Willis Martin, the old Indian fighter enjoyed shooting contests until the time of his death.

FLOOD HITS TOWN

Turner Hubby, a famous Waco marksman, often went to Wootan Wells for skeet shoot-

ing. He once pronounced George Holland the champion of champions.

There were many other activities: horse racing, fishing, and drinking bouts at the Wootan Wells saloon, which was called "Well No. 5."

Lloyd Campbell lived at Wootan Wells with his mother, in the Summer House. He left for the Spanish American War, and when he returned in 1899 a flood had converted the western part of Robertson County into "a shallow sea."

"It rained 16 inches, and the buildings at Wootan Wells were severely damaged. The water remained for two months, and when it receded it left gorgelike holes and all the roads to and from the place were gone," Campbell recalled.

Ralph Wade said the flood cost the Wootan Wells company half a million dollars to restore the resort.

Mrs. Fay Bailey, Allbritton of 713 Proctor, Waco, granddaughter of Francis Marion Wootan, recalled that her father, J. P. Bailey, drove the Wootan Wells mule car after he married her mother in 1883. The family lived in Wootan Wells 10 years.

COMPANY IS SOLD

"The company got into deep debt because of depressions, the flood, and droughts, and my grandfather sold his interest in the enterprise and moved to Bremond," Mrs. Allbritton wrote. "In 1930, mineral water was discovered in Marlin, just 15 miles to the north, and thereafter the new place drew people from the old Wells that were not as they had been in former years. On Aug 1, 1906, Wootan Wells was sold to Ralph Wade by the stockholders, and by 1909, Wade was unable to pay for the property and D. M. Pendergast, who held first mortgage against it, demanded that it be sold at auction in Franklin. At the auction from the courthouse steps Pendergast bought the resort for $10,000 because he was the highest bidder."

After Wade, the great promoter, was removed from his position as manager, Wootan Wells declined even more.

In 1967, Woodie L. Wade, son of Ralph Wade, who managed the general park and soda water parts of the Wootan Wells company, wrote that he left Wootan Wells in 1912, when he was six years old.

"I remember going to school which was located south of the park, and having to go over a stile to get to it. One of my most poignant memories was riding the old horse-drawn flat car with my father and picking up twigs and small tree branches along the right-of-way to use for kindling to start fires in the old depot stove," wrote Woodie Wade.

FIRST SIGN OF END

The first sign of the end of the dazzling resort came in 1902 when one of the large hotels was destroyed by fire. Then the original bathhouse over Well No. 1 burned. Workmen cleared away the burned debris, and "a good number of people" came in the summer of 1903.

Roberts Rifles, Co. E of the Texas 2nd Infantry, was stationed at Wootan Wells in 1903. It had been organized by Roy Hearn in 1900. Officers were Webb Hearn and John T. Atkinson. Fifty Bremond men took part in the drills on the famous camp grounds. Roy Hearn later became adjutant general of the Texas National Guard.

Mrs. E. A. Muret wrote of further troubles of Wootan Wells: "The company struggled to regain its high position after 1910, but good times did not return." The operators borrowed money, but this did no good.

LARGE HOTELS BURN

Marion Commings, writing of troubles of the resort, said: "Large hotels burned, then another fire, then another. Parties and dances were for local couples, and the great shows that came in other years did not return. An effort to sell lots for homes failed to stimulate interest, and the resort continued to decline until there was nothing left but ruins of places that had once been beautiful and fresh."

Dr. C. E. Mays, the leading physician at the resort in the 1890's, worked hard to build the reputation of the Wells. Through his efforts other fine physicians came, including Drs. Pennick, Spring, Powell, and the last to become a part of the adventure, Dr. F. W. Stoltje.

AS IT WAS IN 1914

Mrs. Clark Brown,, Dr. Stoltje's daughter, wrote in 1956, describing the resort as it was in 1914:

"The buildings and grounds at that time consisted of one large rambling two-story hotel, a three-story building in which we lived and which had been a famous hotel, two other two-story structures, former hotels which were not in operation, and about six cottages. There was a grocery store, a bottling plant that was doing business locally and shipping soda water elsewhere, and the old pavilion was still there for social gatherings and occasional dances . . . While we lived there the largest hotel burned, and along with it the cottages and our place. That must have been in 1916. We moved to Waco after that, and so far as I know no further attempt was made to re-establish the resort."

Mrs. Ben Campbell talked on the first telephone in the Bremond area. The line "was stretched from Bremond to the J. T. Bailey store at the Wells." The family of Emmett and Annie Clark lived near the resort and their sons, Jim, Henry, Alfred, Roland and DeWitt, became successful business men in Bremond and Waco. They all have memories of the town that appeared almost magically, glistened awhile on the prairie, then vanished.

LEGENDS AND MYTHS

Except for a few square nails, railroad spikes, brick building foundations, underground masonry cisterns and abandoned wells, there is little physical evidence the resort ever existed.

But like all ghost towns, Wootan Wells has its legends and myths.

There is a story about a former slave who worked at the Wells from the time of its beginning until the place became an empty relic of charred skeletons of once-splendid buildings. It was told that on summer evenings he visited the hill where the resort had been "to see the ghosts who remained and to hear the music and laughter where the old pavilion stood."

Fred Gaston, who drove oxwagons over Wootan Wells hill in the 1870's and lived to the age of 105, maintained until the time of his death in 1947, that "the ghosts of the Wells walked on moonlit nights, and if one listened closely he could hear the dinner bells at the hotels and the screeching of the wheels of the old mule-drawn train as it traveled westward toward the depot filled with laughing children."

STORIES OF TREASURE

There are stories of gold buried in bottles, and of bottles and jugs more precious than gold, buried in the hill. J. L. Turner, present owner of the land, has information that at one time a full load of bottles was dumped into the creek near the park where they were probably covered by waters of the flood of 1899. The old bottles and jugs, if found, would be a bonanza for modern bottle collectors.

There are other stories that add to the myth and legend of Wootan Wells. The late J. J. Staskey, who was a leading businessman of Bremond for more than 70 years, knew them all.

One that adds mystery was that of "the drowning of Henry Przybylski in a stock pond at the Wells." The account, as told by Mr. Staskey, was of a tragedy with a peculiar ending, resulting in the creation of a character who would match Harold Bell Wright's "Shepherd of the Hills."

A PECULIAR "DROWNING"

The account of the "drowning" was generally as follows:

On a summer afternoon in 1899 a group of boys was swimming in a stock pond near old Wootan Wells. One of the boys fell from a grapevine into the water and disappeared. The boy, according to John Kubiak, was Henry Przybylski, then 14 years old was visiting from Nesbit. He remained under the water for "at least 15 minutes." When Henry's friends realized he was in trouble they dived into the pond and dragged the unconscious boy to the bank where they left and ran to Wootan Wells for help.

When the boys returned to the pond with several adults, Henry had disappeared, leaving no trace at all. He was pronounced "dead by drowning," and a search for the body began.

Seven days after the "drowning" a horseman found Henry in the woods near Wootan Wells and took him to a doctor who gave him food and clothing. When the boy was dismissed from the sanitarium he again disappeared into the woods and was not found for another week.

AN AIMLESS WANDERER

Surely the story is fiction. But there is still a Henry Przybylski who walks through the woodlands around Bremond, homeless, wearing three hats and three coats, who "communes only with nature," and has not said an intelligible word to anyone for half a century.

No one knows the story of the ageless man who, for as long as people in Bremond can remember, has wandered aimlessly over the countryside.

It is said he knows the location of every wild fruit and nut tree in the area and that he has never been sick a day in his long life.

Sometimes he is seen unexpectedly by people of the region, standing harmlessly in the woods, gazing into space.

Whether the story of Henry's drowning is fact or fiction is immaterial, for there is a mystery in the man, and his story is a part of the story of old Wootan Wells.

EXISTENCE ON PAPER

Wootan Wells continued to exist on paper long after the resort was gone and the ownership of land on the hill had passed from person to person, combining blocks and acres until the parcels that were in the original Robert Moffitt and Hugh Davlin tracts were drawn together again.

The skeletons of the old buildings that remained after the death of the resort, stood as reminders of the once gay resort.

Then on a fall evening in 1926 a horseman riding eastward from the Brazos River saw smoke rising from the prairie west of Bremond. Thinking there was a grass fire, the rider galloped to the site of the fire and there he saw the last remains of old Wootan Wells disintegrate in flames.

FLAMES TAKE ALL

The smoke curled skyward and flames shot high over the skeleton structures. The horseman could hear the breaking of bottles and jugs and light explosions of gas drums along the streets. The flames spread from the dry grass on the prairies to the Park Hotel, and there were thrown to the famous old Well No. 4. The bottling works was the next victim, then came the well cover, and the fire swept southward to the stately old Jackson Hotel and the cottages nearby.

Before morning, the Wootan Hotel and the Summer House were gone, along with the pavilion, the boardwalks, and every bathhouse and sanitarium on the grounds.

Henceforth, the resort that had boosted a million dollar enterprise, a summer popula-

tion of more than 2,000, the finest music and the "most beautiful girls in world," would be nothing but a memory.

But what a memory.

## THE CAMPUS "THING"

---

## HON. THADDEUS J. DULSKI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

*Friday, December 5, 1969*

Mr. DULSKI. Mr. Speaker, to find out what is doing today on the Nation's university and college campuses, the Buffalo, N.Y., Evening News sent a staff reporter from its Washington bureau, Ronald J. Maselka, on visits to 10 schools this fall.

He returned with varied impressions which he related in a series of articles. Following is the second group of articles in the excellent series:

COMFORTABLE COLLEGE KIDS FACE SOCIETY'S INEQUITIES—V

(By Ronald J. Maselka)

WASHINGTON, October 4.—Today's collegiate generation is reputed to be the healthiest, wealthiest, smartest the world has ever known.

If they're so well-fed—literally and figuratively—why this hungry dissatisfaction with society? Why all this unhappiness on the campus?

For Dr. Lloyd H. Elliott, president of George Washington University, the underlying cause is "the difficulty the student has in finding meaning in the greater society and in his own personal life."

Noting that today's students see a "Hollywood-type facade" on American society, he added: "He can see the serious problems which this facade attempts to hide. When he looks behind it, he sees poor education for a lot of our people. He sees people of all ages in need of minimal health services and unable to get them. He sees people with skills and desires unable to get an equal chance for themselves . . .

"STUDENTS DOUBT SINCERITY

"The students," Dr. Elliott continued, "doubt the sincerity and dedication of both government and leaders of private industry in their efforts to correct these differences."

Acknowledging that the Vietnam war, the draft and "living in the shadow of the nuclear bomb and the possibility of sudden death" have a lot to do with student unrest, the Rev. Robert J. Henle, SJ, Georgetown University's president, also cites television and the rapidity of modern communication.

While it is yet unclear what the effect of spending hours in front of a television set does to young people, he said, "one thing it has done along with movies, publications, the media . . . is that young people have been exposed in a fairly direct way to whole areas of human experience" that earlier generations did not encounter until later in life.

CLASSROOM HASN'T ADJUSTED

This "direct contact with the evils of the world . . . seeing the seamy side of life" at such an early point in their physical and mental development, Father Henle added, has resulted in a certain amount of disillusionment and a desire for quick results.

Noting that "classrooms haven't adjusted to these things yet," he said that today's students are used "to having all messages presented in rapid fire." This presents a special problem in the classroom, he explained, where the lecturer is unaccompanied by noise, background music or flashing lights.

Rapid communication and the mass media have also made students aware of the diversity of morals and values in the world, Father Henle said, "before students are solidified in one view."

RECALLS AN EXPERIENCE

Reading about things and using your imagination to draw conclusions, he continued, have far less impact than seeing them directly. For example, reading about violence does not have the same effect as seeing pictures of a nuclear explosion or seeing daily televised reports of the death and destruction in Vietnam.

Buttressing his case, Father Henle recalled a personal experience in his college days, when he was considered "a flaming liberal."

"These things aren't totally new," he said. "I remember I was all fired up about getting the Marines out of Nicaragua. But I think there was only one other guy on campus who knew where Nicaragua was. Communications of what was going on in Nicaragua was limited to an occasional newspaper article."

While adults who lived during the Depression know what economic fear is, Father Henle said, the values of today's youth include a belief that "a job is not that important, nor is bread for that matter."

PERSONAL COMMUNICATION

The search for a better way, he continued, is fueled when "they see their parents on a treadmill . . . keeping ahead of the system."

Besides devising "more imaginative kinds of educational activity," Father Henle sees the university reacting to this new breed of student by "somehow putting him in personal communication" with faculty members who have wrestled with value problems like why am I here or why am I a Baptist, for example.

He favors an interdisciplinary approach to coursework, citing as an example a Georgetown special projects seminar that involved a deep examination of "freedom in the 19th Century."

PROBLEM COMPOUNDED

Father Henle said that a similar examination of "what is the defense budget of the U.S." for instance, would take students on a search through history, politics, economics, international affairs and other departments.

Dr. Elliott believes the problem is compounded because today's pre-college students "have relatively little freedom of choice."

For young men, for instance, "the draft says if you don't go to college, we'll draft you."

Pointing out that the liberal arts college is the recipient of many students who have no career plans or who are advised to come "while you make up your mind," Dr. Elliott said: "This delivers someone to us who not only doesn't know if he wants to be there or not but who already clearly has said to himself: I'm just putting in time."

NEED RANGE OF CHOICE

Dr. Elliott said that "one of our more serious weaknesses is that we have created a halo around these places. We've told parents, in effect, to get your son and daughter into a liberal arts college—doesn't matter if he or she is interested—and some marvelous, mysterious revitalization will take place. This isn't true."

Stressing that colleges today "have to say more clearly than ever before what we are trying to do, what we can't do and what we are not yet undertaking," Dr. Elliott said this "all-knowing" halo effect partially explains why students are turning to the universities for the solutions to pressing social problems.

Dr. Elliott thinks universities must provide students with "a greater range of choice" in education. He suggests an expansive curriculum—"to provide training for a specific job—that will provide post-high school vocational training for an airplane mechanic, for example, with similar instruction all across the board to the fine arts, for those who want to be artists, dancers, actors and musicians.

SKILLS NECESSARY

This type of widespread change, he said, will require a change of society's thinking, where the high school counselor and the parent "lean toward liberal arts" as the most valuable path toward education and a career.

Noting that "we keep losing sight of the basic function of higher education, which is to equip people, to educate them, to train them with a bit of the skill and knowledge to enable them to devote their lives and energies to the so-called work of the world," Dr. Elliott said it should be impressed on students that they need the tools that college education can provide to be a ghetto lawyer or fight the problem of pollution.

"Without some skill," he added, "he won't be able to do much but scream about it."

While there are a lot of debaters, complainers and blamers today, he continued, there are not enough problem solvers.

"Too often you hear the questions—'Why don't you do something about it? Why doesn't he do something about it?'—but not 'What can I do about it?' "

---

VIOLENCE NAILS COLLEGES AGAINST WALL OF CHOICE—VI

(By Ronald J. Maselka)

CAMBRIDGE, MASS., October 7.—The American university today is much like the hero in "The Lady or the Tiger."

It faces two doors to the future: One leading to repression, one to reason.

Unlike the story's hero, however, the university's decisions is more complicated than simply picking one of those doors to open. There is more than one pair of hands on the door knob and the administration, the faculty, the students all have their fingers on the key, along with alumni, parents and the outside community.

Excessive reaction by any of them—from the extreme left to the extreme right—could be the impulse that turns the key in the wrong door.

With good reason then, there is much talk here at Harvard University and elsewhere of the need for tolerance, understanding and better communication.

It would seem to start specifically with the acknowledgement that nobody is completely right, nobody completely wrong.

As Morris B. Abram, Jr., a Harvard junior, explained: "Most problems at Harvard can be solved by dialogue."

DIALOGUE IS THE NUCLEUS

Dialogue is the heart of the university system, the meaning behind academic freedom, the right to dissent, the right to be different. It is the medium through which the univerversity traditionally has accommodated diversity.

But in recent years, dialogue has been usurped on many occasions by student violence—not peaceful dissent like sit-ins, picketing or noisy demonstrations—but violence.

And the uneasiness that hovers over Harvard and elsewhere is that there may be more.

The troubling thing one detects in conversations with students is not that everyone supports violence but that everyone does not disavow it. While the general belief is that violence has no place at a university and only a tiny majority considers it a working tool, the unsettling thing is that some students qualify their opposition to it. For these, whether student violence is good or bad de-

pends on the specific circumstances, the specific issue.

Two incidents and the students reaction at Harvard illustrate this point.

A NEGATIVE REACTION

The most recent was less than two weeks ago, when a small group of anti-war demonstrators invaded the university's center for international affairs and roughed up several staff members. Supporting the belief there is no general support of violence for violence sake, the university community's reaction was one of shock at the "unprovoked viciouness" of the hit and run attack.

As Richard C. Manny, a varsity football player from Des Plaines, Ill., said: "That got a completely negative reaction here. They didn't take responsibility for their actions at all."

Spokesmen for the less radical wing of the Students for a Democratic Society (SDS) also critized that raid, alleged to have been inspired by a more radical SDS faction.

SEVERAL DEANS EVICTED

But even this moderate SDS reaction to the raid—that it was an assault on the workers, not the bosses—begins to hint at the division of student support for some types of violence. As one SDS moderate explained: "We never attack secretaries . . . but deans are different than secretaries. The deans are very important in perpetuating the system."

The division of opinion is evidenced by the reaction to the other incident here last spring, when student radicals seized an administration building and evicted several deans from their offices.

Here again, the majority opposed a building take-over—even if it is an empty building—as a gesture that goes beyond peaceful protest.

"ONLY SAW VIOLENCE"

But then, besides the radicals who were all for it, there were those who:

—Were opposed to the building take-over only because the deans were involved.

—Didn't think it was too bad because while there may have been some manhandling of the deans there were no permanent physical injuries. "The public only saw the violence," one student said, but they (the SDS) had some just things to say."

But here the definition of violence depends on which end of the receiving line you are on. As one of the deans who was evicted noted: "Why should a person come and push on me anyway?"

Initially opposed it, but in retrospect think it may have been worthwhile. Noting that university action on dropping ROTC, discussion of low income housing and university expansion into the community followed the take-over, one student said: "I don't know if those things would have taken place if the building hadn't been seized. At least, they wouldn't have happened as quickly."

It's hard to argue with success.

PATIENCE COUNSELED

As David Blumenthal, editorial board chairman of the independent Harvard newspaper, the Crimson, said: "It's hard to argue you should wait, when violence gets action so much faster."

But the majority still counsels patience on the grounds that short-term gains will not balance harmful long-term effects like repressive laws.

Acknowledging that "violence can act as a catalyst for social change," Ralph Hornblower, Harvard's first string halfback, noted changes taking place and said: "I would be hard-pressed by any more violence on this campus. Justification for it would be darn near impossible."

Plans to respond firmly yet judiciously to violence or to provide better disciplinary procedures are at best only stopgap measures. The long range answer, of course, is to head off the violence.

A KEY RESPONSIBILITY

A harvard Board of Overseers' report defined this task as the need "to assure the great mass of the university that reasoned views with respect to change will receive prompt attention."

Since it is the students who choose the battlefield and the tactics, obviously they too hold a key responsibility.

According to Harvard College Asst. Dean A. C. Epps, however, the long-range solution is to somehow "bring the community to agree that the use of violence is wrong and unacceptable and the community must stand by this."

Noting that this can be accomplished partially by expelling the violent, more importantly, he said, is the need for "such a general view that violence is wrong that no one will attempt to use it."

---

"UNJUST" VIETNAM WAR IS FUEL FOR RADICALS—VII

(By Ronald J. Maselka)

CAMBRIDGE, MASS., October 8.—"This whole question of campus unrest is complex," one college administrator said. "It's difficult to know which pieces are more important than the others."

It is generally agreed, however, that violence is an important piece.

What causes this minority of students to resort to violence? One can't expect a single answer.

If it is granted that much of the violent student rebellion is based on convictions, political reasoning and political motivation, are there still some underlying psychological answers?

Ask a radical student why he thinks violence may have to be used and he is apt to say that it's a "result of frustration" with the system or "there wasn't anything else to do" because he felt the channels of communication were closed, clogged or nonexistent.

But even if all that is true, does that make violence right, you might ask?

He might very well then cite the Vietnam war, which he says is unjust, and "don't start telling me about the end not justifying the means."

As David Blumental, a Harvard senior who is against campus violence, explained: "The war is the one great advantage the radicals have. It's hard to explain to anyone rationally why we are there."

IMPELLED TO DO SOMETHING

Noting that he also is "not a militant," Ronald H. Janis, a Harvard senior from Amherst, stressed that "students are not causing trouble for the sake of causing trouble." Deciding that the war is unjust, he continued, students are impelled to "do something about it or else you may have to help fight it . . .

"Once you see that problem, you see these others and you say: Maybe I should do something about that one, too."

But that again raises the question why some students want to "do something" more quickly, more violently than others?

Reams have been written about America's violent beginning, its currently rising crime rate, its Western heroes and tough guys, violence on television and in the movies and the effect on people.

SLAPPING INCIDENT

Stressing that there "is no simple answer, just complex individual answers," a Cambridge psychiatrist, who asked not to be identified, said that "example has a lot to do with it."

As a basic case, he recalled his son watched two older boys slapping each other in the face at a playground and immediately walked over and slapped his sister's face.

"The decline in parental authority has much to do with this too," the psychiatrist added. Pointing to the "misplaced emphasis on permissiveness . . . the idea that we must never set limits on the child or GOD forbid he'll have a trauma," he added: "It's idle to raise a child to believe that any punishment is intolerable."

Warning that campus violence can't be explained away, however, as a gigantic collegiate temper tantrum, he said other contributing factors could be things like family splits, the boredom of affluence, the lack of stable personal relationships.

VACUUM IN RELATIONSHIPS

One administrator explained that the militant activists he knew generally "have a serious problem of self-identity . . . They're not sure why they're in college, for instance. They're not ready for college emotionally."

Some individuals, the psychiatrist agreed, might be attracted to radical groups because of this vacuum in their social relationships.

But a key factor in the spread of violence, he said, is "the element of contagion . . . One outbreak of violence tends to lead to another."

This electric appeal of violence illustrates the tightrope college administrators must walk.

DEFINES CRACKDOWN

If they appear overly tolerant, this might fuel an escalation. If they crack down too fast and too hard, they might widen sympathy for the radical offenders.

Recalling last spring's seizure of a Harvard building by the Students for a Democratic Society, Kenneth L. Carson, a sophomore from Seattle, Wash., said that before police arrived to liberate the building students outside were either for the administration or against the SDS.

"There was no alternative between these positions until the police arrived," he added, noting that then the violence of the police became a larger issue than the violence of the building seizers.

Disclaiming any expertise in the specific field of campus unrest, the psychiatrist suggested that the university's role is "not to crack down needlessly but to crack down on substantive issues."

Or as he added, it should "hang loose . . . because they're working out something in their heads."

---

PARENTS' MONEY CAN PAD PROTESTERS' SOCIAL VIEWS—VIII

(By Ronald J. Maselka)

CAMBRIDGE, MASS. October 9—The love of money has been called the root of all evil.

But indifference to money may be a large root underlying today's campus unrest. For if there is one clear facet to this complexity, it's that this is not generally a rebellion of economically struggling students.

A Harvard College junior, the son of a university president, asked to explain the reason for wealthy students' interest in current social protest replied: "Our parents made the buck. Now we're trying to figure out what to do with it."

SOME DON'T UNDERSTAND

That remark substantiates what many studies have shown: Today's young people have a different perception of the world than their parents.

The so-called "generation gap" stems from this different way of looking at things, a gap that remains because each side has a different background and difficulty appreciating the other's point of view.

For instance, many adults who did not have the opportunity to go to college find it difficult to understand why students who do don't concentrate on their studies, instead of on politics and reform.

It's like the Boston cab driver who hopes to send his daughter to college "to give her

a better start in life." This, of course, implies that a college education will lead to material success or a more secure future economically.

A NEW QUESTION

And for many of today's college students, this is still their goal. As Stanley Hoffmann, Harvard's professor of government, explained: "For many students, getting to the top—getting an education—is an important thing yet."

But those who already are "on top" economically, Prof. Hoffmann added, are saying: "Now that we have everything, what are we going to do with it? You don't ask yourself this question—what am I going to do with it—until first you have it."

The affluent student seems to be looking for a new frontier of his own, something beyond material success.

As one Harvard student explained: "Kids have a lot given to them today. But persons want to develop values and work for things themselves."

DON'T RECALL DEPRESSION

The underlying questions students raise—what is the good life, what is the role of government, the university—are what one Cambridge psychiatrist called "basically concerns of the educated leisure class."

"For these young people," he said, "the economic system has always worked. Something like the Depression is out of their ken."

Another different perception between many adults and today's students is the view of college itself. Non-college-educated individuals see college as a golden opportunity, or as the cab driver said: "A lot of these college kids don't realize how good they've got it."

But, even many students for whom college was not a birthright and foregone conclusion expected to go to college ever since they first understood the word. Instead of being where they had always hoped they'd be then, it seems that most of today's students are where they expected to be.

DRAFT A KEY FACTOR

This questioning trend seems to be fueled by this social attitude that you have to go to college, and the military draft, which forces able-bodied students to go to college, even if they are not sure of a career or "where they are going."

The draft is particularly a key factor, a Harvard English professor explained, because it adds to the frustration of a student "who can't leave college if he is bugged and dissatisfied by it."

The Vietnam war, in the opinion of Dr. Adam B. Ulam, a Harvard professor of government, has placed a burden of guilt and anxiety on young people.

In an article in the Harvard alumni magazine, he explained: "Guilt because of the natural feeling that their superior economic status or luck protected them from the dangers of Vietnam; anxiety because of the obvious consequences of the termination or interruption of their student status.

A NATIONAL HYPOCRISY

"A certain degree of anxiety is always present in the young," he continued, "but for some in the colleges, both their sheltered status and the consequences of losing it have increased this anxiety to an intolerable degree."

Another element is that students proclaim a belief in practicing the American ideals that have been preached to them. Racism and poverty are prime examples of the national hypocrisy they mention.

Or as David Blumenthal, a Harvard senior, put it, many students have parents who grew up in the 1930s and "held up liberal principles as something to live up to . . . students are now taking this seriously, and they have the time and security to question."

Adding to this total aura that encourages questioning is what Richard S. Berne, a Harvard football player from Syracuse, N.Y., described as "things are generally more liberalized . . . less rigid socially."

ELEMENT OF CONTAGION

The Cambridge psychiatrist, who has done work with Harvard students, noted that the student questioning "is in a certain sense a spiritual quest, and they can afford a spiritual quest."

Noting that he feels "many of their concerns are religious," he added: "They'd die rather than admit it . . . if you would say that to them, they'd laugh in your face."

But like violence, he said, there is "a certain element of contagion" to this trend of student questioning.

"Many are caught up in the latest student movement," he continued. "For them, not all this represents a whole life commitment . . . Many will fade into the 'establishment' later."

But there is evidence that some of this vocal student concern for community problems and community betterment is being translated into action. On-campus reports of the decline in fraternities and social clubs is matched by off-campus reports that young lawyers show a declining interest in corporation law and medical students are interested in community health clinics, for example.

INTERESTED IN ECOLOGY

The student calls for "relevance" are translated into course selections at Harvard, for instance. Statistics indicate that the number of students concentrating on English and history have declined in recent years, while those in government and social relations rose markedly.

"Noting that science for science sake is not as popular as it used to be," Harvard Physics Prof. Sheldon L. Glashow said more students are interested in political science and ecology because "they want to go into something that is directly useful to society."

While there's no rigid rule, most studies indicate that the politically active protesters are more concentrated in the social sciences and humanities, rather than the natural sciences and professional schools.

This is not to say that one will never find pre-med, pharmacy or business school majors or even a chemistry or physics student in the ranks of the protesters. But generally not.

ASSURED ADVANCEMENT

The suggested reasons for this are varied.

One is that students who pick a hard-science major or a specific professional school already have a career goal in mind, while liberal arts students mainly include "the seekers."

Another is that many students from lower-class backgrounds go into the hard sciences because this route provides an assured job and guaranteed economic advancement. Or as Harvard's David Blumenthal explained: "Science students generally know where they are going better."

Citing the wider interest of liberal arts students, a Harvard graduate student in chemistry from Rochester, N.Y., said that besides disagreeing with the tactics of protesters he and many of his colleagues are "generally too busy in our studies."

One engineering student at the Massachusetts Institute of Technology, who was visiting at Harvard, said: "Science students generally face practical questions, not philosophical ones." This view was taken by Prof. Hoffmann, who noted that liberal arts students generally tend to ask questions on "what is popularly called the values of life."

SENSE OF PROGRESS

While the scientist is concerned with research, to find means toward ends, he added, the liberal arts student is interested "rather in ultimate ends."

Noting that "in a certain sense this is a revolt against technology scientists who are plugged in, social scientists are sort of out of it," a Harvard English professor pointed out that in professional training, there is a certain noticeable learning development. "There's a sense of weekly, monthly progress you don't see in the liberal arts field, for example," he said.

And what the protesting students are saying, with all this talk of relevance, he said, is: "We want to know what is absolute truth, so we can go right out and apply it."

---

STUDENT PROTESTS SEEN AS APPEALS FOR ADULT HELP—IX

(By Ronald J. Maselka)

CAMBRIDGE, MASS., October 10.—Perhaps the most haunting question about campus unrest—the question that eludes a simple answer is—: What does it all mean?

Closely linked are questions on the merit of the student protests. Are they right. Are they wrong?

It's impossible, of course, to take specimens of campus unrest and examine them under a microscope.

Like other intangible issues, campus unrest can at best be put through each man's intellectual microscope. Thus, the opinions are divided.

The analysis of Dr. George Wald, a Nobel Prize-winning biologist at Harvard University, is that "the whole business, all the campus unrest in all the forms it takes is a disguised shout for help."

Pointing out that young people are brought into a world where they don't see much of what they want" and a world which faces them with threats, "some of them involving their continued existence," he said: "They are very upset and quite right."

HAVE MERIT, BUT NOT ERROR-FREE

While he finds merit in the student protest, Dr. Wald does not find them free of error.

Noting that students "will go on making all the mistakes in the book," he added: "But that is their privilege, because they are young. They are just beginning to learn, to acquire experience . . . This is not the world they made."

A vocal opponent of the Vietnam war and militarism, Dr. Wald, 62, successfully urged the Harvard faculty of Arts & Sciences to petition Congress to repeal the draft.

A recipient of the Nobel Prize for his research on vision, Dr. Wald said it is unreasonable for adults to meet the collegiate assault by "complaining that the students themselves are always complaining."

Stressing that students "are not offering solutions to these problems," he added: "Those are not the students' problems. Those are our problems. And it is for us to work them out."

Dr. Wald recalled that "at Harvard as recently as 10 years ago" he could stand in front of his class and say, in effect:

FIND PARENTS BAFFLED

You are a highly select group. Do your work well and you will end up with a good job, two cars in the garage, a large bank account. You'll be able to afford a good private school for the kids, to write big checks to the right charities. You'll have a high status in the community.

"If I did that now," Dr. Wald said, "they'd laugh me out of the room. And the reason is that this is not what they want. These are the things their parents got and they have not made their parents happy."

A benign, white-haired bespectacled man, Dr. Wald added in a soft-spoken voice: "The hardest thing for these young people to bear is not that they don't know what to do but that we, their parents, don't know what to do . . . They find their parents baffled about the most important things in life."

NO LONGER WORKING

The students' confusion, he said, is compounded by "the rapidly widening gap between what children are taught about America, its traditions, what it means, and the reality of what America has come to mean to all the world and the rapid deterioration of its traditions.

"The pat phrases these kids learned in school are becoming increasingly empty and not only if one is black."

But why the attack on the university structure.

Stressing that a university "fundamentally is a student body and a faculty . . . everything else is fundamentally, as the Bible says, commentary," Dr. Wald added.

"The United States is the only nation in the world where colleges and universities are run by boards of trustees, who don't even include a member of the faculty, who are 'men of affairs.' Now this is a uniquely American institution and I think it has run its course and isn't working any longer."

Emphasizing the "increasing need for open communications," he said: "Faculty and students communicate all the time. But the universities are being run by other people, who generally are badly out of communication with both students and faculty.

NEW BREED OF POLITICIANS

"I think that may be the major thing wrong with American universities today."

Exemplary of the trend for academies to get involved in non-campus issues," Dr. Wald turned to American politics.

He said he has detected a new breed of "capable" politicians developing, "bright young politicians . . . fine, intelligent men, firstrate people . . . They are actors with brains, writing their own parts."

Specifically, he cited Rep. Richard D. McCarthy (D., Buffalo), who has led a drive against chemical-biological warfare, and Sen. Charles E. Goodell (R., N.Y.), who has challenged the Nixon administration's Vietnam policies.

WE MUST FIX IT

For instance, he said: "Sen. Goodell seems to be standing for the right things. This is especially significant at this time in a Republican, who has to break with his own leadership and, to a degree with his own party."

Indicating that "my hopes are in those bright young politicians," Dr. Wald acknowledged that students generally do not share this view.

"Kids have trouble getting beyond their local situation," he explained. Since they don't have the vote, he continued, "they try to get their local situation going in the direction they want to go."

Returning to his original theme, he concluded: "These are not problems for students. These are problems for adults. We have the vote. If things are going badly, as they are, all students can do is tell us that. They can fix it . . . we have to fix it."

---

SDS WORRIED BY SPLIT ON REVOLUTIONARY GOALS—X

(By Ronald J. Maselka)

CAMBRIDGE, MASS., October 11.—"These are people looking for revolution for reasons which I can't understand."

That was one Harvard senior's appraisal of the Students for a Democratic Society (SDS).

Those reasons are getting harder to understand these days because there are two main factions claiming the name SDS.

The split that was revealed publicly at last summer's SDS convention in Chicago is particularly noticeable in the Boston area, the headquarters of one faction, the Workers Student Alliance (WSA). The other group claiming the SDS label is the Revolutionary Youth Movement (RYM) No. 1.

SPLIT SHOWS CLEARLY

Both factions, each with its own internal differences of opinion and sub-groupings, express discontent with American society and believe in a need for revolution. The tactics, philosophy and the question of who should be in the vanguard of that revolution and who should be attacked are among the points that led to the split.

The radical SDS solution to problems, like taking over a building, has focused attention on it as a key element in campus unrest. But to hope that the current split will bring internal implosions that will curtail its campus effectiveness is, at this point, simply a hope.

But for some Boston area SDS members, it is also a fear.

Last month's hit and run raid by about 20 anti-war protestors on Harvard's Center for International Affairs brought a reaction from the WSA wing indicating that the split here is a serious thing.

DANGER OF DISCREDIT

Laurent C. Delli-Bovi, a Radcliffe junior from Richfield, Conn., and a WSA member, said the raid "poses a great danger of discrediting us with students and workers." She says WSA HOPES "to counter this by concretely supporting workers' struggles on and off campus."

One man, identified as a Boston area leader of the RYM faction was arrested in connection with the raid.

Later, spokesmen for the WSA faction blamed the raid on the "RYM extremists" and said that WSA was SDS and that RYM had no right to the SDS label.

James Kilbreth, editor of WSA's newspaper, New Left Notes, said the WSA seeks to develop an alliance of students and workers "to fight for better conditions in the schools" through unionization, for example.

"RYM has a great deal of contempt for the working people," he added.

CRUCIAL ISSUES AHEAD

While SDS is "supposed to be an open, democratic, non-exclusionary organization," he continued, RYM people believe "you should agree with us or else."

Mr. Kilbreth said the crucial issues ahead for SDS at Harvard include attacking university expansion into the surrounding community and university links with the Defense Department.

Another distinction between the WSA and the RYM elements, he said, is that WSA would direct any violence against "the bosses" on and off campus. But Mark Rudd, the national leader of the RYM group, has reportedly expressed the belief that the revolutionary movement can be served best "in whatever manner is necessary," even by closing down the universities and schools.

"POLITICALIZES" STUDENTS

The extremist tactics of RYM have found little sympathy at Harvard, various sources indicate.

But the wider student appeal of SDS generally has not been in response to its rhetoric of "exploitation of the workers" or "bossism and capitalism."

SDS strength lies in its ability to politicalize" a larger segment of students, either on the force of a specific issue or because of a university's response, like calling in outside police.

The strength lies also in the fact that SDS picks the issues it will seek a confrontation on. At Harvard last year, for instance, it picked ROTC, which was unpopular with a wide range of students.

FUTURE OF SDS?

Probably one of the weaknesses cited most often in the American university structure is that it tends to react to an issue that SDS raises.

The months ahead will bring a test for both the SDS and the university community.

To survive as a potent force, SDS will need to find potent issues and achieve some measurable success.

But if administrators, faculty and students can achieve the communication needed to head off those issues, by doing something about them or by convincing the majority that something is being done, then it would appear that the future of SDS would be doubtful, regardless of its solidarity or splintering.

## HUNGER AND POOR PERFORMANCE LINKED

### HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. MIKVA. Mr. Speaker, many of us have long maintained that the existence of hunger in the richest and most prosperous nation the world has ever known casts a shadow over all that America claims to stand for. Recently, however, evidence has come into my hands that hunger in the midst of plenty is not only immoral, it also contributes directly to other problems which exist in our inner-city "ghetto" areas. Problems like low educational standards, school drop-outs, and low levels of scholastic discipline.

The Woodlawn Mental Health Center, operated by the city of Chicago Board of Health, recently completed a survey of 2,300 mothers with children attending public schools. The interviews gathered information on all aspects of family life, much of which will be useful in further sociological and sociomedical evaluations of the effects of ghetto life. The study showed a definite relationship between inadequate meals at home—especially the morning meal—and the child's ability in school. Dr. Sheppard G. Kellam, codirector of the Woodlawn center, and a distinguished associate professor of psychiatry at the University of Chicago, summarized the results of the survey:

> The results of these systematic studies show that hunger is important in influencing how well the child socializes in the first grade classroom. By hunger we mean not having food. We are not referring to malnutrition necessarily, but to missing meals.
>
> Children miss meals for a variety of reasons, but if they do, they are likely to have difficulty in school. A program aimed at providing meals would therefore be extremely important in bettering the adaptation of children to school.

I am currently working on a bill which would substantially increase present Federal programs to provide meals to children in schools. I am waiting anxiously to see the exact nature of President Nixon's recently announced efforts in this respect. Dr. Kellam's letters, which I insert at this point in the RECORD, make clear that decisive action to meet the

problem of hungry school children is imperative.

The letters referred to follow:

WOODLAWN MENTAL HEALTH CENTER,
*Chicago, Ill., November 4, 1969.*

Congressman ABNER MIKVA,
*Federal Office Building,*
*Chicago, Ill.*

DEAR CONGRESMAN MIKVA: We are writing this letter to report to you the results of hunger, which is a basic condition among others blocking children in poor communities such as Woodlawn from succeeding in school.

As you know, for the last six years we at the Woodlawn Mental Health Center have been carrying out extensive studies and prevention and early treatment programs for all the 2000 first graders entering Woodlawn schools each year, and have periodically assessed them three times in first grade and have followed 6000 of them as far as the end of third grade. We have considerable information on the families of first graders obtained by two community-wide extensive interviews with about 2300 mothers.

The results of these systematic studies show that hunger is important in influencing how well the child socializes in the first grade class-room. By hunger we mean not having food. We are not referring to malnutrition necessarily, but rather to missing meals.

Children miss meals for a variety of reasons, but if they do they are likely to have difficulty in school. A program aimed at providing meals would therefore be extremely important in bettering the adaptation of children to school.

However, such a program must consider a variety of other factors which are also related to doing poorly in school. In our studies, such basic issues as the mother's sense of potency to influence her children's future; her own mental health; whether she lives with other adults who can share the child-rearing role with her; whether she has $5,000 income (a figure which very sharply distinguishes between families of children who are adapting to school and those who are not); her child-rearing practices, particularly in regard to limit-setting and permission-giving—all characterize basic factors related to successful child-rearing and successful careers in school.

Our considered opinion is that a program aimed at the hunger of children would be a fundamental contribution in poor communities such as Woodlawn. This program, if it is to be successful, must include a role for the mothers at the policy-making level so that the program is basically planned and operated by the local neighborhood community which it serves. This would reinforce the mother's sense of her own importance and self-esteem. The program should be seen as an opportunity for employing mothers and fathers and thus would be a way of improving income. Incidentally, along this line, Mr. Julian Levi has recently described a private catering service as a possibility for implementing such a program. Such a private catering service would work under contract with the local community which in turn would receive its financing through an appropriate mechanism such as the one we are hoping you can successfully develop.

One closing thought which I am sure you share is that a program to alleviate hunger is one of several basic programs which can be a base for improving conditions of family life. We have considerable data on family life and its relation to success in school and to mental health which suggests that programs, such as after school programs, may have similar economical and social benefits. All of these programs in our view must be community-owned at the neighborhood level and must combine a variety of aspects which not only alleviate the central bad condition such as hunger, but also take into account other related problems.

Sincerely,

SHEPPARD G. KELLAM, M.D.,
*Codirector, Woodlawn Mental Health Center; Associate Professor of Psychiatry, the University of Chicago*

---

WOODLAWN MENTAL HEALTH CENTER,
*Chicago, Ill., November 20, 1969.*

Congressman ABNER MIKVA,
*Federal Office Building,*
*Chicago, Ill.*

DEAR CONGRESSMAN MIKVA: The information regarding family life which we reported in our recent letter was obtained in two home interviews. Each interview lasted about an hour and a half and took place in the living rooms of the mothers or mother surrogates of half of the first-grade children in the spring of 1965, and all of the first-grade children in the spring of 1967. A total of about 2300 mothers were interviewed.

The relationships that exist between the family life of the child and the child's adaptation to school according to ratings made by the teacher have been examined in detail and the results of these systematic studies were the basis for the conclusions which we presented.

About four percent of the mothers in 1965 reported that their children had nothing to eat for breakfast or only had liquids; in 1967 this figure was about five percent. These children were not succeeding in a basic task, namely, being able to socialize with the other children in first grade. From other studies we know that if children do not succeed in their social adaptational tasks in first grade, they run a grave risk of not succeeding from then on.

Sincerely,

SHEPPARD G. KELLAM, M.D.,
*Codirector, Woodlawn Mental Health Center; Associate Professor of Psychiatry, the University of Chicago*

---

# SENATE—*Saturday, December 6, 1969*

*(Legislative day of Friday, December 5, 1969)*

The Senate met at 9 o'clock a.m., on the expiration of the recess, and was called to order by the Acting President pro tempore (Mr. METCALF).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Eternal Father, deliver us now from the drive of daily duties, from the tumult of the world about us, and the attention of many competing concerns that our hearts may know Thy refining and renewing power. Keep us from coldness of heart and indolence of spirit, that we may worship while we work in the beauty of holiness and in the holiness of beauty. Equip us now for new tasks, brace us for fresh undertakings, and give us strength for the adventure of this day with Thy love and grace and truth filling our souls and finding expression in our actions.

In the name of Him who lived for others. Amen.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Journal of the proceedings of Friday, December 5, 1969, be approved.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that sometime during the afternoon there be a period for the transaction of routine morning business.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Florida (Mr. HOLLAND) is recognized.

Mr. BYRD of Virginia. Mr. President, will the Senator yield, briefly?

Mr. HOLLAND. I am happy to yield.

## SENATE POLICY ON CONSIDERATION OF MEASURES

Mr. BYRD of Virginia. Mr. President, may I seek the attention of the majority leader, to ask a question?

Mr. MANSFIELD. Yes, indeed.

Mr. BYRD of Virginia. I note that last night, after the final vote on an amendment to the tax legislation was taken, a bill was called up and unanimous consent was obtained for its consideration. It increased the number of supergrades in the Government, as I understand it, by 150.

My question to the majority leader is this: What will be our policy in the future? I was on the floor for 8 or 9 hours almost constantly yesterday. I could have stayed another half hour, or another 2 hours, for that matter, but I had no idea that the tax reform bill—on which there would be no more votes last evening—would be set aside and a measure taken up separate from the tax reform bill.

I am wondering what our policy will be in the future. I can stay as long as anybody else stays, but I would like to know what we might expect in the way of setting aside this bill and taking up other proposed legislation.

Mr. MANSFIELD. The Senator raises a legitimate question. This bill was being held up at the request of a Member on the other side of the aisle. An agreement was arrived at between that Member and the chairman of the committee; and, on the basis of the fact that there were no objections lodged with the leadership by any Senator with respect to that bill, the joint leadership agreed to bring it up. We stated late yesterday evening that there would be no other votes, that the Metcalf amendment would be the pending business, that my distinguished colleague, the Senator from Montana, intended to make a few remarks, but that the vote would come on that amendment today. If we had known of the Senator's interest on objection, we certainly would not have brought the bill up by unanimous consent. Had the debate on that particular proposal last night lasted much longer, I was prepared to lay it aside, because I felt that the Senator from Montana (Mr. METCALF) has been more than patient for the past 3 days, allowing others with amendments to come in ahead of his amendment, when he was prepared to proceed during that period.

Mr. BYRD of Virginia. Mr. President, may I say to the distinguished majority leader that I do not necessarily have objection to the proposal. I could not have objected, even if I had an objection, because I did not know that the proposal would be called up. I quote from yesterday's RECORD:

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be laid aside temporarily, and that the Senate resume the consideration of Calendar No. 556, S. 2325.

Mr. MANSFIELD. That is correct.

May I say that it is my intention, when we are through with the consideration of the pending bill for this afternoon, again to lay aside the pending amendment, whatever it would be—and it would be late in the afternoon—to take up the military construction appropriation bill and the District of Columbia appropriation bill.

Mr. BYRD of Virginia. I would certainly have no objection to any of that, provided I know what the policy is. If the policy is to take up proposed legislation late in the evening, after the final vote for the day has been taken, that is perfectly all right. But I would like to know in advance whether or not that is going to be our policy.

Mr. MANSFIELD. We have done that during all the years I have been in a position of leadership, and even before, under previous leaders. It is always done with the concurrence of the Republican leader; and if there is any opposition by any Senator for any cause, that opposition is brought to the leadership's attention, and that bill is not brought up. It will be held for a reasonable length of time, but not indefinitely.

So I must apologize to the Senator. I assure him that we were not trying to "pull" anything. We were acting in good faith, and we thought it had been cleared all around.

Mr. BYRD of Virginia. I am well aware that the distinguished Senator always acts in good faith, and I was not implying anything of that nature.

Mr. SCOTT. Mr. President, will the Senator from Florida yield to me?

Mr. HOLLAND. I yield.

Mr. SCOTT. Mr. President, this matter has been under some considerable current discussion. The distinguished senior Senator from Delaware has from time to time served notice that he will call up, for example, amendments at any time, or other matter, if he thinks it advisable to do so. I am sure he is not the only Senator who feels that way. Because of the fact that at the end of the sessions these things happen, the assistant Republican leader and I felt some concern about it, on our own behalf, and I had therefore directed a letter to the distinguished majority leader, of which he is aware, which I would like to read into the RECORD at at this time, in the hope that we may arrive at some means of clarifying this matter. The letter reads:

It has come to our attention that on occasion pending business in the Senate is being temporarily laid aside to consider other bills or amendments without any notification to the leadership. This practice we feel creates problems for the leadership in carrying out their responsibilities to other Senators who may have an interest in the bill or amendment called up for action.

Accordingly, we would like to request that you consider—

Addressing the majority leader on it—and we have had no discussion on this—

adopting a procedure which would preclude the laying aside of pending business without prior notification to the leadership, Democratic as well as Republican.

We believe this procedure would save some possible embarrassment to the leadership as a result of amendments or bills passing without anyone being aware of the action to be taken except those Senators on the floor at that time—

Which, I may add, was not the case yesterday—

One or both of us will be readily available at all times to be consulted regarding any action that you or the manager of the pending business desires to take.

Your kind attention to this matter will be appreciated.

So while this does not involve notice to every Senator, it contemplates the hope that we may at all times be sure of notice to the leadership, to at least enable us to notify the managers of the bills or the ranking minority Members or the Senator particularly concerned with the bill, where we have such notice of his interest.

Mr. MANSFIELD. May I say that I concur fully with the sentiments expressed in that letter.

Mr. BYRD of Virginia. I realize the difficulties faced by the leadership in handling a vast amount of legislation, and certainly I do not want to hinder that in any way.

I must say that I was taken by surprise by the matter that came before the Senate last evening.

Mr. MANSFIELD. The Senator has made a very valid point. All I can say in extenuation is that I believe I announced there would be no more record votes last night, and it was on the assumption I did not think anything controversial was coming up or anything that would raise a question; otherwise I would not even have brought up that legislation.

Mr. BYRD of Virginia. I thank the Senator.

## ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order the Senator from Florida is recognized for 10 minutes.

## STRIKE AGAINST FLORIDA POWER & LIGHT CO. COULD HAVE BEEN AVOIDED

Mr. HOLLAND. Mr. President, the International Brotherhood of Electrical Workers has been on strike against the Florida Power & Light Co., the largest public utility in Florida, for more than 5 weeks. This inexcusable strike threatens to seriously affect the welfare of our people and the orderly development of our State.

In an effort to be of some assistance in the matter, my colleague, the junior Senator from Florida (Mr. GURNEY), and I wrote a letter under date of November 26 to 11 local union presidents of the International Brotherhood of Electrical Workers and to the president and vice president of the international brotherhood, as well as the business manager of System Council U–4 of the international brotherhood.

For the information of the Senate, I ask unanimous consent to have this letter printed in the RECORD at this point in my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. SENATE,
*Washington, D.C., November 26, 1969.*

DEAR ———: The present work stoppage on Florida Power & Light Company property can seriously affect the welfare and orderly development of our State. Picketing of construction sites rapidly unwinds the tempo of construction in all fields—residential, commercial and industrial—and payrolls disappear. Meanwhile our busy Winter Season is almost upon us.

There is no apparent reason why this work stoppage should be continued or tolerated. In 1947 the Florida State Legislature, acting on the suggestion of a Labor-Management Committee, which included the state head of AFL–CIO, passed a law requiring binding arbitration in disputes between utility companies and their employees.

Later, the Supreme Court ruled that this type of legislation was in conflict with the Taft-Hartley act, as it denied the right to strike. The law, however, remains on the statute books of Florida, and it is our belief that the people are of the same mind on the matter.

In the present dispute between the IBEW and Florida Power & Light, the only problem is economic—that is, money. Both parties should immediately submit to binding arbitration, for it is imperative that the men go back to work as soon as possible and the dispute be settled without delay. Not only would this observe the spirit of the Florida arbitration law, it would be consistent with

the objects expressed in the IBEW Constitution which calls for arbitration in settling disputes.

We call upon you as a leader of the IBEW to do your duty to the biggest majority involved, the electric customers in Florida and submit your case to binding arbitration.

If the shoe were on the other foot and you had offered arbitration while the company declined, we would feel just as strongly in calling upon the company to do as we are now calling upon you to do.

We know that you, as good citizens concerned with the economy, welfare and betterment of living conditions in Florida, will be responsive to our request.

Sincerely,

SPESSARD L. HOLLAND,
EDWARD J. GURNEY,
*U.S. Senators.*

Mr. HOLLAND. Mr. President, under date of November 29, I received a reply from the president of Local Union No. 622, IBEW, Mr. E. M. Brown, Jr., Lake City, Fla., and I ask unanimous consent to have this letter, which, incidentally, is the only reply I have received to date from the 14 letters sent out on November 28, printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

LOCAL UNION NO. 622 IBEW,
*Lake City, Fla., November 29, 1969.*

HON. SPESSARD L. HOLLAND,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR HOLLAND: Your letter was received this morning, and I wish to assure you that this Local Union No. 622 IBEW is doing everything we possibly can within the Constitution of IBEW, By-Laws of the System Council U4 IBEW, laws of the State of Florida, and the laws of the United States to get the people on the Florida Power & Light Property back to work.

We are not in accord with this strike. We voted not to strike, but were forced to do so when the majority in the State voted strike.

We are now in the process of calling a meeting of the System Council U4 for the purpose of going back to work, accepting the last contract package offered, and negotiating or arbitrating any difference between the Company and the Union.

In accordance to your letter I will feel free to call upon your assistance.

Sincerely yours,

E. M. BROWN, Jr.
*President.*

Mr. HOLLAND. Mr. President, I think it is interesting to note that Mr. Brown states:

We are not in accord with this strike. We voted not to strike, but were forced to do so when the majority in the State voted strike.

Mr. President, an editorial appeared in Today, a daily newspaper published in Brevard County, Fla., under date of November 28, entitled "Arbitration, Quickly." It is very short but very much to the point, and I believe it appropriate to read for the benefit of the Senate, as follows:

ARBITRATION, QUICKLY

When negotiators representing Florida Power & Light Co. and striking members of the International Union of Electrical Workers meet for a fourth time Friday, the strike will be more than five weeks old.

That's five weeks in which supervisory personnel have been doing some of the jobs of striking linemen. A serious disruption of power could come at any time.

For the good of all—the union, the company and, most important, the public—we hope this fourth meeting will be more productive.

Coming a day after Thanksgiving, when some of the strikers no doubt went without turkey, there may be more pressure on the union to submit to binding arbitration, which the union has been refusing to do from the start.

If that were the only reason to arbitrate, of course, we could understand their continued refusal. But so far we have seen no compelling reason for not submitting and a most compelling reason for.

Our primary concern is for the public. Half the state is under the potential threat of a major emergency as long as the strike continues. The work stoppage is fraught with public danger.

Beyond that, the incomes of thousands of persons have been cut off or materially reduced. Much contracting work is at a standstill. The state's economy is affected.

Unions have an unarguable right to strike, but when the welfare, health and safety of the public is at stake, the dispute must be settled in the shortest time possible.

Such a strike is surely bringing nearer the day when Congress will have to require that utility companies and labor unions submit to binding arbitration.

Where 3,100 union men can threaten the welfare of millions, refusing to recognize their responsibility to the public, corrective legislation must be considered.

Mr. President, I bring this matter to the attention of the Senate not only because this strike is most hurtful to the people of Florida but because it could have been avoided had the Committee on Labor and Public Welfare taken favorable action on legislation I have sponsored or cosponsored since the 82d Congress when Senator Wiley, of Wisconsin, Senator Hendrickson, of New Jersey, Senator Robertson, of Virginia, and I introduced S. 1535 on May 23, 1951, to amend the National Labor Relations Act to provide that nothing therein shall invalidate the provisions of State laws which seek to prevent strikes in public utilities.

The introduction of this legislation was prompted by the dangerous and unexpected situation created by the Supreme Court, in its divided decision February 26, 1951, in the so-called Wisconsin case, in its strained interpretation of the legislative intent of the Taft-Hartley Act.

Unfortunately, Mr. President, S. 1535 of the 82d Congress never saw the light of day and died in the Senate Labor and Public Welfare Committee without being accorded a hearing.

In the 83d Congress I did not introduce this legislation as there was pending in the Congress a general bill for the revision of the Taft-Hartley Act, S. 2650. One of the provisions of that bill was broad enough to cover the same objective. This bill was recommitted by a vote 50 to 42. I was one of those voting to recommit, for, while I found much to approve in S. 2650, particularly the section dealing with strikes in public utilities, I voted with the majority because of the unfavorable parliamentary situation which required the consideration of FEPC legislation under a gag rule.

In the 84th Congress I again introduced this legislation which was cosponsored by Senator Robertson. I introduced the measure again in the 85th, 86th, 87th, 88th, 89th, 90th Congresses, and again in this Congress I introduced S. 142 on January 15, 1969. Unfortunately, I have never been able to secure any action on this measure by the Senate Labor and Public Welfare Committee.

This has been most frustrating, particularly when the Florida State Legislature in 1947, acting on the suggestion of a labor-management committee which included the State head of the AFL–CIO, passed a law requiring binding arbitration in disputes between utility companies and their employees. Mr. President, the law, although invalidated by the action of the Supreme Court in its divided opinion in the Wisconsin case—*Amalgamated Association of Street Electric Railway and Motor Coach Employees of America, Decision 998, et al.* v. *Wisconsin Employment Relations Board* (340 U.S.C. 383, 71 S. Ct. 359, 95 L. Ed. 354) dated February 26, 1951, still remains on the Florida statute books.

Mr. President, I bring this matter before the Senate as it supports, I believe, the need for the Senate committee to take action in this area. And I might say in closing that the interpretation of the principal authors of the Taft-Hartley Act as expressed to me personally was that the majority of the Court came forth with a highly strained interpretation of the intent of Congress in the passage of the act of 1947. Senator Taft, in talking with me, made no secret of his complete disagreement with the majority opinion and expressed himself strongly to me on several occasions. Congressman Hartley's interpretation of the bill as shown beginning on page 6383 of the CONGRESSIONAL RECORD of June 4, 1947, is completely different from that of the majority of the Supreme Court in its interpretation of the act.

Mr. President, the inaction of the Labor and Public Welfare Committee to correct an interpretation of the Supreme Court which is contrary to the views of the authors of the legislation is of great concern to me, particularly since legislation has been pending before the committee since 1951, some 18-plus years. It would appear that during this space of years corrective action could have been taken to make the law of the land what Congress intended at the time of passage of the act. I am hopeful that the committee will do so, but I must confess I am doubtful that my voice will be heard now, for it has not been heard in the past.

Mr. President, it is a deplorable pity that Congress is forced by the inaction of its Labor Committees to stand speechless and helpless in performing the necessary task of protecting the public against stoppages in local utility services such as those providing electric power, water, gas, and local transportation. I hope that at long last this committee will wake up and grant us a hearing so that Congress may correct this deplorable situation.

---

## TAX REFORM ACT OF 1969

The PRESIDING OFFICER (Mr. ALLEN in the chair). At this time, in ac-

cordance with the previous order, the Chair lays before the Senate the unfinished business which the clerk will please report.

The ASSISTANT LEGISLATIVE CLERK. H.R. 13270, the Tax Reform Act of 1969.

The Senate continued with the consideration of the bill.

The PRESIDING OFFICER. The question is on agreeing to the amendment (No. 315), offered by the Senator from Montana (Mr. METCALF).

The Senator from Montana (Mr. METCALF) is recognized.

Mr. MANSFIELD. Mr. President, will my colleague yield to me without losing his right to the floor?

Mr. METCALF. Mr. President, I yield to my distinguished colleague without losing my right to the floor.

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. METCALF. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

---

## DEFENSE DEPARTMENT RESEARCH PROJECTS AND STUDIES

Mr. MANSFIELD. Mr. President, on November 19, the military procurement authorization for fiscal year 1970 was signed into law. Part of that law, section 203, stipulates that none of the funds authorized may be used to carry out any research project or study unless such project or study has a direct and apparent relationship to a specific military function or operation. On November 20, I wrote the Secretary of Defense expressing my concern with the interpretation that the Office of Research and Development at Defense intended to give to section 203.

On December 2, I received a most positive and encouraging reply from Deputy Secretary of Defense David Packard. His letter expressed no disagreement with the interpretation of congressional intent that was expressed in the Senate with respect to section 203. I wish to commend Secretary Packard and the Department of Defense for such a constructive attitude in this area of significant importance.

I ask unanimous consent that my letter to the Secretary of Defense of November 20, 1969, and the answer of Mr. David Packard of December 2, 1969, which answer includes a copy of his memorandum to all Department heads in Defense Department be printed in the RECORD at the conclusion of these remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MANSFIELD. Mr. President, it will be noted from that memorandum that the Office of the Secretary of Defense passed the word throughout the Defense Department that any project which does not comply with section 203 must be terminated in an orderly way as soon as possible. In addition, the Department is reviewing all current studies and projects as well as the selection criteria used to evaluate proposed work to assure that the criterion will be applied explicitly in every case. Furthermore, in addition to the internal review now begun, the National Academy of Sciences has been asked by the Defense Department to carry out a complete examination of all projects and studies in the gray area—those projects and studies that do not have a readily apparent military application—and to adjudge independently which do not meet the criteria of section 203.

The gray area in my judgment would certainly be larger than those projects presently sponsored under the heading of basic research. In other words, some applied research certainly would fall within the possible challenge of section 203.

Dr. Packard's response is positive and constructive, and is to be commended. I am well aware of the magnitude of the change required by section 203, but I am encouraged by his attitude that its implementation can go forward in an orderly, thoughtful way. With such a positive attitude, precipitate, last-minute action that might seriously disrupt research projects can be averted. Our joint emphasis will be the orderly transfer to other agencies of projects that do not meet the criteria of section 203.

Several points bear repeating. Section 203 is not intended to cause needless disruption of high quality research; nor is Secretary Packard's attitude indicative of an intended overresponse.

Section 203 has the positive aim of reducing the dependence of basic, scientific research upon military appropriations. Let us be specific on this point. It affects military support of those scientists who pursue the uncovering of new knowledge in whatever direction and way they find most interesting. This is the basic research of which Dr. Vannevar Bush wrote so eloquently in his report to President Truman about scientific research after World War II. Section 203 contemplates that scientists whose interests and way of work focus upon solving problems may continue to receive military funds provided their research has a direct and visible relationship to military needs.

Section 203 does not ban the Defense Department from sponsoring research in universities, or in not-for-profit research institutions. The Defense Department retains ample authority to fund research by university scientists who wish to apply their talents to solving problems of national defense.

Section 203 is not intended to disrupt the work of any scientist simply because his work now funded by defense appropriations does not meet the new criteria. The cooperative attitude apparent in Secretary Packard's letter encourages me to expect that the Defense Department, the civil departments and agencies, the Bureau of the Budget and Congress can arrange for the orderly transfer of quality research projects that should be continued by other agencies, and for appropriate funding arrangements.

Section 203 makes it abundantly clear to students, to scientists, to officers of universities and not-for-profit institutions and to industrial contractors that money received from defense appropriations for research is needed to carry out a specific military need or function and is directly related to the defense needs of this country. No need is of higher importance. The work that will be sponsored by the Defense Department will be able to stand on its own feet and meet the true and open test of a valid need of the Department. The National Science Foundation and other civil agencies will be charged with the responsibility for continuing the investigations that expand our existing base of knowledge in the various scientific disciplines.

As I said on November 6, the performing of research to meet the needs of defense is honorable work. Scientists and universities who receive defense funds for a valid defense need should be proud, never ashamed. It is only when the sponsorship of a project is questionable or the subject matter of the mission is questionable does an element of doubt enter the relationship.

Section 203 reminds all of us that scientists who are interested in problem-solving are just as much a part of the scientific community as are those who pursue knowledge for its own sake. Both outlooks are necessary not only for defense, but also for resolving the many urgent civil problems of our Nation.

In carrying out section 203, we can now expect the Defense Department to identify its needs for research to further defense science and technology, and to publish these needs so that well-qualified, problem-oriented scientists can match their interests and abilities with the defense needs. Some of the requisite research in the future will be suitable for universities and nonprofit institutions. And I would expect it to be carried on in a close, collaborative relation with the Department's research administrator and its own laboratories.

Naturally, I expect that the total of defense-funded research will decrease as section 203 takes effect. I would point out, however, that section 203 is not intended to stimulate a transfer of funds to in-house defense laboratories. The thrust of section 203 is to confine the type of research sponsored by the Department of Defense—not simply to change the identity of the Defense contractors. The latter would be senseless subterfuge.

To expedite the working out of arrangements for orderly transfer of research concerned to other agencies, I have written to the Director of the Budget Bureau and to the Comptroller General. Today I have written to the President of the National Academy of Sciences and to the heads of the National Science Foundation, the Department of Health, Education, and Welfare and other civil agencies to urge their cooperation with the Defense Department and with the Congress in working out final arrangements for the orderly transfer of projects and funds.

The working out of section 203 will be difficult. Nevertheless, whatever the temporary difficulties may be in the long term both the Defense Department and the Nation will benefit from the assertion of the principle in section 203.

And, in conclusion, I would again congratulate the Defense Department for its positive and cooperative response to section 203. I am confident that together the Congress and the Department of Defense will be able to implement the prescription of section 203 and accomplish what is truly in the best interests of the Department and contribute significantly to a healthier attitude in our society toward those who perform research and those who sponsor it.

EXHIBIT 1

NOVEMBER 20, 1969.

Hon. MELVIN R. LAIRD,
*Secretary of Defense, Department of Defense, Washington, D.C.*

DEAR SECRETARY LAIRD: The consideration of the military procurement authorization bill—entailing many weeks of consideration by the entire Senate and the House—reflected a growing interest on the part of Congress in the specifics of the recommendations contained in military expenditure bills. One provision of this year's bill—which is now law—is Section 203 which, as you know, was added by the Senate and retained by the House. The intention of this section is rather clear. The language really needs no explanation since it specifies a restrictive policy with respect to the sponsorship of research by Defense. It was added by the Senate with the specific intent to reduce the sponsorship by the Department of Defense of non-mission oriented research—research that did not have a direct *and* apparent relationship to a specific mission of the Department of Defense.

Over the past two decades, the Department of Defense has sponsored far-reaching and significant research throughout the full spectrum of science. The contributions that have been made to the health and vitality of the Nation's scientific structure by the Defense Department is not disputed. However, the language of Section 203 expresses a clear policy of Congress to reduce this dependency by the scientific community on the Department of Defense. The National Science Foundation was established in 1950 to contribute the Government's share to maintain a proper level of scientific inquiry—investigations for the pursuit of knowledge per *se*.

I was greatly dismayed upon being informed of Dr. John Foster's attitude with respect to Section 203. In answering a letter from Senator Fulbright concerning the Defense Department sponsorship of a study of birds, he expressed the belief that Section 203 would have no effect on that study or on the operations of his office and the research that was being sponsored. The Congress of the United States does not attempt to enact futile gestures; it should be most resentful when an Executive agency decides to ignore its clear expression of intent.

I am writing today to Mr. Staats, the Comptroller General, and requesting him to establish appropriate guidelines and machinery to determine the effectiveness of Section 203 and to return a preliminary finding prior to the consideration of the appropriations bill this year.

I think an appropriate test of these guidelines would be to determine what impact they would have had on last year's expenditures if it had been enacted last year.

With warm regards, I am

Sincerely yours,

MIKE MANSFIELD.

THE SECRETARY OF DEFENSE,
*Washington, D.C., December 2, 1969.*

Hon. MIKE MANSFIELD,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR MANSFIELD: I thank you for your letter of November 20 inquiring about the Department's views regarding Section 203 of the Military Procurement Authorization Act. We appreciate your concerns and would like to explain our position.

There is absolutely no question that the Department will comply fully with the law. I have directed all components to review critically all current and proposed research and development projects and studies to ensure that they have a direct, apparent, and clearly documented relationship to one or more specifically identified military functions or operations. Any project or study which does not fulfill the criterion of Section 203 will be terminated. For your information, a copy of my memorandum on this matter is enclosed.

In addition to this comprehensive review within the Department, we have contacted the National Academy of Sciences and invited them to consider carrying out a complete examination of all projects and studies which might be regarded as marginal under the provisions of Section 203.

With respect to Dr. Foster's recent letter to Senator Fulbright concerning the impact of Section 203, I have discussed the issue in detail with Dr. Foster. He shares without reservation my firm intent to comply completely with the law.

I intend to follow this issue closely and personally in the future, and to cooperate fully with Comptroller General Staats in his review of this matter. Please be assured that in our FY 1971 budget requests and program plans, we will reflect detailed consideration of the intent of Section 203 in relation to Defense needs for research and development.

Sincerely,

DAVID PACKARD,
*Deputy.*

---

THE SECRETARY OF DEFENSE,
*Washington, D.C., December 2, 1969.*

Memorandum for the Secretary of the Army, Secretary of the Navy, Secretary of the Air Force, Director of Defense Research and Engineering, Assistant Secretaries of Defense, Directors of Defense Agencies

Subject: Section 203 of Military Procurement Authorization Act.

Section 203 of the Military Procurement Authorization Act, P.L. 91-121, approved November 19, 1969, provides as follows:

"Sec. 203. None of the funds authorized to be appropriated by this Act may be used to carry out any research project or study unless such project or study has a direct and apparent relationship to a specific military function or operation."

This provision is, in effect, reiterative of the legal principles and longstanding RDT&E policies which have governed and will continue to govern the use of Defense appropriations for RDT&E activities. However, insufficient attention has been given to making clear to the Congress the basis for deciding to support work in a particular field, and particularly the connections between relatively basic research and the long-range Defense problems and missions which require such research.

In order to assure full compliance with the intent of Congress as expressed in Section 203, addresses are requested to assure that prior to the approval of a new research project or study, or the continuation, modification or extension of an existing research project or study, the project manager furnishes a written statement which describes, as clearly and simply as possible, the project or study and its purpose, together with its direct and apparent relationship to one or more designated military functions or operations. Any project which does not have a direct and apparent relationship to a specific military function or operation must be terminated in an orderly way as soon as possible.

I have asked Dr. Foster to work with you in reviewing all current RDT&E efforts, as well as selection criteria used to evaluate proposed RDT&E studies and projects. The purpose of this review will be to assure that the long-standing Department policy, requiring that the criterion of relevance-to-military-missions be applied throughout the RDT&E program, has been and is being applied explicitly in every case. If necessary, please consider supplementing the appropriate directives to ensure that the provisions of Section 203, P. L. 91-121, are followed completely.

In summary, addresses are requested to take all necessary actions, beginning immediately, to comply fully and scrupulously with the law. Under no circumstances shall the Department support work which does not have a direct, apparent, and clearly documented relationship to one or more specifically identified military functions or operations.

DAVID PACKARD,
*Deputy.*

---

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. METCALF. Mr. President, last night, immediately after my amendment was called up, I made a speech explaining the purpose of the amendment.

In summary, it has a very simple purpose; namely, to get at the abuses which have resulted from nonfarmers taking unfair advantage of the special accounting methods designed to ease the bookkeeping chores of legitimate farmers. These accounting methods grew out of the necessity to give the farmer a more simplified method of accounting on his inventory and capital gains, because of the sophisticated bookkeeping records that we give to businesses and industries all over this Nation. Especially livestock and dairy farmers, and orchard operators have special accounting rules and do not have to keep an inventory at the end of the year.

For example, during the course of the hearings, I was asked a question by one of the Senators on the Finance Committee, "Why should Woodward & Lothrup have a tea room and take a loss and have to be treated differently from a man who goes out into a livestock farm and takes a loss?"

The answer is, of course, that Woodward & Lothrup is on an accrual system of taxes, and they include everything in their losses and do not have the special benefits which are given to the farmer.

Thus, this business of allowing the farmer a special tax benefit, which has grown up and which we recognize and which is useful and which should be continued, in recent years has given rise to an abuse by people with large incomes from nonfarm areas, people such as doctors, lawyers, brokers, and bankers—people with an independent income from stock operations, going in and converting their annual income at a high tax bracket level into a capital gains income in a subsequent year.

Everyone who has studied this problem is concerned with it. Everyone who has studied this problem would like to correct this abuse.

About all the difference we have here in the Ways and Means Committee and in the Finance Committee and in the amendment I am offering today is in the various ways to correct that abuse.

In the House, I testified on this same piece of legislation. I testified before the Ways and Means Committee. Some of the members leaned over the desk and said to me, "Senator, we have farms that we are operating in that same way." One member said, "I have a farm but I am not making a loss, I am making a profit on it."

All of them made, in my opinion, an honest effort to correct the abuse of the tax loss farmers.

However, in the House they put in an EDA provision, which would allow the tax-dodge farmer to defer the loss from year to year.

In my opinion, and in the opinion of tax experts, that would mean that over the long period there would be a deferment of nonfarm income, and such a dispersion of it that the bill would be largely ineffective.

In addition, it means that we would have to give the ordinary, legitimate farmer the sophisticated tax system that bookkeepers have in industries. We would have to give the farmer one of the most complicated tax bookkeeping systems in the whole income tax system.

Mr. TALMADGE. Mr. President, will the Senator from Montana yield?

Mr. METCALF. I am delighted to yield to the Senator from Georgia.

Mr. TALMADGE. I should like to ask a few questions about the bill. Is it true that——

Mr. METCALF. May I go on to say a few words about the Finance Committee——

Mr. TALMADGE. Go right ahead. If the Senator would prefer, I will ask him a question or two at the conclusion of his remarks.

Mr. METCALF. I am not concluding them yet, but I would like to say a few words, that the committee has made an improvement in the House bill.

The Finance Committee then, confronted with the problem in the House bill, and the House's opportunity to try to correct this abuse, adopted another procedure. That is a much more simplified procedure, which has been revived and refined in the suggestion I made in the amendment to the House that a "farmer" be defined by the amount of money that he earns and that abuse of income be taken care of by an actual deduction.

A good deal of the language that is in S. 500 has been incorporated as a part of the draftsmanship in the committee amendment to H.R. 13270.

So the approach that the Finance Committee has made is simpler for the legitimate farmer, than the approach taken in the House bill, but does need correction.

It has been frequently stated that when the amount of nonfarm income is $15,000 or over, the abuse is largely uncorrected. The House bill and the bill as reported by the Senate committee are both subject to the criticism that they leave the abuse largely uncorrected. A person who has a large nonfarm income of over $50,000 and an artificial farm loss of over $25,000 will still be able to deduct 50 percent of his artificial farm loss above $25,000.

So I will say to my friend from Georgia that we are talking about dollars today, about where we begin to define a "farmer." Is it a man who is on a farm and earns a nonfarm income in some other activity, at $50,00 or over, or is it a man on a farm who may be living off the fringes of the suburbs, and do we permit him to earn $15,000, on which he can take farm losses?

I want to compliment the committee and the members of the committee who looked into this problem and were aware and cognizant of the abuses and who, I think, made every effort to meet the issue, except that they made the dollar exclusion figures far too high. The purpose of my amendment is to bring it down to more realistic figures.

To show Senators exactly what we are talking about, according to information received from the Internal Revenue Service by the joint committee, about 3 million individuals file farm returns each year. About one-third of those people report losses from their farming operations. My amendment would apply to 14,000 people who have large nonfarm income and take large artificial farm losses as an offset against that nonfarm income.

The bill as reported by the Senate committee would apply to only 3,000 persons.

My amendment would substantially increase the revenues collected. The revenues raised as a result of the bill reported by the committee would be——

Mr. MOSS. Mr. President, will the Senator yield?

Mr. METCALF. I promised to yield to the Senator from Georgia first. Then I shall be glad to yield to the Senator from Utah.

Mr. TALMADGE. I have not had time to read the Senator's amendment in great detail, but I have heard it hurriedly. What does it provide? Does it provide that if one has a $30,000 income a year or more from nonfarm income, he cannot deduct any farm losses?

Mr. METCALF. That is not quite right. Economic agricultural losses have been written into the amendment, and adopted by the committee, so that if one had an economic loss of $100,000 and had a nonfarm income of $100,000, he could deduct it. But outside of the economic losses I have set out in my amendment, if one has a nonfarm income of $15,000 and a farm loss of $15,000, he can deduct it. It phases out dollar for dollar up to $30,000 nonfarm income. After that $30,000, if one has a nonfarm income of $30,000 or over, as the Senator has stated, and an artificial farm loss——

Mr. TALMADGE. What does the Senator mean by "artificial farm loss"?

Mr. METCALF. I have placed in my amendment the following definition:

> The term "special deductions" means the deductions allowable under this chapter which are paid or incurred in the business of farming and which are attributable to—
>
> (A) taxes,
>
> (B) interest,
>
> (C) the abandonment or theft of farm property, or losses of farm property arising from fire, storm or other casualty,
>
> (D) losses and expenses directly attributable to drought, and
>
> (E) recognized losses from sales, exchanges, and involuntary conversions of farm property.

If one has any of those losses, he can take them against nonfarm income in full; but if he seeks to take advantage of the special accounting—for example, holding breeding stock over 13 months, and then converting it to a capital gain—then he cannot take that as a farm loss.

Mr. TALMADGE. Where I come from they raise a good many peaches. In my area of the State they frequently have frost. In fact, a good crop is had only about two times out of every 5 years. If a farmer loses his crop because of weather hazards under those conditions, does it mean that the Senator's amendment would not permit him to take that loss?

Mr. METCALF. My amendment would permit him to take 100 percent of that loss.

Mr. TALMADGE. That is not the way I read it. The Senator permits such persons to deduct taxes, interest, abandonment or theft of farm property, losses of farm property arising from fire, storm, or other casualty.

Mr. METCALF. Would not frost be another casualty?

Mr. TALMADGE. I do not know.

Mr. METCALF. I feel it would. We suffer from frost in some of the apple industry areas in my State. That is a farm loss that can be taken against farm income in the carryover provision, backward and forward, even if one does not have farm income—

Mr. TALMADGE. But he eventually has to recoup that by profits on his farm, as I read the Senator's amendment.

Mr. METCALF. Any losses, under my amendment, and I am reading from page 7 of the amendment No. 315, subsection (3). The same provision is in the bill as reported by the Senate committee. Any losses could be taken against nonfarm income, no matter what the amount. The $15,000 or $30,000 is not attributable to those special deductions. The committee report that enumerates those losses states the same thing that I stated in my testimony before the committee.

Mr. TALMADGE. What if there is a collapse in the market price?

Mr. METCALF. My amendment states "losses from sales, exchanges, and involuntary conversions of farm property." That is an actual farm loss, and, under this amendment, one could take up to 100 percent off the nonfarm income.

Mr. TALMADGE. But there would not be a sale if there were a complete collapse of the market price. It might not be worth going to market. I have seen that on feed crops in my State of Georgia. The price would be so cheap that one would not even undertake to sell them, because he could not recover his cost of labor.

Mr. METCALF. It seems to me that,

under the present law, if one has a recognized loss and he can take it, then under this provision he has a recognized loss. If the Senator is saying the loss he has enumerated is not recognized today, I am not changing the law.

Mr. TALMADGE. Under the bill as reported by the committee, some are allowed that are not allowed under the amendment of the Senator, as I see it.

Mr. METCALF. No; it is exactly the same under the committee bill as under my amendment. The only exception we do not allow under the committee bill is the exceptional——

Mr. TALMADGE. Under the committee bill one can deduct 50 percent of his loss provided he does not have income from nonfarm sources of $50,000 or greater and the excess loss is $25,000. But as I read the Senator's amendment, it is pretty firm and one is limited to his deductions by sales. That means he buys something and sells them. If one did not sell his farm crop, I do not know that would apply to sales and exchanges if the price were so low that he did not even sell it.

Mr. METCALF. I suggest that my friend the Senator from Georgia turn to page 193 of the bill—that is, the committee bill—and check as I read my amendment:

SPECIAL DEDUCTIONS.—The term "special deductions" means the deductions allowable under this chapter which are paid or incurred in the business of farming and which are attributable to—

(A) taxes,

(B) interest,

(C) the abandonment or theft of farm property, or losses of farm property arising from fire, storm, or other casualty,

(D) losses and expenses directly attributable to drought, and

(E) recognized losses from sales, exchanges, and involuntary conversions of farm property.

I ask the Senator: It is identical, is it not?

Mr. TALMADGE. It is identical, with this exception: The Senate committee bill permits you to take $25,000 of farm losses and half the excess, and the Senator's amendment permits you to deduct nothing.

Mr. METCALF. My amendment permits you to deduct every dollar of farm losses under that "special deduction" provision from nonfarm income. Every dollar. If you have $100,000 of nonfarm income, and you have $100,000 of economic losses, under that provision, you can deduct every single dollar, under my amendment.

Mr. TALMADGE. But it can be deducted only if it relates to taxes, interest, losses arising from fire, storm, or other casualty, or from abandonment or theft losses, expenses directly attributable to drought, and recognized losses from sales, exchanges, and involuntary conversions. As I say——

Mr. METCALF. It is exactly the same as the committee bill.

Mr. TALMADGE. But the dollar figure is vastly different.

Mr. METCALF. The dollar figure is vastly different. I say that a man who has an income outside, from a nonfarm activity, of $50,000 or more, is not a farmer in the sense that he should be permitted to take advantage of the special accounting privileges that we give farmers.

Mr. TALMADGE. We have many farmers in Congress, and our salary is fixed by law at $42,500.

Mr. METCALF. The farmers in Congress have been taken care of. Our salary is $42,500 and the committee bill provides you can take a farm loss of up to $50,000. So the House bill and the committee bill have taken care of the gentleman farmers who also have a congressional income.

Mr. TALMADGE. Some of us were farmers before we came to Congress.

Mr. METCALF. And were profitable farmers.

Mr. TALMADGE. Some years I was; and some years I was not. I never was a very profitable farmer, and I do not know many who are.

Mr. METCALF. This is whom I am trying to protect: The man who is not a profitable farmer some years, who has to compete with this gentleman farmer who comes in from the outside.

Let me read the Senator a letter from a woman on an Arabian horse farm, who says that she believes in the free enterprise system, and she would like to work within the system on the farm. This is a letter from a woman in California, written to the executive secretary of the International Arabian Horse Association. She says:

I am well aware that owning and raising Arabian horses can be very expensive, and that a nonfarm income is most helpful in paying the bills between sales of livestock. However, having lived in a ranch community in Wyoming for a good many years, and having numerous friends who are trying to make a living by farming or ranching, I must seriously protest your stand—

The stand was in opposition—

on S. 500 and H.R. 4257. That our extremely unfair tax system has allowed so many farms and ranches to be run at a loss by "absentee big business" at the expense of those who are trying to make a living by ranching is to me a crime, and I am most gratified that the good Montana Senator is seeking to remedy this situation.

As a staunch conservative, I am very much in favor of the free enterprise system which has made our country so great, and it would appear to me that a return to a "free market" in the ranching/farming sector of our economy would be much better for all concerned than a continuation of subsidizing uneconomical livestock producers at the expense of those trying to earn their livelihood in this industry.

Mr. TALMADGE. I thoroughly agree with that, and I applaud the Senator's objective of trying to take some of the tax advantages out of farming. The Committee on Ways and Means tried to do the same thing, and so did the Finance Committee. In fact, we have 12 or 14 pages of provisions in that committee amendment, trying to tighten up in this area.

But it seems to me that the Senator's amendment's provisions that you cannot take true losses on farm operations if you have income in excess of $30,000 is going too far. In my State, we have quite a number of pecan farmers and fruit and vegetable farmers, and growers of other things of that nature, who frequently, because of the elements, insects, disease, failure of market price, and any of the other hazards of nature and the market, have huge losses; and if they cannot take those loses, I am afraid we are going to do irreparable harm to honorable, hard-working, God-fearing farmers who are not using any tax gimmick.

Mr. METCALF. I assure the Senator from Georgia that it is not my intention to do harm to any of those farmers.

Mr. TALMADGE I know that is not the Senator's objective, but I am afraid that, in drawing this amendment, he went too far.

Mr. METCALF. The amendment is not my amendment, as the Senator knows. The amendment was hardened and refined and drawn by experts.

Mr. TALMADGE. I know the Senator has been working on it for years, with the help of many able people.

Mr. METCALF. The amendment I have here, so far as it affects the people who concern the Senator from Georgia, is exactly the same as the provisions in the committee bill, and I congratulate the committee and the Senator for their excellent work in drafting those provisions.

Mr. COOPER. Mr. President, will the Senator yield for a question or two?

Mr. METCALF. I yield to the Senator from Kentucky.

Mr. COOPER. I simply want to find out, for my own information on the effect of the amendment proposed by the junior Senator from Montana, if this is correct: If a person has nonfarm income in excess of $30,000, he would not be able to offset against that income any farm losses?

Mr. METCALF. Artificial farm losses arise as a result of taking advantage of the special farm accounting rules. He would be able to offset the true economic farm losses I have been discussing with the Senator from Georgia. If the farm losses resulted from the special deductions listed in my amendment such as casualties and so forth, which I have enumerated, he could offset the full economic farm loss against his nonfarm income.

Mr. COOPER. The Senator has limited those deductible losses to four or five items.

Mr. METCALF. The Senator is correct.

Mr. COOPER. Which, as the Senator from Georgia has pointed out, would not include, in my judgment, some kinds of loss which might be incurred year after year. As I understand, the most that could be offset, would be $15,000 in farm losses, and that would be reduced $1,000——

Mr. METCALF. Dollar for dollar in the category of paper losses.

Mr. COOPER. Dollar for dollar, as nonfarm income increases, up to $30,000.

Mr. METCALF. And then there would be no loss deduction after that.

Mr. COOPER. For instance, an individual having $29,000 in other income would be able to offset farm losses of only $1,000?

Mr. METCALF. In capital gains, or something of that sort.

Mr. COOPER. I know the Senator from Arizona, Senator FANNIN, is on the committee, and I will yield to him soon.

Mr. FANNIN. No, that is all right.

Mr. COOPER. Has any information been furnished to the committee as to the number of persons who might fall into the category the Senator describes as nonfarmers?

Mr. METCALF. Under the committee bill, and under the definition of the committee bill, that only includes individuals with adjusted gross nonfarm income of over $50,000; only 3,000 out of about 1 million individual farm loss returns would be affected. My amendment would affect 14,000 of those same returns or about 2 percent of the total, and two-thirds of the 14,000 individual income tax returns affected by my amendment would reflect nonfarm adjusted gross income in excess of $100,000.

Mr. COOPER. How much income would accrue to the Treasury if the Senator's amendment were adopted?

Mr. METCALF. According to the joint committee, my amendment would bring in $205 million. The Senate bill would bring in $15 million.

Mr. COOPER. There are people, of course, who purposely use the existing provisions to offset large farm losses. But I must say I have read the testimony, and it seems to me that according to the record of the committee, most livestock breeders and horse breeders are engaged in farming as a legitimate business with the intention of making a profit.

There is a provision in the committee bill as I understand, that if a farmer makes a profit in 2 out of 5 years, the presumption is that he is engaged in business for profit.

Mr. METCALF. That is under the present law.

Mr. COOPER. No. There is a different provision in the Senate committee bill. The amendment proposed by the Senator from Montana is too harsh, and should be voted down.

Mr. METCALF. There is the so-called hobby loss provision in the law which is largely very unjust. Many people say, "Why don't you take care of that provision?"

Mr. FANNIN. It is in the bill.

Mr. METCALF. The real difficulty that most of these people have is amplified by this influx of the tax loss farmer into the community.

These people can compete without trying to earn money on their farms. The legitimate farmer cannot compete with the man who is farming for the purpose of transferring outside income from the 70-percent tax bracket to the capital gains bracket of 25 percent.

Legitimate farmers have to compete for money to finance their operations with people who are operating at this level. And the legitimate farmer is very adversely affected by this sort of operation.

This is the man that I am trying to protect.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. FANNIN. Mr. President, is it not the objective of the Senator—and I certainly would praise his objective if it is—to protect the American farmer and see that we would give protection to the farmer? Is that not the Senator's objective, to make our farmers competitive?

Mr. METCALF. That is right, to make them competitive with each other on the productive capacity of their farms.

Mr. FANNIN. More importantly, they must be competitive with other countries of the world. Has the Senator checked to see how much of our agricultural production is going outside of the United States?

Mr. METCALF. Mr. President, a good deal of it is going outside of the United States. For instance, my own State, since we are near the Pacific coast fortunately, is one of the chief exporters of wheat as a result of our negotiations with Japan under Public Law 480 and under our agricultural exports. It is one of the prime things in our balance of trade already.

Mr. FANNIN. The Senator is correct. However, that is rapidly changing. We are gradually exporting our jobs in farming, manufacturing, and most all industries.

We are becoming noncompetitive.

If the Senator will check the records, he will see that many farmers in the Southwest are moving into Mexico. Many others are operating farms in South American countries and other countries with the idea that, through the use of the cargo planes, they can bring their produce back to the United States cheaply.

Some are even thinking of farming in Spain. With the practically boxcar cargo planes we now have, they can bring their produce back to the United States, and the transportation would not be any more expensive than it would be from California to the market in the East.

I think we must lower the cost of production in the farming industry. We are not going to do that with the small farms. We will do it with operations that can take advantage of modern technology. If we do not do this, we will find ourselves without an agricultural business in the future.

Mr. METCALF. Mr. President, the Senator is going in the opposite direction from me. I wish to cause our tax laws to be an opportunity for our legitimate farmers to operate—whether small or large—and not have them compete with a man who is farming only to acquire an income tax loss.

Mr. FANNIN. Is it not our objective to produce food in the United States of America and to supply jobs for our people and revenue for our farmers?

Mr. METCALF. And income for our farmers.

Mr. FANNIN. And your legislation would defeat that. That is exactly what you are doing in your proposed measure, defeating that objective.

Mr. METCALF. The present law is doing that.

Mr. FANNIN. The present law is not doing it. The Senator says he resents that money being placed into the agriculture industry by people who are not farming but are using a special privilege that we have given the farmer for his accounting system so they might change their nonfarm income into a capital gain.

That is not true, because if the Senator means that this is what is happening, I point out that we are trying to get the farmers to move from the cotton crops—because there is overproduction—into other crops where there is production needs.

Mr. METCALF. I doubt if this measure would affect many cotton farmers.

Mr. FANNIN. It certainly would. And this is what we are up against if we cannot help them to go into other type crops.

Mr. METCALF. Why should we subsidize a broker to go into the farmer business and compete against a legitimate farmer?

Mr. FANNIN. We are not subsidizing a broker to go into the farming business. These are legitimate farmers.

Mr. METCALF. Mr. President, why should we subsidize a $100,000 a year lawyer to go into the livestock business and compete with legitimate livestock operators? Why should we subsidize a man with $1 million in stocks and bonds to go into the orchard business and compete against legitimate orchard operators?

Mr. FANNIN. We should not subsidize but we should assist our farmers to be competitive with the other countries of the world and we must build those industries. We are not going to do it otherwise. We should make opportunities available for our people.

What is happening now is that our agricultural farmers are going into other countries and developing agricultural industries. That will not produce benefits for our workers.

Mr. METCALF. Mr. President, I do not think we will stop that by permitting this inequity and injustice to remain in the tax bill.

Mr. FANNIN. Mr. President, does not the Senator agree with me that if more and more money is invested in the agricultural industry, it is to our advantage?

Mr. METCALF. Of course it is, if it is invested for legitimate reasons by farmers or for farm activity. However, if the Senator means an investment by people outside of the farm so that we would give them an unfair competitive advantage in their operations and competition with legitimate farmers, then it is not to our advantage.

Mr. FANNIN. But if that small farmer cannot compete, we should do something about it. We better help them to compete in the market here in the United States.

Mr. METCALF. This is not the way to do it.

Mr. FANNIN. I think that it is. It is the only way we can have an agricultural market in this nation.

Mr. METCALF. Mr. President, I could not disagree more with the distinguished Senator.

Mr. MOSS. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. MOSS. Mr. President, I am pleased to join with the Senator from Montana as a cosponsor of his amendment to close the hobby farmer loophole. The Senator is the Senate's acknowledged expert on this subject and I am glad he has persisted with his amendment.

The Metcalf amendment must be adopted or the Senate cannot make any serious claims about having eliminated this tax dodge.

The Finance Committee's bill makes only a token effort to stop this abuse of our tax code. The best indication of this tokenism are the meager revenue gains. The farm loss provisions in the committee bill would bring in only $15 million. Given the magnitude of the hobby farmer loophole, this paltry sum makes reform into a joke.

But under the Metcalf formula the fat-cat hobby farmers would stop laughing; 14,000 of them would be affected by this amendment and the Treasury would be $205 million richer.

The legitimate farmer—the individual Congress sought to help by permitting him to use simplified accounting rules—would not be hurt by this amendment. In fact, he will be helped. Not only will farmers still be allowed to operate under a cash accounting system, but legitimate farmers will not have to compete against the tax dodging hobby farmer. In their single-minded efforts to create an artificial tax loss, hobby farmers are notorious in driving up land prices and driving down commodity prices. While the hobby farmer gets rich by deducting his artificial tax loss from his nonfarm income, the legitimate farmer suffers.

The present loophole is so attractive that farm "investments" are solicited in advertisements as a means of achieving a tax loss to shelter nonfarm income Some of these advertisements are blatant appeals to hobby farming, saying in so many words, "let us buy some cattle for you and we will guarantee you a tax loss." I find these advertisements disgusting.

The Metcalf amendment would eliminate the attractiveness of hobby farming by limiting to $15,000 or the amount of "special deductions" listed in the amendment, whichever is higher, the amount by which a farm loss may be used to offset nonfarm income. Special deductions are those that would be allowed to someone whether or not he was in farming or because it is the type of deduction clearly beyond the taxpayer's control. Examples would be such things as droughts, fire, storm, or other casualties.

Either the desire for tax equity or the need for tax revenue each by itself is reason enough to vote for this amendment. Together the appeal is irresistible.

So, Mr. President, I should like to voice my support of the amendment of the Senator from Montana. I think it is in the interest of the farmers themselves, and I think it would provide additional revenue, which is a concern now on the floor of the Senate, as to whether we are making too many charges against our revenue. This would increase the revenue collected, by cutting out what is a great loophole now—the hobby farmer, who goes into farming simply to get the loss and to write it off against his income from another source.

I thank the Senator from Montana.

Mr. ALLOTT addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Montana yield to the Senator from Colorado?

Mr. ALLOTT. I would like the floor in my own right.

Mr. METCALF. I will yield the floor at this time.

Mr. ALLOTT. Mine is an extraneous matter. I will wait until the Senator has concluded.

Mr. METCALF. A few minutes ago, the Senator from Wyoming asked me whether I would answer some questions that he has, but I will yield the floor at this time, and then I will seek to obtain it again.

Mr. ALLOTT. I thank the Senator.

Mr. President, much concern has been demonstrated by many of us in the last few days with respect to the actions of the Senate upon this tax bill. Late yesterday afternoon, the distinguished Senator from Delaware (Mr. WILLIAMS) read a list of the deficiencies that this bill has created so far by the amendments that have been added on the Senate floor. I join with those who believe that this bill, as it has developed so far, is very——

The PRESIDING OFFICER (Mr. BYRD of Virginia in the chair). Will the Senator suspend?

The Senate will be in order.

The Senator from Colorado may proceed.

Mr. ALLOTT. Mr. President, it took so long to obtain order that I do not remember my last sentence, so I will begin again.

Many of us feel that this bill is highly irresponsible—at least, I do. Two editorials have been published in the last 2 days which I think deserve the attention—and I mean the serious attention—of the U.S. Senate. Unfortunately, it is impossible to correct the foolish actions that the Senate has taken thus far on this bill.

The Washington Post, which is not exactly known as a citadel of conservatism, has in its paper this morning, Saturday, December 6, an editorial entitled "Shortchanging the Nation." There they set forth, with a feeling which I think is very responsible, exactly what we are doing to feed and fuel the inflationary fires of this Nation.

I am one of those who believe that, of all taxes, the tax of inflation is the most serious and the most cruel tax, because it hits those people who can protect themselves least—those on pensions, those on fixed incomes, those who are retired, those on social security, and, of course, inevitably, those in the very low-income tax brackets. People with great wealth can vote for all these fine things, because they can protect themselves with their numerous economic advisers and they can hedge against inflation, when the poor man on the street, the retiree, and the widows and the widowers who are unable to work any longer cannot protect themselves.

The other editorial appeared in the Washington Daily News of Thursday, December 4, entitled "Torpedoed Tax Reform." This is a discussion of the exemption amendment, the so-called Gore amendment, and is along the same lines.

We have now built into this tax bill, this "reform"—and I put that word in quotation marks—bill almost $12 billion of deficits as of this morning, before the consideration of the pending amendment. I think it is high time that the Senate reassume its status as a responsible body, which it has had for many years, and which I am not sure it deserves as of this morning.

I ask unanimous consent to have both these editorials printed at this point in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

[From the Washington Post, Dec. 6, 1969]

SHORTCHANGING THE NATION

There are two ways of looking at the votes of the Senate on the Gore and Hartke amendments to the tax-reform bill. Many regard these decisions as highly irresponsible gestures toward inflation at a time when the country is still struggling, with indifferent results, to keep prices from going through the ceiling. Others see them as normal political responses to a so-called "motherhood" issue which should not be taken too seriously. It remains to be seen which view is the more accurate.

On its face, however, the Senate vote to increase the personal exemption of each taxpayer from the present $600 to $700 in 1970 and $800 in 1971 is an inflationary action of no mean proportions. The estimated revenue cuts in the Finance Committee bill were serious enough. But Treasury figures indicate that taxpayers would owe $2.3 billion less under the Gore amendment in 1970 and $3.7 billion less in 1971—a total of $6 billion in two years. To this must be added an estimated loss of $600 million in 1970 and $700 million in 1971 from Senator Hartke's proposal to leave the 7 per cent tax credit in effect for the first $20,000 of any business's investment in machinery and equipment. The House and Finance Committee bills would completely repeal this tax credit.

Both these blows to the concept of fiscal policy as a vital weapon in the fight against inflation came at a very embarrassing moment. While the Senate was voting to slash revenue, the House Ways and Means Committee decided to increase social security benefits by 15 per cent. In the background are pressing plans for revenue sharing, for large outlays to fight crime and hunger, for preservation of the environment and for other urgent undertakings.

Meanwhile the pressures of inflation continue to mount, despite some turndown in industrial production and an increase in unemployment. The report of an 11 per cent increase in projected plant and equipment investment in the first half of 1970 compared to this year tells much about the continued inflation-mindedness of the business community. Soaring interest rates, in some instances above 10 per cent, further dramatize the spreading dislocations.

It is no time for the Senate to be adding fuel to these inflationary flames in the form of general tax cuts. The bonanza offered by Senator Gore could turn out to be a cruel hoax if it further accelerates demand and higher prices or if it forces the Federal Reserve Board to overplay its credit restrictions in the absence of any fiscal restraints.

These is still hope, however, that the Senate, having gone on record for a popular form of tax benefit, will wind up in a more responsible posture. The House-Senate conference committee could retain the promise of a more generous personal exemption and perhaps avoid the risk of a presidential veto by prescribing a longer phase-in period. Or it could build up the revenue side of the bill by adopting the version of the varying reforms which promises to produce the largest returns. There is still time to put together a

sound tax-reform bill that will not short-change the country on revenue at a critical moment. But the Senate has made that job more difficult and thrown a much greater burden on the leaders who must write the final bill.

---

[From the Washington Daily News, Dec. 4, 1969]

TORPEDOED TAX REFORM

Members of the U.S. Senate who voted to increase the personal income tax exemption from $600 to $800 may be political heroes to the folks back home—but they don't rate any medals in the battle against inflation.

The amendment approved yesterday by a margin of 58 to 37 would cost the Federal Treasury more in lost revenues in the next two years than either the House-passed bill or the measure approved by the Senate Finance Committee.

Not satisfied with this much generosity, the senators then voted 48 to 41 to modify rather than repeal the inflationary 7 per cent tax credit on capital investment. This could cost the Treasury $720 million a year.

The net result of all this munificence would be lower tax collections at a time when the Federal Government should be trying to drain money out of the economy.

Sen. Albert Gore, D-Tenn., chief sponsor of the $800 personal exemption bill, noted that raising the tax exemption for each dependent by $100 next year and another $100 in 1971 will have broad popular support because it can be understood "by every mother in America."

Translated, this means that the tax cut should be as simple and obvious as possible for the greatest political impact during an election year.

Unfortunately, the Gore amendment ultimately would cost several billion dollars more than the revenue-producing measures in the tax-reform package would provide.

This is typical of the inconsistency in the Senate's actions so far.

On the one hand, it displayed fiscal responsibility by voting to extend the surtax (at a reduced rate) until next July and by agreeing to cut the oil depletion allowance for the first time in 43 years.

Then it approved an expensive and irresponsible tax-relief proposal which, one senator put it, "a lot of political sex appeal."

Fortunately, the damage in the Senate amendment can be undone when the bill goes to a Senate-House conference committee to be reconciled with the House version of tax reform.

We hope the conference would do something to curb inflation—not encourage it.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. ALLOTT. I am happy to yield to the distinguished Senator from Vermont.

Mr. AIKEN. I hope that the Senator from Colorado realizes that the vote on many of the amendments which have been adopted was a vote of great confidence in our conference committee.

Mr. ALLOTT. I know what the Senator is saying, and perhaps he is correct.

Two things are certain—at least, of which I am certain. We should not write a tax bill on the Senate floor. I have been saying this for months. Forcing the Finance Committee to come out with this bill on October 31 was nothing but an assurance that we would write this bill on the Senate floor. What I have said has now come true, and we are doing the worst thing we can, which is to try to write a tax bill as a Committee of the Whole, and it has inevitably come to the conclusion it has.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. ALLOTT. I yield to the distinguished Senator from Delaware.

Mr. WILLIAMS of Delaware. Does the Senator from Colorado agree that if the various amendments, which add to the large loss of revenue, have been adopted by the Senate on the premise that Senators can vote for them here and then go home and tell their constituents how much they wanted to help them, but then later expect the conferees to eliminate the amendments when we go to conference, it is nothing but sheer political hypocrisy?

Mr. ALLOTT. In my opinion, it is exactly that. I was about to make one concluding remark about the question which the distinguished Senator from Vermont asked me. I do believe it is sheer hypocrisy.

There are many things that many of us believe in. For many years I have been one of those who have joined in support of the expenses of education amendment which was adopted yesterday afternoon. Under other circumstances, in the climate in which we have operated in the past, it was a very worthy amendment. The goals it seeks to attain are still worthy. But in today's atmosphere, I think it is hypocrisy; because I have heard all over the Senate floor, from both sides of the aisle, constant and repeated expressions such as, "Well, I only hope to God that the conference committee can write this bill." Well, it is our job to work our will on the bill here, and not to depend on the conference committee.

Mr. WILLIAMS of Delaware. The reason I make that point is that after we pass this bill and appoint the conferees, we go through the farce of instructing the conferees to stand solidly behind the Senate amendments. Yet, a number of Senators who voted for some of these amendments have already approached me, as one of the potential conferees, to say, "All right, JOHN, you strike that out and do not bring it back from conference because it should not be in the bill."

I think that is not fair. I think the Senate should not adopt any amendment that it does not want the conferees to bring back. If the conferees brought back a bill such as is being approved here, as of today the President would have no choice except to reject it, because of the revenue loss involved.

Mr. ALLOTT. I am sure that is true.

Mr. President, I yield the floor.

The PRESIDING OFFICER. What is the will of the Senate?

AMENDMENT NO. 389

Mr. GORE. Mr. President, in a tax bill which devotes hundreds of pages to an effort to achieve tax reform, it is distressing that some taxpayers will get new loopholes created for them, albeit in the name of tax incentives. The committee bill creates three large new tax loopholes.

Mr. President, I send to the desk an amendment to strike out the three loopholes. I have the honor of the cosponsorship of the distinguished senior Senator from Delaware (Mr. WILLIAMS) in this amendment. I ask unanimous consent that the amendment be printed and that it lie on the table.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the table.

Mr. GORE. Mr. President, these new loopholes are contained in the three provisions permitting rapid depreciation—or amortization—of expenses for railroad rolling stock and locomotives, pollution control facilities, and rehabilitation of low- and middle-income housing. These provisions will cost the taxpayer $720 million in tax expenditures—$830 million under the House bill—$720 million that ought to be going to low- and middle-income taxpayers in the form of tax relief. It is interesting to note the type of persons and corporations that will benefit from these provisions:

Those railroads that are presently in a profitable position;

The factories that have been polluting our air and water for the past 100 years;

Slumlords, some of whom have kept low-income people in conditions of housing misery;

Syndicates created to invest in the tax losses generated by these new deductions—a big, new loophole.

There is no reason why any of these groups should have a claim to three-fourths of a billion dollars ahead of the average taxpayer, or at the expense of an unbalanced budget.

Information furnished the Finance Committee indicated that the dimensions of the benefits accorded by these provisions can be illustrated by recasting them in other forms. The House bill granted a 5-year rapid writeoff for pollution control facilities. Many of these facilities have a useful life of as long as 50 years. A 5-year writeoff for such a facility is the same as granting a 20-percent investment credit to the corporation for that facility. This action is especially unjustified when we are in the same bill repealing the 7-percent investment credit. Fortunately the Finance Committee substantially revised the House provision, but the fact remains that there is no justification for creating this new loophole. The recent Senate action in approving a $1 billion pollution control program renders this tax loophole provision superfluous.

Similarly it is instructive to recast the rapid writeoff benefit being accorded slumlords to rehabilitate low-income housing. The bill rule provides 70 percent taxpayers with the equivalent of a 19-percent investment credit with respect to expenditures for items that have a 20-year useful life.

It is also possible to view this new real estate tax loophole as a Federal subsidy to reduce the taxpayer's costs incurred to finance the project. In the case of a 70-percent bracket taxpayer who makes expenditures with a 20-year useful life, the bill rule has the effect of lowering his interest expense from 8 to 3 percent. The discriminatory nature of the rule is made apparent in the fact that a 20-percent bracket taxpayer would have his 8-percent interest rate reduced to only 7 percent. Now, one cannot reasonably imagine HUD coming to Congress and

proposing a housing rehabilitation program under which it would loan money to the wealthy at 3 percent, but would charge middle-income taxpayers 7 percent. Congress would reject such a proposal out of hand. Yet this is precisely the system which Congress is endorsing in this new real estate loophole.

For railroads, the new "incentives" provide an investment credit equal to almost 5 percent. Why railroads should get a continuing investment credit when it is being repealed for other industries has never been explained.

A further difficulty of each of these provisions is that wealthy individuals are provided more opportunities to engage in tax profiteering. We can expect the formation of syndicates of high-bracket taxpayers who will ostensibly be investing in these various activities. Leasing syndicates were formed under present rules to "buy" and "lease" airplanes to our major airlines. The only economic significance of these transactions was the marketing of the tax advantages of the investment credit and accelerated depreciation to wealthy taxpayers so that they could reduce their taxes. Now the same kind of gimmickry will be engaged in with railroad boxcars and locomotives, housing, and pollution facilities.

The creation of these new loopholes in a bill for tax reform is an insult to the American taxpayer.

If these moneys are to be spent for railroads, pollution control, and housing, then the money should be allocated through the regular appropriations processes so that informed judgments can be made by those with expertise in these respective areas as to the priorities that should be established for the expenditure of these funds. They cannot be justified in terms of tax policy since they are contrary to proper accounting rules. Nor can they be justified as a national expenditure policy since there is no evidence that these tax expenditures are consistent with our national priorities.

These new loopholes should be stricken from the law.

Mr. President, it is the purpose of the Senator from Delaware and the senior Senator from Tennessee to call up this amendment early next week.

Mr. LONG. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. LONG. Would the Senator state again what three items he has in mind?

Mr. GORE. I have in mind the item affecting railroads, the item providing extremely accelerated amortization for certain pollution control facilities, and the item giving a tax benefit to certain housing rehabilitation costs, or to syndicates to invest in any of these three.

Mr. LONG. The Senator, I believe, knows that when we voted on the investment tax credit in committee, while I personally voted for no exceptions, the majority view in the committee was that railroad rolling stock should be excepted from the repeal of the investment tax credit because of the shortage of railroad rolling stock. In view of that, the administration urged that rapid amortization be substituted in the hope the Senate would repeal the investment tax credit with no exceptions. It was on that basis that we agreed to the provision for a 5-year amortization of railroad rolling stock.

In the view of many of us if we had not done that we were faced with a possibility of exempting first railroad rolling stock, and then having other industry exemptions, so that we would see the bill dismembered by industry exemptions. There is no doubt in my mind the truckers, who have every bit of influence in this country that railroads do—they are greater in number and seem to be more effective when it comes to communicating to their elected representatives—could have gotten an exemption also.

My prior experience has been that once an exemption is allowed for railroads, the truckers and the airlines get the same thing.

I hope the Senator realizes that if we had not done something like this we would have been faced with the distinct possibility the bill would have been so dismembered that it would have been totally ineffective.

Mr. GORE. I realize the distinguished chairman and the committee were under a great pressure from lobbyists for the railroads. I see no justification, however, for giving a special privilege in order to avoid giving it in another form. I do not think it should have been given in either form. I did not vote for this provision in committee, and neither did the senior Senator from Delaware. Neither of us was prepared to vote for the other items which these special interest sought.

I expect to discuss this matter more fully when it is called up, but suffice it to say the principal railroad beneficiaries of the provisions in the bill will be not those railroads losing money but those that are making a profit.

We have done a great deal here in the name of rolling stock. The fact is that the provision includes locomotives as well as rolling stock. This is a new loophole in the tax law. I know there are excuses for it, but there is no justification.

Mr. LONG. The Senator is aware of the fact that in committee I did not vote for the small business exception or the minimum $20,000, and neither did he. We kept the investment tax credit without exception. However, on the floor of the Senate, Senators voted on this exception. Is the Senator aware of that?

Mr. GORE. I agree that happened. I did not vote for it.

Mr. LONG. Neither did I.

Mr. GORE. I did not vote for it in committee and neither did the chairman. Of course, the Senate can work its will.

But here is a new loophole in the tax law created by this bill and I do not think it should be there. We hope to strike it out. We do not think it is justified and if it is justified for the railroads, I do not see why other forms of transportation could not claim it is justified for them, too, just as the investment credit would have been.

With regard to pollution control facilities, this provision is equivalent to a 20-percent investment tax credit. I do not expect to discuss it at length this morning because I do not anticipate bringing the matter up until the amendment can be printed and studied by Senators.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. WILLIAMS of Delaware. Mr. President, I am glad to join the Senator as a cosponsor of this important amendment. The Senator stated he expects to call the amendment up next week.

Mr. GRIFFIN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. WILLIAMS of Delaware. Mr. President, so there will be no misunderstanding, if at the conclusion of the proceedings today no other amendments are to be offered, I am sure the Senator would agree we would call the amendment up today so we can go to third reading and pass the bill. In other words, we are not going to hold up the bill for this amendment. I do not know whether we can finish the bill today, but I do wish to make that statement.

Mr. GORE. I concur with the Senator.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. PASTORE. I am sorry I was not here when the Senator began his remarks. Do I understand his amendment is directed to removing the exemptions that were made to the elimination of the investment tax credit?

Mr. GORE. No. The distinguished chairman of the committee was suggesting in colloquy a few moments ago that the committee felt the justification for this provision to be, as I understood it, that if so-called relief were given to railroads by way of an investment credit, then the trucklines and airlines would ask to obtain a similar treatment. Therefore, according to the distinguished chairman, and I think I am accurately stating his point of view, this kind of relief for railroads was decided on.

I was saying that I did not agree that the railroads are entitled to this kind of relief or to the investment credit, because the relief goes primarily to railroads that are already in a profitable position, not to those in a loss position and that need help the most.

Mr. PASTORE. As a broader reason, I think we would be making a tragic mistake if we began to except any industry as against another industry. If an industry needs help, we ought to provide it on a case-by-case basis, not under the investment credit law. After all, we in Rhode Island have problems of amortization in the textile establishment. It is just as important as the railroads. There are many industries that would come in and make a case for an exception. If we are going to remove the investment credit tax, we ought to remove it for everyone. Then if it is necessary to have a subsidy in certain instances for the welfare and prosperity of our economy, we ought to consider providing consideration on a case-by-case basis. The minute we begin to rivet this provision with exceptions, we are in trouble.

Mr. LONG. Mr. President, I should like the Senator from Rhode Island to understand that I took exactly that atti-

tude in committee. But let me tell him what happened. When we were voting on the investment credit, prior to the time the amortization matter came up, I voted for no exception, but that if we were to have no exceptions, we should honor the terms of contracts already in existence, and provide no exceptions in the repeal.

Then someone pointed out the critical shortage of railroad rolling stock. A vote was taken on that question, and by a narrow margin—a margin of one vote—the committee agreed, by a vote of 9 to 8, to provide an exception for railroad rolling stock. When that was agreed upon, there was no doubt in my mind, based on what had happened before, that we were issuing an open invitation to the trucking industry to come in and demand similar treatment, and to the airline industry also.

There was no doubt in my mind that we would see a repetition of what happened on the floor of the Senate, when the Senator from Rhode Island, along with the rest of us, voted to suspend the investment tax credit. Once one exception goes into the bill, there is always a flock of others to come.

To avoid this problem in connection with the repeal of the credit, the Treasury then undertook to pursue the approach of allowing amortization for railroad rolling stock during a period of a critical shortage of railroad rolling stock, and to terminate the amortization provision when the shortage no longer existed. That was agreed to in order to obtain the votes to strike from the bill the only exception to the repeal of the investment tax credit. That has a lot to do with its being here.

Mr. PASTORE. I understand it now. But so far as the investment tax credit is concerned, as reported by the committee, there are no exceptions?

Mr. LONG. There were none. There is one now. The Hartke amendment put one in for a $20,000 exception for each taxpayer but——

Mr. PASTORE. That is for small business.

Mr. LONG. That is right. That will cost $720 million. But when we brought it from the committee, there were no exceptions.

Mr. GORE. I should like to say to the Senator from Rhode Island that——

Mr. PASTORE. I mean, for this amortization, I was only questioning whether we were having an exception to the repeal of the investment tax credit.

Mr. GORE. That is what I wanted to comment upon. We can provide an investment tax credit by another name or formula and call it something else. The provision which the Senator from Delaware (Mr. WILLIAMS) and I seek to repeal, called an incentive, amounts to a 5-percent investment credit for railroads.

Mr. PASTORE. Is it not just fast amortization?

Mr. GORE. What is the difference?

Mr. PASTORE. There is a big difference. We can still deduct it from our taxes. The question is, Can we amortize it in a shorter numbers of years? That is nothing new. We have precedent over precedent for that.

Even John F. Kennedy, in 1961, accelerated the amortization of machinery in the textile mills because of the number of mills in New England and the northern part of the country, which were so dilapidated and old, which were competing with mills in foreign countries which had modern machinery because we had given them foreign aid to build up that modern machinery.

Mr. GORE. It amounts to the same thing. That is precisely the point I am making. This so-called incentive is, in fact, an investment credit. It reduces taxes. I will not proceed further with this, Mr. President. We will discuss it at greater length when the amendment is called up.

FARM TAX LOSSES

Now, Mr. President, I wish to address some remarks to the Senate with respect to the question of farm losses. Here is a problem with which the Senate must deal. According to the Treasury Department, there are some 3 million farm tax returns filed each year, and 1 million of them show losses.

The Metcalf amendment would affect 14,000 of that 1 million. Two-thirds of the 14,000 taxpayers affected by the pending amendment have nonfarm adjusted gross income in excess of $100,000 per year. The others have nonfarm adjusted gross income—the other one-third, that is—of between $15,000 and $100,000 per year.

Now, Mr. President, I should like to take a short time to state, as succinctly as possible, how this comes about.

If I may modestly suggest, I think I know how it comes about, because for several years I have been, in private life, engaged in small business and also in small farming operations and enjoying, too, nonfarm and nonbusiness income.

Here, I think, is the situation: Certain tax rules are generating so-called farm loss nontaxpayers, very similar, in fact, to the real estate "tax loss" nontaxpayers. Wealthy individuals have invested in certain aspects of farm operations solely to obtain tax losses—largely bookkeeping losses—for use to reduce their tax on other income. The result has been to create a high degree of artificiality in the farm economy.

There are two provisions in present law, designed to assist small farmers, that are utilized by nonfarmers to the detriment of our progressive tax system. The first of these permits a farmer to use the cash system of accounting even though he has inventories. This privilege is not accorded other businesses. Second, the farmer is permitted to deduct currently expenditures that should be capitalized under proper accounting rules.

These tax benefits have been used by nonfarmers most notoriously in the case of cattle and horse raising, citrus groves, and timber. One of the remarkable aspects of the problem is pointed up by the fact that persons with large nonfarm income have a remarkable proponsity to lose money in the farm business.

It is important to retain simple accounting rules for true farmers. However, the abuse by nonfarmers of the tax rules designed for farmers should be ended.

In other words bookkeeping losses. It prevails not only in real estate, but also in leasing and in farming, in citrus production, in timberlands, and fruit orchard establishments.

Mr. METCALF. Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. METCALF. I think it should be emphasized here, however, that the farmer has special accounting system——

Mr. GORE. I am coming to that.

Mr. METCALF. That allows him to generate paper losses not analagous to business losses.

Mr. GORE. I am coming precisely to that. The Senator is referring to the special privilege that farmers have of keeping their books, taxwise, on a cash return basis. A Senator or Representative would be hard pressed convincing an average farmer that he had realized income before he sold his calves, colts, or his fruit.

Nevertheless, businessmen are more realistically required to keep books on an accrual basis.

Actually, a farmer does realize income—perhaps not cash income before he sells—when the value of citrus orchard increases, when he keeps his females and accumulates his herd of cattle or horses, or what not. He has, in fact, realized income in any realistic sense; that is, he has had an accretion in the value of his orchard, his herd, et cetera.

As I say, cash bookkeeping is practical for the average farmer, and I would not want to deny that to farmers. I would not wish to cause every small farmer to hire an accountant to keep his books on an accrual basis. He can keep the checks with which he buys feed, pays labor, and trucking bills, he can keep receipts when he sells something at the market, without the expense of accountants.

But this privilege, practical and desirable for farmers, has been taken advantage of by people with large nonfarm incomes. Wealthy individuals have invested in certain aspects of farm operations, we suspect and the Treasury suspects, solely to obtain tax losses—that is, bookkeeping losses—for use to reduce their tax on other income. The result has been to create a high degree of artificiality in the farm economy.

There are two provisions in present law designed specifically to assist farmers that are utilized by some nonfarmers—that is, tax investment farmers—to the detriment of our progressive tax system, to the end of avoiding their fair share of taxes.

The first of these, to which I have already referred, is a cash system of accounting. The second is the one that permits a deduction of current expenditures that, in fact, in a larger, more sophisticated operation, should be capitalized under proper accounting rules.

These tax benefits, as I have said, have been used by nonfarmers most notoriously in the case of horses, citrus groves, timber, and cattle, though there are other instances.

One of the remarkable aspects of the problem is pointed up by the fact that persons with large nonfarm income have

a remarkable propensity to lose money in the farm business. They can be quite successful in other instances, but they have a remarkable propensity for losses in farming. I think it is important to retain the simplified farm accounting rules for the practical farmer. However, the abuse by nonfarmers of tax rules designed for farmers themselves should be ended.

That brings us to the effort of the distinguished Senator from Montana. He wishes to end them. There are members of the Senate Finance Committee, too, who wish to end that practice. I am one of those.

I do not think the committee bill is sufficiently specific and stringent in this regard. I am persuaded that the amendment offered by the distinguished junior Senator from Montana may be too drastic; $15,000, it seems to me, is an unrealistic amount, because, as costly as farming is, even a man who employs only five people and has a modest investment, can lose $15,000 hardly before he knows it if he is not careful. Farming is a hazardous business.

Mr. METCALF. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. METCALF. Of course he can lose $15,000 in his farming operation, and this amendment would not affect that in any way. The figure $15,000 was selected because the Treasury survey—and the testimony is in both the House and Senate hearings—suggested that above $15,000 of nonfarm income was where the border line was crossed between a man who is actually operating a farm for legitimate purposes, and a man who is working on a farm for tax purposes. We put in the provision of $15,000 of nonfarm income to take in that farmer who is on the fringes of the suburban areas, who works in town, and operates his farm, and permit him to have the same opportunity for tax benefits that both the Senator from Tennessee and the Senator from Montana seek for legitimate farmers.

The $30,000 adjusted gross nonfarm is not unrealistic, as far as surveys are concerned, to show the difference between a legitimate farm operator and a man who is using his nonfarm income for the special tax benefits generated by the accounting methods the Senator from Tennessee describes. These are the criteria used in arriving at the basis for the phaseout provision in my amendment.

Mr. GORE. Mr. President, I hope that the Senator will examine the committee bill and the suggestions for changes in the committee bill offered by the senior Senator from Tennessee in his individual views. It is my hope that we can find a meeting of the minds, so that this practice of tax avoidance can be eliminated, or at least very greatly minimized.

Mr. HANSEN. Mr. President, first of all, I want to pay my respects to my distinguished colleague from Montana (Mr. METCALF). He comes from range country, as I do. I am certain he is trying his best to accomplish two things in the amendment he has developed before the Senate at this time.

One is to present legislation which he sincerely believes will be helpful to the farming and ranching businesses; and, second, to close tax loopholes that he believes must be closed in the wider, greater public interest.

Mr. President, with respect to the Senator's concern over those engaged in farming and ranching, it must honestly be said that there are a number of farmers and ranchers who support the Metcalf amendment. I would add, however, that there are a far greater and overwhelming number who oppose it.

Among those who support it—and I have in mind the western Wyoming area of Jackson Hole—are some who believe that the Metcalf amendment would be good because it would provide some way to deny the time-honored American principle of freedom of choice and substitute a system which would keep people out of the farm and ranch business.

I must say that there are persons who feel, that the Metcalf amendment would help in that, in effect, it would impose a license to farm on all Americans. While it does not say "You cannot enter the business," actually the economic barriers to an entry into that business would deny an opportunity that I think all Americans should have, and a right that I hope would remain unabridged.

Mr. CURTIS. I agree with the distinguished Senator from Wyoming. I should like to call the attention of Senators to one or two facts.

Farming is the only business where there is a restriction against writing off its losses. We single farmers out in that regard. I daresay that a great number of eating places run by department stores are intentionally operated at a loss. They are not touched by this bill, or any proposal. I do not know how many newspapers are deliberately published at a loss. They are not touched here, either. The only field where this harsh rule has been applied is agriculture.

Now, another thing, Mr. President: Farmers are the only people who came before our committee and said, "Here are some loopholes, let us close them."

There was a loophole in reference to soil conservation practices, because someone would buy a rundown piece of land, charge off for improving the soil, sell it right away, and get a capital gain. Under the bill before us, they have got to hold it 10 years. That loophole is plugged.

It was agriculture that came in and said, "You can double the length of the holding period for capital gains." It was a year—twice as long as for any other property. It is now 2 years, under the committee bill.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. TALMADGE. In addition to the 2-year holding period, the bill also provides for recapture of any depreciation taken.

Mr. CURTIS. Yes. Also, it is written into the bill that there cannot be a tax-free exchange of a male calf for a female calf. We think they have plugged these loopholes.

The trouble with the Metcalf amendment is that it is an overkill. I had a rancher call me, who said, "Many of these proposals might have been all right 50 years ago, but they are too late now." He said, "My land is mortgaged higher than it has ever been." He said, "If Congress stops outside capital from coming into agriculture, land values will go down, and we will all be broke."

The Metcalf amendment, as I say, is an overkill. The committee provisions are just and sound, and they will do the job.

We must keep in mind also, Mr. President, that we have treated agriculture more harshly from the standpoint of losses than any other industry.

I thank the Senator for yielding.

Mr. HANSEN. Mr. President, I was speaking about the concern that I know my distinguished colleague the Senator from Montana does hold for farmers and ranchers. As I have already said, there are those who support the position the Senator has taken. One of the reasons they support that position—and this is a statement that I have heard made by numerous ranchers; and when I use the word numerous, I do not mean to imply more than perhaps a few percent, I would think not more than 5 percent of the total number of farmers and ranchers in this country—is that, as the Senator himself admits, one of the effects of his amendment would be to depress land prices, and if you want to buy out your neighbor, that is an awfully appealing package to hold out. If you think that you might be able to gobble up the holdings of some of the smaller farmers around you, and be able to do so in a restricted market, without the competition that characterizes that market today, then this measure would have an appeal.

I have heard a few people in Jackson Hole, where I live, say that they would like that, so that they would not have to face the competition that comes from other people, people from outside the State of Wyoming who are also interested in farming or ranching within the State of Wyoming.

There are three times, insofar as I can determine, that the average farmer or rancher does not want land prices to be high. One of those times is when he is buying land. He wants to buy it as cheaply as he can.

He is also pleased to have land prices low when the county board of equalization or the tax assessor comes around to set the tax on that land. That is another time when he does not want to have prices high. And he does not want to have them high when he anticipates his death and the inheritance taxes that will apply to it.

Having said that, I know of no other time when any farmer or rancher in this country wants to have land prices low. He wants to have them high when he goes to the banker and says, "I need more money to run an operation that has not been paying out too well."

Mr. METCALF. Mr. President, I wonder if my friend from Wyoming will yield at that point.

Mr. HANSEN. I yield.

Mr. METCALF. A young man goes to the bank and says, "I would like to borrow some money to buy a couple of sections of adjacent land."

The banker looks at it and says, "You cannot produce on that land. That land is priced at $120 an acre more than its productive capacity. The only way you can get that land is to have some tax gimmick."

The young man says, "I do not have a tax gimmick. I am just a rancher, and have to make my income from ranching."

Then the banker says, "That land is overpriced. The only way we can lend you the money is if you can get a contract with Oppenheimer Industries, or some of these other people getting a tax subsidy and a tax benefit."

What we are trying to do—and I think the Senator from Wyoming is as agreeable to this as I—is make the value of land equitable with the agricultural productive capacity of that land, so that a young man going to the bank can say, "I can produce cattle," or "I can grow a citrus grove," or "I can make an investment, and I can make an income on it that will pay off this loan."

He cannot do that today in some areas, where these tax farmers are coming in and inflating the price of land.

Mr. HANSEN. Mr. President, it should be noted that the average tenancy of farmers and ranchers in this country today is around 7 years, and it should also be noted that there are in this country today some 107 million head of cattle. The Oppenheimer Industries, to which my distinguished friend from Montana has referred, owns only about 200,000. How much validity do those facts lend to the statement of the Senator from Montana? Fewer than one out of every 500 head of cattle, if my mathematics are correct, would be represented in the ownership of the Oppenheimer Industries.

It just is not true that the typical banker in the United States today is telling young people, "You cannot borrow money," because, first of all, the turnover in ranches disproves that, and the relatively insignificant number of cattle that is represented by the holdings of the Oppenheimer Industries underscores it as well.

Now let me continue insofar as land values are concerned. In my State of Wyoming, and in most of the rural West and much of the rural East, land values are important. They are not only important to the rancher when he is trying to borrow money; they are of even greater importance to the young schoolchildren who must depend upon an adequate tax base for the kind of education we need in this country today. If you depress our land prices in America by 50 percent, I suggest that the rural areas of this country will be coming to the Halls of Congress and asking for greater Federal support than we are now giving. It is just that simple.

There is a great contribution made, in the typical school district, in my State of Wyoming, by the assessed valuation of land, of livestock, of farm machinery, and of farm improvements, that goes to make for better schools.

So let us not be deluded by the statement that lower land prices would help the average farmer or rancher. They would not help him at all. And if he should have to sell out, or if the breadwinner in the family should die and the widow has to sell out, I can assure you that she will be very happy indeed to have as many buyers around as possible, actively bidding for her piece of property. Any effort which would result in a diminution of the number of those persons interested in buying some country real estate will hurt that widow and those children, whose only inheritance must come from the values wrapped up in that land.

Mr. President, according to a study made by the Texas A. & M. University, I think there is around $112,000 tied up in the typical farm or ranch in this country. That is quite a bit of money. However, more depressing than the size of the investment necessary to start out in the farming or ranching business is the fact that the Texas A. & M. studies disclose that the average capital return from farming and ranching is less than 3 percent.

This simply means and underscores the fact that we have got to have a constant infusion of new capital if we expect improvements to take place in agriculture, if we are going to have the experimental programs implemented so that the farms and ranches can take advantage of the new technology and the new know-how which is being discovered by the colleges and by the research institutions throughout America.

This costs money. It is not easily done. Let us not do anything to make our great American farm inefficient. Let us remember that only 5 percent of the population of this country today shoulders the burden and the responsibility of feeding the other 95 percent of the American population.

Not only do they do that job pretty well, but they also supply a large part of the requirements for food and fiber to the remainder of the world as well.

Forty-six percent of all of the farm population receives nonfarm income or income from outside sources. Thirty-two percent of all the farm population receives income from nonfarm work for over 100 days a year.

According to the Farmers Home Administration, what would be achieved today if the Metcalf amendment were to be agreed to would be in direct opposition to existing Government programs such as those sponsored by the Farmers Home Administration which are designed to encourage farmers to increase their nonfarm income.

The objects of such programs are to establish nonfarm trades and businesses and thus provide rural communities with services previously unobtainable.

Mr. President, the trouble with the result of the amendment, well intentioned though it is, would be to move in direct contradiction to what is best for rural America.

It is recognized today that the problems of the cities reflect first of all the problems of rural America. It has been a tough thing to make farming operations profitable enough to keep the people on the farms and ranches.

As a consequence, a great many people have migrated to the great cities of this country. And they become part of an increasing problem simply because they go there with no skills and little ability to find employment.

I think that anything we can do to make farming more profitable—and certainly the infusion of new capital into rural America would make it more profitable—will be in the national interest.

Mr. President, the current economic situation in farming and ranching is far from booming. Testimony before the Senate Finance Committee during hearings on this tax reform bill indicates that the return on investment for the livestock industry is only 1 to 3 percent. Another study conducted by Texas A. & M. University concluded that on an investment of $2,000, a return rate of less than 3 percent was received by the rancher. This did not take into account the rancher's labor and overhead.

It is the responsibility of 5 percent of our population to produce the food and fiber for 100 percent of the people in the United States plus much of the world. It goes without saying that this cannot be accomplished without a constant infusion of capital into farming and ranching.

The farm and ranch industry must look outside agriculture and its 1 to 3 percent return on investment to obtain great quantities of new capital required for the competitive farm and ranch producer. Outside capital flowing into agriculture has been the source of improved land, new breeding stock, technological developments, and public and private agricultural research.

In the mid-1960's farmers were spending about $3.4 billion a year for new farm machinery. They were providing jobs for 120,000 employees, plus they were purchasing products containing about 5 million tons of steel and 320 million pounds of rubber. This is enough rubber to put tires on nearly 6 million automobiles. Today's farmer uses more petroleum than any other single industry and more electricity than all the people in the cities of Chicago, Detroit, Boston, Baltimore, Houston, and Washington, D.C., combined. There can be little doubt concerning the great expenditures of capital necessary for today's farm and ranch operation.

The Metcalf amendment strikes hardest at a person who is first starting out in the agricultural business, because it is likely that this individual must depend heavily on nonfarm income to offset his farm losses. The strict provisions of the Metcalf amendment would make it extremely difficult for a person to survive the first years when his capital expenditures are necessarily the largest.

Farmers are looking more and more to outside capital to meet the increased requirements to which they must adhere to remain competitive. The dependence on nonfarm income is on the increase. Forty-six percent of the farm population is forced to depend on nonfarm income for income from outside sources. Thirty-two percent of all the farm population are forced into 100 days a year of nonfarm work.

Mr. President, I submit that these facts suggest that the farmer must go to outside sources of capital to remain in the farm and ranch business.

The provisions of the Metcalf amendment limits the amount of farm losses which may be offset against nonfarm income. This discourages those presently engaged in agriculture from seeking to diversify their income sources. This is in direct opposition to existing Government programs such as those sponsored by the Farmers Home Administration, which encourages farmers to increase their nonfarm income. The objects of such programs are to establish nonfarm trades and businesses and thus provide rural communities with services previously unavailable.

The farmer must look to outside income to supplement his agricultural operation and keep it alive during drought and low prices with the hope that next year will be a better time.

The one great asset and source of security which every farm and ranch owner realizes is that he is the owner of valuable land. Testimony before the Finance Committee during its hearings on this tax reform bill indicates that the proposal which is before us today would have a substantial effect on the value of land.

The present amendment would dampen the economic attractiveness of our farm and ranch operations. When that occurs, land prices are certain to decline.

The farmer and rancher has to depend on the value of his land to obtain credit and raise capital with which he may make investments and provide the maintenance necessary to operate a modern farm or ranch. The use of nonfarm resources such as machinery, equipment, and production items has increased the need for agricultural credit. The use of credit in agriculture has been expanded rapidly since 1950 while the total farm economy has grown at a modest rate. In an industry where return on investment is 3 percent or less, the importance of good land values is imperative.

If we ever break the price of land in this country, every rural community in the United States will be placed in jeopardy, and every taxing body dependent on the land's value will loose the financial support for the services which it provides. This includes every independent school district. We should encourage the economic strength of our rural areas, especially when we consider the increasing problem of life in urban America.

Mr. President, the tax reform package as reported by the Senate Finance Committee already contains provisions which are adequate to close the loopholes without undue burden on legitimate farmers and ranchers.

Mr. President, I urge that the Senate not go beyond closing the loopholes. I feel that the Metcalf amendment would create such a burden on the farmer and rancher that it would have a strangling effect on the agricultural economy. I hope the amendment will be rejected.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. McGEE. Mr. President——

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. LONG. Mr. President, will the Senator yield?

Mr. McGEE. Mr. President, I yield to the Senator from Louisiana.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, I ask unanimous consent that the Senator from Montana (Mr. METCALF) be recognized, and that after he has concluded a colloquy he is to have with the Senator from Wyoming (Mr. McGEE), the debate on the Metcalf amendment be limited to 40 minutes, to be equally divided, 20 minutes to the side, between the Senator from Montana (Mr. METCALF) and the Senator from Georgia (Mr. TALMADGE).

The PRESIDING OFFICER. The Chair had recognized the Senator from Wyoming.

Mr. HANSEN. Mr. President, reserving the right to object—I will not object if the distinguished chairman of the committee will just permit me to make one further observation—I point out that the average permit on all national forest lands today throughout the United States is 68 head of cattle and 1,300-head permit for sheep.

I think that anyone who knows much about farming can appreciate that this operation, the way this industry has grown to the present moment, certainly suggests that it is not in the hands of the great corporations who are trying to take advantage of some tax loopholes, which circumstances, I admit, have existed, for which our industry has recommended, as the Senator from Nebraska has pointed out, some ways to close the loopholes.

I thank the distinguished chairman.

The PRESIDING OFFICER. The question is on agreeing to the unanimous-consent request of the Senator from Louisiana.

Is there objection? The Chair hears none, and it so ordered.

The Senator from Montana is recognized.

Mr. McGEE. Mr. President, I understand that I have the floor.

Mr. METCALF. Mr. President, the senior Senator from Wyoming has the floor. The purpose is to engage in a colloquy after which the unanimous-consent agreement can go into effect.

The PRESIDING OFFICER. The Senator from Wyoming did have the floor, but under the unanimous-consent request the recognition by the Chair of the Senator from Wyoming was rescinded.

Mr. METCALF. Mr. President, I am delighted to yield to the senior Senator from Wyoming for the purpose of asking questions.

Mr. McGEE. Mr. President, am I not correct that when I yielded for the unanimous-consent request, I had the floor?

The PRESIDING OFFICER. The Senator from Louisiana incorporated in his request the fact that the previous recognition by the Chair of the Senator from Wyoming be rescinded.

Mr. McGEE. Mr. President, I understand the parliamentary situation now.

The PRESIDING OFFICER. The Senator from Montana is recognized.

Mr. METCALF. Mr. President, I yield to the senior Senator from Wyoming for a series of questions and observations.

The PRESIDING OFFICER. The Senator from Wyoming is recognized.

Mr. McGEE. Mr. President, I thank my friend the Senator from Montana and I join my colleague, the Senator from Wyoming, in paying tribute to the Senator from Montana (Mr. METCALF) for his thoughtful pursuit of many of the troublesome issues at stake on this issue.

I hesitate to venture into the field of farming and livestock because I am not a farmer. I am a professor. I do not own a single head of livestock of any kind. My concern with the amendment comes from the conversations and the conferences I have had with the livestock people in Wyoming. My colleague from Wyoming (Mr. HANSEN) is a professional in the business. I could not pretend to have the sense of perspective or history that he has about this subject. But I am moved by the fact that in our assemblies with the cattlemen and with other livestock people in the State, they seem uniformly enthusiastic whenever one point is suggested: "Would it help or hurt your business if you were to keep the tax-loss boys out of the cattle business?" I have yet to hear a boo in response to that question from any cattlemen's association. One hears nothing but the strongest of ovations.

The question that arises is: Does the Metcalf amendment do that without exacting some other price? That is the issue that has been expertly raised by my colleague from Wyoming this morning: whether we are complicating the the problem rather than simplifying the problem.

My interest in this colloquy that I have requested is to try to unravel from the pending amendment the elements that are relevant to this problem, and this, I think, I am competent to do. Therefore, I should like to ask the Senator from Montana to return to the question of land values and the general assumption that is made that because of the injection of tax-loss capital funds into the ranch and farm business, the appreciation of land values has indeed become an unmitigated blessing to the average individual who is trying to make it on his own in agriculture.

Mr. METCALF. I, too, am not a farmer, but I have been concerned with tax-loss farming. Just as the senior Senator from Wyoming has experienced in his State, so also in my State many farmers are concerned by the inflated values that result from industries such as Oppenheimer, Charalois Industries, Black Watch Farms, and others, all of whom are in the tax-loss farming business.

But I do want to correct one statement before answering the senior Senator's question. The senior Senator's junior colleague from Wyoming (Mr. HANSEN) said he believed that most of the farmers in America are opposed to my suggestion, and that only a handful—I think he said about 5 percent—favor it. I shall not enter into a numbers game on that point. However, I repeat that the great farm organizations of America—the National Farmers Union, the American

Farm Bureau Federation, the National Grange, the National Farmers Organization, the National Council of Farmers Cooperatives, the National Association of Wheat Growers, the Cooperative League of the United States, the National Association of Farmers Elected Committees, Farm Land Industries, Midcontinent Farmers Association, and the National Catholic Rural Life Conference—all have supported S. 500, which is the text of this amendment, specifically by name, and have come out in support of the Metcalf amendment. This includes most of the farmers of the United States who are members of that organization. The National Livestock Tax Committee, which is hand and glove with Oppenheimer Industries, the National Cattlemen's Association, Oppenheimer Industries, and the American Welfare Association all testified against it.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. METCALF. I yield to the junior Senator from Wyoming.

Mr. HANSEN. Mr. President, I recognize that I am denied the opportunity to respond because of the time limitation imposed by the distinguished chairman of the Finance Committee.

Mr. METCALF. The junior Senator from Wyoming has the opportunity to respond now.

Mr. HANSEN. May it not go unnoted that I do not agree with the statement made by my distinguished colleague.

Mr. METCALF. As I have said, I am not going to enter into a numbers game. I am not certain about the number of members of that organization and the number of members of the organization named on the other side, but the vast majority of legitimate farmers are in support of this proposal.

As to the question about what happens to inflated farm prices as a result of the invasion of the farm industry by these Eastern or Hollywood tax loss farmers, the junior Senator from Wyoming said that a farmer does not want an inflated value when he has to pay taxes on it.

Mr. McGEE. I did not say that.

Mr. METCALF. The senior Senator's colleague from Wyoming (Mr. HANSEN) said that. In his speech, the junior Senator from Wyoming said that a farmer does not want to have to pay inflated values when the tax values are higher, and he does not want to have to pay estate taxes, and he does not want to have to pay an inflated value when he buys his neighbor's farm. But that is most of the time.

Let me read what an actual farmer said in the testimony before the Finance Committee. He testified right after I testified. During the course of my testimony, I conceded that sometimes in a farm community this influx of tax loss farmers did bring an inflated value, and my measure would bring some of the farmland prices down.

Mr. McDonald, who was testifying for the National Farmers Union, said:

I just want to conclude by saying that there has been a good deal of discussion today; in waiting out in the hall this morning some people came out talking about the Senator from Montana——

He is referring to me——

wanting prices to go down, land values to go down, and they were laughing about it, and so forth, and I heard comments here today when I finally got into the room.

Then he said:

I just wanted to say, Senators, that I am perturbed a little bit by the opinion on the committee that an inflated land value is always of benefit to the farmer, at least some individuals think so.

I have here a study, I just happened to have it in this folder, the University of Minnesota, the Agricultural Economics Department made the survey, and they found that the recorded land purchases made in 1967, and in Minnesota there were 1,406 land purchases made by operating farmers, there were 246 made by investors. I assume those would be the people we have been trying to get after.

My point is this: that in this day of expanding technology, the farmer, if he is to compete and he is to survive, he must expand his land holdings, and in some areas the price of land is so high that the working farmer is unable to buy more land that he needs.

Now, the other side of the coin is that some corporations have come in, such as the Gates Rubber Company in western Colorado on a gigantic scale, and are undertaking to raise sugar beets among other things, and I am told by our people in Colorado that land out there is inflated, they tell me $120 an acre.

Well, the farmers out there don't like that because they are not planning to sell out. They would like to stay there. They would like to apparently buy more land. So that I would say this: that if the farmer wants to sell out, why, sure. If land is inflated, particularly if he is near a city, and I had a farm here near Washington some years ago. I sold that farm. I wish now I had waited. But I made a nice profit on it. But that is outside of agriculture, really.

The farmer who goes to the bank to borrow money, the banker wants to know what is the productivity of that farm, and will he be able to repay his loan, and so forth and so on. Senators, I just wanted to bring that point out. I do not think it is an unmixed blessing that land values are inflated.

Mr. McGEE. I thank the Senator for that response.

I think we ought to be mindful of a part of our problem in the West, as my colleague has so expertly detailed, and that is, if it were not for the inflated land values, many of our people would have been out of business long ago. They have been living off that inflated land value. But the question that it still raises in my mind is whether the inflated land price is fool's gold. They cannot see it inflated forever and stay in business. This is my concern, and it is why I raise the question. We could not have stayed in the business in Wyoming right now without that sharp rise in land values.

But we are living on borrowed time, as I see it. For that reason, I would hope that we would not surrender to the suggestion of the Senator from Nebraska (Mr. CURTIS), that we are already 50 years too late. I agree that we are 50 years too late, but I do not want to be caught being 51 years too late. What would be the consequence? The consequence would be that little guys who have tried to make a living from the land are disappearing in droves. One reason why they are disappearing in droves, is that they cannot afford the price to keep their land values and their land expansion at a rate equivalent enough to stay in business and still keep their loans to the banks under control. That is why they are going out of business.

I believe that inasmuch as we have delayed as long as we have about this matter, the time has come when we ought to make a genuine effort—which I think the Senator from Montana is trying to do—to draw some lines that may at least help the little fellow, who is steadily being pushed out of the market, to stay in the competitive agricultural field. It seems to me, from what has been suggested here, that we ought to have a second look at the consequences of a continually inflated land price and its impact on those who cannot meet the rate of that inflated land price.

Mr. HANSEN. Mr. President, will the Senator yield?

Mr. METCALF. I yield to the junior Senator from Wyoming.

Mr. HANSEN. I could not agree more with my distinguished colleague from Wyoming. It is true that land values have been inflated, and they are continuing to be inflated, and it is not the farmers who are inflating those land values.

My distinguished colleague from Wyoming and the rest of us in this Chamber yesterday added approximately $10 billion to that inflation. I voted against most of those amendments, because I am concerned, as everyone in this Chamber should be concerned, about the inflation that is wrecking America.

Mr. President, I would submit for the RECORD that I hope it will be rejected by the people of this country. If we are worried about inflation, do not start looking at the farmers and ranchers and say, "What happened to their land values?" Look right here where the trouble is coming from. If Senators want to stop inflating land values let us get this house in order and bring the budget into balance. Then, Senators will not have to worry about inflated land values.

Mr. METCALF. Mr. President, if Senators want to stop inflating land values today, in the next hour there is an opportunity to do so by voting for my amendment.

Mr. McGEE. Mr. President, I hope we do not interject these other matters which are controversial and which divide parties on both sides, in terms of impact. We have a real question that goes back at least 50 years—at least the Senator from Nebraska said it was 50 years—during which time we have had recession, inflation, deflation, and so on.

But the inflationary process continued in land values, and for the sake of some kind of orderly method, we have to examine the impact of artificially injected capital for those who are losing money in the farm business. It is an impact not only on the land values, per se, but also on the small farmers to keep pace with these rising values. This measure enables us to try to do something about it.

As I understand it, the land inflationary values we are speaking of are those directly traceable to those persons look-

ing for a tax dodge, and that it is in that category of direct impact that we have a chance in the measure offered by the Senator from Montana, to do something about it.

But I want to stress something with him in respect to other consequences. I know a lot of ranchers—many of them friends of mine—who benefit personally as individual ranchers, from leases with the Oppenheimer outfit and the Black Watch Farm.

Several Senators addressed the Chair.

Mr. METCALF. Mr. President, I promised to yield to the senior Senator from Wyoming.

Mr. McGEE. Mr. President, the statement I was in the process of making was that I am a very close friend to some recipients of the leases, of the kinds of organizations that my colleague has also sought to make some kind of case for in the record.

The problem is the transfusion of capital. The farmers I know who are my friends do not own shares of stock in Oppenheimer or in any other group, but some of them have been put in business by them on a leased basis, with the expectation to join in.

My question is: Would we not be putting those little fellows out of business because they were unable to set up farming endeavors on their own?

I would like to correct the record on that, if my colleague would be agreeable. No one is trying to carry water for Mr. Oppenheimer or for other groups. I was making a plea on behalf of the small farmer in Wyoming who has contracts with them—Oppenheimer and Black Watch—and, thus, has been able to enter the farm business.

They are the farmers who have the same interest as the junior Senator from Wyoming. They would like to be farmers in their own right, and they believe under this system Oppenheimer put together they get a chance, at risk capital with long-term rates, that will enable them to do so. I think that is commendable.

This is the reason for the question: How are we going to keep these recipients who need this help from going broke?

Mr. METCALF. Mr. President, my amendment would apply to the 14,000 so-called farmers from New York and Hollywood who have farm returns in the country; those who are responsible for the cover on the New York magazine of a man with a Hereford in his parlor because it saves him $6,000 a year in taxes.

I am trying to put Mr. Oppenheimer out of business; there is no question about it. I think the committee and the people of America feel they have taken unfair advantage and abuse of special farm accounting rules designed to ease the bookkeeping chores of legitimate farmers and ranchers.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. METCALF. I yield.

Mr. TALMADGE. Mr. President, I fully concur in what the Senator has stated. It has been abused; it has been a tax loophole; and, in my opinion the Committee on Finance put them out of business.

Mr. METCALF. I think they took a long step in doing so.

However, some of the reasons they need help from the man the senior Senator from Wyoming was talking about—Mr. Oppenheimer—is because of the competition, tax benefits, and the subsidies we pay outside people to come to Wyoming and open a farm and make a leasehold, as the Senator suggested.

That advantage will be taken away if Mr. Oppenheimer's tax benefits are removed; but in my opinion, and I know in the opinion of the National Farmers Union, the National Grange, and other organizations which testified, it will be offset by the fact that the competitive advantage will be restored to a farmer who can produce and earn money on his productive capacity instead of going out to compete against someone who can take a big tax loss on his cattle and benefit from his nonfarm income.

Over the distance, that farmer the senior Senator from Wyoming is talking about, as well as other farmers in the community, will benefit, and the benefit will redound to the entire farm community.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. METCALF. I yield to the senior Senator from Wyoming.

Mr. McGEE. I wish to underscore the suggestion I made a few moments ago that this transitional condition in inflated land values may, in fact, be "fool's gold." The sooner we can get this leveled off and under some kind of control, the sooner those people who intend to farm as farmers and those people who intend to make their living from the soil rather than as another device, will be protected in the endeavor. This is the point and this is a very important contribution to sustain, support, and underline the endeavors of the Committee on Finance in this regard.

My reservations about it simply involve its effect on those who desperately need this kind of capital long-range investment loan that the Oppenheimer group makes possible.

However, I think, as the Senator has said, far down the road, looking ahead, the consequences of the present trend can be not only to put the little rancher out of business, but the big rancher should read John Donne's volume "For Whom the Bell Tolls," for I suggest, "The bell tolls for thee because you are next."

In this whole process, the corporate groups, the tax loss groups, are certainly, and at a very rapid rate, taking over and all farm statistics in this country bear this out. If we believe there is a place in our economy for the small independent farmer; if we really believe that and not just make speeches on it to get votes back home, then we had better start doing something about it. This is one of the places to stand and make that contribution.

I thank the Senator from Montana for yielding to me.

Mr. METCALF. I thank the senior Senator from Wyoming very much for his comments. Before the unanimous consent agreement goes into effect, I want to yield to my good friend from North Dakota (Mr. YOUNG).

Mr. YOUNG of North Dakota. Mr. President, I am not a tax authority at all. I do not know whether this amendment will be a perfect answer to an evil that is taking place in this country today where outside corporate interests are taking over the farming business. This to the extent that there is little land available now for young and new farmers to buy. Many farmers have small units too small to be economic. They need any available land to enable them to increase their holdings.

I happen to be one Senator who has no other financial interests except in farming. I still have the same land I had when I came to the Senate. I am no longer in the farming business and I hold no stocks or other investments.

The main argument today seems to me that if this amendment passed land prices would be reduced. That would be a good thing if that were the case, but I doubt whether it would materially affect land prices. Land prices are much too high for the prices the farmers are getting for their commodities in order to make money.

About the only ones who are making any sizable profits are the ones who are making large profits in some other enterprise which enable them to write off a tax loss on their farming operations. The price of farm commodities is too low today for the present inflated prices of land.

Thus, if it would accomplish that one thing alone, to stop inflation of farmland prices, that would be well worth while.

As I said, in my case, I still have the same land I had when I came to the Senate. I could sell that land for more than twice as much as it is really worth. So I would be better off if the price of my land was double what it is now. It is already too high.

My opinion is that if we want to help the farmers we do not want higher land prices, if we want to help our young farmers on the farms, we should not have inflated land prices.

I remind the Senate that farm indebtedness is higher now than it has ever been in our history. That indicates, in itself, that something is wrong.

Mr. METCALF. Mr. President, I thank the distinguished Senator from North Dakota. All of us look upon him as the farm expert in this body. As a member of the Committee on Agriculture and Forestry his contributions in this field have been significant.

Now, Mr. President, I should like to yield the floor and have the unanimous consent agreement go into effect. I ask that the Senator from Georgia (Mr. TALMADGE) first yield time.

Mr. MANSFIELD. Mr. President, will my colleague yield me 1 minute on his time first?

Mr. METCALF. I am happy to yield 1 minute to my majority leader on my time.

Mr. MANSFIELD. Mr. President, I believe that the senior Senator from North Dakota (Mr. YOUNG), whom many of us look upon as the outstanding authority on agricultural matters in this body,

made a significant point when he stated that farm indebtedness in this country is at an alltime high. In contrast, the percentage of our farm population is decreasing all the time. I believe it is around 5 percent, or thereabouts, at the moment.

Furthermore, this indicates that the small farmer is going out of business and the corporate farmer is coming into operation, because he can get by on his own without any outside help.

It is true that land prices today are sky high and those who want to live on farms and ranches, who want to stay close to the soil, are being squeezed out.

That is where our taxes are coming from. Who is it that buys suits and clothes, shirts and shoes, and this, that and the other thing in the little towns depending upon the farm economy?

It is not the big corporate type of ranch, but the little rancher. He is the one who pays the taxes and keeps the economy going, week in and week out, year in and year out.

The amendment is a step in the right direction toward giving the small family size farmer and rancher a little consideration and protection.

I am all for it.

Mr. METCALF. I thank my colleague very much.

Mr. TALMADGE. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. TALMADGE. Mr. President, I was born and reared on a farm in Telfair County in South Georgia. I live on a farm just south of Atlanta at the present time.

I have gotten more genuine, soul-satisfying pleasure out of farming, and made less money, than anything I ever undertook.

Thus, I feel that I know something about the hazards of farming.

Farming is the greatest gamble we know of on the face of the earth.

It is, of course, the most important business we have, because it produces all the food and fiber that we utilize, not only in this country, but we also ship a great deal of it to large portions of the world.

Many things can happen to a farmer to cause him to lose the result of a year's labor.

He can have too much water or too little water, and he loses the result of a year's labor.

The Weather can be too hot or it can be too cold, and he will lose the result of a year's labor.

There will be new diseases, new insects, a new pestilence, and the farmer will lose the result of a year's labor.

If nature smiles on the farmer, then everything goes well; but there can be a drastic drop of the market price at harvest time and the farmer will lose the result of a year's labor.

The farmer may find labor unavailable at harvest time and he will lose the result of a year's labor.

Thus, Congress has to be extremely careful and cautious not to write a tax bill that will penalize the farmer and the farmer alone to the exclusion of every other segment of our society.

Mr. President, I would be the last to deny that there have been favorable tax laws benefiting farmers that have been utilized by tax dodgers to take into consideration some of their idle capital.

The Senator from Montana (Mr. METCALF) served on the Finance Committee with me for several years. Several years ago, he started to fight to try to close the loopholes then existing and which were being utilized by Wall Street stock brokers, bankers, lawyers, doctors, and others.

Those loopholes were two in number.

First, if one had a large sum of capital he could buy a rundown farm and plow additional sums of capital into building up the productivity and value of the farm. After he had increased the original value of the farm several times, he could sell that farm, and the profit he had on it would be a capital gain.

That was loophole No. 1.

What was loophole No. 2?

Farm animals are subject to depreciation, just as other capital used in business is subject to depreciation. Some people found out that they could use that depreciation for an enviable tax racket. There was a group called the Black Watch Farms, or something of that nature, which advertised in the Wall Street Journal and urged professional people and business people with large sums of capital to buy cattle that they would never see, to be placed on farms that they had never visited. They would depreciate the cattle and, at the same time, charge off maintenance, feeding, and the keeping of the cattle as an ordinary business expense. Then, after they had depreciated the cattle as much as they could, they would sell it and take a capital gain.

Mr. President, the distinguished Senator from Montana (Mr. METCALF) has been trying to close these two loopholes, and I applaud him for it. He started that fight and the Senate Finance Committee finished it.

I hold in my hand the committee report. Senators have a copy of it on their desks.

On page 95, under the title "Farm Losses," the committee bill will permit farmers with more than $50,000 nonfarm income to take losses in full up to $25,000 a year, but these farmers may deduct only one-half of the amount of the farm loss in excess of $25,000. That should put the tax loss farmer, the kind I have been talking about, out of business.

Then, on page 99 of the committee report, under the heading "Depreciation Recapture," gain on the sale of livestock is to be treated as ordinary income to the extent that depreciation has been claimed prior to the sale of the livestock. I think that adequately puts the Black Watch crowd out of business.

On page 100 of the report is reference to the holding period for livestock. The 1-year holding period is extended to 2 years. There are many others.

Exchange of livestock of different sexes—that was another racket frequently engaged in. Some individuals wanted to build up herds, so they exchanged males for females. Females could have more calves; males could not. The committee provided that such an exchange is taxable.

Then, at the bottom of page 102 of the report, is reference to hobby losses. It is provided that if a taxpayer engages in farming without a reasonable expectation of profit he cannot deduct any farm losses at all from nonfarm income.

On page 105 of the committee report there is reference to gain from disposition of farmland. It provides that if anyone buy a rundown farm and spends large sums of additional money building it up and then sells that farm for a profit, the Government of the United States will recapture these expenditures as ordinary income. He is compelled to hold his farm for 10 years; otherwise he cannot take advantage of that.

The Committee on Finance wrote these and other loophole-closing provisions into the bill. I think they are adequate. I think they will do the job. I think the amendment of the Senator from Montana goes too far. I think it will penalize honorable people who are not trying to make a racket out of their farming operations.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. HOLLAND. I thank the Senator for what he is saying. I thank the committee for what it has done. I agree with the Senator that this is a great step toward taking care of improper practices. If it is proved later this is not sufficient, we can do more.

But I want to call attention to one thing. It seems to me the amendment of the Senator from Montana is one that strikes at a very precious American right, and that is the right of an individual to engage in as many honest callings as his individual ability permits him to do. It appears as though our friends think that only bankers and lawyers go into agriculture. In my State it is the other way. The folks who have made good in farming, particularly in orange growing, particularly in sugar production, particularly in the cattle business have come in and taken over banks, they have taken over housing and subdivisions, they have taken over manufacturing enterprise. I am for it, because I think America is a land of opportunity, where people are given a chance to engage in as many useful occupations as they can.

I do not like to be personal, but I remember the father of the distinguished Senator from Georgia, who was almost a contemporary of mine, when he was a farmer, and when he later became Secretary of Agriculture of his own great State and later its Governor. I am glad he had the opportunity to go somewhere else and to do other things, I am glad my distinguished friend from Georgia has done the same thing.

In my own town there is a banker who began his career as a simple orange grower. He has gone up and has gone into other things.

I do not believe in taking a position here which limits opportunity, which

limits initiative, and does not permit a man to go wherever his ability, character, and industry will take him. I think this amendment is just such a measure that might go just that far. Therefore, I oppose it vigorously.

Mr. GORE. Mr. President, will the Senator yield?

Mr. TALMADGE. Let me first make a very brief observation, and then I will yield.

Mr. GORE. I wanted to respond.

Mr. TALMADGE. Certainly. I yield to the Senator from Tennessee.

Mr. GORE. I thank my distinguished friend.

Mr. President, I think my distinguished and certainly able friend from Florida misses the point here. The issue at hand is a use by nonfarmers of a tax provision specifically found by the Congress in the past, and by the committee in this instance, to be practical and needed for the average farmer. It is not the theme or purpose of the committee, or in my opinion of the junior Senator from Montana, to limit the opportunity of a man in America to engage in the free enterprise system or to be an entrepreneur.

This tax law and the effort by our committee and the junior Senator from Montana is to limit, if not eliminate, the shall I say misuse of a provision specifically designed for the benefit of a practical farmer by one of large income who is in fact not a practical farmer.

I wanted to say that, and if the Senator from Georgia will yield one step further, there is something I have been thinking about and have been wanting to say. I hope the distinguished junior Senator from Georgia will more frequently occupy the center of this Chamber. I have listened to him this morning and upon many other occasions. I know of no man in this body who speaks with more perfect grammar, with more eloquence, and in a more driving and convincing manner than the distinguished Senator from Georgia.

Mr. TALMADGE. The Senator from Tennessee is far more generous in his tribute than I deserve, but I deeply appreciate what he has said.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. HOLLAND. First, I agree with the Senator from Tennessee as to the character, standing, and stature of the Senator from Georgia. We all appreciate him.

Second, I want to make it clear to the Senator from Tennessee and the Senator from Montana that in my State it is frequently the other way around when it comes to tax losses. A freeze comes along that strikes down the annual income of the citrus grove, knocks down trees, so that they will not come to bearing again for 2 or 3 or more years, or a storm destroys a large part of the livestock or equipment of a larger grazier. Who would say that such loss should not be claimed when the man has another business also?

It is a one-way street that is sought to be set up here. So far as my State is concerned, there are just as many times when we have losses by freeze, flood, or storm that come upon the farming person who happens to be industrious enough to have another business so he can turn the loss over to that business. And when the farm is prosperous the taxpayer can turn to farm profit to offset losses elsewhere.

This is a two-way street, and apparently my friends do not understand that is the case.

I thank the Senator for yielding.

Mr. TALMADGE. I thank the Senator from Florida.

We come now to the amendment of the Senator from Montana. He inserts some language in his amendment that the Finance Committee inserted in the bill, but there is a far greater difference in the effect of the amendment, because the Senator's amendment will not permit any farm deductions against any nonfarm income in excess of $15,000 except what he indicates here—taxes, interest, the abandonment or theft of farm property, or losses of farm property arising from fire, storm, or other casualty, losses and expenses directly attributable to drought, and recognized losses from sales, exchanges, and involuntary conversions of farm property.

That is the sum total of all of them. The taxpayer cannot even deduct for farm labor.

What does the Internal Revenue Service say about casualties?

I hold in my hand the United States Master Tax Guide, and I read this particular portion:

> The Commissioner takes the position that a casualty loss deduction for termite damage is not permitted because the suddenness test for a casualty loss is not met unless scientific data indicates that termite damage does not occur until at least two years following the original infestation of the property. But on the other hand, some courts have allowed the deduction.

There you are, Mr. President—suddenness. What does one do if he has a herd of cows and mastitis is found in one of the cows? It does not suddenly sweep through the whole herd. It may take 5 years. That is not "sudden."

Suppose some of one's high priced registered cows are sold for hamburger, and the person loses $500 a cow. He cannot deduct a casualty loss, because it is not "sudden."

Black leg, as the Senator from Tennessee knows, does not kill cows all at once. Is that "sudden" enough to deduct for a casualty loss?

So you could have a whole herd of beef cattle or dairy cattle wiped out, and could not even deduct it, under the Senator's amendment. I think that is too far for the Senate to go.

I think that the committee has eliminated the tax racket that now goes on in farming. I think this is as far as we ought to go at the present time. Later, if we find more loopholes coming to light, I am sure that the Senator from Montana, the Senator from Tennessee, the Senator from Delaware, and others who have worked on this matter for a period of many years will come forth and try to take adequate steps to plug these loopholes.

I hope the amendment will be rejected.

The PRESIDING OFFICER. Who yields time?

Mr. METCALF. Mr. President, I yield myself 5 minutes.

I add my refutation to that which the Senator from Tennessee has made to the remarks of the Senator from Florida. Anyone can go into any business under this legislation. This is not a limitation on anyone going into business, as long as he will comply with the regular accounting system of the Internal Revenue Service. It simply provides that the very special privilege that we give to the farmer to go on a cash basis instead of an accrual basis cannot be abused by people who seek to turn their nonfarm income into a special asset.

We have said that the farmer is in a special and exclusive sort of position, and we have tried to give him appropriate special benefits; and 3 million farmers are taking advantage of those benefits. The House of Representatives has passed a bill that provides for a very complex accounting system, but they have tried to meet the abuses. The Senate Finance Committee, as pointed out by the very able Senator from Georgia, has, I think, made a much better approach.

But while they have adopted the language of my amendment and the language of S. 500, they have fixed the nonfarm income limitation so high that it affects only 3,000 people in the United States, and will bring in total estimated revenue of only $20 million. My bill would bring in revenue of $205 million, and affect 14,000 people. That is largely the difference we are talking about.

We are talking about the man who is abusing the special tax accounting methods that we want to preserve for the rank and file farmer, the competitive farmer, who has only an allotment of 68 acres on the public domain. We are trying to preserve that for him, and at the same time correct the abuses that have grown up for the wealthy, nonresident corporation or high income tax operator, who translates high income taxes into capital gains or farm losses.

I commend the committee. I think they have taken a long step. They have adopted the language, almost word for word, in the kind of refined amendment which I have submitted. But then they have taken a step backward by putting the limit at $50,000—so high that even the Secretary of the Treasury's representatives said that this is an unrealistic definition of what is a farmer and what is not a farmer.

Mr. HUGHES. Mr. President, will the Senator yield?

Mr. METCALF. I yield the Senator from Iowa such time as he may require.

Mr. HUGHES. I commend the distinguished Senator from Montana for presenting this amendment this morning. I wish at the same time to compliment the distinguished Senator from Georgia for the very eloquent presentation he has made and to commend the Committee on Finance, for their careful attention to the important effects which their action has had and will have on the farming industry of this country.

In my lifetime, and perhaps in the lifetimes of all of us, we have seen changes

in the agricultural industry in America that are almost inconceivable. Over the last 45 years, in my own State, we have been undergoing a continuous agricultural revolution. We are still experiencing, in Iowa, a migration of approximately 5,000 people a year from the farms to the towns and city communities. The average size of the farms, in recent years, is double what it was some 25 years ago. A couple of years ago it was indicated that only one in every eight children born on a farm in the State of Iowa would—or, for that matter, could—remain on the farm throughout his lifetime; whereas, when I was a boy, if a father and mother had four children on the farm, and three of them were sons, you could reliably be assured that those three sons could and would stay in the farming business. Today, in Iowa, that is an impossibility. There just is not room for those young people in agriculture in my State.

My State is one of the greatest agricultural States in the country. Its productivity is well known all over the world. Not only in crops, but certainly in hogs and cattle, it has ranked very high.

Immediately after World War II, I spent 7 years of my life buying livestock, selling fertilizer, and dealing in farm enterprises in my own locality of northwest Iowa, and I saw such changes take place that it was almost unbelievable.

Later on, as I became Governor of that great State and observed the changes that were continuing, I found that we were losing, or were in danger of losing, some of the basic agricultural industry that we had. We lost the poultry industry, as the distinguished Senator from Georgia well knows. Most of that migrated from the upper reaches of the United States to the southern part of the United States. Now we are in the process of losing, and have great fear of losing altogether, our great cattle feeding industry, because of changes that are taking place in the United States in feeding and transportation patterns.

It is almost an impossibility in my State, any more, for a young man to begin farming, unless his father is a farmer who can furnish the equipment, the money, and the land to begin on. If a young man were to come back from the service today and want to start farming, he would simply be incapable financially of doing it without great financial resources from his own family.

As a result, I am greatly concerned about the problems of landownership. I am not against landownership by those who are not engaged in farming; certainly not. I thoroughly agree with some of the comments of the distinguished Senator from Florida about the great American right to own, to progress, to develop, and to be and do whatever we have the capacity to be and do. But I think that includes the right to be a farmer, if we have the desire to be a farmer. I think it includes the right of the family farmer in America to survive. I think there is grave question in America today whether that family farmer can survive. Land prices have increased greatly. We have seen so many abandoned farm houses and barns standing around the countryside in my State that at times I have felt impelled to start a campaign to get rid of those buildings, because they have gradually deteriorated and have not been removed. Today, one of my greatest concerns is that we may not be able to meet the agricultural and industrial needs of my State and continue family farmownership. With this great transition in the farming industry taking place, and the great problems we face, it is going to require all the dedication we have.

I think one of the things that can help us to round this corner is to take some of this tax-loss privilege away from those whose primary interest is nonagricultural, and who have been dealing through the farm programs of our Government—and I do not blame them for that; they have every legal right to do it—with the simple objective of accumulating greater capital and greater profit, and who, I am afraid, are dstroying the capability of the young people in this country to stay on the farm.

Mr. President, it is for that reason that I support the amendment of the distinguished Senator from Montana, and I hope the Members of this body will give it their most careful consideration.

I thank the distinguished Senator from Montana for yielding.

Mr. METCALF. I thank the Senator from Iowa, who is experienced with the impact of this abuse of special farm accounting procedures.

I yield to the Senator from Maine, to make a statement.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. METCALF. Mr. President, I had promised to yield first to the Senator from Maine.

The PRESIDING OFFICER. The Senator from Maine is recognized.

## VISIT TO THE SENATE BY SENATOR ALAN MacNAUGHTON OF THE CANADIAN PARLIAMENT

Mr. MUSKIE. Mr. President, I express my appreciation to the Senator from Montana for yielding to me on this matter.

Mr. President, I had the privilege of serving on the Campobello Park Commission, a unique creation of our two Governments, several years ago. Its function is to operate the Roosevelt Campobello International Park.

We took advantage of the fact this morning that the Senate was meeting to conduct a meeting of the Commission. I take a few moments to present a distinguished citizen of our neighbor to the north, the Dominion of Canada.

With me in the Chamber today is a distinguished Member of the Canadian Parliament. He has served as Speaker of the Canadian House of Commons and has served with many United States Senators in interparliamentary conferences over the years.

Mr. President, I take this opportunity to introduce to my colleagues the Honorable Alan MacNaughton, of Montreal, a member of the Canadian House of Commons.

Mr. METCALF. Mr. President, it was a privilege to yield to the Senator from Maine for that purpose. It is our privilege to have a distinguished Canadian parliamentarian here as our guest.

[Applause, Senators rising.]

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. McGEE. Mr. President, will the Senator yield?

Mr. METCALF. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Montana has 8 minutes remaining. The Senator from Georgia has 5 minutes remaining.

Mr. METCALF. Mr. President, I yield 3 minutes to the Senator from Wyoming.

The PRESIDING OFFICER. The Senator from Wyoming is recognized for 3 minutes.

Mr. McGEE. Mr. President, I thank my friend for yielding.

I do not wish to rehash all the dialog we have had in an extended way this morning. Suffice it to say that with all of the complications that now exist and those which have grown up haphazardly over the last half century affecting agricultural legislation, most of us on the floor always come back to the defense of the small farmer, the small family farmer. And I think that here we have a chance to put our actions where our Senate oratory has been for a long time.

Whatever else we say about the present practices, I applaud the noble efforts of the committee to slow down those practices.

The fact is that the net result of the tax-break process has been to make it possible for the farmers and ranchers who were relatively well off to eventually go out through the top, if that is their choice. But by artificially inflating land values it has almost completely prohibited any young, new potential rancher from coming in at the bottom and starting to build.

New opportunities for young beginners is the best hope for the future independent farming operations in this country. If that is indeed what the Senate wants, then let us do something to help. But, if we are going to turn it over to the corporation groups and the tax loss groups, then let us say so bluntly and directly and not equivocate with the people back home. If we really believe there ought to be small family farmers and that they have an important role in our country, I think it is important to support the amendment of which I am a cosponsor.

I underscore the committee's work and applaud the committee efforts to stop encouraging the rich to get richer, and for the committee attempts to bring some equity to those at the lower end of the economic scale.

Mr. METCALF. Mr. President, I thank the Senator from Wyoming.

I yield to the Senator from North Dakota.

Mr. BURDICK. Mr. President, I have had a few inquiries about the amend-

ment. One of the fears that has been expressed is that the amendment, if it is agreed to, may force farmers in the future to adopt another form of accounting for their farming operation.

I have been at a committee meeting this morning. I have not heard all of the debate.

Would the farmer have the same choice as those who are on a cash or an accrual basis?

Mr. METCALF. Mr. President, this will not affect the farmers who are on an accrual basis. I know that the Finance Committee has been confronted with this statement. Both the members of the Finance Committee and I are seeking an answer to the abuses of the special privileges we have for farm accounting.

We have tried to assure that the legitimate farmer will be permitted to continue to report on the cash report basis instead of the accrual basis.

It is the agreement on the part of all members of the committee and those who support my amendment that this would not affect that privilege of the farmers to continue to report as they have in the past.

Mr. BURDICK. Mr. President, under the present law, they can conduct their farm accounting on a cash or accrual basis.

Mr. METCALF. Anyone can adopt the accrual method and take any loss he wants.

Mr. BURDICK. Mr. President, can we be assured then that practice will not be changed in any way?

Mr. METCALF. The Senator is correct.

Mr. BURDICK. Mr. President, I thank the Senator. I will be pleased to support the amendment.

Mr. METCALF. Mr. President, I thank the Senator.

Mr. President, I yield next to the distinguished Senator from Idaho.

Mr. CHURCH. Mr. President, I have long been associated with the distinguished Senator from Montana in his efforts to amend the tax laws.

I know, from broad contact and experience with the farm situation in Idaho, that he seeks to put an end to the abuse which is seriously undermining legitimate farmers. I think it is high time that we do so.

I compliment the Senator, and am proud to be associated with him as a cosponsor.

Mr. METCALF. I thank the Senator.

Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Montana has 3 minutes remaining. The Senator from Georgia has 5 minutes remaining.

Mr. METCALF. Mr. President, would the Senator from Georgia care to yield time?

Mr. TALMADGE. Mr. President, I yield 2 minutes to the Senator from Iowa.

Mr. MILLER. Mr. President, I regret very much that I cannot support the amendment.

I would like the Senate to know that the Senator from Montana and I have been working in an effort to do something better about the problem than the Senate Finance Committee bill would do.

Both of us feel that the Finance Committee bill does not go far enough.

My concern over the pending Metcalf amendment is that I believe it is a little too harsh.

What it amounts to is that if a person has as much as $30,000 of nonfarm income, he cannot deduct any loss at all, because the amendment contains a provision that to the extent that nonfarm income exceeds $15,000, the $15,000 loss will be cut back dollar for dollar. So, if one has $30,000 of nonfarm income, that exceeds $15,000 by $15,000 and wipes out the maximum loss deduction by $15,000. I think that is too harsh.

Mr. METCALF. I wish the Senator from Iowa would make that plain. It wipes out the special loss reduction, but does not wipe out the loss reduction enumerated by the Senator from Georgia.

Mr. MILLER. I assumed that every Senator understood that.

The PRESIDING OFFICER. The Senator's 2 minutes have expired.

Mr. TALMADGE. Mr. President, I have promised to yield my remaining time to other Senators.

Mr. METCALF. Mr. President, I have some time remaining. I yield 1 additional minute to the Senator from Iowa.

Mr. MILLER. I thank the Senator from Montana.

I point out to the Senate that if this amendment should be rejected, the Senator from Montana and I have another amendment. It provides that any amount of loss over $20,000 will be carryover to be applied against net farm income in subsequent years, and there is no reduction of the $20,000 special loss because of the amount of nonfarm income. I think it is a much more equitable provision.

While the arguments in favor of this amendment are quite responsive, and I join in them, I believe the pending amendment is too harsh.

I want the Senate to know that there will be another amendment, if Members feel, as I do, that this one is too harsh.

Mr. TALMADGE. Mr. President, I yield 2 minutes to the distinguished Senator from Arizona.

Mr. FANNIN. I thank the Senator from Georgia and commend him for his explanation of what is involved.

I would have great sympathy for the proposal of the distinguished Senator from Montana if it would accomplish the objectives he seeks, but it will not. I am concerned about the agricultural industry of the Nation, about the small farmers and the large farmers.

I think that what we must think about and seriously consider are the kinds of programs that we can sponsor and foster that will help the American farmer and the American agricultural industry compete with foreign countries. We are now exporting to other countries jobs from every one of our other industries. One industry alone, the aircraft industry, is truly competitive in the world market.

The agricultural industry is moving out of our country into other countries more and more each day. We should all have tremendous concern about that. We must encourage investment in farming in the United States as well as take action to retain jobs in our other industries as well.

I am not in favor of loopholes. I want to be practical and consider the problem properly. The distinguished Senator from Florida realizes what is happening. I know that we have disagreed in some instances in this regard, but I feel that he has made some very good contributions in settling the problem we are discussing. We do have a very serious problem, and this legislation will accentuate that problem, not solve it.

So I feel that if this amendment is adopted it will be another barrier to our agricultural industry's competing with the other agricultural industries of the world. This amendment would seriously handicap the citrus industry and any orchard industry. I feel it is essential that this amendment be rejected, or we will be placing a further burden on our total agricultural industry in this country.

Mr. TALMADGE. I yield 1 minute to the distinguished Senator from Kansas.

Mr. DOLE. Mr. President, the problem of tax-loss farming is indeed crucial to any discussion of farm-related taxation. Our goal, as in any aspect of taxation, is to provide even and equitable legislation which makes allowances for legitimate needs, but insures fair contribution to our revenue structure.

I recognize that there have been some abuses of the current tax provisions applicable to deduction of farm-related losses against net income, and these abuses cannot be excused or tolerated. The Metcalf amendment, while directed toward the goal of eliminating these abuses, does not offer an acceptable solution to this problem. Although its application might end the abuses of farm loss deductions, it surely would severely and undesirably affect many legitimate farmers and ranchers who neither I nor my colleague from Montana desire to see burdened with further tax liability.

The Metcalf amendment takes an overly broad and statistical approach to the problem and ignores the realities faced by farmers and ranchers today. When need for increased capital expenditures and the dependence on off-the-farm income is increasing for all farmers and ranchers, the Metcalf amendment would discourage the input of fresh capital—especially in the case of those just starting out in farming and ranching—and would decrease the incentives to diversify income sources from off-the-farm activities.

Mr. President, I shall not go into the statistics of this matter in detail, but I would point out that testimony before the Finance Committee brought out facts of the latest census that some days of off-the-farm work were reported by 46 percent of all farmers and ranchers, and 32 percent reported more than 100 days of such work. The significance of this off-the-farm work to the small farmer is shown in the statistic that it generated over half the income of farmers having less than $10,000 in farm sales.

I do not feel the Metcalf amendment can be justified in its approach to tax-loss farming abuses because it would hurt

those whose interests it should be insuring.

I should like to ask a question. It has been stated that perhaps the committee bill does not go far enough and that this amendment goes too far. What about the bona fide farmer who suffers crop loss in, say, Kansas, and who, through no fault of his own, has oil production, has nonfarm income, either oil production or a gravel pit or something else? What happens with this bona fide farmer with nonfarm income—not the big corporation farmer, but the real farmers, because we have many in Kansas, Oklahoma, and throughout the Midwest?

Mr. METCALF. In the case of nonfarming, under my amendment, of over $30,000, he cannot take extended depreciation losses or the so-called losses that result from accounting methods, unless he goes to the accrual system.

Mr. DOLE. I do not mean a hobby farmer, but a genuine farmer.

Mr. METCALF. He cannot take the nonfarming profit and apply it to farm losses.

I do not think the Senator from Georgia was quite fair when he suggested that you could not take farm labor, and so forth, because we are talking about the totals at the bottom of the income taxes, the losses and the gains.

If it is one of the economic losses I have suggested, and that were read by the Senator from Georgia, and are in the bill now, it could be taken out of this oil income up to $100,000 or $200,000, unless it is one of the itemized losses as a result of taxes or drought or such things that are itemized there.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. METCALF. I yield 1 more minute.

If it is one of those things that result from soil conservation or result in conversion of current income into capital gain in the future, he could not apply that oil or timber or any other nonfarm loss to his farm income.

Mr. DOLE. But the Senator from Montana stated that at least the committee approach recognizes the problem and does adopt much of the language he suggests. The difference is in the amounts which can be deducted.

Mr. METCALF. There are some minor differences. Largely, the committee—and I am grateful to them—have adopted the language of S. 500. It is not my language. It is the kind of refined language that has been brought in by the circulation of other bills. Many employees of the Finance Committee helped me draft this language.

The principal point I am making is that the committee proposal touches only 3,000 people in the United States, and I do not believe that takes care of the abuses.

Mr. DOLE. I believe the Senator from Montana earlier said 3 million.

Mr. METCALF. Three million people file farm incomes under the current system, and the estimate from the Joint Committee is that the committee bill will apply to only 3,000 people. My proposal will apply to 14,000. The committee proposal will bring in $20 million, and my proposal will bring in $200 million.

Mr. HARTKE. Mr. President, as a cosponsor of the Senator's amendment, I would like to commend my distinguished colleague for the excellent work he has done in preparing this proposed legislation. The amendment is directed to correction of an area of tax inequity which has prevailed too long in our economy and which has compounded, if not in fact created, a serious economic and social condition which the Congress cannot in conscience ignore.

Today, many taxpayers, corporate and individual, in high tax brackets obtain substantial tax benefits from the operation of certain types of farms on a part-time basis. By electing the special farm accounting rules that are available to the ordinary farmer to ease his bookkeeping chores, these high-bracket taxpayers show farm tax losses which in no sense represent true economic losses, and which these taxpayers deduct from their business and other income in order to achieve substantial tax savings. Frequently, these so-called tax losses represent the cost of creating a farm asset, as for example, the cost of raising a breeding herd. When the herd is subsequently sold, the profits from the sale will be taxed at the lower capital gains rates, including that portion of the sales proceeds which represent a recoupment of the previously deducted expenses.

The benefits that high-income taxpayers receive from this tax inequity are substantial. In 1965, for example, according to the Department of Treasury, among taxpayers with less than $50,000 of adjusted gross income, total farm profits were $5.1 billion and total farm losses were $1.7 billion—a 5-to-2 ratio of profits to losses; while, on the other hand, among taxpayers with adjusted gross income in excess of $500,000, total farm profits were $2 million compared with total farm losses of $14 million, a 7-to-1 ratio in the opposite direction—that is losses to profits.

In these times of continuing and rising inflation, wealthy persons and corporations not only find farmland an investment which affords a hedge against inflation, but also offers a tax haven for reducing substantial tax liabilities. The resultant distortion of our farm economy is apparent: the price of land is no longer determined by economic conditions that prevail in a normal farm economy; the farmer who makes his living from his farm competes in the marketplace with wealthy farmowners who may consider a farm profit in an economic sense, unnecessary and even undesirable.

The bill provides what I consider a reasoned and intelligent correction of this manifest inequity. Under it farm losses would be permitted to be offset against nonfarm income only up to $15,000 for those whose nonfarm incomes do not exceed that amount. Accordingly, persons engaged in farming while at the same time holding down a part-time job are not affected by this measure. For those with nonfarm income in excess of $15,000, the amount against which the farm losses may be offset is reduced dollar for dollar. Persons with nonfarm earnings over $30,000 cannot offset farm losses against their income.

To permit this inequity to continue can only serve the interests of a wealthy few. This inequity not only violates our concept of fundamental fairness in tax treatment so essential to public confidence in our tax structure, but also undermines our farm economy to the detriment of the small family farm and the small farmer. I am glad to add my voice in support and in cosponsorship of this measure to remove this inequity.

Mr. PEARSON. Mr. President, revision of the Internal Revenue Code so as to control the growing practice of tax-loss farming is one of the more important aspects of the overall tax reform effort in which we are now engaged.

It needs to be emphasized, of course, that we do not seek to prevent persons who make their living primarily from nonfarming sources from investing in agriculture for economic purposes. However, we do seek to discourage persons outside of agriculture from investing in farm and ranch enterprises primarily for tax purposes.

Outside investors have been able to do this by taking advantage of the special accounting practices which have been granted the working farmer and rancher who generally find it impossible to maintain the more sophisticated accrual accounting system.

We want to correct the abuse of tax-loss farming without, of course, hurting the ordinary working farmer and rancher and without denying others the freedom to invest in agricultural enterprises providing they do so for economic rather than tax reasons.

I originally supported the tax-loss bill introduced by the distinguished Senator from Montana (Mr. METCALF). This was one of the earliest corrective proposals made after the growing practice of tax-loss farming became rather generally apparent.

However, today I am voting to support the proposals of the Senate Finance Committee. They have studied this problem carefully and it seems to me that they have come up with a rather impressive list of corrective provisions which I believe will go a long way toward correcting the abuse of tax-loss farming, without generating other unintended and unforeseen inequities and difficulties.

Mr. TOWER. Mr. President, I shall vote against the adoption of amendment No. 315, the so-called farm loss amendment.

Quite frankly there has been a great deal of comment about this amendment, including arguments both pro and con which have been expressed to me by my constituents in Texas. Both sides have had valid preferences and objections because it will not affect all agriculture as a bloc in the same manner. The proponents of this amendment contend that present tax statutes encourage wealthy nonprofessionals to dabble in agriculture at the expense of the ordinary taxpayer. The implication is that "hobby farmers," as they are called, are thus able to pursue dilettante pastimes without contributing anything to society, meanwhile charging the public with their farm losses through intricate bookkeeping procedures.

This may be picturesque, but it is inaccurate.

I think particularly of the costly and time-consuming procedures for developing a herd of breeding cattle or the painstaking processes necessary for cross-breeding to develop new plant strains, which expenses are currently deductible as incurred.

I ask my colleagues to think, before they vote, what benefits to the American standard of living have emerged from such laboratories protected under present tax procedures. Then project what this has meant for the United States internationally, in terms both of revenue and prestige. If we erase these provisions we erase in proportion some incentive for agricultural research and development. I believe this means is proving a less expensive method of encouraging research and development than Government financed projects.

There is another reason why I will vote against the amendment, and I ask my colleagues to consider it before they cast their votes. The amendment, if adopted, would complicate for the farmer the keeping of financial records required for tax purposes and would necessitate the hiring of financial expertise, a burden today's hard-pressed farmer does not need.

It has been said, also, that the limitations provided in the amendment are too high, and that the amendment here is not properly aimed to meet its stated objective. In my opinion, the reasons which I have stated outweigh other considerations.

We must first consider the effect on agricultural research and the additional accounting responsibilities and burdens imposed on the Nation's hard-pressed farmers.

The PRESIDING OFFICER (Mr. McGOVERN in the chair). All time on the amendment has expired.

SEVERAL SENATORS. Vote! Vote!

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Montana. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GRIFFIN (when his name was called). Mr. President, on this vote I have a live pair with the Senator from Kentucky (Mr. COOK). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I withhold my vote.

The rollcall was concluded.

Mr. PASTORE (after having voted in the affirmative). Mr. President, on this vote I have already voted "yea," but I am willing to have a live pair with the Senator from Louisiana (Mr. ELLENDER). If he were present and voting, he would vote "nay." I have already voted "yea." Therefore, I withdraw my vote.

Mr. BROOKE (after having voted in the affirmative). On this vote, I have a live pair with the Senator from California (Mr. MURPHY). If he were present and voting, he would vote "nay"; if I were permitted to vote, I would vote "yea." I withdraw my vote.

Mr. BYRD of West Virginia (after having voted in the negative). On this vote, I have a live pair with the senior Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "yea." I have already voted in the negative. If I were permitted to vote, I would vote "nay." I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Alaska (Mr. GRAVEL), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), and the Senator from Texas (Mr. YARBOROUGH) are necessarily absent.

I further announce that the Senator from Indiana (Mr. BAYH), and the Senator from Nevada (Mr. CANNON) are absent on official business.

I further announce that, if present and voting, the Senator from Mississippi (Mr. STENNIS) would vote "nay."

On this vote, the Senator from Indiana (Mr. BAYH) is paired with the Senator from Arkansas (Mr. FULBRIGHT).

If present and voting, the Senator from Indiana would vote "yea," and the Senator from Arkansas would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

The respective pairs of the Senator from Kentucky (Mr. COOK) and that of the Senator from California (Mr. MURPHY) have been previously announced.

The result was announced—yeas 29, nays 50, as follows:

[No. 182 Leg.]

YEAS—29

| | | |
|---|---|---|
| Burdick | Jackson | Moss |
| Church | Kennedy | Muskie |

| Cook | Mundt | Symington |
| Ellender | Murphy | Yarborough |
| Fulbright | Russell | |

So Mr. METCALF's amendment was rejected.

Mr. TALMADGE. Mr. President, I move that the vote by which the amendment was rejected be reconsidered.

Mr. LONG. Mr. President, I move that the motion to reconsider be laid on the table.

The motion to lay on the table was agreed to.

## ORDER FOR ADJOURNMENT TO 9:30 O'CLOCK A.M., ON MONDAY NEXT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate completes its business today, it stand in adjournment until 9:30 o'clock a.m. on Monday next.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ORDER FOR RECOGNITION OF SENATOR MATHIAS ON MONDAY MORNING NEXT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that at the conclusion of the prayer on Monday, the distinguished Senator from Maryland (Mr. MATHIAS) be recognized for not to exceed 30 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

### UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, I ask unanimous consent that there be a time limitation of 20 minutes, with the time to be equally divided on two amendments to be offered by the Senator from Utah (Mr. BENNETT); and that there be 40 minutes, to be equally divided between the sponsor of the amendment and the Senator in charge of the bill, on two amendments to be offered by the Senator from New York (Mr. JAVITS).

Mr. MILLER. Mr. President, reserving the right to object, the Senator from Montana (Mr. METCALF) and I have a joint amendment on the very same subject on which we just voted. It was our hope that we could limit the time and discuss the amendment, since the Senate is already oriented to the subject; so that we would both hope we could offer the amendment next.

Mr. LONG. Mr. President, I ask unanimous consent that the Senator from Iowa (Mr. MILLER) be permitted to offer his amendment next, and that there be a time limitation of 20 minutes, with 10 minutes on each side on his amendment.

Mr. BENNETT. Mr. President, I will be happy to yield for that purpose, with the understanding that I will gain the floor at the end of that period.

The PRESIDING OFFICER. Is there objection to the several unanimous-

consent requests just made? The Chair hears none, and they are so ordered.

Mr. MANSFIELD. Mr. President, as I understand it, we now have five amendments pending, and on each there will be a 20-minute limitation of time to be equally divided; two Bennett amendments; two Javits amendments, and one Miller-Metcalf amendment; is that not correct?

The PRESIDING OFFICER. The Chair understands that the request was for the two amendments to be offered by the Senator from Utah (Mr. BENNETT) with 20-minute time limitation on each one.

Mr. BENNETT. Mr. President, 20 minutes for both.

Mr. MANSFIELD. That is right—and the same for the Senator from New York (Mr. JAVITS).

Mr. HOLLAND. Mr. President, will the majority leader yield?

Mr. MANSFIELD. I yield.

Mr. HOLLAND. This does not cut off amendments subsequent to that?

Mr. MANSFIELD. Oh, no.

Mr. President, to keep the record straight, the chairman of the committee asked and received unanimous consent that there be a time limitation of 20 minutes, with the time to be equally divided, on an amendment by the Senator from Iowa (Mr. MILLER), and the Senator from Montana (Mr. METCALF); two amendments to be offered by the Senator from Utah (Mr. BENNETT), and two amendments to be offered by the Senator from New York (Mr. JAVITS).

Mr. LONG. Mr. President, it might require more time on the second Javits amendment; but on the first one, 10 minutes to a side.

Mr. KENNEDY. Mr. President, reserving the right to object, do we expect to have rollcall votes on these amendments? Could we find out? We have meetings going on. We are in the final executive session on an important measure of the administration, and we are voting on amendments now, and I think we should find out at this time.

Mr. MANSFIELD. I believe that the Bennett amendments will be accepted. So far as the Senator's meeting is concerned, that is right next door and we can give him immediate notice to get back into the Chamber so that he will not be caught short. I do not know whether the Senator from Iowa (Mr. MILLER) wants a rollcall vote on his amendment.

Mr. MILLER. Yes, I do.

The PRESIDING OFFICER. It is the understanding of the Chair that there will be 20 minutes on each of the five amendments, with 10 minutes allotted to a side.

AMENDMENT NO. 359

Mr. MILLER. Mr. President, I call up amendment No. 359 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. MILLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

On page 189, strike the portion of line 24 following the word "farming", and on page 190 strike line 1 and the portion of line 2 preceding the second comma.

On page 190, strike lines 9 through 12, inclusive, and insert in lieu thereof the following: "(A) $20,000, or (B)".

On page 190, line 24, strike "$50,000 and".

On page 190, strike line 25 and insert in lieu thereof the following: "$20,000 amount specified in subsection (a) shall be $10,000 for each".

On page 191, line 1, strike all preceding "The".

On page 191, line 9, insert after the word "inventories" the following: "valued at fair market value".

On page 192, line 17, strike "one-half of".

On page 193, strike lines 1 through 4, inclusive, and renumber the succeeding paragraphs on pages 193 and 194 accordingly.

On page 193, line 22, strike "(except for purposes of paragraph (1))".

On page 194, line 23, after the word "PARTNERSHIPS" add the following: "AND ELECTING SMALL BUSINESS CORPORATIONS".

On page 194, line 24, insert after the word "partnership" the following: "or an electing small business corporation as defined in section 1371(b)".

On page 194, line 25, strike "of such partnership".

On page 195, line 1, strike "in such partnership".

Mr. MILLER. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

Mr. MILLER. Mr. President, I have been concerned for several years now about the problem of nonfarmers writing off losses from farming operations against their nonfarm income. I first introduced a bill on this matter in the 90th Congress and I reintroduced it again this year. Earlier this year I testified before the House Ways and Means Committee on this subject during their hearings on tax reform.

Mr. President, I was very pleased when I learned at the beginning of this session, that the House Ways and Means Committee was going to consider the question of whether, and to what extent, farm losses should continue to be allowed as deductions against nonfarm income. I believe the time has come when the Congress should no longer drag its feet in amending the Internal Revenue Code to put a stop to the use of losses from farming operations as a tax avoidance scheme.

Tax-loss farming should be curbed because it poses unfair competition to the family farmer and, furthermore, results in annual tax revenue losses running into the millions of dollars. As the tax law is now written, the family farmer is forced to compete against many individuals and corporations who write off losses from farming operations against high tax bracket income from nonfarm operations. This competition is unfair.

For example, a top income bracket taxpayer can, using proper planning, convert $1 of loss into 70 cents—77 cents with the surtax—of tax savings; and then, by selling off his farm assets lock, stock, and barrel, realize long-term capital gain of $1 with maximum tax of 25 cents.

The extent of these tax loss writeoffs is reflected in a study of 1966 income tax returns by the Internal Revenue Service which shows that 75 percent of the 4,778 individuals who had farm operations and incomes over $100,000 deducted $72 million in farm losses against their other income.

A more complete breakdown of high income taxpayers, whose returns included farm schedules shows:

Millionaires: Of the 103 involved in farming operations, 15 showed a net profit and 88 showed a net loss;

From $500,000 to $1,000,000: Of the 228 in this bracket, 27 showed a net profit and 201 or 88 percent showed a loss;

From $200,000 to $500,000: Of the 1,104 farm schedules, 209 showed a net profit and 895 or 81 percent showed a loss;

From $100,000 to $200,000: Of the 3,343 farm schedules, 986 showed a net profit and 2,357 or 70.5 percent showed a loss; and

From $50,000 to $100,000: Of the 14,202 farm schedules, 5,622 showed a net profit and 8,580 or 60 percent showed a loss.

A U.S. Department of Agriculture report, released about the same time as the Internal Revenue Service study, discloses that nonfarm business income was reported most frequently by those with the largest farm losses. Although the USDA report was based on 1963 income tax returns, it shows the depth of the problem, which is even greater today. Individuals with farm losses reported nonfarm income nearly twice as often as those with farm profits, and their nonfarm business income averaged more than twice that of persons with farm profits. Out of a group classified by the USDA report as "well off," comprising almost a quarter of a million individuals, approximately 111,000 reported farm losses and more than 38,000 reported farm profits of less than $12,000. Of the 66,000 individuals who were classified as "wealthy," more than two-thirds reported farm losses, with the average losses reported being $14,110.

A properly designed tax law is needed. Tax loss farming is detrimental to the regular farmer in that it tends to push up the price of farm land. Wealthy individuals and corporations bid up the price—not because they desire a farm to make a living for themselves and their families, but because they want to take advantage of a tax scheme. Higher property taxes eventually hit the neighbors. Furthermore, the fact that farmowners with nonfarm income in high income brackets may consider a farm profit, in the economic sense, unnecessary for their purposes puts the ordinary farmer at a disadvantage when competing in the market place. Because he does not have to depend on farm operations for a livelihood, the high income bracket taxpayer can demand less for his products than the regular farmer, who needs to make a profit to be able to stay in business.

If farm losses could not be offset against other business income, these multibusiness individuals and corporations would get out of farming or they would help fight for better prices and lower costs of production.

When the House provision dealing with farm losses was finally unveiled I was greatly disappointed. As it has been previously pointed out, the House bill would affect only about 3,000 returns and would produce only $5 million in 1970, $10 million in 1971, and $20 million annually thereafter. Thus, in my opinion, the House bill will not close this loophole.

I believe that the Senate Finance Committee improved the House bil' by eliminating the excess deductions account, which was very complicated and substituting a formula similar to the pending amendment. Unfortunately, the limitations are so high in the Senate Finance Committee bill that it also fails to close this loophole. For example, it would affect only about 3,000 returns and produce $25 million annually. This is just slightly more than the revenue which would be produced by the House bill once it is fully implemented.

Mr. President, the junior Senator from Montana and I believe that a more effective provision should be adopted, and this is reflected by the pending amendment.

Now, Mr. President, we have all heard the arguments about the problem, and I do not think there is much that can be added to what has been said so ably by Senators who have already spoken on the preceding Metcalf amendment. Senator METCALF and I have been working together to try to work up a proposal that would appeal to most Senators. I might add that our amendment would leave the Finance Committee bill pretty much intact.

What our amendment would do with respect to the loss allowed is to change the loss provisions allowed under the Finance Committee bill in this way: The committee would allow a farm loss deduction of up to $25,000, and any losses over and above that would be allowed to the extent of 50 percent.

I suggest that when we open up a loss deduction to the extent of one-half of all over $25,000, we have opened up a wide hole for persons engaged in farm loss operations. For example, in the case of a loss of $1 million, half of it could be written off over $25,000.

The Senator from Montana and I believe that is too much of a loophole. So what we have pending in the amendment is this provision: A loss up to $20,000 can be written off against nonfarm income, regardless of the amount of nonfarm income. If a taxpayer, engaged in farm operations, has $1 million of nonfarm income, say income from an oil well, which is what the Senator from Kansas suggested in his question during debate on the proceeding amendment, he could still deduct $20,000 of losses. Our amendment would, however, not permit farm losses in excess of $20,000 to be written off against nonfarm income.

Now if there is a loss over and above $20,000, our amendment permits this to be carried over and applied against net farm income in subsequent years.

As in the Finance Committee bill, there is an unlimited loss carryover deduction. There is an important difference between our amendment and the committee amendment, however. While the Senate committee amendment allows an unlimited loss carryover deduction, it provides that a loss carryover deduction can be applied only to the extent of one-half of the net farm income. Our amendment provides that the farm loss carryover deduction can be applied in full against future net farm income. Thus, I believe there is an improvement.

The amendment of the Senator from Montana (Mr. METCALF), the committee bill, and this pending amendment should be compared as to impact.

The committee bill would affect only 3,000 returns and would pick up $25 million.

As was pointed out by the Senator from Montana, the preceding amendment would affect 14,000 returns, to the extent of $205 million.

The pending amendment strikes a balance between the two and would affect 9,000 returns, to the extent of $120 million. Both of us feel strongly that the committee does not go far enough, and here is why:

The statistics show that some 3,000 returns by individuals in high income brackets—that is, to the extent of $100,000 of net income or more—have net farm losses on farm schedules that they file. We do not think that covering them is enough.

I would point out that our pending amendment gets down to the $50,000 to $100,000 bracket as well. That is where the additional 6,000 returns would come from. We think this is important to keep our regular farmers competitive and at the same time allow people who do have some nonfarm income to engage in farming operations on a prudent basis.

Mr. President, I reserve the remainder of my time.

Mr. LONG. Mr. President, the pending amendment would have the same objections to it that existed with regard to the Metcalf amendment, except that this amendment would remove the limitation contained in the Metcalf amendment which would limit the offset of income above $15,000 with the gradual limitation of the offset up to $30,000 of nonfarm income. In that respect, the amendment is not as objectionable to Senators who opposed the Metcalf amendment, but in other reasons is equally objectionable. For the reasons I have given, Senators who were opposed to the Metcalf amendment would be opposed to this amendment. We oppose the amendment.

Would the Senator from Georgia (Mr. TALMADGE) care to comment on the amendment?

Mr. TALMADGE. Mr. President, I have no additional comment to make. The committee acted on it. I outlined to the Senate what the committee did. I think it went far enough. I really have not had a chance to see the Senator's amendment, and I do not know what it provides.

Mr. METCALF. Mr. President, will the Senator from Iowa yield me 1 minute?

Mr. MILLER. Mr. President, I do not believe I need unanimous consent to modify my amendment. Is that correct?

The PRESIDING OFFICER. The Senator does need unanimous consent. The yeas and nays have been ordered.

Mr. MILLER. Mr. President, I am sorry to trouble the Senate like this, but I ask unanimous consent that the pending amendment be modified by the further proviso that on page 193, line 11, the word "disease" be inserted after the second comma.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and the amendment will be so modified.

Mr. MILLER. Mr. President, I want to briefly explain what this does. The Senator from Georgia had a very valid objection with reference to the committee bill which talks about losses arising from storm, fire, or other casualty, in that "casualty" may not cover disease, because disease may operate slowly and "casualty" has been limited to a "sudden" happening. By putting in the word "disease" I think we have covered the problem pointed out by the distinguished Senator from Georgia.

I yield 1 minute to the Senator from Montana.

Mr. METCALF. Mr. President, I concur in the amendment of the Senator from Iowa. I am cosponsor of the amendment. I do not feel it completely takes care of the situation. My amendment was a better one. However, this is a compromise that the Senator from Iowa is talking about and that the Senator from Tennessee is talking about. They think perhaps my amendment was too sharp and went too far. At the same time, their comments were that the committee bill did not go quite far enough. I think this is a valid compromise.

I feel my amendment, the committee bill, and perhaps this amendment takes care of casualties. Whatever we do in conference, I hope we are sure that the kind of casualty as a result of disease that the Senator from Georgia was talking about is taken care of by the committee bill or the report, so that it is nailed down without an interpretation that some of the things we have been talking about will not become an economic loss when we all intended to safeguard economic losses.

Mr. MILLER. Mr. President, I yield myself 1 minute.

In response to the comments of the able chairman of the Finance Committee, I must point out that our amendment provides for a loss up to $20,000. I believe he stated it merely removed the $15,000 limitation contained in the preceding amendments.

We believe this amendment would be a little more liberal and more appealing. In the committee we talked about $15,000, $20,000, and $25,000. We think $20,000 is enough, particularly with the unlimited carryover deduction.

Mr. President, I am prepared to yield back my time.

Mr. LONG. Mr. President, I yield myself 1 minute.

Mr. President, the way the Senator has modified his amendment would make it somewhat less objectionable, but most of the objections which were made by the Senator from Georgia to the previous amendment would still apply to this amendment. Therefore, we will have to oppose it.

Mr. MILLER. Mr. President, do I have any time remaining?

The PRESIDING OFFICER. The Senator has 1 minute remaining.

Mr. MILLER. Mr. President, I want to emphasize that the Senator from Georgia had a valid point. I have had a lot

of experience with the distinction between a casualty loss and one which is not considered, for two purposes, a casualty loss, because it did not happen suddenly enough. That is why it is important to have the word "disease" written into the Finance Committee bill. That is what we have done, by the pending amendment as modified, so that, as in the example of the Senator from Georgia, if there were a loss, from disease, in a dairy herd amounting to $50,000, our amendment will protect that and will permit, in addition to that, $20,000 of farm loss if there is one. So I think we have covered the casualty and disease problems the Senator from Georgia pointed out.

Mr. COOPER. Mr. President, will the Senator yield? May I ask the Chair how much time the Senator has left?

The PRESIDING OFFICER. The Senator from Louisiana has 8 minutes remaining.

Mr. COOPER. May I have 3 minutes?

Mr. LONG. I yield 3 minutes to the Senator from Kentucky.

Mr. COOPER. Mr. President, as Senators know, my State of Kentucky, among others, is engaged in the breeding of horses—thoroughbreds for racing, saddle horses, show horses, and other registered purebred horses. I had thought the provisions that were agreed to in the committee were an improvement over the House bill, and that while they may present the horse industry with some difficulty they would not be punitive or destructive of the industry, as would the amendments offered today.

Kentucky is known throughout the country and throughout the world for the breeding and training of thoroughbred racing horses, of trotting and pacing harness racehorses, or three-gaited and five-gaited saddle horses—including, I may say, Tennessee walking horses—and other registered horses for show and pleasure.

There are now about 6 million horses in the United States. Approximately 1.2 million are registered horses—more than double the number a decade ago—over 800,000 recreational and over 400,000 commercial horses. Breeding, training, showing, and racing horses are a legitimate business. It is a business in which hundreds of millions of dollars have been invested. It provides a large volume of taxes to our country and to my State and provides wide employment.

In his testimony before the committee, Gov. Louie B. Nunn estimated that the horse industry was responsible for half the tourist business which brought $43 million in direct taxes to Kentucky, and that nationally breeding, training, and showing horses provides 150,000 full-time jobs. Of course, the business requires tremendous investment by individuals engaged in it. One never knows whether the work of 1 year will be successful. Actually, there is a cycle of at least 6 consecutive years from the time breeding stock is purchased until the offspring race and the results of that breeding are known and proved. It is a business with substantial risk, by its nature often involving investment over many years before that work is rewarded with success.

I want to call to the attention of the Senate the character and importance of this business to Kentucky and other States. In my opinion, the pending amendment would destroy that industry, as would the amendment proposed before it, which the Senate rejected. I think the committee amendments, on the other hand, will at least give the industry a chance. I hope that the Miller-Metcalf amendment will be rejected.

Mr. LONG. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All remaining time has been yielded back. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. PELL (when his name was called). Mr. President, on this vote I have a pair with the Senator from Louisiana (Mr. ELLENDER). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withhold my vote.

The rollcall was concluded.

Mr. NELSON (after having voted in the affirmative). Mr. President, on this vote I have a pair with the Senator from California (Mr. CRANSTON). If he were present and voting, he would vote "nay." If I were at liberty to vote, I would vote "yea." Therefore, I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from California (Mr. CRANSTON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Alaska (Mr. GRAVEL), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON) and the Senator from Texas (Mr. YARBOROUGH) are necessarily absent.

I further announce that the Senator from Indiana (Mr. BAYH) and the Senator from Nevada (Mr. CANNON) are absent on official business.

On this vote, the Senator from Indiana (Mr. BAYH) is paired with the Senator from Arkansas (Mr. FULBRIGHT). If present and voting, the Senator from Indiana would vote "yea," and the Senator from Arkansas would vote "nay."

On this vote, the Senator from Missouri (Mr. SYMINGTON) is paired with the Senator from Mississippi (Mr. STENNIS). If present and voting, the Senator from Missouri would vote "yea," and the Senator from Mississippi would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Vermont (Mr. AIKEN) is detained on official business to attend the funeral of a friend.

If present and voting, the Senator from Kentucky (Mr. COOK), the Senator from Arizona (Mr. GOLDWATER), and the Senator from California (Mr. MURPHY) would each vote "nay."

The result was announced—yeas 32, nays 47, as follows:

[No. 183 Leg.]

| Ellender | Russell | |

So the amendment, as modified, was rejected.

Mr. BENNETT. Mr. President, I send to the desk two amendments which are numbered A and B and ask that they be considered separately in that order.

I ask unanimous consent that reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered. The amendments will be printed in the RECORD.

The amendments ordered to be printed in the RECORD are as follows:

On page 148, after line 16, insert the following:

"(h) CERTAIN PRIOR TAXABLE YEARS.—In the case of a water users association which is organized to operate a reclamation project of the Bureau of Reclamation, Department of the Interior, and which is a membership organization described in section 277 of the Internal Revenue Code of 1954 (as added by subsection (b)(3)), no deduction attributable to furnishing services, goods, or other items of value to members shall be denied for any taxable year beginning before January 1, 1971."

On page 148, line 9, strike out the quotation mark and add:

" 'No examination of the religious activities of such an organization shall be made except to the extent necessary to determine whether such organization is a church or a convention or *association* of churches, and no examination of the books of account of such an organization shall be made other than to the extent necessary to determine the amount of tax imposed by this title.' "

Mr. BENNETT. Mr. President, in order to understand this amendment, it is necessary briefly tc review how the basic provision came to be included in the Senate version of the Tax Reform Act.

Back in 1916, Congress exempted "mutual ditch or irrigation companies" from income tax where their income was "solely" from members. Ultimately because nonmembers had occasion to utilize

the water and related facilities of these organizations, Congress later moderated the "solely" test to allow exemption where nonmember income was "incidental" to the operation of the company, that is, where not more than 15 percent of the organization's gross revenues came from nonmember sources. Eventually, because of the general need for water development and irrigation, many of these organizations came to supply services to nonmembers in excess of 15 percent of their gross income. Consequently, they lost their tax-exempt status.

When they lost this tax-exempt status, the Internal Revenue Service took the position that since the organization's basic operation of selling water rights to its members was not intended to be a profitmaking venture, the expenses incurred in supplying water to members were not ordinary and necessary business expenses and could not be deducted in excess of the amount of income received from members. It had won similar cases in situations where the corporations involved were not tax-exempt or non-profit organizations—*International Trading Co.* v. *Commissioner*, 27 F. 2d 578, and *American Properties Inc.* v. *Commissioner*, 262 F. 2d 150. In a recent case—*Anaheim Union Water Company* v. *Commissioner*, 321 F. 2d 253, C.A. 9th, 1963, which reversed 35 T.C. 1072—the circuit court disagreed with the position of the Commissioner and held that the expenditures made by the company to supply water to its members were "ordinary and necessary" because this activity did constitute the carrying on of a trade or business. The Commissioner has not acquiesced in the court's decision and has continued to take the position that the expenses are not deductible. There has been subsequent litigation and two cases are now being considered on appeal—*Bear Valley Mutual Water Company*, 283 F. Supp. 949 (1968)—on appeal, C.A. 9th; *San Antonio Water Company*, 285 F. Supp. 297 (1968), on appeal, C.A. 9th. There is also one case pending in the Tax Court and another in the District Court in Oklahoma.

The Senate bill adds a new section to the Internal Revenue Code—section 277—which would codify the position taken by the Commissioner of Internal Revenue. The provision would not become effective until January 1, 1971. My amendment would not change what is now contained in the bill.

What it would do, would be to allow water users associations organized to operate reclamation projects of the Bureau of Reclamation of the Department of the Interior to deduct all expenses incurred in supplying services and benefits to their members up to the effective date of the provision in the Senate bill. In other words, up until January 1, 1971, the expenses would be treated in accordance with the position taken by the taxpayers and approved by the courts in the Anaheim case. From January 1, 1971, on, the position expressed in the committee bill would apply.

I think this amendment is fair and feasible in that it would eliminate further litigation and uncertainty on the point until the provision contained in the reform bill becomes operative.

Mr. President, also at this time I would like to engage the chairman of the committee in a brief colloquy.

During the executive session in the Committee on Finance, I raised a question as to whether the effective date of the income averaging amendment contained in the bill would in any way upset the effective date approved by Congress when it enacted the income averaging provision in 1964.

I was concerned that an individual who had engaged in a long-term employment contract prior to the 1964 act might inadvertently be denied the long-term spread permitted under the present 1964 law with respect to a payment he receives after this tax reform bill becomes operative. I was assured in committee that the situation I described would not be affected by the tax reform legislation and that an individual who had embarked before 1964 on a long-term employment could average the income he received from that employment over the period the services were rendered. It was my understanding the committee report would be clarified on this matter.

Unfortunately, the explanation I expected to see in the committee report is not there, and so I am directing this inquiry to the chairman of the committee: Does the effective date of the income averaging provision apply in any way to restrict the application of the savings clause contained in the original income averaging provision in 1964?

Mr. LONG. No. It does not. The effective date of the tax reform act does not limit the operation of the savings clause contained in the 1964 act. An individual who began an employment under the savings clause could still report his income under that savings clause even though he receives it after the 1969 tax reform bill goes into effect.

As the Senator knows, the committee report was prepared with considerable haste. I regret that the language we had intended to include in the report is not there.

Mr. BENNETT. I recognize that this is a complete inadvertence. I appreciate the willingness of the chairman to straighten the matter out on the floor.

It is my understanding, as I am sure the chairman will confirm, that the two amendments I have offered are so limited in nature that the chairman is willing to accept them and take them to conference.

The first amendment refers to the problem of a water user's association organized to operate a reclamation project of the Bureau of Reclamation which is a membership organization described in section 277 of the Internal Revenue Code of 1954.

Under that code, in providing those services if more than 15 percent of the water users were not members of the association, it loses its tax exemption.

Mr. President, in the normal course of the operation of a number of these projects, this number has crept up above 15 percent. And that matter is being litigated.

The purpose of the amendment is to make sure that no deductions attributable to furnishing services, goods, or any other items of value to members shall be denied for any taxable years beginning before January 1, 1971.

This will be the matter in conference where it can be discussed carefully. I think it is so complicated that it should not be debated on the floor of the Senate.

Mr. LONG. Mr. President, I have discussed this matter with the members of the staff. I see no objection to it. I have also discussed it with other members of the committee. So far as I know, there is no objection to the amendment. I am willing to agree to it and to take it to conference.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The question is on agreeing to the amendment of the Senator from Utah on page 148, after line 16, to insert new language.

The amendment was agreed to.

Mr. BENNETT. Mr. President, the other amendment refers to what I think is a desirable clarification of the language in the bill which, for the first time, allows the Internal Revenue Service to audit churches.

This has not been possible under the previous law. And the language of the bill, I think, is too loose.

The Treasury agrees with me. I am offering alternate language which adds on page 148, line 9, these limiting requirements:

On page 148, line 9, strike out the quotation mark and add:

"No examination of the religious activities of such an organization shall be made except to the extent necessary to determine whether such organization is a church or a convention or association of churches, and no examination of the books of account of such an organization shall be made other than to the extent necessary to determine the amount of tax imposed by this title."

Mr. President, that is the title imposing a tax on unrelated business income.

There is a fear the language would open it up so that the IRS could go through all the church books that pertain to religious activities.

They did not intend to do this. Therefore, the IRS agrees with me that the limiting language will have uses.

It is my understanding again that the chairman agrees with me and is willing to take the amendment to conference.

Mr. LONG. I have no objection to the amendment, Mr. President.

The PRESIDING OFFICER. Do the Senators yield back the remainder of their time?

Mr. BENNETT. I yield back the remainder of my time.

Mr. LONG. I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back. The question is on agreeing to the amendment of the Senator from Utah on page 148, line 9.

The amendment was agreed to.

AMENDMENT NO. 350

Mr. LONG. Mr. President, I ask unanimous consent that the Senator from Arizona (Mr. FANNIN) may offer an amendment at this time.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. FANNIN. I thank the distinguished Senator.

Mr. President, I call up amendment No. 350.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. FANNIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 113, line 15, strike out all down through page 115, line 10, and insert in lieu thereof the following:

"(5) SPECIAL REAL ESTATE PROVISION.—With respect to any private foundation which owns stock on October 9, 1969, in an incorporated business enterprise which owns (together with any of its subsidiary corporations) more than 10 percent of the land area of any major political subdivision of a State, section 4943(c)(4)(B) shall be applied by substituting the term "10-year period" for the term "15-year period" wherever it appears in such section. For purposes of this paragraph, a 'major political subdivision' means an incorporated city or county having a population of more than 100,000 persons on October 9, 1969."

The PRESIDING OFFICER. The Senate will be in order. Attachés and clerks standing must take seats, or the Sergeant at Arms will eject them.

Mr. FANNIN. Mr. President, section 101(1)(5) of the bill entitled "Special Real Estate Holding Provision" would require a foundation to dispose of its excess business holdings in stages—10 percent of the excess holdings within 2 years, 25 percent within 5 years, 50 percent in 10 years, and the remainder by the 15th year—if those excess holdings are in an incorporated business enterprise which together with subsidiaries owns more than 10 percent of the land area of a major political subdivision—city or county with a population of more than 100,000 persons on October 9, 1969. As its title indicates, this section is indeed a special provision: it singles out one private foundation for discriminatory treatment.

The only foundaton that fits the description in section 101(1)(5) of the bill is the James Irvine Foundation, San Francisco, Calif. The foundation owns 4,590,000 shares or 54.55 percent of the stock of the Irvine Co., which in turn owns a large tract of land comprising about 20 percent of the area of Orange County, Calif. The balance of the outstanding stock of the Irvine Co. is held almost exclusively by donor related parties. Accordingly, under the terms of the bill all except about 4 percent of the foundation's Irvine Co. stock must be disposed of as excess business holdings.

The effect of section 101(1)(5) of the bill is to impose on the James Irvine Foundation a stock-divestiture requirement with a much tighter time schedule than that applicable to any other foundation. The Irvine Foundation would have to sell 459,000 shares within 2 years, another 688,500 shares within 5 years, an additional 1,147,500 shares within 10 years, and the remaining 2,295,000 shares within 15 years. All other foundations holding the same percentage of voting stock interest are given a full 15-year period to dispose of their excess business holdings; they are not required to make partial dispositions within 2, 5, and 10 years. This discrimination against the James Irvine Foundation means that its charitable beneficiaries will suffer the loss of capital value resulting from the sale under distress conditions of a major equity interest for which there is no existing market.

Any such departure from elementary principles of equity, fairness, and nondiscrimination must be supported by special facts or considerations of tax policy. No such support exists in this case. Neither the foundation nor the company has ever engaged in the self-dealing, accumulation of income, political activities, or other abuses which other foundations may have committed and which the Tax Reform Act is designed to prevent, or in any other unlawful activity.

The foundation has been subject to criticism because its current income and distributions to charity are relatively low if expressed as a percentage of the current fair market value of its assets including unrealized capital appreciation. Even here, however, the foundation's yield is as good as, or better than, the yield realized by many other foundations, particularly foundations that are required, as the James Irvine Foundation is, to retain the stock interests originally contributed by their founders. The foundation's unrealized capital appreciation, which reflects potential future income to be distributed to charity, has been caused by the recent rapid growth of land values in metropolitan Los Angeles and has not been the subject of any tax benefit for either the foundation or the company. The company has, for several years, been engaged in a major program to increase its income by developing its land in an orderly manner, and substantially all of its increasing income from these expanding operations is distributed on a current basis to its stockholders as dividends.

The foundation has also been criticized on the ground that it continues donor-related control of the Irvine Co. This criticism has no basis. Only one of the foundation's governing board of eleven directors is donor-related, a granddaughter of James Irvine, and only two of the remaining 10 directors are former business associates of Mr. Irvine. The remaining eight directors are independent, public-spirited California business and professional men.

Based on the foregoing facts, there is absolutely no reason why a tax reform bill, which is supposed to correct inequities in the tax law, should create a new inequity by discriminating against the James Irvine Foundation to the serious detriment of its charitable beneficiaries. The time period allowed by the bill's discriminatory divestiture rule in this case is wholly inadequate. As I shall point out later, it would be inadequate for an orderly disposition even if there were an established market for Irvine Co. stock. In the absence of a market, certainly, there is no reasonable possibility that sales required within 2 years and 5 years can be made without serious impairment of the value of the foundation's capital and consequent losses of great magnitude to the educational institutions, hospitals, youth groups and other organizations that are the recipients of the income from that capital. Among the major beneficiaries of the James Irvine Foundation are Stanford University, University of Southern California, Santa Ana Community Hospital, Los Angeles County Art Museum, and the Boy Scouts of America.

A conservative estimate of the extent of the loss in the value of trust capital would be approximately $100,000,000. Based upon the price paid to a shareholder by the Irvine Co. in 1968 for redemption of a small minority stock interest, the foundation's stock would be valued at $25 per share, or $114,750,000. However, the foundation has a majority stock interest and given a reasonable time to search for qualified buyers, conduct orderly negotiations, establish a market and effect a sale at fair market value, the foundation should be able to realize $225,000,000 or more for its equity. This conclusion assumes, however, that the time allowed would be long enough so that negotiations could be conducted under favorable economic conditions, rather than in the valley of the present temporary economic downturn, and that the negotiations would be free from the adverse influence imposed by unrealistic deadlines and the threat of heavy tax penalties.

It is completely unrealistic to suppose that the foundation within 2 years, or even 5 years, could complete a sale of all of its Irvine Co. stock, except at forced sale prices far below fair market value. Yet a sale of all of its stock, rather than merely partial divestiture, is what is probably required in legal and practical effect by the special real estate holding provision in section 101(1)(5).

Legally, the foundation is bound by California law to follow the mandatory directions of the trustor in the trust instrument. Mr. Irvine's trust instrument does not auhorize the foundation to relinquish its control of the Irvine Co. and retain a minority stock interest, but specifies that the foundation shall exercise a "controlling voice" in the operation of the properties and shall hold and administer the majority stock "as a unit without division or segregation thereof." Accordingly, the requirement in section 101(1)(5) of the bill that the foundation sell 10 percent of its stock in 2 years may operate legally to require sale of all its stock in 2 years.

Viewed practically, the sale of 10 percent of the foundation's holdings would mean loss of control which under the circumstances would greatly impair the salability as well as the value of the remainder of the foundation's stock. A sophisticated buyer is likely to make a large investment in a closely held, unlisted, real estate development company like the Irvine Co., which has substantial minority stockholders, unless it obtains a controlling interest. Therefore, it may well be that a fair market value for all of the foundation's shares can be obtained only by offering them for sale as a unit following negotiations over a reasonable time period free from the adverse impact of stringent time deadlines.

The experience of the Ford Foundation in disposing of its Ford Motor Co. stock illustrates the time required to dispose of major business interests. Beginning

in 1956, it undertook a massive program to divest itself of this stock as rapidly as practicable. After 13 years, it has only succeeded in reducing its holdings from 88.4 percent of the total stock outstanding to 27.4 percent.

It may also be helpful to consider the time required for disposition of major business interests to comply with judicial orders requiring divestiture under the antitrust laws. In *United States* v. *du Pont & Co.*, 366 U.S. 316 (1961), the Supreme Court allowed the defendant a period of 10 years for disposition of its General Motors stock. Similarly, in *United States* v. *United Fruit Co.*, 1958 CCH Trade Cases section 68,941, United Fruit was permitted 8 years and 4 months after the decree to dispose of its International Railways of Central America stock. In both of these cases the business interests to be sold were in publicly held corporations whose stock had an established market. Even longer periods would have been necessary to comply with the divestiture orders had the corporations involved been closely held with no existing market for their stock.

Since there is no established market for Irvine Co. stock and only two sales, other than repurchases by the company, have occurred in the past 20 years, it is clear that the restrictive transition period allowed for the James Irvine Foundation under the bill is wholly inadequate to permit an orderly disposition of its excess business holdings. In the interests of the foundation's charitable beneficiaries and of providing fair and reasonable legislation—and in the interests of carrying out this legislation's announced purpose of providing equity in the tax laws—section 101(1)(5) of the bill should be amended to delete the discriminatory requirement of piecemeal disposition in 2 and 5 years and to provide an unrestricted 10-year period for disposition of the excess business holdings of the James Irvine Foundation.

This is what my amendment does. This is all it does. I hope that it will be accepted.

Mr. LONG. Mr. President, there is some objection on behalf of the Senator from Virginia (Mr. BYRD) to the amendment in its present form.

In the spirit of compromise, if the Senator will modify his amendment to reduce it to 8 years where the 10-year figure is used, I believe it will be a fair compromise, and I would be willing to agree to it in that fashion.

Mr. FANNIN. Mr. President, I ask that such change be made in the amendment.

The PRESIDING OFFICER. The amendment will be so modified.

Mr. FANNIN. Mr. President, I move the adoption of the amendment, as modified.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified, of the Senator from Arizona.

The amendment, as modified, was agreed to.

AMENDMENT NO. 381

Mr. JAVITS. Mr. President, I call up my amendment No. 381 and ask that it be read.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. JAVITS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 546, line 12, at the end of section 914 add a new section 915 to read as follows:

"SEC. 915. COOPERATIVE HOUSING CORPORATIONS

"(a) Section 216(b) is amended by adding at the end thereof a new paragraph as follows:

"'(4) For purposes of this subsection, in determining whether a corporation is a cooperative housing corporation no account shall be taken of stock owned and apartments leased by the United States, its possessions and territories, a State or any political subdivision thereof, or any agency or instrumentality of the foregoing empowered to acquire shares in a cooperative housing corporation for the purpose of providing housing facilities.'

"(b) The amendments made by subsection (a) shall apply to taxable years ending after January 1, 1966."

Mr. JAVITS. Mr. President, the purpose of this amendment is to deal with a situation relating to housing cooperatives whereby the individual tenant-stockholder may deduct from his income a proportion of interest and local taxes. In order to qualify, 80 percent of the income of the cooperative must derive from such individual tenant-stockholder. In my State, and it may be true in other States, we have a situation in which some of the income of cooperatives comes from the State housing authority, which then subleases apartments to low- and moderate-income families. In such cases, income does not derive from individuals, as called for by present law, but from a governmental entity—to wit, the State of New York.

The purpose of this amendment is to extend to individual tenant-stockholders in cooperative projects which do not meet the 80-percent test because of income from a property the same privileges which they should have were the State or governmental entity which owns apartments in that building an individual—the same deductions as are generally available in cooperative housing.

I hope very much that the equity of this proposition may be evident to the committee and that it may accept this amendment. The Assistant Secretary of the Treasury, to whom we submitted the matter, has indicated a favorable attitude, and I have a letter from Edwin S. Cohen, Assistant Secretary, dated October 1, so indicating.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. JAVITS. I yield.

Mr. LONG. On page 2, line 4, of the Senator's amendment, he uses the date January 1, 1966, Is the Senator certain he wants to use that date?

Mr. JAVITS. I will accept the advice of the committee, if they think we should use another date.

Mr. LONG. I think the Senator would want to use the date December 31, 1968.

Mr. JAVITS. I modify the amendment to that effect.

The PRESIDING OFFICER. The amendment is so modified.

Mr. LONG. I have no objection to the amendment as modified.

The PRESIDING OFFICER. Do the Senators yield back the remainder of their time?

Mr. JAVITS. I yield back the remainder of my time.

Mr. LONG. I yield back the rest of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment, as modified, of the Senator from New York.

The amendment, as modified, was agreed to.

Mr. JAVITS. Mr. President, I send another amendment to the desk and ask that it be read.

The PRESIDING OFFICER. The Chair inquires of the Senator from New York whether he wishes his attaché to remain on the floor.

Mr. JAVITS. I ask unanimous consent that he remain.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. JAVITS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 536, strike out lines 15 through 19 and insert:

"(A) with respect to which a mortgage is insured under section 221(d)(3) or 236 of the National Housing Act or housing is financed or assisted by direct loan or tax abatement under similar position of state or local laws, and

"(B) with respect to which the owner, under such acts or laws or regulations issued thereunder—"

On page 537, line 8, strike out the period and insert the following:

"or, in the case of sale or disposition of a qualified housing project with respect to which a mortgage is insured or housing is financed or assisted by direct loan or tax abatement under state or local laws referred to in paragraph (1)(A), is approved by the appropriate state or local agency administering such laws pursuant to regulation which such secretary has certified are in accord with the standards applied by him in approving the sale or disposition of a qualified housing project."

On page 392, strike out lines 17 through 19 and insert the following: "to which a mortgage is insured under section 221(d)(3) or 236 of the National Housing Act or housing is financed or assisted by direct loan or tax abatement under similar provisions of State or local laws,".

Mr. JAVITS. Mr. President, the purpose of this amendment is to deal with a problem which represents itself in the following States: New York, Massachusetts, Connecticut, New Jersey, Michigan, and Illinois. In those States, the State, itself, has programs for low- and moderate-income housing. This bill would provide incentives for housing constructed under, section 221(d)(3) and 236 of the National Housing Act.

Our interest—and I have letters to support it from the housing authorities in New York and New Jersey—is to ex-

tend this kind of tax incentive to a State program which provides for the same controls as are found under the Federal programs.

The problem was one of working out the language. This amendment would extend the incentive to housing under a State program, where the State program is like the Federal programs, based upon either a guaranteed mortgage or a direct loan. This amendment also would apply to a State program of assistance through tax abatement.

In this amendment I also seek to insure that rental rates and return on investment are controlled. Therefore, the amendment provides, as a control mechanism, the requirement for certification by the Secretary of Housing and Urban Development.

This amendment, in its present form, is satisfactory to the chairman of the committee and of the ranking minority member.

I might point out that this is not an inconsiderable matter. In the State of New York 100,000 apartment units have been constructed under the State Mitchell-Lama program.

I note that the Senator from New Jersey (Mr. CASE) is in the Chamber. The State of New Jersey is similarly concerned.

I am hopeful that the ranking minority member of the committee and the chairman may see fit to follow what is the policy of the Department of Housing and Urban Development, under the 1968 Housing Act, to encourage the development of housing for low- and moderate-income persons, not only under Federal law, which is now done under this bill, but also under State law, provided that such State and local programs meet the same objectives and contain the same safeguards.

Mr. LONG. Mr. President, I do not believe I will object to the Senator's amendment in the fashion in which it is drafted. I would be willing to take the amendment to conference.

Mr. JAVITS. I thank my colleague.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. JAVITS. I yield.

Mr. WILLIAMS of Delaware. I am not going to raise any objection to the amendment. As the chairman knows, I opposed this section when it went into the bill in the Committee on Finance. I thought it was taking an unwise step. However, if it is going to relate to Federal projects, there should be something to relate to State projects.

Mr. JAVITS. I am grateful to both Senators.

Mr. President, I yield back the remainder of my time.

Mr. LONG. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New York.

The amendment was agreed to.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LONG. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, I ask unanimous consent that the time on the amendment to be offered by the Senator from Florida may be limited to 20 minutes, the time to be equally divided between the Senator from Florida and the chairman of the committee.

The PRESIDING OFFICER. Without objection, it is so ordered. The Senator from Florida is recognized.

AMENDMENT NO. 375

Mr. HOLLAND. Mr. President, I call up my amendment No. 375, and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. HOLLAND. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with, and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 375) ordered to be printed in the RECORD is as follows:

At the end of the bill add the following new section:

"SEC. ——. CAPITALIZATION OF COSTS OF PLANTING AND DEVELOPING CITRUS GROVES.

"(a) REQUIREMENT OF CAPITALIZATION.—Part IX of subchapter B of chapter 1 (relating to items not deductible) is amended by adding at the end thereof the following new section:

"SEC. 277. CAPITAL EXPENDITURES INCURRED IN PLANTING AND DEVELOPING CITRUS GROVES.

"'(a) GENERAL RULE.—Except as provided in subsection (b), any amount (allowable as a deduction without regard to this section), which is attributable to the purchase, planting, cultivation, maintenance, or development of any citrus grove (or part thereof), and which is incurred before the close of the fourth taxable year after the date on which the trees were planted, shall be charged to the capital accounts; however, if the planting of a citrus grove is commenced during one taxable year and completed during a subsequent taxable year, amounts (allowable as deductions without regard to this subsection) shall be charged to the capital account only to the extent to which such amounts are attributable to the part of such grove which was planted after the close of the fourth preceding taxable year.

"'(b) EXCEPTIONS.—Subsection (a) shall not apply to amounts allowable as deductions (without regard to this section), and attributable to a citrus grove (or part thereof) which was:

"'(1) replanted after having been lost or damaged (while in the hands of the taxpayer), by reason of freeze, disease, drought, pests or casualty, or

"'(2) planted or replanted prior to the enactment of this section.'

"(b) CLERICAL AMENDMENT.—The table of sections for such part IX is amended by adding at the end thereof the following new item:

"'Sec. 277. Capital expenditures incurred in planting and developing citrus groves.'"

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning after the date of the enactment of this Act."

Mr. HOLLAND. Mr. President, taxpayers growing citrus fruit, and that means not just in my State but wherever they grow it in the Nation, are treated as farmers and, under existing law may report income and expense on the cash method. Thus, it has been possible for such taxpayers to treat as expense items developmental costs incurred during the 4- or 5-year period following the planting of a citrus grove pending the reaching of the productive state for the grove property.

Such unusual tax advantage has been responsible in large part for speculative plantings of orange groves in Florida alone to the point that total citrus acreage now amounts to almost 1 million acres, having more than doubled in the past 10 years. Thereby, the actual production of oranges in Florida and in the United States this season is establishing an all-time record far beyond the capability of the industries to market this surplus supply at prices which will even return out-of-pocket production costs to the owners of these properties.

The general purpose of this amendment is to halt this abuse by requiring capitalization of all costs of planting and developing citrus groves, for such costs are truly capital in nature.

Other approaches to this problem which would continue to allow partial or limited exemption from the requirement for capitalization would permit or actually encourage the continued expansion of citrus plantings to a point that would bring about surplus supply situations year after year, and thereby adversely affect the total economy.

Mr. President, the detailed explanation of the amendment is as follows:

First. Subsection (a), in general or as modified by subsection (b), requires that all amounts attributable to the purchase, planting, cultivation, maintenance or development of any citrus grove incurred within 4 years after the date on which trees are planted, shall be charged to capital accounts. Provided, that in the case of a citrus grove for which planting is commenced within one taxable year and not completed until the subsequent taxable year the 4-year requirement shall apply to the respective part or parts of the particular grove determined by reference to the particular taxable year in which such plantings of the various part or parts of the citrus grove were actually completed.

Second. Subsection (b) exempts from capitalization requirements plantings or replantings of a citrus grove made necessary by casualty or other losses of trees brought about by conditions beyond control of the taxpayer. That would apply particularly in the case of a freeze or a hurricane loss. As well, this section as a matter of equity, exempts plantings completed before the enactment of this amendment.

Third. The amendment is therefore effective only as to expenses incurred after enactment of the proposed bill.

Mr. President, I am told by our citrus people that the citrus areas of California also join in this request. As far as I am concerned I am very much interested

in seeing that important matters that should be capitalized are capitalized. Citrus groves cannot be productive for at least 4 years, and in many cases, not until the 5th, 6th, or 7th year is reached.

I have discussed the amendment with the able chairman of the committee and with a ranking minority member. I understand they are willing to take the amendment into conference.

Mr. LONG. Mr. President, since the bill was reported to the Senate, my attention has been directed to an article which discusses the fact that investments in citrus groves in Florida have been encouraged for tax avoidance purposes. Since I started speaking, a staff member has handed the article to me. It is entitled "Tax Sheltering Your Income: Citrus Groves," and the subheading is "There's Juicy Tax Money To Be Made in Fruit; Here's the Story of One Dentist Who Learned How To Squeeze an Orange."

Mr. President, I ask unanimous consent that the article may be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

TAX SHELTERING YOUR INCOME: CITRUS GROVES

(By Bradley Hitchings)

(NOTE.—There's juicy tax money to be made in fruit. Here's the story of one dentist who learned how to squeeze an orange.)

Five years ago the thought of investing in citrus groves hadn't entered the mind of a certain Ohio oral surgeon. But every time that Dr. Walter Lasker (as I'll call him) filled out his tax form he was reminded that his investments weren't giving him tax shelter—and each year it got worse. But he never got beyond a little wishful thinking about oil wells, cattle ranches, and such.

Then one day, while he was in Florida escaping a Cleveland snowstorm, the dentist took an airplane ride with a real estate agent. They passed over a sea of little orange trees, row after row stretching into the distance. When he asked who the millionaire was who owned such a spread, Dr. Lasker learned that it was owned by lots of people—everyone from European noblemen to Joe Namath, the football player, to other doctors like himself.

That's how he discovered the organizations that sell you a parcel of citrus grove and, if you want, manage it and market your oranges for you.

Since the dentist was already a confirmed Florida vacationer, with vague thoughts of retiring there in another ten years, he decided to do some checking on the outlook for oranges. He found that Florida produces roughly 80 per cent of the U.S. citrus crop, and one-third of the world's production. With the U.S. population expected to hit 300-million by 1995, and with only a limited amount of Florida acreage available for citrus, the future for groves then being developed seemed bright, indeed.

Per capita consumption of orange juice would soon be 3.6 gallons a year, compared to 42 gallons for milk, 35 gallons for coffee, and 21 gallons for soft drinks and artificial fruit-flavored drinks. Only 23 per cent of the U.S. population were eating oranges and 33 per cent drinking orange juice. It was conceivable that increases in per capita consumption might overtake the industry's ability to produce orange juice within the decade.

Assured that citrus groves had a future, Dr. Lasker began to study the tax aspects of investing in them. Land improvements and the needed irrigation system of a grove get depreciation over 20 years, which can be straight-line or declining balance. The trees are depreciated over 33⅓ years, and you can use either a 150 per cent declining balance method for groves purchased while in production, or a 200 per cent declining balance on groves bought before they have reached production.

Maintenance costs from the date of planting are ordinary business deductions, even when trees aren't producing. If you want to, you can capitalize maintenance costs during the first four or five years and depreciate this amount starting with the first year of fruit production.

You get an investment credit of 7 per cent on tangible personal property and real property, except buildings starting with the first year that your groves are in commercial production, usually about the fifth year.

The costs of clearing land, including the costs of treating the earth, can be deducted up to $5,000, or 25 per cent of that year's taxable income from farming. When you have producing groves, this simplified farm write-off lets you invest in additional acreage and get a further reduction of taxes.

The real meat of the tax shelter comes when you invest on margin. You can buy citrus groves for 15 per cent down and pay the balance over ten years. You actually pay $1,500 for a $10,000 investment—but write off the entire $10,000. It takes about five years to get into production, and all this time you're taking a loss on the costs of management, which cuts your taxes. If you buy citrus groves about ten years before you plan to retire, as Dr. Lasker was thinking about doing, the trees start full production about the time your income from dentistry has tapered off, so money that you would otherwise have paid the government has been converted into a solid income-producing investment.

You depreciate your groves, but they don't really depreciate in value. Some 75-year-old groves are still producing good crops, and it's not uncommon for a grove to return 15 per cent profit in a given year. The land appreciates over the long run, and you can pass your groves on to your heirs as a going concern.

Sell your citrus groves after holding them six months, and you get long-term capital-gains tax treatment on any profit. And those trips you make to Florida to inspect your groves are tax-deductible as business expense.

By the time he unearthed all these facts, Dr. Lasker was definitely interested. Through his real estate man in Florida, he got the name of a man in the Cleveland area who had invested in orange groves. "Yes, I'm happy with it," the man told him over the phone, "but be sure you get with a company that knows the business. The biggest risk is the quality of grove management."

The dentist learned that a number of organizations are in the business of selling parcels of citrus groves and managing it for the buyers. Some are small Florida concerns, others are large investment plans sponsored by Wall Street brokerage houses. Jasmine Groves Co., for example, is one of the newer entries into the citrus management field. It makes groves available to large investors and small, through the brokerage firm of Hayden Stone, Inc., which holds a controlling interest in the citrus organization. Dr. Lasker's stockbroker gave him the names of other large citrus grove companies which have reputations for sound management and good results.

The dentist contacted American Agronomics, an over-the-counter corporation and one of the biggest management companies specializing in citrus groves. This firm now has more than 2,000 clients, a jump of 100 per cent in the last year. First, the company sent Dr. Lasker extensive materials on their operations; then he went to see them.

American Agronomics manages several massive citrus tracts in Florida. These are owned by investors who buy anywhere from 2½ acres to more than 30 acres. Most of the land is in valencia oranges, a late-maturing fruit that ships well, has few seeds, is fairly uniform in size and color, and is excellent for juice. Industrial statistics indicate that a good grove of mature valencias could have averaged better than $10,000 net income over the last ten years.

The company manages these groves on a cost basis, employing well-qualified managers and gaining an advantage in quantity purchases of materials and supplies. Their maintenance costs are less than averages for the state. A 2½-acre grove gets the same attention as 5,000 acres and, in fact, you need a map to tell you where your trees leave off and the other fellow's begin.

When the trees are producing, the fruit is counted and picked by 10-acre blocks. The number of boxes picked is multiplied by the average sales price, and you get a check in the mail for that amount, multiplied by your number of 10-acre blocks. There's a fresh fruit processing plant right on the premises, and a new concentrate plant is now on the drawing boards. Plans are also under way to set up a franchise operation for direct sale to the consumer, which will improve the profits of the marketing operations in the near future.

All the groves this company operates are well below the frost line, which greatly reduces the danger of losing a crop to an early freeze (although some say the cooler the climate the better the flavor of the fruit). The ground is high enough to assure good drainage, and a canal system draws off even the heaviest rainfall. All groves have overhead irrigation systems as well. The dentist learned that for any investment in citrus groves, all these factors must be considered.

By now he was convinced that citrus groves were the tax-sheltered investment he was looking for, and he was convinced that this particular firm had the requisite know-how, plus a respectable track record. He asked for names of other dental and medical practitioners who had invested with the company, and was provided with the names of several men in his area. He called them all, and none of them had any serious complaints. So, in 1964, Dr. Lasker became a farmer.

He bought 10 acres of newly planted valencia trees, which then were about 2 feet high. The price was $16,900, but he only paid $3,000. For the rest he took a bank note and started paying off the balance at 6 per cent interest.

The monthly payout included principal, interest, and a fee for management. The costs of maintaining the grove came to about $90 a month for the dentist's 10 acres. This year, his trees will start producing commercially, and he'll have an additional charge for marketing. Also this year, the dentist will get the 7 per cent investment tax credit, which can only be taken once orange production begins. After the fifth year, the production of his trees should increase steadily, so that a sure return on his investment is only one or two harvests away, at most.

If the dentist were to invest in additional groves today, he would find that prices have gone up. Presently, you pay about $17,500 for 10 acres. (The minimum that American Agronomics allows, 2½ acres, now goes for $5,400.) On 10 acres the down payment is presently $3,000, principal and interest charges come to $167.21 a month. Add maintenance of $83.30, and you get the total monthly payout, $250. There are discounts for larger purchases—1 per cent off for 20 acres, 3 per cent off for 40 acres, 6 per cent off for 100 acres.

Compared with other tax-sheltered investments, citrus groves are on the conservative side. Oil wells are a good deal riskier, cattle ranches are also chancy by comparison. The tax writeoff on citrus groves is not as great as for oil wells and cattle ranches but, over

the long term, profits from operations should be substantial, at less risk.

Appreciation of property is a major plus for investment in citrus groves. At present, Florida is the fastest growing state in the Union. DeSoto County, the southernmost citrus-growing area of the state, is now reaching a takeoff stage, with recreational and residential expansion as well as spreading citrus groves. Many of the currently available citrus investments are located in this area, which gives them an added advantage. It is possible that your land will take on extra value because of adjacent real estate development.

You can buy groves developed to the point of planting trees, groves already in production, or groves with trees already in the ground but not yet in production. You get the 7 per cent investment credit in each case. Dr. Lasker's trees were about 2 feet tall when he bought them five years ago. Now they're 10 feet high and approaching maximum height, and while it's impossible to predict the set of this year's crop at this point, he may have enough fruit to cover all operating expenses for the year.

Naturally, there are risks involved in growing oranges. The major risk is Florida weather. Hurricanes and frosts can wipe out entire crops overnight. The growers whose trees bear fruit at such times, however, get astronomical prices for their crops. In 1962, a freeze pushed the price of oranges up more than 200 per cent.

Several years ago there was a tremendous production of oranges, and a buyer's market sent prices tumbling downward. Since then, the state legislature has passed laws governing the sale of oranges, and it's unlikely that any Florida growers will take another beating like they did then. Also, California's residential expansion keeps overrunning groves of oranges, which strengthens the market for Florida oranges.

Some dentists, hoping to avoid paying the fees extracted by the larger citrus management companies, may try to work out more favorable arrangements with small operators, or go it alone. Frequently, the small operators face a serious problem with grove management. There are more chores to be done around an orange grove than you might expect—hoeing, fertilizing, pruning, spraying, picking, storing and marketing the fruit. It's a year-round job, and it takes the attention of someone who knows the business.

As the owner of an isolated grove, you're at the mercy of the manager, who may travel miles to work in your rows of trees. Poor farm management can produce small, off-color fruit, and when oranges become ripe, they must be picked promptly. Unless you plan to live in Florida and ride herd on the operation yourself, it's best to deal with the larger and more reputable firms. It must be said that even at this late date, Florida's reputation for fancy real estate shuffles and double deals is not entirely without foundation.

A good producing grove should double in value between its fifth and tenth years. It hits its prime between the twelfth and fifteenth years. By then, it could well be worth three, four, or even five times its original cost. So whether you intend to keep the grove and pass it on to your heirs, or sell out after a few years, you have in a citrus grove a sound investment in terms of capital gains.

While it's impossible to predict how many boxes of oranges Dr. Lasker's trees will be producing ten years from now when he retires, it is clear that the money he has put in will be more than offset by the money he gets back. With Uncle Sam as a silent partner in the deal, providing funds that otherwise would have gone to taxes, the dentist reduces his tax load now, while his income is high. Then, when he's is a much lower tax bracket, his trees will come into maximum productivity.

The dentist will take another trip to Florida next winter, and the cost of his travel will come off his income tax for the year. Also, the terms of his arrangement with the management company provide one more advantage for him. He is allowed to build one house on his groves. No matter how bad things get, he says, he can always ". . . put up a little shack down there and live on oranges."

Mr. HOLLAND. Mr. President, since my distinguished friend has mentioned it, I wish to point out that there have been advertisements in the press in various parts of the Nation inviting people to come in and invest in citrus groves because they will be able to write off so much developmental costs on their tax bills. I think that is wrong, and I do not think any Senator would want that practice to continue.

Mr. LONG. The article to which I referred was printed in a publication entitled "Dental Management" for September 1969, and it commences on page 53.

Obviously that is the kind of thing about which something should be done. I applaud the Senator from Florida for bringing this solution to the problems to our attention so that this abuse will be fully corrected. I support the amendment, and as far as I know there is no objection by any member of the committee.

The PRESIDING OFFICER. Do Senators yield back their time?

Mr. LONG. I yield back my time.

Mr. HOLLAND. Mr. President, I yield back my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Florida.

The amendment was agreed to.

Mr. HOLLAND. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 374

Mr. PERCY. Mr. President, I call up my amendment No. 374 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

Page 36, strike "5 percent" where it appears in line 16 and lines 19 and 20, and insert in lieu thereof "6 percent".

Page 108, in lines 15 and 16, strike "and 1974" and insert in lieu thereof "1974, 1975, and 1976".

Page 108, in line 18, strike "and 4½ percent", and insert in lieu thereof "4½ percent, 5 percent, and 5½ percent".

Mr. LONG. Mr. President, I ask unanimous consent that the time on the amendment be limited to 40 minutes, to be equally divided between the manager of the bill and the sponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I yield myself 10 minutes.

The PRESIDING OFFICER. The Senator is recognized for 10 minutes.

Mr. PERCY. Mr. President, this amendment is directed to the basic objective of stimulating a significant increase in funds devoted to philanthropy. Charitable needs are expected to rise in the 1970's.

The bill of the Committee on Finance has recognized this great need and it has a provision requiring payout of assets, equivalent to 5 percent. My amendment simply changes this to 6 percent and phases the payout increase over several additional years. I base my amendment primarily on the findings of the Peterson Commission which has intensively studied the needs of private philanthropy and the establishment of foundations as they relate to that need and what can be expected from foundations in the future.

The Peterson Commission, based on the objectives that I have just stated, has arrived at a number of recommendations, one of which is a payout increase to between 6 percent and 8 percent. They are almost unanimous in the commission in recommending this higher payout.

Mr. LONG. Mr. President, if the Senator from Illinois will yield right there, and yield on my time, because I wish to inquire of the parliamentary situation, I personally favor the Senator's amendment. It was voted on in committee and the committee did not agree to it, but I am one of those who voted for it. I favor the concept. My understanding is that the distinguished Senator from Delaware (Mr. WILLIAMS) also favors the concept of the Percy amendment, although a majority of the committee did not agree to it.

Therefore it will be my duty, in due course, to suggest—in fact I should like to do it soon—the absence of a quorum to let those who wish to oppose the amendment to have time available from the Senator in charge of the bill, because I favor it. I believe it is a good amendment and should be agreed to. But, I think, in all fairness, that we should adequately alert those who would wish to speak in opposition to the amendment so that they might make their presentations and explain their agruments in opposition.

That being the case, Mr. President, I think it would be desirable if the Senator would not proceed further until there are more Senuators to hear both himself and those in opposition to this amendment, so that both sides can be adequately heard.

That being the case, I should like to ask unanimous consent that there be a quorum call, without the time being charged to either side—either the opponents or the proponents.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana? The Chair hears none and it is so ordered.

The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, I ask unanimous consent that my amendment may be withdrawn temporarily.

The PRESIDING OFFICER. Without

objection, the Senator's amendment is withdrawn temporarily.

Mr. PERCY. Mr. President, it is my understanding that the Senator from Colorado (Mr. ALLOTT) wishes to bring up his amendment at this time.

AMENDMENT NO. 318

Mr. ALLOTT. Mr. President, I call up my amendment No. 318 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. ALLOTT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD at this point.

The text of the amendment is as follows:

Page 350, after the matter following line 22, insert the following new section:

"SEC. 508. MOLYBDENUM.

"(a) RATE OF PERCENTAGE DEPLETION.—Section 613(b)(2)(B) (relating to deposits subject to 23 percent rate of percentage depletion) is amended by inserting 'molybdenum,' after 'mercury.'.

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after October 9, 1969."

Mr. ALLOTT. Mr. President, I also ask unanimous consent that my colleague Mr. DOMINICK may join me as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ALLOTT. Mr. President, this is a rather simple amendment, to correct what has been a gross injustice and inequity for many years in the depletion allowance field. There is a mineral not known to most people in this country, molybdenum.

It so happens that all molybdenum production in the Western Hemisphere lies in a very small area. There is a small production of it in New Mexico, but the great supply of molybdenum comes from mines in Climax, Colo., and that area.

For some unexplainable reason, when the depletion schedules were originally set up, they were set up with the rest of the ferroalloys—that is to say titanium, vanadium, nickel, and the like, at 23 percent. Whatever the reasons, they are, I think, unjustified, because molybdenum is also a ferroalloy and one of the most important ferroalloys but was classified with miscellaneous minerals at 15 percent. I believe it is generally recognized this was only an oversight.

The sole purpose of my amendment is to place molybdenum on an equal basis with the other ferroalloys.

Molybdenum is vitally important to almost every industry in the United States. As everyone knows, it is a toughener of steel—I should say more strictly it is a toughener of iron. It provides strength to iron and is used in steel production. Particularly is it valuable in those areas where the resultant steel will be exposed to very high temperatures, such as, for example, in the fans on gas turbines, and in our space program. It is used more extensively as a strengthener and toughener of our iron ores to get good steels which will withstand the rigors to which they are subjected when used.

To give some example of the need for this, present deposits of molybdenum are rapidly reaching the stage where the ore deposits are getting rather small and low in concentration. It has been necessary, therefore, for the Climax Molybdenum Co. to go to other areas to find molybdenum. They therefore have found such a deposit in Henderson, Colo., approximately 40 miles west of Denver, but in order to mine it and take care of the conservation measures necessary to keep from defacing that beautiful country and scenery around there, they have gone to the unprecedented and unheard of trouble to sink a shaft on the east side of the Rocky Mountain Divide some 2,500 feet. They have also developed, or are in the process of developing, a railroad tunnel, 11 miles in length, under the Rocky Mountain Divide. They have also acquired an exchange of extensive lands on the west side in order to provide for a mill site for the proper disposition of the residue after the milling of the molybdenum ore.

Mr. President, I cannot overestimate how vital molybdenum is to our economy, as well as to the free world. It has seemed to me for a long time, and I think the distinguished chairman of the committee will agree with me, that there is no justifiable reason why molybdenum should be placed in a different category than other ferroalloys such as titanium, vanadium, and nickel.

This is the sole purpose of my amendment, and I hope that it will be favorably received by the Senate.

Mr. LONG. Mr. President, this measure was considered in the committee. It received a considerable number of votes, but it was not agreed to. I was one who voted for it. Therefore, I do not think the Senator from Louisiana should speak in opposition to it. There is some opposition to it, but I support it. I will leave it to the Senate to do what it wants to do.

Mr. WILLIAMS of Delaware. Mr. President, this amendment was defeated in the Finance Committee by a vote of 11 to 6, as I recall it. In my opinion, it would be a mistake to approve it. We have already acted on depletion rates, and under the action of the committee, later sustained by the Senate, the depletion rates on molybdenum and other minerals already have been raised from the level provided by the House.

Molybdenum is a metal which is mined in Colorado and New Mexico, about 80 percent of which is used in the hardening of steel. Molybdenum currently enjoys percentage depletion at a rate of 15 percent on both domestic and foreign production. The special 23-percent rate for certain domestic metals is not available to molybdenum, probably because there is no scarcity of this metal. The staff of the Joint Committee on Internal Revenue Taxation, in its July 14, 1969, depletable resources confidential committee print prepared for the House Ways and Means Committee, did not recommend inclusion of molybdenum in the same category as the 23-percent metals.

The United States is the world's largest producer and exporter of molybdenum. Most of the Nation's production comes from a single mine located at Climax, Colo. Molybdenum from this mine is exported to almost all steel-producing countries outside the Communist bloc. However, there are also commercial molybdenum deposits in New Mexico, and molybdenum is recovered as a byproduct of the production of copper. Because the amount of byproduct molybdenum is fixed by the scale of copper operations, an increase in the depletion rate for molybdenum will not increase the amount of byproduct molybdenum produced from copper mines. At present, byproduct molybdenum accounts for about 20 percent of the annual U.S. production.

The United States has approximately a 37-year supply of molybdenum in existing deposits. The Bureau of Mines indicates that there are substantial additional deposits of molybdenum of somewhat lower grade which could be worked after the existing 37-year supply is exhausted. In addition, future exploratory activity seems likely to locate additional sources of high-grade ore.

The molybdenum stockpile is in a position of susbtantial surplus, and the General Services Administration is gradually reducing its stocks. The stockpile presently contains 52,164,345 pounds of molybdenum; the current objective is 36,500,000 pounds. Approximately 12 million pounds of molybdenum are currently offered for sale without success. The stockpile objective has recently been reduced because of the opening of new Arizona molybdenum mines owned by the Duval Copper Co., which have substantially increased both current supplies of molybdenum and available reserves.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The Senate will be in order. The attachés who are standing will either leave the Chamber now or sit down.

Mr. WILLIAMS of Delaware. Mr. President, I hope the amendment is defeated.

Mr. ALLOTT. Mr. President, first, in reply, let me say I know the feelings of the distinguished Senator from Delaware, and I respect them, but no valid reason has been advanced, or any reason at all, why, if the 23-percent depletion allowance applies to the other ferroalloys, it should not apply to molybdenum.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. ALLOTT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MONTOYA. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HOLLINGS. Mr. President——

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Illinois (Mr. PERCY).

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the amendment of the Senator from Illinois be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from South Carolina is recognized.

Mr. HOLLINGS. Mr. President, I call

up my amendment relative to the disposition and sale of bonds.

The PRESIDING OFFICER. The amendment offered by the Senator from South Carolina will be stated.

The assistant legislative clerk read the amendment, as follows:

On page 323, line 7, strike out "July 11, 1974," and insert in lieu thereof the following, "July 11, 1982."

Mr. HOLLINGS. Mr. President, the amendment I propose concerns a change in the treatment of bonds held by financial institutions found in section 433 of the committee bill on page 321.

The present law provides that the gain on the sale of bonds has been treated as a capital gain. The committee bill would treat such as a gain as ordinary income. My amendment would not change this rule. The committee bill, however, provides that if bonds held by a bank on July 11, 1969, which are sold or exchanged by the bank before July 11, 1974, any gain realized would be considered capital gain. If such bonds are held beyond this 5-year period, any gain thereafter would be ordinary income.

In the disposition, during the 5-year period, it was hoped, by the Finance Committee treatment, that the banks could dispose of the bonds and not suffer any real loss. However, I found in my State—and this is prompted by two or three smaller banking institutions that purchased municipal bonds; we have tried to get the best figures possible—say this would apply to 90 percent of the bonds involved. Of the $52 billion of the bonds outstanding, $40 billion of these bonds are municipal bonds. According to a Federal Deposit Insurance Corporation report of 1966 it involves about $100 million in revenue over the extended 12-year period—in other words, about $6 million a year in revenue is what we are talking about.

That does not sound very dramatic based upon the whole revenue picture, but the fact is that many of those bonds were bought by small banks for municipal improvements in small towns. They are long-term bonds. The capital gain treatment and expectation was inherent in the price of the bond. In other words, if they were going to have ordinary income, the price of the bond would be less. Otherwise, the banks that were investing would have had other opportunities to invest in short-term bonds rather than long term.

It has been the habit of the banks to try to support the small communities.

The bill changes the rules in the middle of the game.

My amendment would delete this 5-year period and substitute a 13-year period, meaning that the new rule would not apply to bonds purchased before July 11, 1969 until July 11, 1982.

There are several compelling reasons why I believe this amendment is necessary and meritorious. First, in its present form this section of the bill is retroactive. It would apply to bonds purchased long before the proposed rule becomes applicable. The decisions made in purchasing such bonds many years ago, under the old rule, would not necessarily be followed under the new rule. In my judgment, to go back and apply this new rule retroactively, reaching back to affect decisions made by financial institutions 15 or 20 years ago, is patently unfair.

Furthermore, there are approximately $52 billion of such bonds that would be affected by this retroactive transitional rule. These are bonds held by financial institutions that would mature more than 5 years in the future; $40 billion of these bonds are municipal bonds which are vital to the economy of our cities. Thus, the decision to dispose of these bonds would be governed not by sound business and banking practices, but by the practical necessity of selling them within the next 5 years. To force an early sale of this magnitude would further disrupt the already unfavorable municipal bond market.

Let me review this reform in detail.

H.R. 13270, the Tax Reform Act of 1969, as passed by the House of Representatives, includes a section 443 which amends section 582(c) of the present Internal Revenue Code to provide that the net annual gains of financial institutions resulting from the sale or exchange of instruments of indebtedness—bond—shall be treated as ordinary income. Under present law, such gains are treated as capital gains, while net annual losses are treated as ordinary losses. The treatment of losses will be continued under the proposed law. Section 443 is applicable to taxable years beginning after July 11, 1969.

On October 16, 1969, the Committee on Finance of the U.S. Senate proposed to accept section 443, as passed by the House of Representatives, with the exception that gain from bonds owned by financial institutions on July 11, 1969, would continue to receive capital gains treatment if sold within 5 years.

While the wisdom of changing the present treatment of financial institutions' gain on the disposition of bonds can be debated with reasonable arguments on both sides—summary of H.R. 13270 prepared by the staffs of the Joint Committee on Internal Revenue Taxation and the Committee on Finance, pages 70–71 "Summary"—the retroactive nature of section 443, even as modified by the Committee on Finance, has two highly undesirable characteristics; first, it will cause profound disorder in the already seriously undermined State and municipal bond market, and second, it is fundamentally unfair.

DISORDER IN THE STATE AND MUNICIPAL BOND MARKET

The effect of either the House of Representatives or Senate Finance Committee version of section 443 will force banks to dispose of large numbers of State and local municipal bonds—"municipals"—just prior to the capital gains cutoff date in order to take advantage of the lower tax rates which will then still be in effect. Commercial banks are by far the largest holders of municipals and have already curbed their municipal bond investment programs—see Committee Print of the Committee on Finance, U.S. Senate, testimony to be received Tuesday, September 23, 1969, and additional statements on tax treatment of State and local bond interest, page 111, "Testimony." The commercial banks, however, according to the American Banking Association, still retained approximately $58.5 billion of municipals as of June 30, 1969.

Without question, a congressionally forced concentrated flow of municipals onto the market will result in the siphoning off of funds that otherwise might have gone into new municipal bond issues. While the State and local governments might be able to offset this competition to a degree, they could only do so at the cost of paying substantially higher interest rates than the already inflated ones they are now incurring. As stated by the National Governors Conference in a telegram to President Nixon on September 2, 1969, however:

Very simply, Mr. President, if the ability to market State and municipal bonds is jeopardized in any way, it will be a setback that for years to come will overshadow any positive proposals. (Testimony, p. 29)

FUNDAMENTAL UNFAIRNESS

The special treatment accorded to financial institutions by section 582(c) of the Code was introduced in 1942 to encourage financial institutions to support the large new issues of Government bonds which were then being offered to help finance the war. Ever since that time, the market value of publicly traded bonds has reflected the fact that all nondealer taxpayers are entitled to capital gains treatment upon the sale or redemption of such bonds at a profit. This factor clearly would have caused bond prices to be higher than they otherwise would have been if the major purchasers of bonds had known that their capital gains were to be taxed as ordinary income. Many financial institutions bought bonds prior to July 12, 1969, at these higher prices, in reliance on then existing law. A very large number of the bonds acquired prior to this date will mature after July 11, 1974. Thus, even under the more favorable Finance Committee treatment, financial institutions would have to dispose of many bonds, prior to maturity, in order to receive capital gains treatment. Unfortunately, the very fact that section 443 of H.R. 13270 is adopted in any form will depress the already weak bond market summary, page 71. This will result in a substantial loss to financial institutions that purchased bonds prior to July 11, 1969, on the basis of the incentives provided under then existing tax law.

CONCLUSION

In order for section 443 to be imposed fairly and with the least harmful effect on the municipal bond market, it should be made inapplicable to gains arising from bonds owned by financial institutions on July 11, 1969, regardless of the time sold or redeemed. At the very least, this rule should be made applicable to municipal bonds. Only if financial institutions are permitted to hold bonds purchased prior to July 12, 1969 until maturity and receive capital gains treatment will the banks be precluded from disposing of their municipal bonds en masse as the cutoff date for capital gains treatment approaches; only in this way will banks be able to avoid the effects of a bond market depressed by the very law which effectively forces disposition of the bonds. Since the Congress provided the incentive which led many financial institutions to purchase bonds

prior to July 12, 1969, Congress should permit these financial institutions to enjoy the full benefits which were intended by the law in effect at the time the bonds were purchased, especially when changing the law retroactively will be of significant detriment to the legitimate interests of State and local governments.

Mr. President, I wanted to eliminate the July 11, 1974, date entirely. I have discussed this with members of the Finance Committee. I have discussed it with the distinguished chairman of the committee. Rather than eliminate it entirely, we agreed—and, of course, the distinguished chairman of the committee will speak for himself—that probably a better cutoff date would be July 11, 1982. So my amendment is simply to extend the Finance Committee provision from July 11, 1974, to July 11, 1982.

Mr. THURMOND. Mr. President, I would like to associate myself with the remarks of my distinguished colleague. I think this amendment has great merit, and I hope the Senate will see fit to approve it.

I ask unanimous consent, with the approval of my colleague, to have my name added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HOLLINGS. Mr. President, I ask unanimous consent that the names of the Senator from Texas (Mr. TOWER) and the Senator from Alabama (Mr. SPARKMAN) be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, this is a matter that involves a time period, which would be in conference in any event. What we are talking about is the capital gains treatment for bonds held by banks. This was terminated as of July 11, 1969, except that under the committee amendment gains on bonds held on that date, will when realized still be capital gains if that realization occurs in 5 years. The Senator's amendment extends this to 12 years.

In view of the fact that this is a matter that will be in conference in any event, it is satisfactory to the Senator from Louisiana to agree to the amendment. I believe there may be objection by other Senators, but I personally have no objection to it.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The Senator from Delaware is recognized.

Mr. WILLIAMS of Delaware. Mr. President, I appreciate the position of the chairman of the committee, but I would not want the RECORD to show that there is no opposition to this amendment. The committee, I think, dealt very fairly with this problem; and under the committee bill, the corrections that we made would not become effective until 1974. Certainly that is lenient enough. If we agree to this amendment, it would mean the so-called reform in this area which the committee approved would not become effective until 1982. We might just as well say we are not going to do it at all.

I think financial institutions have been treated very fairly. The Senator from South Carolina is correct in saying that at the time they bought these bonds, they were figuring that they would have a certain tax treatment that was provided under existing law. There is no argument about that. And, under this bill, we have changed those rules of tax treatment.

But that is also true for every individual in America who bought similar bonds. Anyone who bought those bonds, or any other type of securities or fixed assets, who bought them a year ago, 2 years, or whenever they were purchased, bought them on the basis that the capital gains on their sale would be taxed at 25 percent.

Under the Finance Committee bill, the capital gains tax rate could go as high as 35 percent; but we find that under the Gore amendment, which the Senate agreed to, the capital gains tax can go as high as 37.5 percent in the top bracket.

We have changed the rules for all Americans in this bill. When we reduce the tax rates, they all get the benefits of that. I think it would be a great mistake to further open the bill and start whittling away at what little reforms there is left in it. There is little enough left now. I must oppose the amendment.

Mr. HOLLINGS. Mr. President, I would only add, in reply to the distinguished Senator from Delaware, that most of his remarks go to the general nature of the tax treatment given by the committee to banks, banking institutions, and everyone else in the overall tax reform program. He does not attempt to answer the problem of changing this rule in the middle of the game. I would hate to see an investor who bought under one set of rules and had the rules changed on him, coming back and saying, "Well, the banks and these other institutions have gotten all these special treatments."

They say, "We gave you consideration on this, that, and everything else." Mr. President, that is like taking a fellow 20 feet offshore and throwing him a 15-foot rope, and then sitting back and bragging how you met him more than halfway.

Mr. President, these banks are caught, and they cannot dispose of these securities, particularly since most of them are municipals and you have the crush in the municipal bond market now. They cannot be transferred in and out. They are going to have to be sold under the pressure added by a change of rules in the middle of the game, rather than in the ordinary course of business. Many small banks are going to suffer, and that should not occur through a tax reform measure.

Mr. WILLIAMS of Delaware. I appreciate the Senator's position but, as I stated, a great deal of this tax reform involves changing the rules in the middle of the game.

I was interested in the Senator's comparison of the banks' situation with that of a drowning man 20 feet offshore, trying to save himself with a 15-foot rope. I most respectfully suggest that if he cannot swim, he had better not get 20 feet offshore in deep water. Our banking institutions are supposed to be soundly managed, and I hope they are closer to the financial shore than that.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from South Carolina.

The amendment was agreed to.

Mr. HOLLINGS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. THURMOND. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 374

Mr. PERCY. Mr. President, I call up my amendment No. 374.

The PRESIDING OFFICER. The amendment is already before the Senate.

Who yields time?

Mr. LONG. Mr. President, I ask unanimous consent that the time in opposition to the amendment be assigned to the distinguished Senator from Nebraska (Mr. CURTIS).

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. PERCY. Mr. President, this amendment is directed to the basic objective of stimulating a significant increase in the funds actively devoted to philanthropy, charitable needs will continue to rise rapidly in the 1970's, and this amendment strongly reaffirms the further encouragement of private philanthropy.

The committee bill provides for equivalent to 5 percent of assets payout per annum. The Peterson Commission, after giving many months of study to the activities of foundations and the methods of private philanthropy in the country, has determined that it would be desirable to require a higher payout. The Commission feels that this would make the foundations themselves more vigorous, it would make their investment accounts more active and it would more directly benefit philanthropy.

I should like to summarize some of the arguments that the Peterson Commission used.

It recommends the requirement of a higher payout, because it feels that foundations should be required to make substantial annual distributions to charity to help meet rapidly accelerating charitable needs. Data on the performance of university endowments, mutual funds, and other professionally managed investments suggests that a payout in the 6-percent range is fair and reasonable under present conditions. Any payout percentages should, of course, be reviewed periodically to take account of changes in economic conditions. But in the light of changing economic conditions, if we look back over a period of some 20 years, 6 percent would be a perfectly reasonable amount, considering that many mutual funds have averaged an appreciation of some 10 percent over a period of many years.

Perhaps more important than the particular percentage are the assumptions on which it should be based. I believe that the payout requirement for foundations should be high enough to require them to invest their funds productively. The percentage should not be so high as to amount to a delayed death sentence. A foundation with a well-managed investment portfolio should be able to maintain its size and to stay abreast of changes in the value of the dollar. However, the current needs of our society for philanthropic funds are so great that I consider it inappropriate to permit foun-

dations to grow in size, without making an adequate current contribution to philanthropy. A payout percentage which will permit a well-managed foundation portfolio to maintain its size, while making a productive contribution to charity, represents an equitable balance between the pressure of society's current needs and the interests of future generations.

While accurate forecasts are impossible to make, a payout requirement in the 6-percent range might increase foundation grants significantly, perhaps several hundred million per year. That, however, is not the only reason why the recommendation of a higher payout is being made, and why I support it.

Another important reason is the peculiar nature of foundations as grantmaking institutions. Foundations are unique in our society in having assets which are not fully committed to ongoing activities. This is one of their great strengths, and makes them capable of doing things which other institutions cannot do. However, it also means that foundations are not under the same budgetary pressures as other organizations. From the limited data available I feel that foundation investment performance has in the past been quite unimpressive and that very substantial improvements are possible.

Another reason why I favor a high payout requirement is that the donor to a foundation receives a tax deduction at the time of his donation. Considering the pressing needs for charitable funds, I believe that funds for which a charitable deduction has been received, should be devoted to charity on a prompt and productive basis.

RELEVANCE TO PERPETUITY PROBLEM

I also believe that a high payout requirement provides a partial, and I think, sufficient answer to the concerns which have been expressed about perpetual existence of foundations. A high payout requirement means that the foundations can have perpetual life only as long as they continue to make substantial contributions to charity. If a foundation's endowment is not sufficiently productive to meet the payout requirement, the foundation will gradually be phased out of existence. Thus, perpetual life becomes a justified reward for continuing productivity, and not an automatic privilege which is grantad without being earned.

RELEVANCE TO CORPORATE CONTROL PROBLEM

A high payout requirement will also serve to answer at least some of the concerns which have been expressed with respect to foundation ownership of sizable blocks of stock in business corporations. My concern is that such blocks may be given to foundations for reasons, such as protecting the donor's control of the corporation, which have nothing to do with their desirability from an investment standpoint. I believe that the concerns about foundation holdings of large blocks would be substantially reduced when such holdings make a productive contribution to charity. A high payout requirement coupled with prohibitions on self-dealing, greater disclosure, and improved Government supervision, provides a better solution than an arbitrary limit on percentage of ownership.

Mr. President, we now require an annual report and audit of foundations.

The bill's provision indicates that for all assets that are readily ascertainable in value there should be a moving monthly average evaluation of assets.

An audit makes it possible to know virtually at all times the value of the assets. The trustees of the foundations would have no doubt in their minds what the specific percentage payout requirement would be.

When we consider that today the average foundation pays out about 7.5 percent of its asset value each and every year, equivalent to about $1.5 billion, a 6-percent requirement would not be an overall hardship on foundations.

Admittedly, some foundations simply have been sitting on their assets and doing nothing about paying them out. I think that foundations will have to have some adjustments. They will have to put their assets into more liquid securities yielding higher income if their present assets are nonproductive. There will be some adjustments.

The committee has very wisely required a scale-up over a period of years of the payout provision, and my amendment extends the period even beyond that, for 2 years.

The Commission, which has made the most intensive study of foundations and philanthropy ever carried out in our country, virtually unanimously feels that a payout of 6 percent is reasonable and prudent and would help to strengthen and give greater virility and activity to our foundations and would tremendously benefit private philanthropy as the payout increases from our foundations.

The PRESIDING OFFICER. Who yields time?

Mr. CURTIS. Mr. President, at the appropriate time I shall ask for a yea-and-nay vote on the amendment.

The Peterson Commission recommended this in lieu of much of the legislation. To add it on would not be wise. I do not think that any Senator could read off a list of the stocks that a foundation could invest in and conform to these requirements.

This is not an amendment to distribute income. This is an amendment to hasten the end of the life of the foundation.

I realize that the Peterson Commission worked a long time. I do not think they worked longer than either the Ways and Means Committee or the Finance Committee, or both of them. They came up with a figure of 5 percent.

Mr. President, I believe that the adoption of the amendment—well intentioned though it is—would be a disastrous blow to the good foundations.

I could list some foundations in which it would create disaster. I know of a foundation in the Southland that was created by a colored gentleman, the son of a slave. He is the owner of the largest life insurance company serving his people. There is a special provision contained in here to save it from the divestiture. There is not a way in the world that they could pay out half of 6 percent.

If they have to start to sell the assets in order to do that, that would be an encouragement to every raider in the country. It would be an encouragement to everyone who wants to merge and gobble up little companies.

Nothing is to be served by this amendment. It was presented at a time when, under the circumstances, it would be the principal governing factor. It is now offered in addition to all the provisions that are in the pending bill; and adding them together would be most unjust.

Mr. President, I feel so deeply about this matter that I am constrained to ask unanimous consent that we have a quorum call before the argument is completed and that the time not be charged to either the proponents or the opponents of the amendment.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. CURTIS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CURTIS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, on the amendment, I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. CURTIS. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, will the Senator from Illinois yield me 2 minutes?

Mr. PERCY. I yield 3 minutes to the Senator from Louisiana.

Mr. LONG. Mr. President, the Senator undoubtedly has referred to the fact that at the request of people like the Rockefellers, who have well-regarded foundations, the Peterson Commission was organized to study the foundation problem. These were business-oriented people, in the main, who were sympathetic toward foundations.

The Peterson Commission recommended a high payout requirement so that the charities could have the funds they need to carry on their programs. Interest rates being what they are, foundations could very well make payments in accordance with the requirements suggested by the Senator from Illinois if they rearranged their investments, the general thought being that if people want to establish foundations for charity or education, they ought to be allowed to do so, but if they do so the foundations should pay out substantial amounts currently, as was suggested by the Senator from Illinois.

As I understand the Senator's amendment—if I am not correct, I hope he will correct me—if interest rates should fall and the prevalent rate of dividends on stocks should decline, the amount that would be required to be paid out would be reduced or adjusted downward by the Secretary of the Treasury.

Mr. PERCY. That is right. The provisions are exactly as those in the Finance Committee bill, with the exception that it is a 6-percent rate instead of 5 percent. But we have given them plenty of time to adjust to it.

Mr. LONG. And the right of the Secretary of the Treasury to revise the payout percentage to reflect changed market rates of return is provided in the committee bill.

Mr. PERCY. It is in the committee bill as it exists.

Mr. LONG. So that they could easily earn this much, enough to make this kind of payout, even on triple A bonds or bonds of the U.S. Government, right now.

Mr. PERCY. Absolutely.

Mr. LONG. So that what the Senator is seeking is the approach recommended by the Peterson Commission, which studied this matter and which, in general, is very sympathetic to the foundations—that there should be a high payout requirement because the purpose of these foundations is to provide funds for charity.

Mr. PERCY. I felt very strongly, when I opposed the 40-year limitation on the life of foundations, that I had a moral obligation to take into account that by removing the 40-year limitation we were not removing some of the legitimate concerns that Members of the Senate had. This payout provision is the most effective device for removing the abuses and for assuring that we are not going to just set up foundations for the purpose of putting away stock of closely held corporations, and that the purpose is for charity and philanthropy, not for self-interest and for preserving management control which foundations could do if they had no required payout.

The committee recognized this. Most of the foundations and the Peterson Commission have looked at the 5-percent limitation. They think the principle is so sound that it ought to go from 6 percent to 8 percent. I feel that a 20-percent increase from 5 percent is reasonable.

Mr. LONG. Mr. Peterson told our committee that balanced funds today are yielding 9 percent. If a balanced fund investment would yield 9 percent, it is reasonable to ask the foundations to pay out 6 percent. They still could retain some to expand the corpus of the foundation even after making the kind of pay out the Senator has suggested.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. PERCY. I yield the Senator 2 additional minutes.

Mr. LONG. It seems to me it would be a worthy reform to require foundations to pay out a higher percentage—and this would be phased in along the lines provided in the committee bill.

I applaud the Senator from Illinois for offering this amendment.

Mr. PERCY. I thank the Senator.

Mr. CURTIS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Nebraska has 16 minutes remaining.

Mr. CURTIS. I yield myself 10 minutes.

Mr. President, I daresay that most of those Senators—I respect their views; they are honest in their views—who voted for the 40-year life of foundations will vote for the Percy amendment, because it is an amendment to cut off the dog's tail an inch at a time.

No foundations of which I know are asking for this. I think I have been in touch with as many foundations as has any other Member of the Senate. A number of foundations have said to me, "We cannot reach a 6-percent payment."

These are some of the things to which it can lead. First, it can lead to a dilution of the corpus of the foundation, its basic assets. They will have to distribute those. Or it can lead to an unwise investment policy. It can lead to further divestiture of assets.

I mentioned earlier that one of the finest foundations in this land is in Georgia. Its donor is the son of a slave. He is the owner of the largest life insurance company in the land for colored people. He has already given this foundation part of their stock. They have helped school after school in the South with their proceeds. He has written a will—because he has no heirs—providing that the rest of this company shall go to this foundation. It will be possible for that foundation to go on through the years and do good.

I do not think any Member of the Senate contends that life insurance stocks pay a 6-percent dividend. They just do not do it. If any Senators serve on a college board, they should inquire what the dividend return is on an endowment. It will not average 6 percent. As a matter of fact, many foundations earnestly beg that the 5-percent mandatory feature be reduced to 4 percent. As the bill stands, they are required to pay out of their income, but not less than 5 percent.

Mr. PERCY. Mr. President, will the Senator yield for a question?

Mr. CURTIS. I yield.

Mr. PERCY. A statement of fact has been made which I think would be refuted by the facts. In fact, I would go so far as to say that if there are major universities in this country that through the past 20 years have not averaged better than a 6-percent return on investment, including appreciation—and that is what we have to take into account—they ought to fire their investment committees, because I do not know of a single major university that has not been able to earn better than 6 percent. In fact, today anyone could invest in Government bonds and earn more than that. One can buy triple A bonds of corporations at 8 or 9 percent today, if you take into account not just income but also appreciation.

I yield myself 2 minutes of my time, Mr. President. I do not wish to take the time of the Senator from Nebraska.

If a foundation choses to put its assets into low-earning investments—and if it is in low-earning investments, I presume that is being done for the purpose of appreciation. Then as it gets its appreciation it would have to occasionally sell some assets in order to give to philanthropy. I am very suspicious of the motive of a foundation that might not be willing to do that. Are they not willing to do it because they have really set up this foundation for the purpose of having a bundle of stock of a company in a safe, comfortable place so that the proxy can always be voted for management? Is it that they do not want to divest themselves of the stock because it is not a philanthropic organization but because it is set up to help control a closed corporation? I am suspicious of the motives of anyone who may feel that a 6-percent payout would be too much.

Mr. CURTIS. Mr. President, the distinguished Senator from Illinois has admitted that he is talking about capital gains, and I never said that. What I said is that you could not invest it in stock the dividends of which would enable you to pay out and meet the requirements of this proposal.

There is another factor: How do foundations come into being? They usually come into being because the donor gives that which he has. What does he have? His own business. So he starts a foundation by giving all or part of his business to the foundation. If he is going to meet this 6-percent requirement, the foundation has to sell that; perhaps invest it in Government bonds, or whatever it is, or some high paying security. Again, you are forcing the sale of a company, much to the delight of the raiders, much to the delight of those who seek to merge and expand, and so forth.

Now, I wish the distinguished Senator from Illinois who, I know, is a friend of foundations, would do this. We have written into this bill provision for the Internal Revenue Service to audit for the first time. I use the figure that there are 30,000 foundations; perhaps there are more. Do Senators realize most of them have never been audited once? That audit will bring in some information. This bill also provides for very detailed annual reporting; a notice has to be published calling attention to the report; and anyone can have the report by asking for it within 6 months after it is published.

The bill itself provides they must pay out everything, but not less than 5 percent. Why the hurry? Why not let them operate for a year or two and find out what the Internal Revenue Service audits shows and find out what the annual reporting shows? Then, if what many of us feel is punitive, that in reality it will compel the foundations to sell part of their assets, let us do it then.

I said the other day that there was a good old American custom that the trial should precede the hanging. I think it should always be that way. Let us have the audits and let us have the annual reporting for a couple of years, and if we find that the requirement that they pay out all of their income annually, and not less than 5 percent, is a loophole—sustained not by the guesswork of any committee or any well-intentioned group, but by a systematic audit and an annual report led by every foundation in the land—we will be better informed.

I do not like to see an additional side burden placed upon the divestiture requirements of the bill. This measure required when it came from the House that if a foundation owned more than 20 percent of the assets of a company, they had to sell them and do so within 2 years. That provision does not bring in one dime in revenue. It was placed in there to punish foundations because people do not like them. I think most people appreciate foundations. I think that without foundations we would not have our prolific education system in this country. I know Senators may tire of hearing me say this but in my State they pay 30 percent of the cost of education

and not one could stay open without foundations.

After all, when the law states they must pay out all of their income currently, or not less than 5 percent, and we know we will have more information a year from now from the Internal Revenue Service and from the annual reports, and more than that in 2 years, why take this punitive action of arbitrarily saying that it has to be 6 percent.

I think that the Peterson Commission did a great deal of good, but this one item is out of context. It was never intended to be added to what is in the bill.

The PRESIDING OFFICER (Mr. STEVENS in the chair). The time of the Senator has expired.

Mr. RIBICOFF. Mr. President, will the Senator from Illinois yield for a question?

Mr. PERCY. I yield.

Mr. RIBICOFF. Is it my understanding that the 6 percent in the Senator's amendment comes from the recommendation in the Peterson report?

Mr. PERCY. The Senator is correct.

Mr. RIBICOFF. What was the basis of the 6-percent recommendation in the Peterson report?

Mr. PERCY. The basis of the 6-percent recommendation in the Peterson report was that the Commission felt we must stamp out abuse. It was very strongly opposed to the so-called 40-year death sentence of foundations, but felt a device which required a foundation to fulfill its purpose, to pay out to philanthropies is the best way to stamp out abuse. This provision would automatically deal with a lot of the subterfuge that some of these foundations have been engaged in. Some of the larger foundations are most ardent in wanting these abuses stamped out.

Mr. RIBICOFF. The Peterson report shows that all of the abuses could be eliminated if foundations performed their function of actually contributing to society and charity. Is that correct?

Mr. PERCY. The Senator is correct. I am thinking of the great universities in Nebraska that depend on foundations for 30 percent of their funds. All my amendment would do would be to require that foundations pay out several hundred millions of dollars more each year so that the great universities of the country in great need today could get the benefit. I am not so much worried about the one foundation in the South and the discomfiture that might be felt if it does not want to sell assets or does not have much to pay out. I am thinking of the recipients of the foundations' grants and not the discomfiture of the foundations themselves. I am talking about foundations whose actions are not for the purpose of philanthropy, but for other self-interest purposes.

The Senator from Nebraska asked why do we have to do this. I think we have to do it because we have taken out the death sentence of the 40-year lifetime limitation. You now can continue them in perpetuity, but we must make certain they are set up and operated for the purpose for which they were originally established and given a tax exemption.

Mr. RIBICOFF. Mr. President, I find myself in an interesting position here because I have been filled with admiration for the splendid fight the Senator from Nebraska has been making for foundations, both in committee and on the floor of the Senate. No one has been a better friend for foundations. Our votes have been in tandem on almost every issue. But as I understand the purpose of the amendment, this is one amendment which will really bring meaning to the foundations and require them to do what they are set up to achieve and accomplish. I think one of the great problems of the foundations is that in many instances they are poorly managed. Foundations go along with a certain type investment that no prudent trust officer, no prudent banker, and no prudent investment would allow to remain in his portfolio. As a result many foundations are stuck with assets which are dwindling in value—many foundations today are stuck with investments that bring a return of 1 or 2 percent.

By agreeing to the amendment we would now require foundations to be really alive in their investment portfolio to make sure they perform their function of contributing to our universities, hospitals, and charities.

One of the most constructive steps we can do is to agree to the amendment of the Senator from Illinois. In doing that I would make the prediction we will never have problems with foundations because we would be eliminating one of the basic abuses.

Mr. PERCY. I thank the distinguished Senator from Connecticut.

I yield 2 minutes to the Senator from Minnesota.

Mr. MONDALE. Mr. President, I rise to commend the Senator for this proposal. This is based on the recommendations of the Peterson committee.

The PRESIDING OFFICER. The Senator from Illinois has 1 minute remaining.

Mr. PERCY. I would be glad to yield the 1 minute to the Senator from Minnesota.

Mr. MONDALE. I have said my piece.

Mr. CURTIS. Mr. President, I ask unanimous consent that both sides may have 3 additional minutes.

Mr. PASTORE. Oh, Mr. President, I do not think this is necessary. This thing has been talked out.

Mr. CURTIS. Three minutes. After all, the distinguished Senator from Rhode Island, whom I love, is very ardent in his plea that we must have tax reform this year.

Mr. PASTORE. On the basis of affection I withdraw it. [Laughter.]

The PRESIDING OFFICER. The time is extended for 3 additional minutes.

Mr. CURTIS. That warms my heart. I know it is true. It is mutual.

Mr. President, I shall withdraw my opposition to this amendment if anyone can cite one foundation guilty of abuses that has paid out 5 percent. It is true some have paid out nothing, or 1 or 2 percent. The bill provides that they must pay it out at a minimum of 5 percent.

Just wait until the reports come in and then we may find out that the difference between 5 percent and 6 percent creates abuses.

This is a bleeding operation to destroy foundations, and I will tell the Senate why:

Foundations come into being by an individual's giving of his own company or part of it to create a foundation. If they cannot comply, they will be out of compliance right away and they will have to sell the assets.

Mr. President, I yield back the remainder of my time.

Mr. PERCY. Mr. President, I should just like to make a few remarks and comment on what has just been said by the distinguished Senator from Nebraska. He mentioned one particular foundation and said that it could not possibly pay out even one-half of the 6-percent requirement.

When the Senaate passes this bill, which I assume it will, they must pay out 5 percent under the current provision. So, if they cannot pay out one-half of 6 percent they cannot pay out 3 percent, so they will have to do something, anyway under the bill which I assume the distinguished Senator from Nebraska has concurred with; so that there will have to be some adjustment. I do not believe that we should tailor a requirement, in the judgment of those who have most carefully studied foundations and ways of improving their operations, just because a few have to make adjustments, because they have to make adjustment anyway. The Senator indicates he does not know of any foundation which has asked for this. I concur with that completely. No one ever comes in and asks for any requirement to be imposed upon them that they might have to fulfill.

The question is, do they really object?

I have carefully checked with the heads and representatives of the major foundations in this country, Rockefeller, Ford, Carnegie, and with the Council on Foundations which speaks for all foundations who are members, and they do not have any objection at all.

They violently objected to the 40-year limitation.

They are trying to stamp out and eliminate abuses. They are trying to see that foundations serve the purpose for which they were intended.

For that reason, they have no objection to this particular amendment. They realize that it will require changes in investment policy. It will sharpen up some of the investment practices and habits, and it will stamp out some of the abuses which include foundations being used as holding places for assets of closed corporations that the company management controls.

So, I urge the Senate to adopt this amendment which I feel will strengthen private philanthropy and encourage giving, and will do it at a time when there is great charitable need in this country, and when we are exerting tremendous budget pressure upon the Federal Government. This will enable the foundations and require the foundations to step up and take on a slightly larger share of the load than they are now assuming, until such time as the Federal Government can again fund more fully

some of the urgently needed programs in education, health, and welfare.

Mr. HATFIELD. Mr. President, I wish to add my comments about this amendment to those of the distinguished Senator from Nebraska (Mr. CURTIS). Senators are aware, I entered public service after serving as an educator. I currently serve as a trustee of two Oregon colleges.

My prime association has been with Willamette University, in Salem, Oreg. It was there that I taught and served as dean of men. Currently, I am a trustee there.

Many contributors have assisted in Willamette's capital development, but I think two warrant special attention. The Collins Foundation and the Atkinson Foundation both have given much of the capital needed at this fine university. The Collins Foundation has distributed over $1,800,000 to Willamette in 20 years.

My opposition to the Percy amendment, which would raise the payout requirement from 5 percent—the figure set by the Finance Committee—to 6 percent is focused by the plight of the Atkinson Foundation, which would be hurt greatly by this amendment. The parent company, Guy F. Atkinson Co., is one of the larger construction companies in the country.

Mr. President, the words of Mr. Donald K. Grant, treasurer of the foundation and a respected lawyer, express the plight of the foundation better than I can. Let me quote Mr. Grant:

> In our case, our Foundation has since 1934 given away more than $3,200,000 (through December 30, 1968)—*all* of its income plus some additional sums from cash gifts received. In that same period, however, our stock in Guy F. Atkinson Company (of which our founder is president) has grown from a value of some $1,444,000, to just under $5,000,000.
>
> We have no objection to being required to continue to give away all income actually received each year; but to now require us to use this $5,000,000 figure as the basis for a mandatory minimum 5 per cent return is simply to require us to sell off more than $100,000 from our invested stock each year:

| | |
|---|---|
| Required minimum return ($5,000,000 × .05) | $250,000.00 |
| Estimated GFACo. dividends | 149,102.40 |
| Balance to "make up" each year | 100,897.60 |

> This 5 per cent minimum investment return provision is nothing more than an attempt to force a private foundation to sell off its business holdings over a period of time. . . .

Mr. President, this amendment may be justified in the eyes of some, but to me it will hit the beneficiary of the philanthropy in the long run. When a foundation has to eat into its assets to satisfy such a rule as this, the smaller foundations face a short life as they wither and die. Their corpus will be eaten up by this payout rule—some eventually even by the 5-percent rule.

As Governor of Oregon for 8 years, I became involved with higher education in both the public and private sector. During this 8 years, I witnessed the tremendous increase in the costs of operating a university. This cost increase was present in colleges in States which all of us here today represent.

Mr. President, are we to add another albatross to the neck of our colleges and universities? Are we going to hinder further the one source which has risen dramatically in recent years? I hope not.

I ask unanimous consent to have printed at this point in the RECORD, a fine article highlighting the plight of colleges and universities in Oregon.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

OREGON'S PRIVATE COLLEGES, UNIVERSITIES HURT BY STEEP DECLINE IN FALL ENROLLMENT

(By John Guernsey)

KLAMATH FALLS.—The crisis facing some of Oregon's privately operated colleges and universities was pointed up Monday when fall term enrollments for all institutions were reported by the State Board of Higher Education.

The 18 independent colleges and universities this fall have a total enrollment of 12,086 students, down about 5.5 per cent from their fall term total last year.

In the past four years, the combined independent institutions have fallen about 13 per cent from their peak total enrollment of 13,627 in the fall of 1965.

This year's enrollment reports indicate that while the independents fell 5.5 per cent, the public four-year colleges gained 5.4 per cent, and the number of community college students taking academic college transfer courses climbed nearly 24 per cent.

The big losers in the independent college field are Northwest Christian College of Eugene, down 12.6 per cent from 460 students last year; Marylhurst College down 17.3 per cent from 750 students last fall; Mount Angel College, down 10.3 per cent from 370 last year; and Linfield College, down 7 per cent from 1,147 last year.

Lewis and Clark College climbed 6.1 per cent to 1,989 students; Reed College gained 7.3 per cent to 1,379; University of Portland is up 5.2 per cent to 1,879 students; and Willamette University is up 3.9 per cent to 1,632.

The over-all college enrollment declined in spite of enrollment-luring innovations such as new study programs on many of the campuses and despite state scholarship support for private college students.

The issue of state fund assistance for the independents is expected to be a major one during the 1971 Oregon legislative session.

The enrollment reports also alerted legislators and educators to keep a close eye on the two-year community colleges, to see that they do not become strictly academic-flavored junior colleges, with little or no attention paid to vocational-technical courses and students.

Whereas the number of community college students taking academic courses climbed nearly 27 per cent to 14,991 students, the total community college enrollments gained only 15 per cent this fall.

The history of community colleges and junior colleges in other states indicates they are inclined to develop into academic institutions, with vocational instruction having only the country cousin role.

Legislators have made it clear that they do not intend this to happen in Oregon.

Total enrollment in the nine public colleges and universities has reached about 84,000, up 5.4 percent over last fall.

The figures indicate that 1969 legislative action to curb the number of graduate students has produced the desired effect.

The System of Higher Education now has about 8,240 graduate students, up about 2.7 per cent over the 8,023 of last year.

More than 9,000 had been anticipated before legislative restrictions went into effect.

There are about 6,468 out-of-state students in the public four-year colleges this fall, up about 12.5 per cent over the 5.755 of last year. Even though the out-of-state number is up considerably, the legislative intent of not having more than 900 new out-of-state freshmen at the University of Oregon and Oregon State University has been accomplished.

Mr. HATFIELD. Mr. President, the article, written by John Guernsey, of the Portland Oregonian, points out the decline in enrollment in Oregon's private colleges and universities, I, for one, do not want to see this happen and I fear that the Percy amendment will hurt these colleges and universities in the long run.

In closing, I ask Senators to look at their States: look at private colleges and universities, look at art museums, look at historical museums, and look at the many worthwhile charities that will be hurt if this payout requirement is tightened.

I hope that Senators will see that we must not put undue restraints on those who give so much, who do so much, and who help so much. Let us not kill foundations piece by piece.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Illinois.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New York (Mr. ANDERSON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON) and the Senator from Texas (Mr. YARBOROUGH) are necessarily absent.

I further announce that the Senator from Indiana (Mr. BAYH) and the Senator from Nevada (Mr. CANNON) are absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Louisiana (Mr. ELLENDER) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE) and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) and the Senator from California (Mr. MURPHY) would each vote "nay."

The result was announced—yeas 49, nays 32, as follows:

[No. 184 Leg.]

YEAS—49

| Eilender | Mundt | Yarborough |
| Fulbright | Murphy | |
| Goldwater | Russell | |

So Mr. PERCY's amendment was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRIFFIN. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. SCOTT. Mr. President, I offer amendments and ask for their immediate consideration.

The PRESIDING OFFICER. The amendments will be stated.

The legislative clerk proceeded to read the amendments.

Mr. SCOTT. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments are as follows:

On page 156, line 15, strike out "and".

On page 157, at the end of line 6, strike out the period and insert ", and".

On page 157, after line 6, insert the following:

"(iii) a private foundation all of the contributions to which are pooled in a common fund and which would be described in section 509(a)(3) but for the right of any substantial contributor (hereafter in this clause called 'donor') or his spouse to designate annually the recipients, from among organizations described in paragraph (1) of section 509(a), of the income attributable to the donor's contribution to the fund and to direct (by deed or by will) the payment, to an organization described in such paragraph (1), of the corpus in the common fund attributable to the donor's contribution; but this clause shall apply only if all of the income of the common fund is required to be (and is) distributed to one or more organizations described in such paragraph (1) within 3 months after the close of the taxable year in which the income is realized by the fund and only if all of the corpus attributable to any donor's contribution to the fund is required to be (and is) distributed to one or more of such organizations not later than one year after his death or after the death of his surviving spouse if she has the right to designate the recipients of such corpus.

Mr. SCOTT. I will explain the amendments.

The PRESIDING OFFICER. Does the Senator from Pennsylvania wish the amendments to be considered en bloc?

Mr. SCOTT. Yes. I ask unanimous consent to do so.

The PRESIDING OFFICER. Without objection, the amendments will be considered en bloc.

Mr. SCOTT. Mr. President, this is an amendment which has been cleared on both sides of the aisle and would extend the availability of the 50-percent charitable deduction limitation and the full deduction for gifts for certain appreciated property, also, to contributors to what are known as community foundations; and the extent to which other provisions of the proposed legislation dealing with private foundations will be applicable to community foundations will not be affected by the proposed amendment.

This is a clarifying amendment, to make certain that community foundations are included in the provisions of the bill in this form.

I ask unanimous consent to have printed in the RECORD at this point a memorandum in further explanation of the amendment.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

MEMORANDUM RE AMENDMENT TO SECTION 201(A) OF H.R. 13270

Certain publicly supported charitable organizations have supplemented their fund-raising programs by forming so-called "community foundations" which receive contributions and, although investments are pooled, maintain separate accounts for each contributor in the income and corpus of the foundation. The income and assets representing each contributor's account ultimately redound to the benefit of the founding organization, except to the extent that the donor may periodically designate that other section 501(c)(3) organizations, contributions to which qualify for the 50% contributions deduction limitation, receive all or part of the income or corpus allocable to his account. Typically, apart from the designation of the particular organization which will receive the income or corpus, such foundations are controlled in all respects, including investment policies, by the founding organization.

The provisions of H.R. 13270 dealing with charitable contributions may be unduly restrictive as applied to these "community foundations," since the retained power in the contributor to designate the ultimate recipient from among such section 501(c)(3) organizations may cause the "community foundation" to be treated as a "private foundation" by reason of section 509(a)(3)(C). The 50% charitable deduction limitation and the full deduction for gifts of certain appreciated property may therefore not be available to contributors to the same extent as if contributions were made directly to the section 501(c)(3) organizations.

These two rules have been made applicable with respect to contributions to other organizations classified as "private foundations", namely private operating foundations and other private foundations which distribute 100% of contributions received before the end of the taxable year following the year of receipt. The proposed amendment to section 170(b)(1)(E) would extend the availability of the 50% charitable deduction limitation and the full deduction for gifts of certain appreciated property also to contributors to "community foundations". The extent to which other provisions of the proposed legislation dealing with "private foundations" will be applicable to "community foundations" will not be affected by the proposed amendment.

Mr. SCOTT. Mr. President, I ask for action on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Pennsylvania.

The amendments were agreed to.

AMENDMENT NO. 368

Mr. KENNEDY. Mr. President, I call up my amendment No. 368.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be waived.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. LONG. Is the Senator willing to agree to a time limitation?

Mr. KENNEDY. I am willing to agree to a 1-hour limitation on the amendment, to be equally divided.

The PRESIDING OFFICER. Thirty minutes to a side?

Mr. KENNEDY. Yes.

Mr. SCOTT. No objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. JAVITS. Has the Senator sought to have these amendments considered en bloc?

Mr. KENNEDY. If the Senator will withhold his request, I intend to make that request now.

Mr. President, I ask unanimous consent that the amendments be considered en bloc.

Mr. JAVITS. Mr. President, I object. I have no objection to——

Mr. KENNEDY. Very well; with the understanding that the Senator objects, will the Senator permit me to continue?

Mr. JAVITS. My only question is as to the appreciation feature.

Mr. KENNEDY. Mr. President, I make the request that my amendment be divided as follows: that the amendment be considered in two parts, and that all of amendment No. 368 as printed except lines 3 through 12 on page 3 be treated as the first part—section A—and that lines 3 through 12 on page 3 be considered as the second part—section B. This would remove for separate consideration the provision on appreciated property given to charity, and may meet the Senator's objection. Therefore, Mr. President, I ask unanimous consent that the amendment be divided in this manner.

The PRESIDING OFFICER. So that the understanding of the Chair may be clear, all of the Senator's amendment except lines 3 through 12 on page 3 will be considered as one amendment, and those lines will be considered as a second amendment?

Mr. KENNEDY. That is correct. Also, Mr. President, I ask unanimous consent that the provision on appreciation in value of charitable contributions be voted on first.

Mr. COTTON. Mr. President, reserving the right to object, what does that do to the time limitation? Does the time limitation apply to each of the sections?

The PRESIDING OFFICER. The time limitation would apply to the whole amendment as called up. The first vote would be on lines 3 through 12 on page 3.

Mr. LONG. Mr. President, I ask unanimous consent that the time limitation apply only to the first section of the amendment, and that we have a separate time limitation on the other division, because Senators would like to know what they are voting on. I might not need all of the time we have in opposition, but I do think Senators ought to have an explanation of what they are voting on between part 1 and part 2 of the amendment.

Mr. PASTORE. Mr. President, I object, on the ground that if we stay here and listen, we will know.

Mr. COTTON. Mr. President, the request for a division has not been granted.

The PRESIDING OFFICER. The Chair corrects the Senator from New Hampshire. The division has been granted.

Mr. COTTON. I made a reservation, and I did not hear it granted after I made the reservation.

Mr. SCOTT. The Senator's reservation was as to the time limitation.

Mr. COTTON. I made the reservation on the request that the amendment be divided. My point is that I feel that if we are going to divide it, there should be some assurance that we do not use up all the time on the first part, or nearly all of it, so that we do not have an adequate opportunity to discuss the second part; and it would seem to me that when the Senate agreed to the unanimous-consent request for the limitation of 30 minutes on a side, it was with the understanding that it was on all of the amendment. Now, if it is to be divided——

Mr. PASTORE. Why not do it 40 minutes on one part and 20 minutes on the other?

Mr. KENNEDY. Mr. President, will the Senator yield? I think all of us here realize the importance of permitting some additional discussion after we vote on the appreciation in value of charitable contributions. I think that would be the logical way to proceed. We should have a reasonable period of time just to discuss the other part of the amendment, which proposes to make the minimum tax progressive, and to reduce the level of preference income which triggers the minimum tax. It was my intention to use up only about 20 minutes of my part of the time in talking about appreciated property given to charity. I think the other part of my amendment will be illuminated to some extent in the course of our discussion on appreciated property, and I think we can deal with the whole amendment in the agreed period of time.

I agree with the Senator from New Hampshire and the Senator from Louisiana that after we complete the first part of the amendment, we will need time for some discussion on the second part.

Several Senators addressed the Chair.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. KENNEDY. I think the Senator from New Hampshire has the floor.

Mr. COTTON. I am happy to yield to the Senator.

Mr. PASTORE. We have been staying here now for more than a week, and we have got to come back next week. The trouble here is, we do not stay on the floor and listen to the argument. If we would stay on the floor and listen, we could facilitate this.

We can stay within the hour. Why not allow 40 minutes for the vote on part B, and take a vote, and then have 20 minutes on part A, and still stay within the hour?

Mr. COTTON. That is perfectly acceptable to me.

The PRESIDING OFFICER. Does the Senator from Massachusetts concur in that unanimous consent request?

Mr. KENNEDY. Mr. President, I wish to reserve the right—if the portion of the amendment dealing with appreciated property given to charity is defeated—to offer a substitute amendment. Therefore, I do not wish to yield back the remainder of my time before the vote on the first part of the amendment.

Mr. LONG. All time must be yielded back before the vote.

The PRESIDING OFFICER. The Senator is advised that all time would have to be yielded back before the vote on the first section of his amendment.

Mr. KENNEDY. Then, Mr. President, may I have the attention of the Senate? I propose that we modify the unanimous-consent agreement to permit 30 minutes each on the two separate sections of the amendment.

The PRESIDING OFFICER. Is that 15 minutes for each side?

Mr. KENNEDY. Yes.

The PRESIDING OFFICER. According to the Chair's understanding, then, there will be a time limitation of 1 hour, 15 minutes on each side for each section. Is there objection?

Mr. PASTORE. I have no objection, Mr. President.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. Kennedy's amendment (No. 368), as divided, is as follows:

AMENDMENT No. 368

FIRST PART (SECTION A)

Page 212, strike out lines 16 through 20 and insert the following:

"(a) IN GENERAL.—

"(1) INDIVIDUALS.—In addition to the other taxes imposed by this chapter, there is hereby imposed for each taxable year, with respect to the income of every person other than a corporation, a tax, determined in accordance with the following tables, on the sum of the items of tax preference:

"(A) Taxpayers other than married individuals filing separate returns—

"If such sum is:

| | |
|---|---|
| Not over $5,000 | 0. |
| Over $5,000 but not over $30,000 | 2½% of such sum over $5,000. |
| Over $30,000 but not over $50,000 | $625, plus 5% of such sum in excess of $30,000. |
| Over $50,000 but not over $100,000 | $1,625, plus 10% of such sum in excess of $50,000. |
| Over $100,000 | $6,625, plus 15% of such sum in excess of $100,000. |

"(B) Married individuals filing separate returns—

"If such sum is:

| | |
|---|---|
| Not over $2,500 | 0. |
| Over $2,500 but not over $15,000 | 2½% of such sum in excess of $2,500. |
| Over $15,000 but not over $25,000 | $312.50, plus 5% of such sum in excess of $15,000. |
| Over $25,000 but not over $50,000 | $1,812.50, plus 10% of such sum in excess of $25,000. |
| Over $50,000 | $3,312.50, plus 15% of such sum in excess of $50,000. |

"(2) CORPORATIONS.—In addition to the other taxes imposed by this chapter, there is hereby imposed for each taxable year with respect to the income of every corporation, a tax equal to 5 percent of the amount by which the sum of the items of tax preference exceeds $30,000.

Page 213, line 2, strike out "person" and insert "corporation".

Page 214, after line 2, insert the following:

"(4) TAXPAYERS OTHER THAN CORPORATIONS.—In the case of a taxpayer other than a corporation, rules similar to the rules provided by paragraphs (1), (2), and (3), shall be applied under regulations prescribed by the Secretary or his delegate." . . .

Page 220, strike out lines 9, 10, and 11 and redesignate subsections (b) through (g) of section 58, as subsections (a) through (f), respectively.

Page 220, beginning with line 21 strike out all through line 6, page 221 and insert the following: "or trust the sum of the items of tax preference for any taxable year of the estate or trust shall be apportioned between the estate or trust and the beneficiaries on the basis of the income of the estate or trust allocable to each."

SECOND PART (SECTION B)

Page 217, after line 21, insert the following:

"(10) APPRECIATION IN VALUE OF CHARITABLE CONTRIBUTIONS.—So much of the amount of the deduction allowable for the taxable year under section 170 or 642(c) which is attributable to contributions of property (other than contributions to which section 170(e) applies) as is equal to the amount by which the fair market value of such property (at the time of contribution) exceeds the taxpayer's adjusted basis in such property."

Mr. WILLIAMS of Delaware. Mr. President, does the Senator request the yeas and nays on his amendment?

Mr. KENNEDY. I ask for the yeas and the nays on the second part.

The yeas and nays were ordered.

Mr. KENNEDY. I also ask for the yeas and nays on the first part.

The PRESIDING OFFICER. The ruling carries as to both sections.

Mr. KENNEDY. Mr. President, first of all, basically and fundamentally, the amendment which I offer today on behalf of myself, the Senator from Nevada (Mr. CANNON), the Senator from Michigan (Mr. HART), the Senator from South Dakota (Mr. MCGOVERN), the Senator from Montana (Mr. METCALF), the Senator from Wisconsin (Mr. PROXMIRE), and the Senator from Ohio (Mr. YOUNG), would carry forward a very important and, I think, progressive concept that has already been established in the committee bill, and for which the Committee on Finance should be commended. The concept that has been established is the concept of a minimum tax.

The minimum tax provision included in the Senate bill is the result, I believe,

of the great sentiment of millions of ordinary taxpayers of this country. They have been outraged in recent years to find that there are individuals who are able to accumulate great sources of income without paying any income tax at all.

Mr. President, the most glaring defect of our tax laws is their inequity. Although our procedures for administering the tax laws are the most advanced of any nation in the world, the laws themselves are unfair. We know that some taxpayers pay a bargain basement price while others, especially the poor, are required to bear far more than their fair share. Millions of Americans below the poverty level pay taxes they cannot afford on their meager yearly incomes. Many of our wealthiest citizens, with millions of dollars in income each year, pay little tax or no tax at all. Often taxpayers with the same real economic income are taxed at widely different rates, depending on the source of their income.

In 1967, for example, in what has now become the famous statistic in American tax lore, 155 Americans filed tax returns with adjusted gross incomes in excess of $200,000, but paid no taxes whatever. Twenty-one of these citizens had incomes in excess of $1 million. Yet, these 155 Americans are only the tip of the iceberg. Tens of thousands of wealthy citizens obtained subsantial tax reductions because of the sophisticated use of tax loopholes.

Although the maximum tax rate is 70 percent, the effective tax rates are far lower. Indeed, the average effective tax rate rises to only about 30 percent for persons with annual incomes in the range of $50,000 to $200,000, then gradually declines for those earning over $1 million a year.

Even these dramatic figures, however, do not adequately measure the breakdown in fairness of our current tax structure. Clearly, in our tax laws, some types of income are more equal than others. Thus, salaries and many kinds of business income are taxed at ordinary income rates, but other income is not taxed at all—such as the appreciated value of property given to charity—or is taxed at lower capital gain rates. And, taxable income from any source can be offset by artificially large deductions for oil and gas properties, such as intangible drilling costs, the recurring percentage depletion allowance, and the foreign tax credit.

Mr. President, as I have indicated, I would like to commend the Committee on Finance and its distinguished chairman, the Senator from Louisiana, for the significant improvements the committee has made in the provisions dealing with the minimum tax—LTP—as passed by the House of Representatives.

The minimum tax is specifically designed to deal with the problem of the consistent excessive use of tax preferences, alone or in combination, by individuals subject to the progressive rate structure. At the same time it is also designed to avoid a substantial penalty on the moderate use of such preferences. Preferences are incentives, given through the tax law to encourage desirable objectives, and if they are to remain in the tax law they should be allowed to operate to achieve their intended purposes, except where they are used to an excessive degree to permit taxpayers to avoid a fair share of their tax burden.

The LTP in the House bill applied to "disallow" preferences only to the extent they exceeded half the taxpayer's true economic income. This disallowed portion was taxed on the basis of the progressive rates. A taxpayer whose income consists of salary and dividends of $200,000 and who reduces this amount by $150,000 of preferences under existing law would have adjusted gross income of $50,000. Under LTP, the preferences could not be used to reduce his adjusted gross income to less than $100,000—one-half of $200,000, his true economic income.

Although the theory of the "limit on tax preferences"—the so-called LTP—in the House bill was relatively simple in concept, the proposal was highly complex in practice, as most of us who have tried to fathom its detailed provisions will attest. If enacted, the LTP would require difficult calculations by taxpayers, and would add significant new administrative difficulties to the Internal Revenue Code. Even more significant for our present purposes, however, the bill passed by the House was deficient in three major respects:

First. It omitted a number of substantial items from its list of tax preferences subject to the minimum tax, such as preference income from percentage depletion and from leased personal property.

Second. It applied the minimum tax only to individual taxpayers. It failed to apply the tax to corporations, who also are able to enjoy large amounts of tax preference incomes.

Third. And, perhaps most significant of all, the House bill contained provisions that did not "trigger" the minimum tax until tax preference income exceeded taxable income. As a result, many individuals with high taxable income would continue to enjoy large amounts of tax-free preference income under the House bill, in spite of the minimum tax.

As the excellent report of the Finance Committee makes clear, the committee recognized the serious complexity and the inequity of the House version of the minimum tax, and adopted a completely different approach, based on the general concept that every taxpayer should pay at least some tax on income derived from tax preferences. I believe that this new concept of the minimum tax, now offered by the Finance Committee, is one of the major virtues of the committee bill, and I commend the committee for establishing this important principle. Indeed, as Members of the Senate are aware, Senator LONG has long favored the concept of the minimum tax, and it is entirely appropriate that his important contribution should at long last be made a part of this major tax-reform bill.

At the same time, however, I believe that the minimum tax proposed by the committee can be improved still further as it applies to individuals. In fact, there are three important respects in which the fruitful work of the committee should be carried forward, and my amendment is intended to accomplish this result.

First, the minimum tax on individuals should be a progressive tax, not a flat rate tax. As many Senators have pointed out in the course of the current debate, the genius and guiding principle of our Federal income tax system is its progressivity. We apply that principle to our ordinary income tax on individuals, and we should apply it as well to the committee's version of the minimum tax.

As reported by the committee, the minimum tax in H.R. 13270 imposes a flat 5-percent tax rate on both individuals and corporations. Since corporations are already subject to a flat income tax rate under our present tax laws, it is appropriate that the minimum tax applied to corporations should also be at a flat rate. Therefore, I support the provisions of the committee bill as they apply to corporations.

With respect to individuals, however, the situation is far different. Under present law, the tax rates are progressive, ranging from 14 percent in the lowest bracket to 70 percent in the highest bracket. I believe that the minimum tax rate we enact should also be progressive. In general, the larger the amounts of an individual's income from tax preferences, the larger should be the rate of the minimum tax he pays. We know that each year, many taxpayers receive hundreds of thousands of dollars or more in tax-free income through the use of the numerous preferences now contained in the tax code. It is fair to demand that these wealthy taxpayers pay their minimum tax at a higher rate than citizens with more modest preference income. For this reason, the minimum tax amendment I am proposing contains a new rate schedule graduated in four stages, from 2½ percent in the lowest bracket to 15 percent in the highest bracket.

Second, the minimum tax should be "triggered" at the lowest reasonable level consistent with effective administration of the tax laws and avoidance of unnecessary complexity for the taxpayer. Obviously, not every taxpayer with a few hundred dollars of capital gain should be subject to the tax. As passed by the House, the first $10,000 of tax preference income was made exempt from the minimum tax. In the version of the minimum tax reported by the Finance Committee, the first $30,000 of preference income was exempted from the operation of the tax.

I believe that both of these triggers are too high. One of the great virtues of the minimum tax is its insistence that all individuals with substantial tax preferences should pay at least some tax on their preference income. To be sure, even with the $30,000 trigger in the committee bill, the wealthiest taxpayers—those with the largest amounts of tax preference income—would be subject to the committee's minimum tax. But to say that $30,000—or even $10,000—of such income can continue tax free is to cast grave doubt on the principle of the minimum tax in the eyes of scores of mil-

lions of our citizens whose taxable income is far less than $30,000 or $10,000. If we are to win their confidence in the justice of the minimum tax, we must set the trigger at the lowest practicable level. For this reason, my amendment proposes to set the trigger for application of the minimum tax on individuals at $5,000 of preference income. Thus, the amendment will establish the following progressive tax rates on preference income:

| | Percent |
|---|---|
| $0 to $5,000 | 0.0 |
| $5,000 to $30,000 | 2.5 |
| $30,000 to $50,000 | 5.0 |
| $50,000 to $100,000 | 10.0 |
| Over $100,000 | 15.0 |

Third, the items of "tax preference" income made subject to the minimum tax should be as comprehensive as possible. Except for two omissions, I believe that the nine items of preference income listed in the committee bill represent an essential complete list of the preferences now contained in the Internal Revenue Code or that will be contained in the code if other provisions of the committee bill are enacted.

The two omissions, however, are significant. They are interest on State and local government bonds, and the appreciation in value of property donated to charity. Because of the extremely tenuous position of the tax-exempt bond market at this time, the virtually unanimous opposition of Governors and mayors throughout the Nation to any mandatory tax whatever on their Government bonds, and the probability that early next session Congress will consider proposals like Urbank, it makes no sense to attempt to include interest on such bonds in the list of tax preferences subject to the minimum tax at this time.

No such argument applies, however, to appreciation in value of property given to charity. Undoubtedly, such appreciation is a tax preference, and should be subject to the minimum tax, just as excess percentage depletion or excess depreciation on property is subject to the tax. I believe that the concept of the minimum tax is too important to allow its comprehensive tax base to be lightly eroded. Therefore, the amendment I am proposing includes, as a tax preference, the appreciation in value of property donated to charity.

Mr. President, let me speak further on the tax rate in the version of the minimum tax in the committee bill.

I believe that a 5-percent tax fails to deal adequately with the problem of the excessive use of tax preferences. Its rate is too small. It is not a progressive tax. It is only a drop in the bucket for wealthy taxpayers with hundreds of thousands or even millions of dollars in tax preferences. Recent Treasury studies show an extensive pattern of returns in which tax preferences are used to offset all, or substantially all, of the income of high-income taxpayers. If a taxpayer with $200,000 of salary and dividend income had sheltered all of this amount with preferences, his tax under present law would be zero. Under the committee bill, it would be only $10,000. Under my amendment, the tax would be $21,000.

For this very high income taxpayer, the 5-percent committee tax will impose a tax burden on preferences of less than one-half of the tax burden that would have been imposed by amendment No. 368. Yet this taxpayer is enjoying $200,000 of tax-sheltered income. Equally serious, the tax burden is at the same rate under the 5-percent committee tax whether the taxpayers' preferences are $50,000, or $500,000, or $5,000,000.

Indeed, the 5-percent tax is actually regressive in nature. The denial of the tax benefit decreases as the taxpayer's marginal rate increases—as his taxable income increases—so that the impact will be least where it should be greatest and vice versa. Stated another way, a 5-percent tax has the same effect as disallowing 10 percent of a deduction to a 50-percent-bracket taxpayer, but to a 70-percent-bracket taxpayer, the effect is the same as disallowing only 7 percent of a deduction.

Mr. President, in summary, my amendment would make three changes in the minimum tax:

It would replace the existing flat rate with a graduated rate.

It would reduce the "trigger" from $30,000 to $5,000.

It would expand the list of tax preferences by adding an important additional item, the appreciation in the value of property donated to charity.

According to Revenue estimates, these provisions will increase the revenue gain from its present value of $700 million under the committee bill to approximately $1.2 billion.

As recent votes make clear, additional revenues from tax reform are essential if we are to maintain a proper measure of fiscal responsibility in the tax bill for the immediate years ahead. I am pleased, therefore, that a more equitable approach to the minimum tax also confers the additional bonus of a substantial revenue gain. If enacted, the amendment I am proposing will help bridge the gap between tax reform and tax relief in the bill.

Mr. President, there are those—and I am certainly one of them—who have been subjected to calls and telegrams from many of our colleges and universities and even foundations throughout the country, complaining about this amendment and saying that it is really going to destroy their institutions by eliminating the opportunities for individuals to make sizable contributions to the charitable institutions of their choice.

This amendment does no such thing.

To demonstrate my point here, I would like to make several observations in connection with my minimum tax amendment:

First, an effective minimum tax is essential to the fair operation of our tax system. The essence of the minimum tax is the fundamental principle that every individual should pay at least some tax on his income. Yet, the loopholes and escapes in our current tax laws are widespread and are known to be widespread. Compounding this unfairness, the use of tax shelters for income can be reached only by our wealthiest citizens. To paraphrase a famous aphorism, our tax laws in their majestic equality allow the poor as well as the rich to reap long-term capital gains, to search for oil, and to contribute appreciated property to charity. The minimum tax is intended to remedy these abuses while still maintaining the principal tax incentives. The minimum tax does not eliminate tax preferences. What it does do is to place a modest or minimum tax on the income represented by such preferences, which would otherwise be completely tax free.

This is what the "taxpayers' revolt" is all about. Millions of law-abiding citizens faithfully pay the Federal tax collector billions of dollars each year from their hard-earned taxable income. The minimum tax will insure that all citizens, including those with tax-sheltered income and tax preferences, pay some tax. Therefore, the list of tax preferences should be as comprehensive as possible. Since appreciation in value of property donated to charity is a tax preference, it should be added to the nine items of tax preferences listed in the committee's bill.

Second, the charitable deduction for appreciated property given to charity is a tax preference. If an individual bought stock for $0 and it is now worth $100, the appreciation in value of the property is $100. If he gives the stock to charity, he gets a deduction from his other, "ordinary," income for the full $100 market value of the stock. At the top bracket of 70 percent, the gift would actually cost the taxpayer only $30. In effect, the Federal Government would be contributing the other $70 to the charity; that is, the taxpayer is giving away a large part of his tax to charity.

On the other hand, if the individual sold his property and then contributed it to charity—which is the method of contribution that strict tax justice would require, absent incentives for charitable giving, he would have to pay capital gains tax on the full $100 appreciation in value. Under the committee bill as it now stands, his capital gain tax would be $35. If he gave the remaining $65 to the charity, he would get a deduction of $65 from his ordinary income. This gift would actually cost the taxpayer 30 percent of $65, or $19.50, and the Government would be contributing the difference—$45.50—to the charity. Thus, the total effective cost to the taxpayer of the $100 gift is $35 in capital gains plus $19.50 after the deduction from his ordinary income, or $54.50. Under present law, his cost is only $30. Clearly this is a tax preference.

In other words, there is a tax preference in present law that encourages contributions of appreciated property—as opposed to cash—to charity. The higher the tax bracket of the contributor, the greater the benefit of his contribution. The economic situation in my example is the same as if the tax laws were to read in effect as follows: For every $100 contribution made in cash or out of his salary check, the taxpayer gets a deduction of $100. But if he gives $100 worth of appreciated property, he is entitled to a deduction of $154. That is, $100 multiplied by the ratio 100/65 equals $154. Under amendment No. 368, the appreci-

ation in value of property given to charity is recognized for what it is—a tax preference. It should be subject to the minimum tax, just as percentage depletion or excess depreciation on real property or personal property is already subject to the tax under the committee bill.

Third, universities and other charities will not be seriously hurt by amendment No. 368. Members of the Senate are well aware of the extraordinary protest raised by charitable and educational organizations and institutions throughout the Nation against the House bill. It is clear, however, that the impact of the House bill on such organizations and institutions was vastly more serious with respect to the allocation of deductions provision than it was with respect to the minimum tax.

This point was explicitly recognized by former Secretary of the Treasury Douglas Dillon, who testified before the Senate Finance Committee on September 25, 1969. Secretary Dillon's testimony on the devastating impact of the allocation of deductions provision was itself devastating, and was in large measure responsible for the deletion of the allocation of deductions provision from the House bill by the Senate committee. However, in his testimony, Secretary Dillon minimized the impact of the House version of minimum tax—LTP—on charities, and stated specifically that 85 percent of the impact of the House bill would be due to the allocation of deductions.

The Finance Committee bill contains no provision for the allocation of deductions, and neither does amendment No. 368. This is a crucial distinction. It is important to recognize that the concept of the minimum tax is independent from the concept of the allocation of deductions. Even though appreciated property donated to charity may be a tax preference for the purpose of the minimum tax, it need not necessarily be treated the same way in the allocation of deductions, even if such an amendment is offered. The modest minimum tax proposed by amendment No. 368 will not have a serious deleterious effect on our charities, our universities, or our other philanthropic institutions.

Also, the minimum tax does not take away the existing incentive in the tax laws for the gift of appreciated property to charity. Unlike the allocation of deductions provision in the House bill, it does not disallow any part of a charitable contribution.

This overall point is made clear by figures published by the American Council on Education with respect to contributions to universities—

For the university year 1962–63, the only year for which data are available, the total amount of university contributions was $1.035 billion. Of this amount: $794 million was in cash, or 77 percent of the total; $183 million was in securities, that is, appreciated property, or 18 percent; $26 million was in real estate, and $2.5 million was in art objects.

Moreover, the gift of appreciated property to charities is only a small proportion of the total amount of all charitable gifts. In the year 1966, the total amount of deductions for charitable contributions listed on individual tax returns was $9.1 billion, of which $8.3 billion was in cash. Only $760 million—or less than 10 percent—was in the form of appreciated property and gifts other than cash. Clearly, the minimum tax will have a minimum impact on charities.

Mr. President, amendment No. 368 still retains a very large tax advantage for gifts of appreciated property to charity. The top tax rate on ordinary income in present law is 70 percent, and will continue to be 70 percent if the Gore amendment adopted last Wednesday is signed into law. The top tax rate on capital gains under the bill is 35 percent. By contrast, the top rate for the minimum tax under amendment No. 368 is only 15 percent. Thus, a taxpayer will still be far better off than he would be if he sold his appreciated property, paid tax to the Government on his capital gains, and gave the remainder to charity. There is still a strong incentive for the taxpayer to give to charity. If he does not give, he gets no deduction to offset his ordinary income.

Fourth, the committee bill contains two major new provisions that will undoubtedly stimulate a substantial increase in charitable contributions.

First, private foundations must currently distribute either all of their income, or 5 percent of their investment assets, whichever is greater. Obviously, a large portion of these distributions will find their way to charities, and especially to universities. Indeed, the primary thrust of this provision in the committee bill will be to favor universities. Moreover, just now, the Senate has voted to raise the percentage to 6 percent.

Second, the ceiling on the deduction for charitable contributions is raised from 30 percent—under present law—to 50 percent—under the committee bill—of a taxpayer's adjusted gross income. This provision creates a strong additional incentive for charitable contributions. The provision creates a strong additional incentive for charitable contributions. The provision is primarily intended to offset the bill's repeal of the unlimited charitable deduction used by wealthy taxpayers, but it will also serve to offset any possible impact of the minimum tax.

Mr. President, in conclusion amendment No. 368 is a major step forward toward the cause of tax justice. It still leaves a large incentive for contributions of property to our universities, but at the same time it is an important and primary addition to the fairness and equity of our tax laws.

If we fail to adopt this provision, then we will have failed to act on precisely the sort of tax loophole that generated the taxpayers' revolt of last winter. We must not forget that because of this revolt, we are here today, voting on what is likely to become the best tax reform bill in the Nation's history.

In closing, I compliment the distinguished chairman of the committee for his positive leadership in the area of tax reform—not only with respect to the minimum tax, an idea that he had long advocated, but also with respect to the many other very desirable features of this bill. Last winter, when the taxpayers' revolt first began, few of us believed that by December the Senate would be about to pass the greatest tax reform bill in our history. Today, our hopes are being realized, and the fact that they are is a great and lasting tribute to the leadership of the Senator from Louisiana.

Mr. President, I ask unanimous consent that the two tables to which I referred—showing the relation contributions in cash versus other property to charities—be printed in the RECORD at this point.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE I.—NATURE OF GIFTS TO HIGHER EDUCATION (UNDER $5,000 AND OVER $5,000 FOR THE 1962–63 YEAR)

| | Under $5,000 | | | Over $5,000 | | | Total | |
|---|---|---|---|---|---|---|---|---|
| | Donor transactions | Amount | Average per transaction | Donor transactions | Amount | Average per transaction | Donor transactions | Amount |
| Cash | 2,366,059 | $238,288,479 | $100 | 17,241 | $556,062,359 | $35,621 | 2,383,300 | $794,350,838 |
| Securities | 11,180 | 15,721,263 | 1,406 | 3,476 | 167,586,834 | 48,213 | 14,656 | 183,308,097 |
| Real estate | 59 | 113,137 | 1,917 | 280 | 26,053,007 | 93,046 | 339 | 26,166,144 |
| Rights to trust income | 62 | 83,225 | 1,342 | 72 | 7,568,344 | 105,115 | 134 | 7,651,569 |
| Art objects | 2,226 | 651,811 | 292 | 135 | 1,895,439 | 14,040 | 2,361 | 2,547,250 |
| Business or farm inventory | 114 | 95,597 | 838 | 21 | 304,134 | 14,482 | 135 | 399,731 |
| Mineral rights | 10 | 10 | 1 | 9 | 201,699 | 22,411 | 19 | 201,709 |
| Life insurnce policies | 137 | 63,139 | 460 | 13 | 205,232 | 15,787 | 150 | 268,371 |
| Rights to rental | 5 | 11,134 | 2,226 | | | | 5 | 11,134 |
| Unclassified [1] | 51,581 | 4,927,000 | 96 | 506 | 15,004,434 | 29,653 | 52,087 | 19,931,434 |
| Total | 2,431,433 | 259,954,795 | 107 | 21,753 | 774,881,482 | 35,621 | 2,453,186 | 1,034,836,277 |

[1] Donor transactions not identified as to nature of gift.

Note: This table distinguishes as between donor transactions in the form of cash as compared to securities and property. Of $1,034,836,277 of all voluntary support $794,350,838, or 76.7 percent, was received in the form of cash; $183,308,097, or 17.7 percent, was received in the form of securities; and $57,177,342, or 5.6 percent, was received in the form of property.

Mr. DOMINICK. Mr. President, will the Senator yield for a simple question?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. BELLMON in the chair). The Senator from Massachusetts has 7 minutes remaining.

Mr. DOMINICK. Mr. President, is the Senator talking about the charitable contributions section of his amendment?

Mr. KENNEDY. Mr. President, I have tried in a very brief way to give a general description of the complete amendment.

The amendment that we will vote upon first will deal only with the contributions of appreciated property to colleges and universities. That would be the first amendment that we will vote on.

I think it is important to realize that the complete amendment will provide additional tax revenue of some $480 million. That would be from both parts of the amendment.

Mr. President, I ask unanimous consent that a table giving tentative revenue estimates for my amendment, as well as for three other possible floors for the amendment—$10,000, $15,000, and $20,000—be printed in the RECORD at this point. The table also indicates the number of taxpayers who would be affected by the various floors.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

KENNEDY AMENDMENT NO. 368, MINIMUM INCOME TAX ON INDIVIDUALS, PRELIMINARY REVENUE ESTIMATES (TREASURY DEPARTMENT)

| Floor | Revenue gain | EMK gain above committee bill | Number of returns affected |
|---|---|---|---|
| $5,000 | $800,000,000 | $480,000,000 | 780,000 |
| $10,000 | 740,000,000 | 420,000,000 | 280,000 |
| $15,000 | 710,000,000 | 390,000,000 | 185,000 |
| $20,000 | 690,000,000 | 370,000,000 | 112,000 |

REVENUE GAIN BY EXEMPTION LEVEL

[In millions of dollars]

| Tax preference | EMK | | | |
|---|---|---|---|---|
| | 5,000 | 10,000 | 15,000 | 20,000 |
| Capital gain | 621 | 574 | 551 | 533 |
| Interest for investment income | 75 | 70 | 67 | 65 |
| Depreciation (accelerated over straight line) | 19 | 18 | 17 | 17 |
| Intangible drilling and percent depletion | 46 | 43 | 41 | 40 |
| Rehabilitation depreciation | 15 | 13 | 13 | 12 |
| Appreciated property to charity | 24 | 22 | 21 | 21 |
| Total | 800 | 740 | 710 | 690 |

Mr. JAVITS. Mr. President, what would it add in part A and what would it add in part B?

Mr. KENNEDY. Mr. President, section B would involve $24 million. Section A would involve $456 million.

Mr. MOSS. Mr. President, what is included in each section?

Mr. KENNEDY. Section B includes contributions of appreciated property as a tax preference. Section A establishes a progressive rate for the minimum tax and lowers the floor on the minimum tax from $30,000 down to $5,000.

Mr. MOSS. Mr. President, may I ask a question on these figures. Is it not true under the amendment that an individual who donates property that originally cost $1,000 and is now worth $101,000, would pay a tax of $6,625, and at the same time he would be able to deduct the entire $101,000 from his taxable income?

Mr. KENNEDY. That is correct.

Mr. MOSS. Mr. President, the way I compute it then, if he is in the 65-percent tax bracket, that would be a tax saving of about $65,000. So, even with the minimum income tax, this individual would pay about $58,000 less in income taxes that year.

Mr. KENNEDY. That would be correct.

Mr. MOSS. That would be $58,000 more in consumable income, which is not such a bad deal.

Mr. KENNEDY. That is exactly correct.

Mr. PASTORE. Mr. President, will the Senator yield for a question at that point?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Massachusetts has 6 minutes remaining.

Mr. PASTORE. Mr. President, is the man not giving away $101,000 to education?

Mr. MOSS. That is true.

Mr. KENNEDY. He is giving away $101,000. However, in effect, it is really the Federal Government that is making most of that contribution. This is what the tax subsidy does. Obviously, when the Federal Government pays that kind of tax subsidy, it will have to increase the taxes on all our citizens, in order to make up the deficiency in the budget. And when the Government does so, it will apply a progressive tax at ordinary income rates on wage earners and all the rest of our people.

Mr. PASTORE. Mr. President, what will we do, end up with all State universities and put the private universities out of business?

Mr. KENNEDY. No. Quite clearly, the colleges and universities get 77 percent of their contributions today in the form of cash. Only about 18 percent of their funding comes from appreciated securities.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. JAVITS. Mr. President, what is the source for that statement?

Mr. KENNEDY. Mr. President, the source is a study published by American Council on Education in 1968. It is a great myth that my amendment will seri-

ously reduce the flow of gifts to universities. In the past few days, I have received telegrams from a number of college presidents who actually have no understanding—and I say this with the greatest respect—of what the amendment will actually do.

The former Secretary of the Treasury, Mr. Douglas Dillon, testified before the Finance Committee on the allocation of deductions and minimum tax provisions in the House bill. His primary concern was the allocation of deductions.

He said that for a hypothetical taxpayer with large charitable contributions to be in the same position as he now is if the House bill is enacted, he would have to reduce his contributions by over 93 percent. But—and this is the important point—the allocation of deductions provision by itself would require an 87-percent reduction. Clearly, the impact of the minimum tax in the House bill on gifts to charities—as opposed to the allocation of deductions—would be very small indeed. And as the Senator is aware, there is no allocation of deductions provision in the Finance Committee bill or in my amendment.

There are many who believe that the allocation of deductions is a fair and equitable way to get at the problem of tax preferences. But I did not provide for that in my amendment. All we have here is the minimum tax.

Mr. President, the universities and colleges receive their funding mostly in cash contributions. Yet for the special few who give appreciated property, our current tax laws provides an enormous tax shelter, and the committee bill does nothing about it.

I reserve the rest of my time.

Mr. LONG. Mr. President, some of us on the Finance Committee have for years been concerned about the fact that it has been possible for someone to make money by giving something away. We have been very much concerned about the point that it was possible in years gone by for someone to give away something that is worth $1,000 and achieve a tax savings of $1,200 or $1,400.

Generally speaking, of course, one is talking about persons who are in a high-income tax bracket and who are giving away appreciated property. That is a problem to which the Senator addresses himself.

Under the bill reported by the Finance Committee, I am happy to say that we achieved everything I have been trying to do along that line for years. Under the committee bill it no longer would be mathematically possible for anybody to make anything by giving something away. He is giving something of himself when he gives something, under this bill.

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. PASTORE. In other words, the Senator from Louisiana says that no matter what the tax break might be, the fact remains that a sacrifice in money is being made by the giver, and he is giving it to an educational institution.

Mr. LONG. The Senator is correct.

We have so carefully and completely plugged that loophole that when we started considering our minimum tax, we put it on depletion allowances and on the half of capital gains that was not taxed; we put it on all sorts of things, everything that looked as though it should bear some of this. But when we looked at the matter of appreciation in the value of an asset given to a charity or given to a college, we concluded that we had so completely plugged that loophole that if the donor wanted to give some, we should not remove whatever incentive remained. Therefore, we felt that we would not be justified in applying the limited income tax to that.

The Senator's amendment, in two parts, if it is all adopted, would, one, seek to put the minimum tax on something that we do not think ought to be taxed. After we looked at everything we thought this is one thing that should not be taxed, and we closed that loophole as completely as anyone could ask.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. TALMADGE. Is it not true that it would also deny this deduction for appreciated property when it is contributed to the private foundation?

Mr. LONG. That is correct.

Mr. TALMADGE. It must be given to a true public charity—that is, a hospital, a school, a church, or a museum.

Mr. LONG. Yes. The exception would be that it could be given to a private foundation for them to contribute within 1 year. Otherwise, one would not get this allowance for the appreciation, the deduction for appreciation in the value of charitable contributions.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. LONG. I will yield in a moment.

Mr. President, we have so carefully closed that loophole and everything relevant to it that this committee could not find it in its conscience to vote even the amount of 5 percent on this type of situation.

Furthermore, the Senator's amendment would go on from there and levy a graduated income tax, up to 15 percent, on something that the committee, having closed this loophole, felt should not be taxed at all.

I yield to the Senator from Nebraska.

Mr. CURTIS. Is it not true that if the amendment of the distinguished Senator from Massachusetts is adopted and someone gave a gift, say, to Boys Town, in Omaha, which represented appreciation of $200,000, in addition to parting with his property, it would cost him $21,625 in tax over existing law?

Mr. LONG. That sounds reasonable.

Mr. CURTIS. He would be taxed for giving his own money away.

Mr. LONG. Mr. President, we have removed the unlimited charitable contribution deduction. We have removed the 2-year charitable trust rule. We have removed the present favorable treatment for appreciated property in the case of ordinary income assets. We have tightened up on rules on charitable trusts, and we have tightened up on rules on deductions for use of property. So we have undertaken to tighten up wherever we thought we would be justified in tightening up on the rules regarding charitable contributions.

But in this area we feel that this would be discouraging people from giving money to universities, to charity, to museums, to institutions that tend to benefit the public generally.

Even though the Senator may be right when he says that only 18 percent of this involves contributions to universities—and I do not quarrel with him when he says that—that is a very big, important 18 percent from the point of view of anybody trying to run a private college or a private university.

Mr. JAVITS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. JAVITS. Mr. President. I have looked at the study on which the Senator from Massachusetts relies. Let us remember that he is talking about $24 million in income, so it is di minimis. So the question is the essence of his proposition.

That study is for gifts in 1962 and 1963—not current— when, according to my recollection, the market was very poor. And it is a private study. It is not a public document.

Second, we inserted in the RECORD, on October 7 at page 28944, a much later study, of 1968–69—generally speaking, the years between 1965 and 1969—from a list of colleges in the State of New York, which showed that they got $94 million in securities in those years, and that represented 46.5 percent of all gifts they received.

Inasmuch as this is di minimis, I think the Senate should lay that beside what the Senator from Massachusetts (Mr. KENNEDY) is arguing for, and I should like to identify myself with the views expressed by the Senator from Louisiana (Mr. LONG).

We are making very deep social changes here. Let us not go too fast and too far. That is why I think the amendment providing for a presidential commission is so vital, because if we are worried about this, they will look at it. We have been going on this way for 50 years. With $24 million a year, we are not going to die if it is 2 more years.

Mr. DOMINICK. Mr. President, will the Senator yield?

Mr. LONG. How much time does the Senator desire?

Mr. DOMINICK. Two minutes.

Mr. LONG. I yield 2 minutes to the Senator from Colorado.

Mr. DOMINICK. I wish to associate myself with the Senator from Louisiana and the Senator from New York. I do not understand the rationale of the amendment.

There is a theory that if someone has acquired something for $100 and its value then rises to $1,000 and he gives it away for charitable purposes, he is making a profit. He has not made a profit. He has given away the very asset that he had. If he had sold it, he would have made a profit. But if he gives it away, he does not.

So if he gives it away or if he holds onto it, he has not made a profit.

The idea that one has an unrealized profit when he gives something away simply is not the fact, because he has neither the money nor an asset. That is

what I do not understand about the theory of the amendment offered by the Senator from Massachusetts.

Mr. LONG. We were concerned about this problem until we did all the things we have done in this area. But by the time we were through, we had provided under the committee bill that someone could not make money by giving something away.

So I think there is no longer any justification for our saying that there should be any tax on the appreciated part of what someone gives to a university or a charity. Please keep in mind, with respect to the appreciated part, he cannot give it to a foundation without tax consequences unless the foundation is going to pass it on to a charity or a public charity within 1 year.

Mr. DOMINICK. I think the Committee on Finance has done a fine job of tightening loopholes. More is involved than merely the revenues the Government would realize. The revenue that would be gained for the Government would be lost to charity, to universities, and to social purposes, and with it would be lost all that money that is donated because of the tax incentive created for donating it.

It is not a tax profit to a person. It is a tax incentive, a tax saving, to encourage one to make a donation to a university or to a charity. A person who makes a donation in the nature of a gift is donating a part of that which he would have left after he had paid taxes on the transaction.

Mr. BYRD of Virginia. Mr. President, will the Senator yield?

Mr. LONG. I yield 2 minutes to the Senator from Virginia.

Mr. BYRD of Virginia. I should like to ask the Senator from Massachusetts a question in connection with his statement that is on the desk of each Senator. On page 2 is this statement:

> The best available estimate for 1970 on the major revenue-losing amendments adopted this week is as follows:

The last item reads: "Education credit, $2.3 billion."

My understanding of the Ribicoff-Dominick amendment, which was adopted last night, is that it does not apply to 1970. It does not become effective until 1972, and would have nothing whatsoever to do with 1970.

Mr. KENNEDY. There were reports in the press this morning which estimated the loss at $2.3 billion, and I believe that the reports referred to the calendar year 1970.

Mr. BYRD of Virginia. I am not getting into the exact amount of dollars. I think the amount cited by the Senator from Massachusetts is wrong. I am not arguing that point. But I think the Senate should understand that this does not apply to 1970.

Mr. RIBICOFF. Mr. President, will the Senator yield to me?

Mr. KENNEDY. I yield.

Mr. RIBICOFF. Mr. President, the Senator from Virginia is absolutely correct. The Ribicoff-Dominick amendment goes into effect for the year 1972. The first time a revenue loss would show up would be in the tax return filed in 1973. We were most careful because of the shortfall in the Ribicoff-Dominick amendment to make sure it would not have an impact on revenue until 1973.

Mr. BYRD of Virginia. I thank the Senator.

I would like to address one further question to the Senator from Massachusetts.

The Senator spoke of 155 individuals with incomes in excess of $200,000, who paid no income tax.

The PRESIDING OFFICER (Mr. STEVENS in the chair). The time of the Senator has expired.

Mr. LONG. Mr. President, I yield 1 minute to the Senator from Virginia.

Mr. BYRD of Virginia. Mr. President, I have only one more question I would like to ask.

Mr. LONG. Mr. President, how much time is remaining on both sides?

The PRESIDING OFFICER. The Senator from Massachusetts has 3 minutes remaining, and the Senator from Louisiana has 2 minutes remaining.

Mr. LONG. Mr. President, I yield 1 minute to the Senator from Virginia.

Mr. BYRD of Virginia. Mr. President, in closing the loopholes, which the Senate has been trying to do, and the Senator from Massachusetts is trying to close a further loophole, does the Senator from Massachusetts include the tax-free interest on State and municipal bonds?

Mr. KENNEDY. No, I do not.

Mr. BYRD of Virginia. If the Senator does not, then is it not possible for individuals to continue to have huge incomes and pay no taxes, even under the amendment of the Senator from Massachusetts?

Mr. KENNEDY. I did give consideration to the possibility of the inclusion of tax-free interest in this amendment as a tax preference.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. KENNEDY. Mr. President, I yield myself one-half minute on my time.

We now have in the House-passed bill a Federal interest subsidy for municipal bonds. Early next session, it is likely that there will be hearings on Urbank. It seems to me that we would recognize the minimum of these hearings, which will be of major importance to State and local financing. However, if the Senator wants to add tax-free interest to my amendment, I would not object.

Mr. President, I understand I have 2½ minutes remaining.

The PRESIDING OFFICER. The Senator has 2½ minutes remaining.

Mr. KENNEDY. Mr. President, the gift of appreciated property is a tax shelter for many of the 155 Americans who paid no taxes but who had incomes of over $200,000. Many of their tax shelters came from donations of appreciated property.

The Committee on Finance closed some significant loopholes but there remains another loophole. Enormous amounts of income are involved. The loophole is still there. Now, it may be used more than ever before.

The working people of this country give a large part of the 77 percent of the cash contributions that go to colleges and universities. They, too, would like to have great halls named after them and they, too, would like to be members of boards of trustees, but they will not be able to do so. That course will be available, however, to those who can afford to take advantage of this tax shelter. Whether the year is 1962 or 1968, the fact remains that it is a tax shelter, and it will continue to be a tax shelter unless we adopt this amendment.

The people of this country who give cash to colleges and universities in America today are aware that there are other people who are dodging the payment of their justified taxes because of this huge tax shelter.

Mr. President, this is a very modest proposition. The statistics indicate that the overwhelming majority of our colleges and universities do not depend on the appreciated value of these donations. Their lifeblood comes in cash contributions. Although a few selected universities receive a more substantial portion of their contributions—occasionally even more than 50 percent—in appreciated property, the fact is that the vast majority of our universities and colleges depend on cash gifts. These great centers of learning talk about fairness, equity, and liberalism, but not when their own tax shelters are involved.

Mr. JAVITS. Would the Senator like to have an authoritative fact on that?

Mr. KENNEDY. I do not have any time remaining.

The PRESIDING OFFICER. The Senator from Louisiana has 1 minute remaining.

Mr. LONG. Mr. President, if the Senator can convince me at some point in the future a person can still make money by giving money away I would be glad to hear about it. I have been opposing gifts to charity as a tax avoidance device for many years and I am still opposing it. But we closed that loophole. Under the committee's bill there is no way one can make money by giving it to universities, colleges, or anyone. If we follow the course of this amendment we will discourage people from giving to colleges and universities. I do not think the Senate wants to do that.

Mr. DOMINICK. Mr. President, will the Senator yield 30 seconds for a unanimous-consent request?

Mr. PASTORE. Mr. President, reserving the right to object, How much time does the Senator request?

Mr. DOMINICK. Thirty seconds.

The PRESIDING OFFICER. The Senator is recognized.

Mr. DOMINICK. Mr. President, I ask unanimous consent to have printed in the RECORD a table sent to me by the president of Yale University which shows seven colleges in Massachusetts received from 24 to 92 percent of their total gifts from individuals in 1968–69 in the form of securities rather than cash.

Mr. KENNEDY. Mr. President, will the Senator permit me to introduce that table since it is for my State.

Mr. DOMINICK. It covers other States as well.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

LEVEL OF SECURITIES GIVING BY INDIVIDUALS TO SELECTED COLLEGES

| Institution | Years involved | Value of securities donated by individuals | Ratio of securities to total gifts from individuals (percent) |
|---|---|---|---|
| California: | | | |
| Mills | 1966-69 | $1,659,000 | 55 |
| Santa Clara | 1967-69 | 143,000 | 6 |
| Stanford | 1966-69 | 9,037,000 | 52 |
| USC | 1966-69 | 6,100,000 | 54 |
| USF | 1966-69 | 130,000 | 10 |
| Connecticut: | | | |
| Connecticut College | 1966-69 | 640,768 | 27 |
| Hartford College | 1966-69 | 149,491 | 34 |
| New Haven College | 1966-69 | 52,204 | 58 |
| Trinity College | 1966-69 | 2,867,109 | 35 |
| University of Hartford | 1966-69 | 1,156,944 | 49 |
| Wesleyan University | 1968-69 | 1,150,000 | 50 |
| Yale University | 1967-68 | 13,243,788 | 69 |
| Massachusetts: | | | |
| Boston College | 1968-69 | 450,000 | 39 |
| Brandeis University | 1968-69 | 12,600,000 | 50 |
| Harvard University | 1968-69 | 15,900,000 | 68 |
| Holy Cross | 1968-69 | 221,130 | 24 |
| M.I.T. | 1968-69 | 2,170,000 | 70 |
| Smith College | 1968-69 | 2,884,563 | 46 |
| Wentworth Institute | 1968-69 | 502,208 | 92 |
| Pennsylvania: | | | |
| Haverford | 1966-69 | 3,545,000 | 71 |
| Juniata | 1968-69 | 243,000 | 53 |
| Lehigh | 1966-69 | 7,930,000 | 46 |
| Pennsylvania | 1966-69 | 16,600,000 | 53 |
| Philadelphia College of Pharmacy | 1966-69 | 3,700,000 | 80 |
| Swarthmore | 1966-69 | 2,061,000 | 43 |

Mr. BROOKE. Mr. President, I am disturbed by the inclusion of gifts of appreciated property to charity under the minimum income tax proposed by this amendment. I believe that this addition offers significant problems for our Nation's colleges and universities.

The Senate Finance Committee stated in its report that it did not consider it wise to include gifts of appreciated property under the 5 percent minimum tax provision, as the bill reported from the committee contains a number of other provisions directly aimed at curtailing the tax advantages resulting from such gifts. The principal effect of including gifts of appreciated property in the minimum tax is to reduce the benefit of the contribution and thereby further and unduly restrict the support of worthwhile public charitable institutions.

It has been suggested that this provision of amendment No. 368 still retains a large incentive for gifts of appreciated property to charity. A person would still have a choice of either giving the property to charity and being taxed on the amount of the appreciated value at a rate not to exceed 15 percent or selling this property and pay the capital gain tax, which could be as high as 45 percent. In essence, the incentive would lie in the difference between the minimum tax proposed in this amendment and the new capital gain rate. It is assumed that one would choose the option offering the lower rate of taxation. However, many donors may choose not to subject themselves to such taxation at either rate and may simply pass the property to their heirs. As a result, I believe much property that might otherwise go to charity would be withheld by a prospective donor.

To many charitable institutions, the uncertainty already engendered by this bill has been evident in a decline in donations that they might otherwise receive. As with the municipal bond market, when taxation of municipal bond interest had been considered, charitable giving is now suffering from damaging uncertainty. In effect, the incentive to give is already adversely affected by its tax status. I would hope that the Senate would do nothing to add to this deleterious situation.

For many months now, I have been working with academic institutions in Massachusetts to identify problem areas in this legislation. Our colleagues on the Finance Committee have remedied a number of serious defects in the House version of this bill, which would surely have reduced the access of these institutions to important sources of private contributions. It would be most adverse to add this provision to the bill, for it would undermine important incentives for private support of our colleges and universities.

The PRESIDING OFFICER. All time has expired. The question is on agreeing to section (b) of the amendment of the Senator from Massachusetts.

Mr. JAVITS. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. JAVITS. Mr. President, the vote now occurs solely on the part of the amendment which relates to appreciated property; is that correct?

The PRESIDING OFFICER. The vote covers only lines 3 through 12 on page 3 of amendment 368; and covers only the appreciation of value of contributions.

On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Maryland (Mr. TYDINGS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that the Senator from Indiana (Mr. BAYH) and the Senator from Nevada (Mr. CANNON) are absent on official business.

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT) and the Senator from Mississippi (Mr. STENNIS) would each vote "nay."

On this vote, the Senator from Nevada (Mr. CANNON) is paired with the Senator from Louisiana (Mr. ELLENDER).

If present and voting, the Senator from Nevada would vote "yea" and the Senator from Louisiana would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) and the Senator from California (Mr. MURPHY) would each vote "nay."

The result was announced—yeas 16, nays 63, as follows:

[No. 185 Leg.]

YEAS—16

| | | |
|---|---|---|
| Aiken | Inouye | Moss |
| Burdick | Kennedy | Proxmire |
| Dodd | Magnuson | Stevens |
| Eagleton | Mansfield | Williams, Del. |
| Hart | McGovern | |
| Hughes | Metcalf | |

NAYS—63

| | | |
|---|---|---|
| Allen | Fong | Montoya |
| Allott | Goodell | Muskie |
| Baker | Griffin | Nelson |
| Bellmon | Gurney | Packwood |
| Bennett | Hansen | Pastore |
| Bible | Harris | Pearson |
| Boggs | Hartke | Pell |
| Brooke | Hatfield | Percy |

|---|---|---|
| Anderson | Gore | Saxbe |
| Bayh | Gravel | Smith, Ill. |
| Cannon | McCarthy | Stennis |
| Cook | McClellan | Symington |
| Ellender | Mundt | Tydings |
| Fulbright | Murphy | Yarborough |
| Goldwater | Russell | Young, Ohio |

So section B of Mr. KENNEDY's amendment was rejected.

## LEAVE OF ABSENCE

Mr. MANSFIELD. Mr. President, I ask unanimous consent that I may be excused from attendance on the Senate, for personal reasons, for the rest of the day.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. KENNEDY. Mr. President, if Senators will remain, I think we will take only a few minutes to discuss the other provision.

The PRESIDING OFFICER. Under the previous agreement, time is divided.

Mr. KENNEDY. Mr. President, in the committee bill some nine different areas of tax preference are defined. Three of the most significant are the excluded half of capital gains, excessive depreciation on real estate, appreciated property given to charity, and percentage depletion.

We have just voted not to include appreciated property given to charity as a tax preference; but as to the others, the

Finance Committee adopted a minimum tax of 5 percent.

The thrust of the part of amendment No. 368 which remains is that we should have a progressive minimum tax on all income from tax shelters. These shelters have been recognized and identified by the Senate Finance Committee. A 5-percent minimum income tax on individuals has been provided. A 5-percent tax has been applied on corporations.

The thrust of this part of my amendment is to provide that the tax which is applied to individuals will be progressive in nature. It also provides that there will be a lowering of the floor to $5,000, rather than the $30,000 floor that the committee bill established.

Mr. JAVITS. Mr. President, will the Senator yield for a factual question?

Mr. KENNEDY. I yield.

Mr. JAVITS. Would this amendment not raise the capital gains tax?

Mr. KENNEDY. It would, in effect, raise the capital gains tax. The committee bill does that also. This amendment, in effect, recognizes capital gains as an area of tax preference, and subjects it to the minimum tax along with all the other tax loophole income.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield for a moment?

Mr. KENNEDY. I yield.

Mr. WILLIAMS of Delaware. As I understand the amendment it would raise the top capital gains rate to 42½ percent. Is that correct?

Mr. KENNEDY. Yes.

Mr. WILLIAMS of Delaware. The committee proposed to raise it to 35 percent, the Gore amendment raised it to 37½ percent, and the amendment of the Senator raises it to 42½ percent.

Mr. KENNEDY. That is correct. The top rate for capital gains would be 42½ percent for the highest bracket taxpayers. Their ordinary income tax rate is 70 percent. My amendment still keeps a major tax preference for capital gains.

Mr. President, adoption of this provision would add $456 million in new revenues to the Treasury, above the revenue gained by the committee bill. It provides a tax that is progressive in nature for these major tax preferences. It also lowers the floor for the minimum tax to $5,000. I think it is an important and useful amendment.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

Mr. KENNEDY. I yield.

Mr. PASTORE. I merely want to applaud this phase of the amendment. While I opposed the other part of the amendment, I will support this one.

Mr. PELL. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. PELL. I am confused about one thing. I intend to support the amendment, but I do not think the capital gains tax should be increased further. I am all for increasing income taxes, but capital, to my mind, should have mobility.

How does this amendment increase the capital gains tax? Will the Senator explain that?

Mr. KENNEDY. Yes. Under present law, the maximum rate of tax for capital gains tax is 25 percent. Under the present bill, the rate is increased, so that the highest income taxpayers would pay a 35-percent rate. If the Senator is talking about someone at the highest level of income who has had a capital gain, he would be paying a 35-percent tax on his gain, and my amendment would add 7½ percent additional minimum tax. We must remember, though, that if he had ordinary income, he would pay tax at a 70-percent rate.

If what the Senator is talking about is the lowest income factory worker or wage earner who has a small capital gain, he probably would not be affected by the minimum tax at all. It affects only the capital gains of taxpayers with large amounts of tax preferences—with capital gains of hundreds of thousands or even millions of dollars.

The capital gain of a person who sold his house in shifting jobs probably would not even be included in the minimum tax, because the minimum tax does not start until the tax preference is $5,000, and then it is only 2½ percent in the first step. Thus, it would be a true progressive tax.

The essence and thrust of this amendment is not to extend the minimum tax to the lower-, or even the middle-income family or wage earner that has realized a small capital gain, but to provide a progressive tax for those having huge tax shelters.

Mr. PELL. What portion of the revenue received from capital gains taxes will be increased by this measure?

Mr. KENNEDY. I will have to answer that in a moment.

Mr. PELL. Perhaps the chairman of the committee can answer that.

Mr. KENNEDY. Would the Senator restate his question?

Mr. PELL. What is the percentage?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. JORDAN of Idaho in the chair). The Senator has only used 5 minutes.

Mr. KENNEDY. What is the Senator's question?

Mr. PELL. The question is, Of the revenue received as a result of the capital gains tax, what percentage of it would be affected by the Senator's amendment?

Mr. KENNEDY. Under our amendment, $800 million would be gained from the minimum tax.

Mr. PELL. And how much of that comes in from the capital gains tax?

Mr. KENNEDY. It is $621 million.

Mr. PELL. Could I ask the Senator from Louisiana that question?

Mr. LONG. I do not have it.

Mr. PELL. I think we have to have that information to judge this amendment intelligently.

Mr. KENNEDY. I do not know the total amount of the capital gains tax the Treasury receives.

Mr. PELL. If it is significant, then the principle of the Senator's amendment is excellent. If it is not, the amendment would do more harm than good.

Mr. LONG. On the individual level, the biggest item in capital gains, but there are others. I cannot tell the Senator the exact amount. That is the largest item in individual taxes to which the amendment would apply. The Senator's 5-percent tax on corporations would be the same as that in the committee bill, so there would be no difference there, as I see it.

Mr. PELL. But would the capital gains increase to 42 percent affect a major portion of the capital gains taxes that are paid, or a minor portion? That is my question.

Mr. LONG. In terms of dollars, it would be an important part of the total, but not in terms of the number of taxpayers who would be paying it.

Mr. PELL. More than half, or less than half?

Mr. LONG. In terms of dollars, more than half.

Mr. PELL. More than half the capital gains tax returns, then, would go up?

Mr. LONG. No, in terms of people, the higher tax rates on capital gains would apply to a small fraction of people with capital gains. In terms of dollars, more than half of the capital gains would be subject to the higher rates.

So it depends on whether the Senator is talking about numbers of people or numbers of dollars affected by the higher rates.

Mr. KENNEDY. On the question of capital gains which is affected by this amendment, I think it is important to realize that by providing the progressive feature of this amendment, the first $5,000 would be excluded, and it would provide a tax of only 2.5 percent for amounts from $5,000 to $30,000.

Then, from $30,000 to $50,000, it goes up to 5 percent. From $50,000 to $100,000, the tax is 10 percent. Only for amounts over $100,000, do we get to the figure the junior Senator from Rhode Island has described as being 42½ percent.

So what we are trying to build into the bill with that amendment is that the capital gains realized by the lower middle-income or even the upper middle-income taxpayers will not be greatly affected. This amendment is designed to reach the highest bracket taxpayers with huge tax preferences.

Mr. PASTORE. Mr. President, will the Senator yield to the senior Senator from Rhode Island?

Mr. KENNEDY. I yield.

Mr. PASTORE. Insofar as the 6-month period is concerned, as reported out by the Committee on Finance, we are not disturbing that at all?

Mr. KENNEDY. We are not.

Mr. PASTORE. I thank the Senator.

Mr. LONG. Mr. President, the Senate Finance Committee arrived at a 5-percent figure for the so-called supertax because it was felt that at this rate, which is a reasonable rate, taxpayers should not be too greatly concerned about the additional tax burden.

I must say that since we did that, I have discovered there is a lot of concern about it among those who would be paying the tax. But the Senator has done a number of additional things with his amendment that would make this a much less palatable proposal than that of the Finance Committee.

In the first instance, the proposal of Committee on Finance would not affect

the average citizen, in that we would allow him of up to $30,000 tax privileges on such things as capital gains, excess investment interest deductions, accelerated depreciation on real property, and tax benefits on stock options.

The Senator would drop that $30,000 level down, however, and make the tax applicable to any person who had a capital gain or some other tax preference of $5,000 or more.

Now, when we talk about a $5,000 level, we are talking about a great number of little people who have sold a piece of real estate, or sold some stock, or sold something that has been in the family a number of years. Even though the Senator would only tax these little people at a 2.5-percent rate, I have discovered that there is no tax that is really popular, and any time you start taxing those people, even at 2.5 percent, they are not going to like it.

Then, under the Senator's proposal at the $30,000 level, the tax rate would go up to 5 percent; at the $50,000 level, to a 10-percent rate; and at the $100,000, to a 15-percent rate. That would mean that a person in the highest tax bracket who along with significant other preferences had a capital gain of $100,000, would pay tax at a 42.5-percent rate on the untaxed part of his capital gain: he would be paying a 70-percent regular tax on half of it, and a 15-percent tax on the other half, and that works out to a 42.5-percent tax on capital gains.

Mr. President, a lot of these capital gains are really not a profit at all. The regular taxes on these capital gains, the graduated tax on them and which the Senator would add are really a penalty the Government levies on the citizens for the failure of the Government to maintain the purchasing power of its money.

Let me illustrate the point. Many people have assets that have been in the family for at least 30 years, where the purchasing power of the dollar at the time the asset was acquired was twice what it is today. So, today, one might sell something for $200,000 for which he paid, at the time it was acquired 30 years ago, perhaps $100,000. Thus, it really is worth no more today, in terms of constant dollars, than it was 30 years ago. The only reason a profit results is because the dollar will not buy what it would buy 30 years before. So in many cases, there has been no real gain.

In other words, in many instances a capital gains tax is a tax on a gain that in real terms does not exist at all. In many instances, it is really only a penalty on the citizen for failure of the Government to have maintained a level purchasing power, and to have maintained the value of its currency.

Now the Senator wants, in addition to all the additional taxes we have put on, in addition to raising the rates on capital gains, in addition to putting a minimum tax on the portion of gains that was previously untaxed, to come along and put a graduated income tax on this and all the other preference items.

I say, Mr. President, that this type of graduated income tax on top of a graduated income tax will be a very unpopular and, I believe, a very unfair thing. If the idea catches on, as well it might, I assume it will not stop there; I assume eventually we would have a graduated income tax up to 70 percent on capital gains as well as on various and sundry other items. Why not go all the way with it?

Mr. RIBICOFF. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. RIBICOFF. Mr. President, is it not a fact that when we agreed to the Gore amendment we provided for about $100 million more in the amount received from capital gains than we would have received if the committee position had prevailed?

Mr. KENNEDY. It could be that much. I do not know how much it is. But, the rates under the Gore amendment are the same as the rates under existing law.

Mr. RIBICOFF. Mr. President, I was talking to the distinguished Senator from Delaware (Mr. WILLIAMS), and he said it was about $100 million.

Mr. LONG. That sounds correct.

Mr. RIBICOFF. In other words, the Gore amendment charges those who have capital gains an additional $100 million, approximately.

Mr. LONG. The Senator is correct.

Mr. President, I only have about 5 minutes remaining.

Mr. RIBICOFF. Mr. President, I think this point will clarify the position of the Senator.

The Kennedy amendment applies to the capital gains of individuals. But the committee amendment applies to the capital gains of corporations. There is a disproportionate amount that an individual would have to pay. Under the Kennedy amendment, he would have to pay a higher capital gain tax than a corporation.

Mr. LONG. The Senator is correct. The individual would pay under the Kennedy proposal about three times as much as a corporation. I find that very difficult to justify.

Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, either we are serious in the Senate about trying to make the tax laws apply fairly to all the taxpayers of the country and have it function equitably, or we are not.

We in Congress can establish progressive tax rates, and we should do so for the minimum tax. The person who receives a salary every week and has a part of it withheld knows how heavily he is taxed, and he wants tax justice.

When tax time comes around, he can look at the figures and see what his rate is. Those in the middle-income brackets know what they will be charged. They know the tax rate they will pay.

Everyone knows the rates and expects that everyone else will have to abide by them. When a person sees that an executive makes $100,000, he supposes that man will have to pay the rate established by Congress of 70 percent. But no; we have written into the laws a variety of tax shelters. A person who realizes a capital gain of $100,000 is taxed at a 35-percent rate and not a 70-percent rate.

So what we are trying to do here is to say that we know there is a tax shelter. If it is a large gain, the wealthy taxpayer will realize hundreds of thousands of dollars and he ought to be willing to pay a modest and progressive tax.

The 5-percent committee tax is only a slap on the wrist for people who have huge tax shelters. We are asking the American people to pay a fair tax. What we are trying to do in the Congress is to have a tax system which is progressive.

We all realize that there are tax shelters. And we fail to meet our obligations if we do not try to enact a progressive tax measure. If we fail, we will be doing the country a disservice.

All over this country, American taxpayers are becoming wiser. They see individual after individual taking advantage of tax loopholes. Can we tell them that we have raised the tax by only 5 percent on those individuals?

Why do we not try to provide some tax advantages for those who are on fixed salaries, and for the working people of the country? Why do we not start to give them some tax advantages?

My amendment establishes a simple progressive minimum tax. Those who realize only a small advantage from the various tax shelters which already exist—up to $5,000—will not be taxed at all. If their tax shelters are worth from $5,000 to $30,000, we add only a 2.5-percent tax. However, we add 15 percent for those who have more than $100,000 in tax shelters.

I think that a progressive tax is vital to the minimum tax, and is entirely consistent with the philosophy of our revenue laws.

Mr. President, I hope that the amendment will be agreed to.

Mr. LONG. Mr. President, in the committee bill we have raised taxes by $6 billion on individuals and corporations who were regarded as being favored in one respect or another.

The Senate has seen fit to trim that figure down for us by several hundreds of millions of dollars. But even so, there is still about $5,300,000,000 that we have raised.

I voted not to trim it down, but to gain even more revenue. I voted for the Tydings amendment that would have raised it another $2.2 billion by providing a carryover basis for a decedent's assets.

I wanted to vote to tax foundations not just on one-fifth of 1 percent of investment assets but on 7½ percent of investment income after they were in existence for 40 years. We would have achieved $3 billion of additional tax increases beyond the $6 billion reported by the committee.

However, this amendment involves a tax of $480 million on top of other taxes involved here which cannot be justified because in a great many cases this involves a graduated income tax on profits that do not exist at all except in a bookkeeping sense.

I do not think it can be justified, Mr. President, and I predict that if Congress wants to go down this road we will be killing incentives by imposing a graduated income tax on transactions which in real terms produce no profit at all. The item sold is no more valuable in terms of purchasing power than it was when acquired. But because the person had it a

long time, it is more valuable in terms of inflated dollars and the amendment levies a 42.5-percent tax on these capital gains, while a country such as Canada has no capital gains tax. This tax would tend to chase money from this country and would penalize people unfairly when they had made no gain at all. This tax would merely increase a penalty on citizens because of the Government's inability to maintain a stable value for its currency.

Mr. PELL. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. PELL. Could this amendment be divided to take out, separately, the capital gains portion of it? If so, I would demand such a provision.

The PRESIDING OFFICER (Mr. JORDAN of Idaho in the chair). The Senator could move, when all time had expired, to strike it out; but under the circumstances, this agreement was entered into by unanimous consent.

Mr. KENNEDY. Mr. President, I will object, if that is within my rights.

Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Massachusetts has 2 minutes remaining.

Mr. KENNEDY. I would merely say, in closing, that a little more than a year ago a taxpayers' revolt began in this country because the taxpayers did not believe that the system we have was really fair, equitable, and progressive.

The purpose of my amendment is to provide what I consider to be a reasonable, modest, and progressive feature to fill in the various tax shelters, some of which have been filled by the Committee on Finance, and others of which have not.

Are we really serious about providing our tax system with a progressive nature? Are we really interested in a revenue gain of $456 million. Are we really serious about the minimum tax?

I hope the Senate will agree to the amendment.

Mr. JAVITS. Mr. President, will the Senator from Louisiana yield?

Mr. LONG. Mr. President, how much time have I remaining?

The PRESIDING OFFICER. The Senator from Louisiana has 4 minutes remaining.

Mr. LONG. I had agreed to yield 2 minutes to the Senator from Florida.

Mr. JAVITS. I should like 1 minute.

Mr. HOLLAND. Mr. President, one feature which I fail to understand is the disparity between the extra tax levied on tax preference income of individuals and that levied on corporations; under the pending amendment. This tax on individuals, after $50,000, is 10 percent, and after $100,000 is 15 percent, and this applies either to single persons or to the married persons filing separate returns. I note, however, that as to corporations, the extra tax levied on preference income is only 5 percent and it does not exceed that amount. Corporations, of course, can make capital gains and other preference items amounting to very large gains, up in the millions.

How does the distinguished Senator from Massachusetts justify levying only 5 percent of these preference taxes on corporations and at the same time levying 15 percent on individuals? I do not see the justification, and if there is a justification, I ask the Senator from Massachusetts to state it for the RECORD.

Mr. KENNEDY. I thought the Senator from Louisiana had yielded time. I was checking on the parliamentary situation. I did not hear the question.

Mr. LONG. The Senator from Florida wants to know how the Senator from Massachusetts justifies a 5-percent rate for corporations and a 15-percent rate for individuals.

Mr. KENNEDY. There is a distinction. We are already taxing the corporations at a flat rate, and the flat 5-percent committee rate is appropriate in corporations. More important, the minimum tax is really a tax that is most appropriate for individuals. It is individuals who actually enjoy the use of tax shelters. Corporations must distribute their income from tax preferences to their stockholders before the income can really be enjoyed. And when the income is distributed by the corporation, it is usually taxed to the stockholder at ordinary income rates.

Mr. HOLLAND. Mr. President, having in mind the very high level of capital gains which can be had by corporations and the very high level of other preference taxes, I see no justice at all in putting the level of extra taxes at 15 percent on individuals and at 5 percent only on corporations.

Mr. JAVITS. Mr. President, will the Senator yield me 1 minute?

Mr. LONG. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Louisiana has 3 minutes remaining.

Mr. LONG. I yield 2 minutes to the Senator from New York.

Mr. JAVITS. Mr. President, I should like the attention of the Senate, briefly.

There is a case—I would like to agree with the Senator from Massachusetts (Mr. KENNEDY)—for some kind of progressive tax for those items which really represent special exemptions under the law. If his amendment is adopted, that is it. But if the amendment is rejected, I hope he will devote himself to that point, because I cannot agree, and I think many other Members of the Senate cannot agree, with the way he handles capital gains.

First, there is no progressive tax on capital gains. It is a flat tax.

Second, many countries do not have a capital gains tax, precisely to encourage capital venture.

Third, the Gore amendment already has put the tax up very materially.

I wanted to vote for this amendment. I would like to vote for some amendment like it, but I do not feel I can unless we can articulate the problem of capital gains, somehow exclude it, and also find out what it does financially, and what are the balances in the proposition which the Senator from Massachusetts is making.

I make the basic point that capital gains are not basically a tax loophole. We do it because we want to encourage a certain kind of risk taking. Second, it never has been a graduated tax. It always has been a flat tax, and I do not think it belongs in this particular approach.

Mr. LONG. Mr. President, under the proposal of the Senator from Massachsetts, he would tax interest expense. That is not interest income. This minimum tax applies to an interest expense insofar as it exceeds investment income. In voting so, we thought that at a 5-percent rate we could justify taxing an interest expense. In his amendment, the Senator is proposing putting a 15-percent tax on an interest expense. I find this difficult to justify.

SEVERAL SENATORS. Vote! Vote!

Mr. KENNEDY. Mr. President, how much time remains?

The PRESIDING OFFICER. The Senator from Massachusetts has 1 minute remaining.

Mr. KENNEDY. I yield myself 1 minute.

Mr. President, the Finance Committee bill provides a tax on the interest for investment income. The revenue gain from this provision is very small—$75 million—it is incidental.

Either we believe in a progressive income tax, or we do not. As I said earlier, the people of this country expect that we do. This amendment incorporates a progressive feature in an important new concept in our tax laws—the minimum tax. My amendment affects many aspects of our tax system that today are considered unfair tax shelters. It will not affect the middle- or low-income person who is going to realize gains under even a minimum tax amendment.

The PRESIDING OFFICER. All time on the amendment has expired.

The question is on agreeing to the second section of the amendment of the Senator from Massachusetts. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HUGHES (when his name was called). Mr. President, on this vote I have a pair with the Senator from Louisiana (Mr. ELLENDER). If he were present he would vote "nay." If I were permitted to vote I would vote "yea." I withhold my vote.

The rollcall was concluded.

Mr. BYRD of West Virginia (after having voted in the negative). Mr. President, I have a pair with the distinguished majority leader, the Senator from Montana (Mr. MANSFIELD). If he were present and voting he would vote "yea." I have already voted in the negative. If I were permitted to vote I would vote "nay." Therefore, I withdraw my vote.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from Montana (Mr. MANSFIELD), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. Mc-

CLELLAN), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I further announce that the Senator from Indiana (Mr. BAYH) and the Senator from Nevada (Mr. CANNON) are absent on official business.

On this vote, the Senator from Nevada (Mr. CANNON) is paired with the Senator from Mississippi (Mr. STENNIS). If present and voting, the Senator from Nevada would vote "yea" and the Senator from Mississippi would vote "nay."

I further announce that, if present and voting, the Senator from Arkansas (Mr. FULBRIGHT) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Kentucky (Mr. COOK), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) and the Senator from California (Mr. MURPHY) would each vote "nay."

The result was announced—yeas 24, nays 52, as follows:

[No. 186 Leg.]

So section A of Mr. KENNEDY's amendment (No. 368) was rejected.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

## PROGRAM

Mr. LONG. Mr. President, I am seeking to locate the majority leader. It was my understanding earlier in the day that at the conclusion of this vote the Senate would turn to the consideration of certain appropriation measures and that we would then resume the consideration of the tax bill when the Senate convenes on Monday.

I would like to ask the acting majority leader if this is his understanding.

Mr. KENNEDY. Mr. President, the majority leader had business out of the city and has been officially excused. He was hopeful we would continue and act on additional amendments as long as any were offered. He also indicated he was hopeful we could take up the military construction bill when there were no further amendments to the tax reform bill.

It would be my hope that, consistent with the majority leader's intention, we try to dispose of some additional amendments to the tax bill this afternoon.

Mr. BIBLE. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. BIBLE. Mr. President, it is my understanding that the majority leader desired to move forward on as many amendments to the tax bill as we could, and then, at the end of that deliberation to lay down the military construction bill with the understanding that we would, if possible, get to third reading. If there were amendments, obviously they would go over until Monday for rollcall votes. In addition, there would be a rollcall vote on final passage. If we get to third reading, we would go over to Monday and have the military construction bill, in the hope that we could get third reading on that today.

Mr. LONG. Mr. President, as far as this Senator is concerned, we might as well proceed as long as Senators want to, but I doubt very much that we will reach the third reading of the bill today.

That being the case, I think we might just as well proceed to the consideration of the appropriation measure.

Mr. SCOTT. Mr. President, it would be my hope, also, after some discussion with the majority leader and with the acting majority leader, that we could go over now, temporarily, to the military construction bill, with the hope of reaching at least the third reading tonight on that bill.

Mr. KENNEDY. I wonder whether it would be possible now, to try to get a unanimous-consent agreement to a 1-hour limitation on any additional amendments to the tax bill. I have mentioned this to the minority leader just now, and also to the chairman of the Finance Committee. If we could make that decision, we could move forthwith to the military construction appropriation bill and, it is hoped, finish the tax bill in the early part of next week.

Mr. HRUSKA. Does the Senator mean a blanket agreement to limit debate on all amendments?

Mr. KENNEDY. On all amendments.

Mr. HRUSKA. Mr. President, reserving the right to object—and I think I shall—just because this will be the 14th day of debate instead of the first day of debate, that does not mean that the gravity, seriousness, and scope of the tax bill should not continue to have full and complete debate. Many amendments are pending, and if some of them are called up, I believe they will be found to be in the same category as amendments that have been considered heretofore and on which it was not considered desirable to have a limitation of debate.

Mr. KENNEDY. We have had many limitations on debate on other amendments. The suggestion of the leadership has been that if there were additional amendments, which Senators desired to offer today we would proceed with them this afternoon. We were trying to reach some degree of comity and understanding. Especially we might remember the urging of the President, who has talked about this measure and has suggested the possibility of our coming back during the Christmas holidays at his request. Certainly we would like to continue with this measure today.

Mr. HRUSKA. May I suggest that the President also, in that same message, called for fiscally responsible tax legislation. If we are going to accord 1 hour's worth of debate on an amendment which should have 3 or 4 hours, I do not see how we can inject fiscal responsibility into it. This morning's proceedings are an example of it. The junior Senator from Montana (Mr. METCALF) proposed an amendment on which we did not spend 1 hour but 4 hours. I would be precluded from doing that if an amendment of that type were submitted between now and next Wednesday.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. WILLIAMS of Delaware. There are a number of amendments. I am confident that we can continue on the tax bill right on through today. If we do not finish it today, then we will continue on Monday next. But I understand the leadership wanted to lay the tax bill aside in order to proceed with the appropriation bill on military construction. If I am wrong, I am sorry, but that is what I understood. I am willing to do either—work on the tax bill or on the appropriation bill.

Mr. KENNEDY. The instructions that I had from the majority leader clearly stated that we should continue voting on the tax bill this afternoon so long as amendments were called up. It says here, in a memorandum the Senator from Montana wrote to me: "Make it clear to our colleagues during my absence that the important thing is to keep the ball rolling as long as we can."

Mr. WILLIAMS of Delaware. I understood that the leadership was concerned that we get the appropriation bill rolling. Hopefully, we can do that, as indicated; otherwise, we can stay and work on the tax bill. It should be our intention to remain and consider all amendments. I am trying to find out what the leadership wants to do now.

Mr. KENNEDY. The leadership would like to know if there are any amendments now to the tax bill; and if there are any amendments now which any Senator is prepared to move on, they

should be called up. It would be tne hope of the leadership that we would continue with those amendments, with the expectation that we would take up the military construction appropriations bill later today after there were no more Senators ready to move on amendments to the tax bill.

Mr. SCOTT. May I ask the Senator from Massachusetts whether the majority leader made a distinction, if there is one, as to whether he was talking about noncontroversial amendments on which rollcalls would be expected.

Mr. KENNEDY. No. It is hoped that we could continue as long as there were Members of this body who had amendments and who were prepared to debate them this afternoon. That was the parting suggestion of the leader, with which I agree. Then we could take up the military construction bill after Senators have concluded offering amendments this afternoon.

Mr. HANSEN. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. HANSEN. I have prepared two, maybe three amendments and I am certain they are noncontroversial, if everyone will be reasonable. [Laughter.]

Mr. KENNEDY. The Senator from Michigan (Mr. HART) has some amendments.

Mr. HART. Mr. President, reserving the right to object, if there is need, in order to test what is desired with respect to proceeding as the majority leader suggested, I am prepared to call up an amendment which, as its author, I can assure everyone makes good sense. Its number is 314 and it seeks to go beyond the position the committee has taken with respect to deductibility of penalties paid under trust judgments. I am prepared to discuss it briefly at this time. It really has a limited fiscal implication. It is more a question of philosophy. I would be pleased to bring it up under a limitation of debate.

Mr. KENNEDY. Obviously there are amendments which are prepared for consideration.

Mr. WILLIAMS of Delaware. There is no question that there are plenty of amendments. I had only reluctantly agreed to what I thought was the majority leader's request that later today we would set the tax bill aside and consider the military construction bill. If I have misunderstood, then we will proceed with the tax bill and just let the military construction appropriation bill go over until next week.

Personally, I would rather complete the tax bill today, or on Monday or Tuesday next, before we take up other business. But I was willing to accommodate the majority leader. Apparently, from what I gather from the Senator from Massachusetts, I must have misunderstood the majority leader. Thus I say, let us proceed with the tax bill.

Mr. KENNEDY. Mr. President, I am delighted to state the majority leader's position, and that is to continue voting on the tax bill throughout the afternoon, and in the late afternoon take up the military construction appropriation bill. I do not consider the 4:30 o'clock p.m. period to be late afternoon. There have been Members of the Senate who have indicated that they have amendments. Therefore, it is my suggestion now that we continue with those amendments and take up the military construction appropriation bill after that.

Mr. WILLIAMS of Delaware. I want to thank the acting majority leader. I pledge him my support. Let us proceed with the tax bill.

Mr. BENNETT. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. BENNETT. Does the leadership know whether there will be any serious amendments to the military construction bill, or will that get bogged down, too?

Mr. KENNEDY. I would rather have the distinguished Senator from Nevada (Mr. BIBLE), respond to that question.

Mr. BIBLE. If the Senator from Massachusetts would yield to me, let me say, to the best of my knowledge there will be no amendments requiring rollcall votes on the military construction bill. Senators can be sure of one or more amendments but if there are amendments offered of a serious nature, the majority leader has asked me to assure everyone that those amendments will go over until Monday next for voting. But, if there are no amendments, then we will go to third reading and then have a rollcall vote on final passage of the military construction bill on Monday next.

Mr. BENNETT. With all Senators present, or most of them, as well as the chairman of the subcommittee, may I ask if there are any of us who intend to bring up a serious amendment to the military construction bill, so that we might be able to clear on that now?

Mr. BIBLE. The Senator from North Dakota (Mr. YOUNG) can respond to that.

Mr. YOUNG of North Dakota. There have been some expressions concerned about, perhaps, ABM funds. There is only $16 million in the bill for that, which is for research and development in a very important area. There is no opposition that I know of.

Mr. BIBLE. That is likewise my understanding, Mr. President. This is for research and development at Kwajalein and nothing in the continental United States.

Mr. BYRD of West Virginia. Mr. President, will the Senator from Massachusetts yield?

Mr. KENNEDY. I yield.

Mr. BYRD of West Virginia. Might I make the suggestion to the joint leadership that we proceed with consideration of the tax reform bill, discussing any amendments and voting on them by voice vote if they are not too controversial, and if we have amendments which will require rollcall votes, after discussing them, then the rollcall votes can go over until Monday, so that all Senators would know now that there woud be no more rollcall votes today. If we get to the point that we have no further amendments for discussion to the tax reform bill, we can lay it aside temporarily and take up the military construction appropriation bill and proceed with it until we have advanced it to third reading, with the understanding that any and all rollcall votes would go over until Monday next on both bills.

Mr. KENNEDY. Mr. President, if Senators who will be here this afternoon and have amendments to offer to the tax bill and who desire rollcalls, it is the intention of the leadership to stay in session this afternoon for some time. If there are Senators who want to have voice votes, we will do that. It is also the intention of the leadership to move to consideration of the military construction appropriation bill after a reasonable period of time.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. WILLIAMS of Delaware. There will be rollcalls. The Senator from Alaska (Mr. STEVENS) has an amendment on which he wants a rollcall.

Mr. BYRD of West Virginia. Mr. President, will the Senator yield?

Mr. KENNEDY. I yield.

Mr. BYRD of West Virginia. Mr. President, I merely suggested this so that Senators might know that there would be no more rollcalls today. Apparently, we are not going to finish either of these bills. They are going over until Monday for the final vote. Why not put over all rollcalls until Monday? The majority leader and I have an amendment which will lower the age for social security recipients to 60, and I intend to ask for a rollcall vote on it. Perhaps we could have a fixed time to vote on that amendment on Monday.

Mr. KENNEDY. Mr. President, as long as there are Senators present who have amendments to the tax bill and are prepared to move on those measures, it is the leadership's intention to continue on. We will consider the possibility of moving onto other matters later in the afternoon.

AMENDMENT NO. 380

Mr. STEVENS. Mr. President, I call up my amendment No. 380.

Mr. COTTON. Mr. President, will the Senator yield me half a minute?

Mr. STEVENS. Mr. President, I ask for the yeas and nays on my amendment.

The PRESIDING OFFICER. Is there a sufficient second?

The amendment will be stated.

The legislative clerk proceeded to read amendment No. 380.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

Amendment No. 380 is as follows:

On page 413, line 3, before the period, insert "and property to which subsection (f) applies".

On page 428, line 6, following subsection (e) add the following new subsection:

"(f) INVESTMENTS IN DEPRESSED AREAS.—

"(1) IN GENERAL.—In the case of section 38 property (other than pre-termination property)—

"(A) the physical construction, reconstruction, or erection of which is begun after April 18, 1969, or which is acquired by the taxpayer after April 18, 1969, and

"(B) which is located in a depressed area and which is constructed, reconstructed, or erected, or acquired for use in a trade or business,

the taxpayer may select items to which this

subsection applies to the extent that qualified investment for the taxable year attributable to such items does not exceed the limit on qualified investments determined under subsection (2) of this subsection. In the case of any item so selected (to the extent of the qualified investment attributable to such item taken into account under the preceding sentence), subsections (a), (c), (d), and (e) of this section, paragraphs (5) and (6) of section 46(b), and the last sentence of section 47(a)(4) shall not apply.

"(2) LIMIT ON QUALIFIED INVESTMENT.—The taxpayer shall project, under regulations promulgated by the Secretary, the number of new jobs that will be created by the qualified investment. The limit on qualified investment shall be determined by multiplying the number arrived at under the first sentence of this paragraph by $15,000.

"(3) DEPRESSED AREA.—For purposes of paragraph (1), the term 'depressed area' means an area in a State or political jurisdictional subdivision of a State in which the Department of Labor certifies that the unemployment rate for the preceding calendar year was at 6 percent or greater, or which the Secretary of Commerce determines, after consultation with the Secretary of Agriculture, are areas in which (A) farming is a major industry, (B) there has been a substantial decrease (or there is a continuing marked decrease) in the number of persons engaged in farming as a major source of their income or livelihood, (C) there is a substantial migration of such persons out of the area, and (D) as a result of such decrease and migration, a condition of substantial and persistent unemployment or underemployment exists or is caused in other areas."

Mr. SCOTT. Mr. President, were the yeas and nays ordered?

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. STEVENS. Mr. President, I yield 1 minute to the Senator from Colorado (Mr. ALLOTT).

AMENDMENT NO. 397

Mr. ALLOTT. Mr. President, of myself and my colleague from Colorado (Mr. DOMINICK) I send an amendment to the desk for printing.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the desk.

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. Senators will please take their seats.

AMENDMENT NO. 380

Mr. STEVENS. Mr. President, I ask unanimous consent that my amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, with the agreement of the Senator from Louisiana, I would be willing to enter into a consent agreement of 20 minutes on each side.

UNANIMOUS-CONSENT AGREEMENT

Mr. LONG. Mr. President, I ask unanimous consent that there be a limitation of 40 minutes on this amendment, 20 minutes to the sponsor of the amendment and 20 minutes to the manager of the bill.

Mr. HRUSKA. Mr. President, I should think we ought to know the nature of the amendment before we agree to any limitation of debate.

Mr. STEVENS. The amendment seeks to continue the investment tax credit to depressed areas.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). The Senator will suspend until there is order. The Sergeant at Arms is instructed to clear the floor of all staff personnel who are not needed in connection with this bill, and those who are needed in connection with the bill must take seats. The Chair will await the action of the Sergeant at Arms in enforcing this order.

Mr. DOMINICK. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Would the Senator from Louisiana now repeat his unanimous-consent request?

Mr. LONG. Mr. President, I ask unanimous consent that further debate on the amendment of the Senator from Alaska be limited to 40 minutes, to be equally divided between the sponsor of the amendment and the manager of the bill.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Louisiana that the time on the amendment be limited to 40 minutes, to be equally divided? The Chair hears none, and it is so ordered.

Who yields time?

Mr. STEVENS. Mr. President, I yield myself 10 minutes, and I yield one-half minute to the Senator from Colorado. I had hesitated to call up this amendment——

The PRESIDING OFFICER. There will be order in the Senate.

The Senator from Alaska.

Mr. STEVENS. Mr. President, I had hesitated to call up this amendment, but since I shall be absent from the Senate on Monday and seek a rollcall vote on it, I have decided to call it up. It seeks to preserve the investment tax credit in depressed areas.

I would call to the attention of this body that my whole State is a depressed area. The unemployment rate in Alaska exceeds 9 percent at all times. Sometimes, in many portions of our State, it is as high as 85 percent.

We have investigated the total cost in 1968 for the investment of manufacturing plant and equipment that created new jobs, and based upon information from the Department of Labor and the Department of Commerce, have ascertained that it is fair to assign the figure of $15,000 as the amount necessary to create a new job in terms of investment.

This amendment seeks to perpetuate the investment tax credit in depressed areas in this manner: We would take the number of new jobs that are created, as determined by guidelines established by the Secretary of the Treasury, multiply those jobs by $15,000, and that would give the gross amount that would be available for the tax credit at the rate of 7 percent.

Yesterday I put in the RECORD an analysis of the cost of this amendment. Assuming that all of the unemployed people in the depressed areas of this country were employed as a result of this type of investment, the total tax loss to the Treasury would be but $10 million, because the people who are presently unemployed are a burden on the Federal Government and on the State governments in terms of welfare costs.

As an offset against the cost of the credit, we have, under the administration's new program, the family assistance benefit that would not have to be paid to the unemployed receiving jobs as a result of the credit. We believe that if the Senators will examine the real drain on the Treasury as a result of this type of incentive, it will be found to be very small. It would be an incentive to take investment dollars and put them into areas where new jobs must be created.

I would call attention particularly to the fact that if it were not in a depressed area, there would be no investment tax credit.

Investment in a depressed area would only be eligible if, in fact, it did create new jobs, and thereby relieved the burden in depressed areas such as in my State.

I believe this is one way we can preserve the investment tax credit in areas where it will do some good, where it will reduce unemployment, where it will provide new income for people presently unemployed, provide new tax revenues for the Federal Government by virtue of that employment, and actually reduce the burden on the States because welfare rolls will have that much less burden.

I shall be pleased to discuss the matter with any Senator who has any question about it. It is a simple amendment. We are all familiar with the investment tax credit. It seeks to preserve what is presently an eligible investment under section 38 of the Internal Revenue Code.

I think it is important to point out what is a depressed area under the terms of this provision. It would be an area in which the unemployment rate exceeded 6 percent in the calendar year preceding the investment, or that portion of a State which the Secretary of Agriculture certifies is an area in which farming is a major industry, there has been a substantial decrease or there is a continuing marked decrease in the number of persons engaged in farming as a major source of income or livelihood, there is a substantial migration of such persons out of the area and as a result of such decrease or migration, a condition of substantial and persistent unemployment or underemployment is caused in such area or in some other area.

The PRESIDING OFFICER. The Senate will be in order. Attachés will not stand around the walls. The Sergeant at Arms will enforce this order during the remainder of the day. The lobbies will be cleared of all persons other than Senators and persons connected with the business of the Senate.

The Senator may proceed.

Mr. STEVENS. Mr. President, the inclusion in my amendment of the additional definition of a depressed area to include those farming areas which are losing farmers and are causing substantial underemployment or unemployment by reason of such action, is the result of a suggestion for which I am indebted to the Senator from Iowa (Mr. MILLER). There is a persistent problem of unemployment as a result of a substantial and

continuing migration away from farm areas.

This amendment would act as an incentive to create jobs in those farm areas experiencing such migrations. This amendment is extremely important to my State. The investment credit, I feel, has been an incentive to bring money to Alaska. Despite the fact that we have substantial tax revenues and oil revenues in our State treasury, we still have the highest rate of unemployment in the country, and I point out, with respect to the unemployment figures, that almost 20,000 people are not even included; they have been unemployed so long, they are no longer included in the statistics. This is primarily in the bush areas, the native and Indian areas of our State.

This investment tax credit, I feel, would be an incentive to private industry to take up the burden that is otherwise going to be assumed by the Federal Government under the family assistance program suggested by the administration if we do not create jobs and put these people to work on private payrolls. I really believe this is one of the places where the investment tax credit is justified, and I would not have offered the amendment had not the amendment by the Senator from Indiana been agreed to the other day. It preserved the investment tax credit as far as this body is concerned, and goes beyond the bill suggested by the Finance Committee in that regard.

I think this is a fair amendment. It is an amendment no one can abuse. You have to create a job by virtue of the investment in order to take the credit, and by tying it down so that you must show, in accordance with regulations promulgated by the Secretary of the Treasury, the fact that you have created permanent new employment by your investment to justify the credit, we guarantee that the credit will be an incentive, I feel, for job-creating investment.

Mr. President, I reserve the remainder of my time.

Mr. MONTOYA. Mr. President, will the Senator yield?

Mr. STEVENS. I am happy to yield.

The PRESIDING OFFICER. How much time does the Senator yield?

Mr. STEVENS. I yield whatever time the Senator may require.

Mr. MONTOYA. Mr. President, I wish to associate myself with the remarks of the Senator from Alaska. I think this is a very worthwhile amendment. Under the concept we have developed here in Congress through the Economic Development Act, we have been able to do a good deal with the funds we have appropriated under that act for this type of area.

There have been many small industries financed through the Economic Development Administration in many of these areas, but the most important contribution, to my way of thinking, has been the fact that, because these areas qualify under the EDA concept, the local schools have been able to get 80-percent grants, with 20 percent local matching funds, for the establishment of vocational schools.

We have now also incorporated Indian reservations and Indian villages under the EDA concept. In looking over the amendment, I fail to see that the Senator from Alaska has included Indian villages or Indian reservations in his amendment, and I am assuming that he would have no objection to modifying the amendment to include Indian villages and reservations, in addition to political subdivisions within a State.

Mr. STEVENS. Mr. President, I have no objection. Since the entire State of Alaska qualified, native areas would automatically have been part of a depressed area, and I apologize for the error. I certainly would include an Indian reservation within the definition of a depressed area.

Mr. MONTOYA. Is the Senator willing to amend his amendment accordingly?

Mr. STEVENS. I am happy to do so.

The PRESIDING OFFICER. Does the Senator ask unanimous consent to modify his amendment?

Mr. STEVENS. I ask unanimous consent that my amendment be modified, on page 3, line 1, by inserting after the word "State", and prior to the word "or", the words "Indian reservation", so as to make it read "State, Indian reservation, or political subdivision."

The PRESIDING OFFICER. Is there objection to the modification of the amendment? The Chair hears none, and it is so ordered.

Mr. MONTOYA. I thank the Senator from Alaska.

Mr. STEVENS. I thank the Senator from New Mexico for his contribution.

Mr. President, I point out that there are 490 such areas in the United States. In those 490 areas, there were 434,000 unemployed at the end of 1968. And I point out one other thing: Of the 80 million persons in the labor force of this country, only 5.2 million people live in those 490 areas. These are the areas that need new investment and new jobs; and unless we find some way to stimulate new investment in those areas, we shall not have the investments necessary to create those new jobs.

The PRESIDING OFFICER. The Senator's time has expired.

Mr. STEVENS. I yield myself whatever additional time I may have remaining. I ask unanimous consent that the name of the Senator from West Virginia (Mr. RANDOLPH) be added to my amendment as a cosponsor.

The PRESIDING OFFICER. Without object, it is so ordered.

Mr. STEVENS. I also ask unanimous consent that the name of the Senator from New Mexico (Mr. MONTOYA) be added as a cosponsor of my amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Alaska has 7 minutes remaining?

Mr. STEVENS. I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LONG. Mr. President, I yield myself such time as I may require.

The PRESIDING OFFICER (Mr. BYRD of West Virginia in the chair). The Senate will be in order. Staff members will take seats. The Chair recognizes that this is the kind of complex bill which requires a goodly number of staff technicians; but the Chair expects the staff members to use those seats. All staff members will be seated. There will be no exception to the Chair's order.

The Senator from Louisiana may proceed.

Mr. LONG. Mr. President, I have much sympathy for the laudable motives of the Senator from Alaska in seeking to use the tax structure to relieve depressed areas and to help wipe out areas of economic distress and poverty throughout the Nation.

Nevertheless, Mr. President, it was the view of the members of the Committee on Finance that we should try to pass a bill that would have no exceptions to the repeal of the investment tax credit. Our efforts in that regard were frustrated by the adoption the other day of the amendment which provides a $20,000 exception to the repeal for every taxpayer, the so-called small business exemption—and the cost of that exception would greatly exceed what the Senator has in mind. I am told the Senator's amendment would cost $300 million; and, while it has considerable merit to recommend it, I fear that if we agree to it, it would then lead to other amendments, and the hope of repealing the investment tax credit might never be realized.

On that basis, Mr. President, I regret that I cannot support the amendment.

I believe other Senators have a similar feeling about the matter, although I must say that if there were to be exceptions, this would be a very worthy exception to the repeal of the investment tax credit.

I believe the Senator from Delaware wanted to speak on the matter. Does the Senator from Delaware desire time?

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. LONG. Mr. President, I yield 5 minutes to the Senator from Delaware.

Mr. WILLIAMS of Delaware. Mr. President, I appreciate the position of my friend, the Senator from Alaska, on the amendment. Nevertheless, I think it would be a great mistake if the Senate were to agree to it.

I understand the cost of the amendment is estimated to be about $300 million. It would restore the investment tax credit for investments in those areas classified as depressed areas under certain definitions.

I understand that the whole State of Alaska would be classified as a depressed area for this purpose. That means that the investment tax credit would continue in the entire State of Alaska. It also would continue in other areas of the country that would qualify under the 6-percent unemployment figure which is used to determine whether an area is a depressed area.

If we had a recession, it is not at all beyond the realm of possibility that this amendment could trigger a restoration

of the investment tax credit throughout the whole country, which would occur if we reached the 6-percent level on unemployment.

We should either repeal the investment tax credit or not repeal it. And if we are going to accept this amendment, as far as I am concerned, I would say that the next amendment should be for the outright repeal of the section of the committee bill which deals with the removal of the tax credit.

We cannot justify continuing the credit in one case and not continuing it in another. We cannot justify having it apply differently in one State than in another State.

The Hartke amendment eliminated nearly one-fourth of the revenue which would have been produced under the committee bill by the repeal of the investment tax credit. This amendment would take out another $300 million of that revenue gain.

I think the amendment should be rejected.

Mr. LONG. Mr. President, I yield 2 minutes to the Senator from Illinois.

The PRESIDING OFFICER. The Senator from Illinois is recognized for 2 minutes.

Mr. PERCY. Mr. President, I should have liked to study the provision much more closely than I have. I am not at all familiar with the situation in Alaska, so I do not know precisely what effect it would have there. However, I am trying to think of the situation in my own State where we do have some depressed areas. I am trying to think of what effect it would actually have there.

I know that automation and labor-saving devices over a period of time create employment, not unemployment. However, that is on the broadest possible basis. If we give an incentive in depressed areas where we have excess labor available, those companies that invest money in that particular area, in that particular plant, in labor-saving devices—and that is the type capital equipment they would be putting in—it might actually do exactly the opposite of what we would want to accomplish in a depressed area. It might be providing incentive to replace men with machines.

However, I now understand that there is a provision in the amendment that bases the limit on investments to which the investment tax credit can apply to $15,000 times the number of new jobs created. This would actually insure that new jobs would be created and makes the amendment much more acceptable. However, I am worried about the fiscal impact of this amendment—$300 million in decreased revenue. The actions of the Senate this week have already eliminated many billions of Federal revenue and this would be a further addition to that deficit.

Mr. STEVENS. Mr. President, I yield myself such time as I might need.

The PRESIDING OFFICER. The Senator from Alaska is recognized.

Mr. STEVENS. Mr. President, no tax credit would be available to anyone unless he created new jobs in an area of high unemployment where there are people who are waiting for jobs. The reason for the investment is to encourage industry to go there to create the jobs.

In the rural areas of my State, it is impossible to get people to put in new canneries or new docks or any of the new equipment necessary in the fishing industry or mining industry. Those industries are sagging. In the native areas of my State the economy is completely depressed.

This amendment would provide an incentive to bring money into those areas. And if investment does come in and creates new jobs, this amendment will not cost the Treasury much.

If all of the unemployed people of this country were put to work by virtue of this amendment, the tax loss to the Treasury would be $300 million. However, we would have to employ every single unemployed person to have that cost.

At the same time, we would have a savings by virtue of the welfare payments that are being made to people under the Federal programs in existence today, not counting the new programs that have been suggested. And if we had those savings, the cost of employing every unemployed person would be only $10 million.

It will not cost anything unless it works. So how can we lose?

Mr. MONTOYA. Mr. President, in my State, Fairchild Camera came into the Navajo Reservation. They have installed very sophisticated equipment in that factory. They employ 1,500 Navajo Indians there, and they want to expand because of the experience they have had with the Indians.

With respect to the disadvantage of the depressed areas in this country, I point out industry goes to the metropolitan areas, and the metropolitan areas have a great advantage over the depressed areas in that they have local bonding statutes which permit the municipalities or the political subdivisions to create incentives for bringing industry into that particular area.

In the usual case in the depressed areas, they are unable to float any bond issues to provide facilities for industry so that industry can be lured into these areas and serve to supply the financial opportunity in these areas through this medium of a tax advantage.

I feel it is going to work. I feel that EDA has proved the case. In fact, EDA was a great instrument in bringing Fairchild Camera to the Navajo Reservation.

EDA is satisfied with it. The loan is being amortized, and Fairchild Camera has created an employment situation there that is a bonanza for the Navajo Indians.

I feel that the concept that the Senator from Alaska is developing in the amendment is healthy. It is a concept that will help the depressed areas of the country.

Mr. STEVENS. Mr. President, I thank the Senator.

The normal rate on corporations is 52 percent. If we allow $15,000 for each new job created, the total net effect on the Treasury of this 7-percent credit will be about $1,000 for each job that is created.

We cannot support, even through the Federal programs, a family for 6 months for $1,000. Every new job we create would lose the Treasury $1,000 in potential tax revenues. That is all it could cost, because no one may take the credit unless he creates new jobs.

I think this is the one way to get some of the investment in the areas in which it has not been possible to obtain it in the past.

If we do not get the investment there, we will be in here for welfare programs, family assistance programs, and all kinds of programs that will cost much more money. And I will support those programs. I would rather have them employed by private enterprise. Before condemning welfare programs I want first to take every proper action to get private enterprise in there.

If private enterprise cannot do the job, then government will have to do the job. This is one way to prevent any part of this burden from falling on the Federal Treasury.

It is an important amendment, so far as my State is concerned. I am informed that my State is the only State in the Union that is a 100-percent depressed area.

I will admit that any investment made in my State would qualify under this measure. However, I point out to the Senator from Delaware that we do not have any of the charitable contributions there that we have been talking about. We do not have any of these contributions that are made to such colleges as Yale or Harvard.

If the Senator wants to point out the fact that this affects Alaska more than other States, I point out that there are many things in this bill that do not help Alaska one bit. We are happy to support the chairman who has done such an outstanding job. And the Finance Committee generally. But, if the investment tax credit is to be continued, as it has been by the Hartke amendment, then my amendment is justified.

In terms of the service industry, we are trying to lure into our State the industries to produce some of the tools used in the oil industry. Those service industries will not come into our State if they do not have some incentive to come there. I think this would help.

Mr. LONG. Mr. President, I am not prepared to vote for any exception to the repeal of the investment tax credit. The House may insist that there be no exceptions to the repeal of the credit. But in view of the fact that the Senate has already voted one exception to the repeal, and the Senator has made such a persuasive argument, I think I will vote for his amendment.

Mr. STEVENS. I thank the Senator from Louisiana. I rest my case while I am ahead.

The PRESIDING OFFICER. Who yields time?

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. WILLIAMS of Delaware. I do not want to delay this matter, but I would say there are two reasons for voting for this amendment: There are those who believe in the amendment sincerely and there are those who would like to see this bill killed. The adoption of this

amendment would be another step toward sinking a bill that many people have been speaking for, but really want to kill.

This bill already has been loaded with amendments that will lose almost $10 billion of revenue next year. Another $1.7 billion of revenue will be lost eventually as a result of the credit for education expenses, and this amendment will add another $300 million. I hope the amendment will be rejected. Let us vote.

Mr. STEVENS. I yield back the remainder of my time.

Mr. LONG. If there are no further requests for time, I yield back the remainder of my time.

The PRESIDING OFFICER. All time on the amendment has been yielded back.

The question is on agreeing to the amendment of the Senator from Alaska. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Idaho (Mr. CHURCH), the Senator from California (Mr. CRANSTON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Tennessee (Mr. GORE), the Senator from Alaska (Mr. GRAVEL), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Hawaii (Mr. INOUYE), the Senator from Montana (Mr. MANSFIELD), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Arkansas (Mr. MCCLELLAN), the Senator from Rhode Island (Mr. PASTORE), the Senator from Connecticut (Mr. RIBICOFF), the Senator from Georgia (Mr. RUSSELL), the Senator from Mississippi (Mr. STENNIS), the Senator from Missouri (Mr. SYMINGTON), the Senator from New Jersey (Mr. WILLIAMS), the Senator from Texas (Mr. YARBOROUGH), and the Senator from Ohio (Mr. YOUNG) are necessarily absent.

I also announce that the Senator from Indiana (Mr. BAYH) and the Senator from Nevada (Mr. CANNON) are absent on official business.

I further announce that, if present and voting, the Senator from Louisiana (Mr. ELLENDER), the Senator from Arkansas (Mr. FULBRIGHT), the Senator from Alaska (Mr. GRAVEL), and the Senator from Mississippi (Mr. STENNIS) would each vote "yea."

I further announce that, if present and voting, the Senator from California (Mr. CRANSTON) would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Tennessee (Mr. BAKER), the Senator from Delaware (Mr. BOGGS), the Senator from Kentucky (Mr. COOK), the Senator from Maryland (Mr. MATHIAS), the Senator from California (Mr. MURPHY), the Senator from Ohio (Mr. SAXBE), and the Senator from Illinois (Mr. SMITH) are necessarily absent.

The Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Massachusetts (Mr. BROOKE) is detained on official business.

If present and voting, the Senator from Arizona (Mr. GOLDWATER) would vote "nay."

On this vote, the Senator from Kentucky (Mr. COOK) is paired with the Senator from Delaware (Mr. BOGGS). If present and voting, the Senator from Kentucky would vote "yea," and the Senator from Delaware would vote "nay."

On this vote, the Senator from California (Mr. MURPHY) is paired with the Senator from Massachusetts (Mr. BROOKE). If present and voting, the Senator from California would vote "yea," and the Senator from Massachusetts would vote "nay."

The result was announced—yeas 35, nays 33, as follows:

[No. 187 Leg.]

YEAS—35

| Ellender | Mundt | Young, Ohio |
| Fulbright | Murphy | |

So Mr. STEVENS' amendment was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. GRIFFIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMINICK. Mr. President, on behalf of Senator ALLOTT and myself I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

On page 546, line 12 at the end of section 914 add a new section 915 to read as follows:

"SEC. 915. PERSONAL HOLDING COMPANIES.

"Section 563(b)(2) (relating to personal holding company tax) is amended by striking '10 percent' and inserting in lieu thereof '20 percent.'"

Mr. KENNEDY. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats. The Presiding Officer has plenty of time to wait on staff personnel to take seats.

Mr. DOMINICK. Mr. President, this is not a complicated amendment. It is more a matter of bookkeeping than anything else. I have discussed the amendment with the manager of the bill, the Senator from Louisiana (Mr. LONG), the distinguished ranking minority Member, the Senator from Delaware (Mr. WILLIAMS), and the Treasury Department.

Personal holding companies at the present time have to distribute within the taxable year 90 percent of their earnings and then distribute the remaining 10 percent in the next 3½ months. The problem is that in many cases it is very difficult to make an accurate estimate of earnings before their books are closed and the present 10 percent does not permit an adequate margin to either avoid paying too much in dividends, or paying too little. If the latter occurs, they subject themselves to very heavy penalties. I have discussed this problem with Treasury officials and they suggest we raise the margin from 10 to 20 percent.

I hope the manager will accept the amendment.

Mr. LONG. Mr. President, I have no objection. I am willing to take it to conference.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Colorado.

The amendment was agreed to.

Mr. BELLMON. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. BELLMON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

At the proper place insert the following new section:

"SEC.—. REPLACEMENT OF REAL PROPERTY INVOLUNTARILY CONVERTED WITHIN A TWO-YEAR PERIOD.

"(a) IN GENERAL.—Section 1033(a)(3)(B) (relating to the period within which property must be replaced) is amended by striking out 'one year' in clause (i) and inserting in lieu thereof 'two years'.

"(b) EFFECTIVE DATE.—The amendment made by this section shall apply with respect to compulsory or involuntary conversions of real property only if the disposition of the converted property (within the meaning of section 1033(a)(2) of the Internal Revenue Code of 1954) occurs after the date of the enactment of this Act."

Mr. GRIFFIN. Mr. President, is the amendment printed and does it have a number?

Mr. BELLMON. The amendment is in lieu of an amendment that was printed.

Mr. GRIFFIN. I thank the Senator.

Mr. BELLMON. Mr. President, this amendment is intended to relieve a situation that develops when Federal agencies or other governmental entities take private property for the development of lakes, airports, highways, or other use.

Under the present law those who give

up property have only 1 year to reinvest the funds received before being called upon to pay a capital gains tax. The purpose of the amendment is to give them an additional year.

I have discussed this matter with the distinguished chairman of the committee, and also with the ranking minority leader, and they have both agreed to the terms of the amendment.

Mr. LONG. Mr. President, I have looked at the amendment and so have the members of my staff. We think the amendment has merit and I have no objection to it.

Mr. WILLIAMS of Delaware. Mr. President, I agree with the comments of the chairman of the committee.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oklahoma.

The amendment was agreed to.

Mr. WILLIAMS of Delaware. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CORRECTION OF ANNOUNCEMENT ON VOTE

Mr. GRIFFIN. Mr. President, on vote No. 177, the Senator from Maryland (Mr. MATHIAS) was not present, but, through error, the position of the Senator was not recorded in the RECORD.

I ask unanimous consent that the permanent RECORD show that had he been present and voting, he would have voted "nay."

The PRESIDING OFFICER. Without objection, it is so ordered.

THE MILTON HERSHEY SCHOOL AND THE MILTON HERSHEY SCHOOL TRUST

Mr. SCOTT. Mr. President, I would like to draw the attention of my colleagues to a noncontroversial provision of H.R. 13270 that is of great importance to the Milton Hershey School—a school for poor orphan boys in Hershey, Pa. The provision is proposed section 509(a)(3), to be found on pages 20 and 21—commencing on line 12 of page 20 and running through line 2 on page 21—of the version of the bill reported by the Committee on Finance. My remarks are intended to make the legislative history, already spelled out in the House and Senate committee reports, crystal clear insofar as the provision's applicability to organizations such as the Milton Hershey School and the Milton Hershey School Trust are concerned.

Proposed section 509(a)(3) excludes from the definition of private foundation—and hence from the coverage of the legislation—certain organizations which never have been thought of as private foundations, but which inadvertently might have been subjected to the new rules for private foundations in the absence of the exclusion.

The Milton Hershey School for poor orphan boys was established in 1909—long before the advent of Federal income and estate taxes—by Milton Hershey, the founder of the Hershey Chocolate Co. Mr. Hershey, destined to have no children of his own, donated a substantial amount of his fortune to endow a first-rate educational organization for children without parents. When Milton Hershey set up the school he did so by executing a deed of trust under the terms of which the donated assets were deeded not to the school itself but to a trust—the Milton Hershey School Trust. The sole function of the Milton Hershey School Trust was to hold legal title to the school's operating and endowment assets, to invest the endowment assets, and to apply the income from the endowment assets to the benefit of the school in accordance with the direction of the school's governing body—its board of managers. Thus, under the terms of the original deed of trust, which is still in effect today, legal title to even the school's campus and classroom buildings is held not in the name of the school itself, but in the name of the school trust.

That there are two entities as a theoretical matter is made meaningless by other provisions of the deed of trust, which insure that the same persons who control and manage the school trust also control and manage the school. At all times since 1909, the membership of the board of managers of the school has been the same as the membership of the body that manages the trust. By virtue of this complete identity of control over the school and the school trust, there is in reality only a single entity, functioning just as the board of governors or board of trustees of the normal university or school would function, the purpose of which is to operate an educational organization for the benefit of poor orphan boys. Nine individuals, in their capacity as the board of managers of the school, oversee the operation of the Milton Hershey School; the same nine, in their trust capacity, are custodians of legal title to the school's operating assets and managers of the school's endowment assets.

Why Milton Hershey chose this unique arrangement for establishing and endowing the Milton Hershey School is not entirely clear. The net effect of the arrangement is the same as that of any ordinary school or college. There would be no significant difference if Milton Hershey had decided to give his fortune directly to the school. There is little doubt that in all probability he would have conveyed the donated assets directly to the school had he had any idea of the complications that might arise by virtue of the regulatory restrictions that we are, in this bill, imposing upon private foundations.

The Internal Revenue Service itself has recognized that the school trust and the school in effect constitute a single entity, and that this entity qualifies as an educational organization having a regular faculty, curriculum and student body within the meaning of the Internal Revenue Code. In a 1951 Revenue ruling, the Service said in part:

> Inasmuch as the information submitted disclosed that . . . [The Milton Hershey School] is owned and operated . . . [as] an integral part of the activities carried on by the trust it is the . . . opinion of this office that the trust is an educational organization . . . [having a regular faculty, curriculum, and student body].

Mr. President, when the Treasury and the Congress first began considering what changes in the Internal Revenue Code ought to be made in order to curb abuses that had been discovered in the area of private foundations, the approach taken was to include within the definition of private foundation all section 501(c)(3) tax exempt organizations except for certain excluded categories. Among the excluded categories were schools and colleges having regular faculties, curriculums, and student bodies. The Milton Hershey School is clearly such an educational organization, and itself is clearly the beneficiary of this exemption. And, because of its virtual identity with the Milton Hershey School, as recognized by the above mentioned Revenue Ruling, the Milton Hershey School Trust might also be viewed as an educational organization that is not included within the definition of private foundation. Certainly organizations such as the school trust are not the sort of organizations responsible for the abuses that occasioned the new strictures. Nor is the school trust the kind of organization commonly thought of as a "foundation." It is, however, not perfectly clear that the school trust would be excluded in the absence of clarifying statutory language.

Were the school trust not excluded, the result would have been most unfortunate, Mr. President. The hardship would have been suffered by the School and its students. In effect, such a view would subject the Milton Hershey School to unfortunate requirements—including a very substantial tax—to which schools or colleges organized along more traditional lines would not be subjected.

I might interject at this point, Mr. President, that the Milton Hershey School and the school trust constitute a most unusual organization that has not merely benefited many thousands of orphan boys from all across the country. When, in the early 1960's it became clear that Milton Hershey had so handsomely endowed the school that its income was accumulating much more rapidly than was needed to serve the needs of the school, the school and the school trust, in cooperation with the attorney general of Pennsylvania, went into court and invoked the cy pres doctrine to authorize the application of some $50 million of the accumulated income to the establishment of a new medical school for the Pennsylvania State University, which previously had been without a medical school. Through this munificence, there was established one of the most modern and progressive medical schools in the country. This, my colleagues, was an act of supreme charity. I do not have to remind anyone here how badly we need new medical schools and new doctors.

When it was called to the attention of the Treasury and the House Ways and Means Committee that the breadth of some of the provisions designed to correct abuses by private foundations might have included organizations such as the Milton Hershey School Trust, it was

readily agreed that language should be drafted to preclude this unintended effect. Section 509(a)(3) was the result. Both the Treasury and the Ways and Means Committee thought it clear that in the case of organizations like the Milton Hershey School Trust, the organization, being an integral part of a school or college, should be treated like the school or college itself. In the House report on this provision of the bill, it was noted that among the intended beneficiaries of section 509(a)(3) was the Milton Hershey School Trust, or the Hershey Trust as it is sometimes called. And the Senate Finance Committee, Mr. President, has affirmed the approach taken by the House of Representatives in proposed section 509(a)(3).

To qualify for proposed section 509(a)(3) treatment under the committee's amendment, Mr. President, an organization must satisfy the requirements of subsections (A), (B), and (C) of the provision. Subsection 509(a)(3)(A) requires that the organization be organized, and at all times thereafter operated, exclusively for the benefit of, to perform the functions of, or to carry out the purposes of one or more specified organizations described in section 509(a)(1). Among the organizations there described are schools or colleges that have a regular faculty, curriculum and student body. Since the Milton Hershey School Trust was organized, and at all times thereafter, it has been operated exclusively for the benefit of the Milton Hershey School, to perform the functions of the Milton Hershey School, and to carry out the purposes of the Milton Hershey School. Moreover, it is not necessary that all three of the criteria of subparagraph (A) be met. It is sufficient, for example, that the school trust was organized, and at all times thereafter operated, to carry out the purposes of the Milton Hershey School. Since the purpose of the trust has been to hold the legal title to the classrooms, dormitories and other operating assets of the school, and to manage the endowment assets of the school and apply the benefits therefrom to the school, this criterion is clearly met. Without elaboration, it is also clear that the school trust was organized and has been operated to perform the functions of the school. It further seems clear that the school trust was organized and operated exclusively for the benefit of the school. Regarding this last point, the school trust's grant of the $50 million for the establishment of the medical school of the Pennsylvania State University—itself, incidentally, qualifying as an organization having a regular faculty, curriculum, and student body—is not fatal to the requiremnet of exclusivity, since the transfer was effected under court order and through the use of the cy pres doctrine, and did not affect the "exclusive operation" of the trust. In any event, it is clear that both of the other two criteria of the subsection are met, the satisfaction of either one of which would be sufficient.

Subsection 509(a)(3)(B) requires that the organization be operated, supervised, or controlled by one or more organizations, or in connection with one organization (or more than one educational organization described in section 170(b)(1)(A)(ii)), described in section 509(a)(1). Since the Milton Hershey School Trust is operated in connection with the Milton Hershey School, this requirement is clearly satisfied. The arrangement between the school trust and the school probably qualifies under several other of the combinations allowed by this subparagraph.

Subparagraph 509(a)(3)(C) specifies that the organization not be controlled by certain disqualified persons as defined in section 4946. It is not anticipated that the school trust would have any difficulty under this requirement.

Mr. President, I hope I have not gone into such detail on this matter as to try the patience of my colleagues. Let me state again that the provision is noncontroversial, and one that I feel every Senator can support without reservation. I did want to draw to the Senate's attention some of the background of the provision.

Mr. BENNETT. Mr. President, as a member of the Committee on Finance, I would like to assure the senior Senator from Pennsylvania that the committee, and this Senator in particular, was very mindful of the problem that certain organizations would have had in the absence of proposed section 509(a)(3). I would like to assure my colleagues that the sort of situation involving the Milton Hershey School described by the senior Senator from Pennsylvania is what the Committee on Finance had in mind when it approved this part of the bill.

AMENDMENT NO. 352

Mr. BELLMON. Mr. President, I call up my amendment No. 352 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

At the proper place insert the following new section:

SEC. —. RECOVERY OF REASONABLE ATTORNEY'S FEES, AS A PART OF COURT COSTS, IN CIVIL CASES INVOLVING THE INTERNAL REVENUE LAWS

(a) IN GENERAL.—Part II of subchapter C of chapter 76 (relating to Tax Court procedure) is amended by adding at the end thereof the following new section:

"SEC 7465. RECOVERY OF COSTS

"'(a) IN GENERAL.—In any proceeding before the Tax Court for the redetermination of a deficiency, the prevailing party may be awarded a judgment of costs to the same extent as is provided in section 2412 of title 28, United States Code, for civil actions brought against the United States.

"'(b) JUDGMENT.—A judgment of costs entered by the Tax Court shall be treated, for purposes of this subtitle, in the same manner—

"'(1) as an overpayment of tax, in the case of a judgment of costs in favor of the petitioner, and

"'(2) as an underpayment of tax, in the case of a judgment of costs against the petitioner.

No interest or penalty shall be allowed or assessed with respect to any judgment of costs.'

"(b) CLERICAL AND CONFORMING AMENDMENTS.—

"(1) The table of sections for such part II is amended by adding at the end thereof the following new item:

"'Sec. 7465. Recovery of costs'

"(2) Section 2412 of title 28, United States Code, is amended—

"(A) by inserting '(a)' before 'Except', and

"(B) by adding at the end thereof the following new subsection:

"'(b) In any civil action which is brought by or against the United States for the collection or recovery of any internal revenue tax, or of any penalty or other sum under the internal revenue laws, and in which the United States is not the prevailing party, a judgment for costs may include reasonable attorney's fees.'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply only with respect to civil actions and proceedings for the redetermination of deficiencies commenced after the date of the enactment of this Act."

Mr. BELLMON. Mr. President, this amendment arises out of a situation which, I believe, cries out for correction.

The present Internal Revenue tax system has become so complicated that it is rarely understood by individual taxpayers. As a result, most taxpayers feel compelled to retain professional legal and accounting services when differences with the Internal Revenue Service arise. Such services are expensive and increasingly, taxpayers who are innocent of wrongdoing find it cheaper to pay taxes and penalties not owed, than to contest unfair Internal Revenue Service rulings in the courts. As a result, there is a great temptation for the Internal Revenue Service to resort to tactics which frequently border on extortion.

In a recent conversation with an official at the Internal Revenue Service, I was amazed when he told me that, "if the taxpayers of this country ever discover that the Internal Revenue Service operates on 90 percent bluff, the entire system will collapse."

Every citizen of this country must pay the full and fair amount of tax due under our law. Certainly this amendment does not intend to change that. With that responsibility, the taxpaying citizen must also have the protections against unfair taxation. This amendment helps assure an innocent citizen that he cannot be forced to incur unfair costs by unwarranted accusations by an agency of the Federal Government.

Under our present system, the Internal Revenue Service may communicate with the taxpayer and tell him that he owes the Government of the United States a certain sum of money. The citizen has two alternatives when this occurs. One, he can pay the Internal Revenue Service the amount claimed due. Or, he can go to court and try to prove that the amount is not due the Federal Government. But if, in a court action, the citizen does prevail, he is still burdened with the attorney's fees and other costs that are incidental to the litigation, which may exceed the amount claimed by the Internal Revenue Service. In either case, the citizen comes out the loser.

Unless the sum claimed by the Internal Revenue Service is large, the citizen is likely to pay the amount the Internal Revenue Service claims is due and forgo his right to prove his innocence.

This amendment will strengthen the ability and the will of American citizens

against an arm of our Government, which many feel is unduly repressive, by allowing recovery of court costs when they prevail in an action brought by or against the United States.

Mr. President, the intention of this amendment is simply to assure equity in matters where an innocent taxpayer defends his innocence in court in an action brought by the Internal Revenue Service and proves that he did not owe a penalty in this case, so that he would be allowed to recover his attorney's fees.

Mr. GURNEY. Mr. President, before I came to Congress, one of my fields in law was the practice of tax law. On many occasions I ran into the very situation the Senator from Oklahoma has just described, where a taxpayer had been harassed by the Federal Government for additional taxes and in some cases the case was clearly on the taxpayer's side. There were certain instances when even the Internal Revenue agent stated that in a conversation with me as the taxpayer's attorney, and also said in the same breath that, "We know how much it will take to defend the suit but, frankly, we think if we press it we may be able to get our claim," assuming, of course, that the client and I, as his lawyer, would not contest the claim in court because it would be too expensive.

Mr. President, as a matter of fact, just this past year, one of my constituents in Florida, whom I have known rather well for years, had a substantial claim levied against him on capital gains on some stock he owned. The amount was somewhere around $50,000 altogether. He finally settled with the Internal Revenue Service for a sum less than that but still a considerable sum, in the neighborhood of $20,000. Yet, quite clearly, the law was on his side. Had he gone to the Tax Court or into the Federal court, he could have prevailed. In this case also, the Internal Revenue agent handling the case was frank to admit that the law was on the side of my friend, the Government's case was rather shaky, but the Government pressed the case because it knew it would be able to exact a substantial settlement because of the high cost of tax litigation in the case.

There is authority in other areas of law where the Government handles attorneys' fees. In my State of Florida, in land condemnation cases, where the Government is taking the land involuntarily, for a taxpayer in Florida, at least, the attorneys' fees are paid.

Certainly, I think this case is even more compelling than those land cases. But I have seen happen in actual practice, time and again, the very case the Senator from Oklahoma has made.

I think it is an excellent amendment. It is one that the Senate should agree to, because only if the Government does not prevail, only if it has a poor case, and if it loses, would it have to pick up the attorneys' fees.

I support the amendment of the Senator from Oklahoma.

Mr. GRIFFIN. Mr. President, I associate myself with the remarks of the Senator from Florida (Mr. GURNEY) and also with those of the Senator from Oklahoma (Mr. BELLMON).

Although I did not practice tax law—I did practice law, but not tax law—it is my understanding that the taxpayer in a situation like that, really has the choice between paying the tax in question or suing to get it back, and in that case he brings a civil suit in a Federal district court—is that correct, and if he does not pay it, then he ends up in the Tax Court?

Mr. BELLMON. I yield to the Senator from Florida.

Mr. GURNEY. I do not want to enter into this, but the taxpayer can move in one of two ways. He can go into the Tax Court or he can proceed in a Federal court, as the Senator has suggested, to get back the money, after he has paid it. The taxpayer can go in either direction.

Mr. GRIFFIN. Is it true that at the present time if the taxpayer takes the route of going through the Federal district court—which is not established to handle tax cases; the Tax Court, I understand, has judges who are experts in the field—an attorney's fee in the district court cannot be obtained? Can the Senator from Oklahoma answer that question, or perhaps the Senator from Delaware?

Mr. BELLMON. I do not know the answer to the Senator's question. Perhaps some other Senator might have that information.

Mr. WILLIAMS of Delaware. I am advised that they cannot be obtained in the district courts.

Mr. GRIFFIN. Although attorneys' fees are available in Federal district courts in some other areas, in this particular area they would not be available in suits in a Federal court?

Mr. WILLIAMS of Delaware. I am so advised.

Mr. GRIFFIN. I still think there is great equity to this amendment. It also serves the purpose of encouraging the use of the Tax Court rather than the Federal district court. I believe that would be a good thing. The dockets of the district courts are very crowded, and the tax courts, in general, have more expertise. I hope the Senator's amendment will be adopted.

Mr. BELLMON. I thank the Senator.

Mr. President, I ask unanimous consent that the name of the Senator from California (Mr. MURPHY) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, as I understand it, the effect of this amendment would be that the Federal Government would pay the attorney's fee in every case in which it brought suit against a taxpayer and lost, or even in those cases where the taxpayer brought the suit for a refund and the Government lost.

I have not checked with the Treasury on this, but I am reasonably certain it would be strongly opposed to this amendment. I know it objected to an amendment dealing with a part of this problem which was offered by the Senator from Kansas, and which the Senate adopted. I think in this particular instance it would be establishing a dangerous precedent to put the Government in a position where it could not file a claim without at the same time accepting responsibility for paying the taxpayer's attorney fees.

I think this would be a dangerous precedent, particularly since we have not given consideration to it in the Finance Committee and the Treasury Department has not had an opportunity to be heard on it.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. GRIFFIN. The Senator understands, does he not, that the only time the attorneys' fees would be in question would be if the Government lost the case and the Government was wrong; in other words, that the taxpayer did not owe the amount the Government said it owed? Only in that case would attorneys' fees be involved.

Mr. WILLIAMS of Delaware. That is true. But it raises a number of problems. Suppose a case were dropped for some reason. Who wins the case then?

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. BENNETT. I would like to ask the Senator from Oklahoma if he has any knowledge of the amount of money involved.

Mr. BELLMON. I have no idea of the amount of dollars involved, except I have been informed by the Internal Revenue Service in Oklahoma that the IRS succeeds in more than 95 percent of the cases it brings. If it is as successful as it has been, and I certainly hope it will continue to be, the Government would pay relatively little in attorneys' fees. I am talking about the 5 percent or fewer of the cases that the Government would lose.

Mr. BENNETT. Is there any control on the size of the legal fee which the attorney can submit after he has won the case, and does that requirement take in all the fees that that attorney has charged the taxpayer, not only for trying the case, but for handling the tax account through all the steps before coming to trial?

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. BENNETT. Let me get an answer first.

Mr. HRUSKA. Mr. President, will the Senator yield on that point?

Mr. BELLMON. I yield.

The PRESIDING OFFICER. The Senator from Delaware has the floor. To whom does he yield?

Mr. WILLIAMS of Delaware. Whichever Senator wants the floor.

Mr. HRUSKA. Mr. President, I would stand correction from any eminent tax authority, such as the Senator from Florida, but my understanding is that it would have to be a reasonable attorney's fee approved by the court as to amount. It would take into consideration the trial of that case. That is the fashion in which attorneys' fees in other civil suits in which the Government is involved are decided. Since the language of the

amendment of the Senator from Oklahoma is in the same general language, I presume it would be the same.

Mr. GURNEY. Mr. President, if whoever has the floor will yield——

Mr. WILLIAMS of Delaware. Mr. President, I would like to ask a question, myself, of the Senator from Oklahoma. Do I understand this takes care only of the attorneys' fee? As a rule, in tax cases, the taxpayer also has an accountant's fee. Does this proposal take care of the lawyers' and also the accountants' fees?

Mr. BELLMON. The language of the amendment provides for recovery of reasonable attorneys' fees.

Mr. WILLIAMS of Delaware. Let me ask another question. Suppose there is an assessment of a $20,000 deficiency. The taxpayer disputes it. The case goes to Tax Court. The Tax Court decides that the proper deficiency is $10,000. Who won the case?

Mr. BELLMON. I am not able to answer the question.

Mr. WILLIAMS of Delaware. It seems to me an answer is necessary if we are to understand the impact and effect of the Senator's proposal.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. BELLMON. I yield.

Mr. GURNEY. In answer to the Senator from Delaware, that is a matter always in litigation where attorneys' fees are involved.

Mr. WILLIAMS of Delaware. The point is——

Mr. GURNEY. If I may complete my reply, very frequently settlements are made in the course of litigation. Attorneys' fees are determined upon the amount of time that is put in the case. There is no problem there. The amendment of the Senator from Oklahoma contains the usual provision in the usual language.

Mr. WILLIAMS of Delaware. If the Senator will yield for a moment, I do not quite understand that that answers my question. This amendment says that if the Government loses the case—if it is not the prevailing party—then the Government has to pay the taxpayer's attorneys' fees. If there is a $20,000 assessment against the taxpayer in a case which goes to the Tax Court and the Tax Court makes a judgment of $10,000, who is the prevailing party? Who won?

Mr. GURNEY. The Government would have in that case, unless the Senator from Oklahoma has a different opinion.

Mr. BELLMON. I am not a lawyer or judge, but I would certainly feel the Government had won in a case of that kind.

Mr. WILLIAMS of Delaware. Suppose the judgment is for $5,000?

Mr. BELLMON. I would say that if the Government got $5, the Government would be the prevailing party.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. BELLMON. I yield.

Mr. GURNEY. I would like to make one other comment, because the comment has been made that this amendment will result in great cost to the Government, but anybody who is familiar with tax litigation knows that considerable litigation goes on long before it ever comes into court, first of all between the taxpayer and the Internal Revenue Service, and then the appellate steps. Actually, there are three steps altogether before it ever gets into tax court.

So there are very few cases among the vast number of tax litigation cases and tax claims made in this country that ever wind up in tax court. It seems to me that if a case does arrive there, after all that preliminary negotiation, and the Government loses, the Government itself has brought on a poor case and has harassed the taxpayer to that end, and so help me, ought to pay a reasonable attorney's fee. That is precisely what the amendment of the Senator from Oklahoma provides. It is a fair amendment, and the Government ought to pay it.

Mr. MILLER. Mr. President, will the Senator from Florida yield?

Mr. GURNEY. I do not have the floor.

Mr. MILLER. Will the Senator from Oklahoma yield?

The PRESIDING OFFICER. The Senator from Florida has the floor.

Mr. GURNEY. Excuse me; I yield.

The PRESIDING OFFICER. The Senator from Oklahoma lost the floor when he sat down.

Mr. BELLMON. I yield to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized.

Mr. MILLER. Mr. President, the Senator from Florida says that if, after going through these various stages, the Government loses the case, they have had a poor case, and therefore they ought to reimburse the aggrieved taxpayer for all the legal expense and trouble he has gone through.

That certainly has a ring of sense to it. But when he says, "and the Government loses," to me that is putting the finger on the problem we have.

The Senator from Oklahoma, in response to a question by the Senator from Delaware, has indicated that the intention of his language in this bill is that if the case is tried by the tax court, and the Government ends up with even $1 by way of a deficiency, then the Government will not have lost.

That is one interpretation, and that apparently is the interpretation of the author of the amendment. However, it seems to me that if an assessment of $10,000 has been proposed, and the taxpayer's counsel is able to get that deficiency cut down to $5,000, the Government has not really won. They have won partially. It may be that the amendment could be reworked a little bit, so that some kind of proportion could be allowed.

It seems to me that if the Government has a proposed deficiency of $10,000 and the Tax Court decision is $5,000, perhaps 50 percent of the taxpayer's costs should be allowed, rather than saying that since the Government had prevailed, the taxpayer gets nothing because the taxpayer has been put upon by an excessive deficiency proposal.

There is another thought on this matter, and I ask my friend from Florida whether he will yield so that I can ask a question of the Senator from Oklahoma.

The PRESIDING OFFICER. Does the Senator from Florida yield for that purpose?

Mr. GURNEY. I yield.

Mr. MILLER. Suppose that the case had gone to the Tax Court, and the pleadings have been filed, and before the court holds the hearings, the taxpayer's counsel and the Government attorneys work out a settlement. Would my interpretation be correct that, in that case, since the case has not gone to trial, there would be no reimbursement to the taxpayer for his legal costs?

Mr. BELLMON. Mr. President, it is my understanding that the statement the Senator from Iowa has made is accurate; that in case the Government recovers all or part of the assessment that has been made, the Government has prevailed, and is the prevailing party. I could not agree with the Senator from Iowa that in case the claim is settled for half or any other percentage, the taxpayer should be paid his attorney's fee. That is not the intention of the amendment. The amendment is intended to discourage the Internal Revenue Service from bringing unmeritorious cases against our citizens. That is the sole purpose of the amendment, and it has nothing to do with recovering a portion of attorney's fees in a case where there is a partial settlement.

Mr. MILLER. Will the Senator from Florida yield further?

Mr. GURNEY. Yes. May I say this before yielding, however: I think the point is well made when the Senator says there are cases where the Government asks for $50,000, knowing that perhaps they can only collect $25,000. But the Senator from Oklahoma has not drawn his amendment that way, perhaps feeling, "Let us try for this first, and see how it works, and perhaps we can go on to the other later on."

Mr. MILLER. Mr. President, I think the Senator from Florida and I are in agreement on that. This is breaking new ground, and if we are going to break new ground gradually, I think the Senator from Oklahoma has delimited the effect of his amendment to such a degree that no one need worry about much cost to the Government on this proposal. It could serve as a salutary warning that the Internal Revenue Service had better settle these cases without pushing them up to the Tax Court. Furthermore, it is only going to be in a rare case where, after going through all of these stages, a proposed deficiency before the Tax Court ends up with zero liability to the taxpayer. I would guess those cases would be very rare, and only in those cases would the amendment of the Senator from Oklahoma apply.

So I think that the amendment has a good deal of merit, and I would support it, with the understanding that it is delimited as the Senator from Oklahoma has described.

Mr. GURNEY. The point of the Senator from Iowa is well made, and I am delighted that he is giving his support to this amendment of the Senator from Oklahoma. It is well known that prior

to his coming to Congress, he was widely experienced and successful in the practice of tax law, and his opinion on this matter is certainly something the Senate should take into consideration.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. GURNEY. I yield to the Senator from Delaware.

Mr. WILLIAMS of Delaware. At the first stages of the negotiation, as I understand it—though I am not a lawyer—most of the negotiations are handled by accountants. I am wondering, if we are going in this direction, why we are singling out lawyers. I am sure Senators would not want this referred to as a relief act for lawyers. If we are going to do it at all, how do we distinguish between the expenses of accountants and those of lawyers? I wonder if the former would not be equally as great. I do not know that the lawyers are any less able to take care of themselves than the accountants; I wonder, if we are going to take part of it in, why we would not take all of it.

Mr. MILLER. Mr. President, will the Senator yield, so that I may explain that?

Mr. WILLIAMS of Delaware. I just wondered whether it was an oversight.

Mr. GURNEY. I yield to the Senator from Iowa, who would like to be heard on that point.

Mr. MILLER. This may partially answer the question of the Senator from Delaware: Under Tax Court procedure, certified public accountants as well as lawyers are entitled to practice. There are quite a number of certified public accountants who do appear before the Tax Courts. I would have to look at the amendment a little more carefully, but I would understand that in that case, an accountant who is entitled to practice before the Tax Court would be entitled to have his fees recovered.

Mr. WILLIAMS of Delaware. One other question has been suggested: I have not had a chance to study the amendment, but if the Government has to pay the fees where it loses the case, would that work the other way? If the Government wins the case, would the taxpayer have to pay the Government's costs?

Several Senators addressed the Chair.

Mr. WILLIAMS of Delaware. I yield to the Senator from Alaska.

Mr. STEVENS. I have the amendment in my hand. It says:

> In any proceeding before the Tax Court for the redetermination of a deficiency, the prevailing party may be awarded a judgment of costs.

Mr. CASE. Costs are not the same as attorney's fees.

Mr. STEVENS. Then we get down to the other part. It says:

> In any civil action which is brought by or against the United States for the collection or recovery of any internal revenue tax, or of any penalty or other sum under the internal revenue laws, and in which the United States is not the prevailing party, a judgment for costs may include reasonable attorney's fees.

The PRESIDING OFFICER. The Senate will be in order. Will the Senator please speak loudly enough so that other Senators may hear him?

Mr. STEVENS. To repeat:

> In any civil action which is brought by or against the United States for the collection or recovery of any internal revenue tax, or of any penalty or other sum under the internal revenue laws, and in which the United States is not the prevailing party, a judgment for costs may include reasonable attorney's fees.

That is limited. It is only when the United States is not the prevailing party that attorney's fees may be included. Costs would not include attorney's fees unless specified.

I might add that costs could include an accountant's fee if the accountant were an expert witness before the Tax Court. Such costs would certainly be included in all instances where the accountant appeared as an expert witness. But only where the prevailing party is not the United States could attorney's fees be included.

Mr. HRUSKA. Mr. President, it has been suggested that this language be looked over a little, to see whether the amendment can be modified. May I, for the purpose of allowing a little time for that purpose, suggest the absence of a quorum?

The PRESIDING OFFICER. Does the Senator from Florida yield for that purpose?

Mr. GURNEY. I yield.

Mr. HRUSKA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. AIKEN. Mr. President, I object until I know what we will do afterward.

The PRESIDING OFFICER. Objection is heard.

Mr. AIKEN. Mr. President, it is about time for more consideration for the public to be shown here. The "oily" bird is getting all the worms here today. We should go over until Monday.

The PRESIDING OFFICER. The clerk will continue to call the roll.

The assistant legislative clerk resumed the call of the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The Senator from Florida (Mr. GURNEY) under the previous unanimous-consent agreement has the floor. He is not present. So that order is vacated.

## TRANSACTION OF ROUTINE MORNING BUSINESS

Under the previous order, the following routine morning business was transacted:

## REPORTS OF A COMMITTEE

The following reports of a committee were submitted:

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

H.R. 4744. An act for the relief of Mrs. Ezra L. Cross (Rept. No. 91–577); and

By Mr. ERVIN, from the Committee on the Judiciary, without amendment:

H.R. 2238. An act to provide for the relief of certain civilian employees paid by the Air Force at Tachikawa Airbase, Japan (Rept. No. 91–574).

By Mr. TYDINGS, from the Committee on the Judiciary, without amendment:

S. 1646. A bill to create an additional judicial district in the State of Louisiana, and for other purposes (Rept. No. 91–575).

By Mr. TYDINGS, from the Committee on the Judiciary, with amendments:

S. 2624. A bill to improve the judicial machinery in customs courts by amending the statutory provisions relating to judicial actions and administrative proceedings in customs matters, and for other purposes (Rept. No. 91–576).

## TAX REFORM ACT OF 1969—AMENDMENTS

AMENDMENT NO. 389

Mr. GORE (for himself and Mr. WILLIAMS of Delaware) submitted amendments, intended to be proposed by them, to the bill (H.R. 13270) to reform the income tax laws, which were ordered to lie on the table and to be printed.

(The remarks of Mr. GORE when he submitted the amendments appear earlier in the RECORD under the appropriate heading.)

AMENDMENT NO. 390

Mr. CURTIS (for himself and Mr. MUNDT) submitted an amendment, intended to be proposed by them, jointly, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 391

Mr. HOLLAND submitted an amendment, intended to be proposed by him, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 392

Mr. RIBICOFF (for himself, Mr. CURTIS, Mr. Moss, and Mr. PERCY) submitted amendments, intended to be proposed by them, jointly, to H.R. 13270, supra, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 393

Mr. MILLER submitted amendments, intended to be proposed by him, to H.R. 13270, supra, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 395

Mr. DOLE submitted an amendment, intended to be proposed by him, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 396

Mr. FANNIN submitted an amendment, intended to be proposed by him, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 397

Mr. ALLOTT (for himself and Mr. DOMINICK) submitted an amendment, intended to be proposed by them, jointly, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

(The remarks of Mr. ALLOTT when he submitted the amendment appear earlier in the RECORD under the appropriate heading.)

AMENDMENT NO. 398

Mr. BYRD of West Virginia. Mr. President, I am submitting this amendment on behalf of the majority leader and myself, to reduce from 62 to 60 the age at which actuarially reduced social security would be made available to eligible individuals who apply for them.

Under this amendment, which would become effective at the end of June of next year, an estimated 3.5 million persons, not otherwise eligible for monthly benefits under social security, would become immediately eligible. Of these, an estimated 35,000 reside in West Virginia.

Of the 3.5 million who would become eligible, Mr. President, it is further estimated by the Social Security Administration that 800,000 persons would actually apply for these reduced benefits. About 10,000 of these would be West Virginians.

The short-range cost effect of adopting this amendment would approximate $605 million in additional benefit payments during the first 12 months of operation.

That figure does not tell the whole story, however, because it is the long-range cost which we need to examine.

The long-range cost of implementing my amendment is nothing. The reason for this is that individuals who elect to take reduced benefits at age 60 would receive the same net amount by the time of their deaths as they would have been paid had they started receiving larger payments at 62 or 65.

Mr. President, I have offered this amendment on previous occasions and the Senate has passed it several times. Unfortunately, it has been knocked out each time in conference with the House for reasons best known to Members of that body. These setbacks have not been very encouraging, but I do not believe that they should deter us from making another try.

It is unusual for the Congress to be in the position of genuinely helping our older citizens at no additional cost to the employer or the employee. But this amendment would allow us to do just that.

I believe that there are millions of people in this country who, because of failing health or loss of employment, are forced into retirement earlier than others. It is not fair to these people to make them wait until age 62 for reduced benefits if they need them at age 60 and if they elect to take further reductions in the amount of their monthly payments.

The amendment also would offer an alternative to some individuals who otherwise might be forced to go on welfare or stand with hat in hand at the gates of their children.

There is yet another good reason for enacting this amendment. Presumably, a number of the persons who otherwise would voluntarily elect to take benefits at 60 are currently wage earners. By our making it possible for them to voluntarily retire earlier, their jobs would thus be vacated and filled by younger people. This could help somewhat in alleviating the national unemployment problem. The question of reducing the retirement age to 60, therefore, takes on additional important social aspects.

Mr. President, making actuarially reduced social security payments available at age 62 seems such a commonsense thing to do that I really cannot understand the obstacles which have been put in the path in prior years.

Yesterday, we saw some necessary social security amendments enacted, and the Senators who voted for those amendments are to be commended. Let us today enact this simple and cost free, but vital, amendment so that it can truly be said that, in the year of the ABM and the manned moon landing, Congress did not forget the Nation's senior citizens.

Mr. President, I ask unanimous consent that the amendment be printed in the RECORD.

The PRESIDING OFFICER. The amendment will be received and printed, and will lie on the table and, without objection, the amendment will be printed in the RECORD.

The amendment is at the end of the bill, add the following new title.

TITLE X—AMENDMENTS TO THE SOCIAL SECURITY ACT

SHORT TITLE

SEC. 1001. This title may be cited as the "Social Security Retirement Age Amendments of 1969".

ACTUARILY REDUCED BENEFITS

SEC. 1002. (a)(1) Section 202(a)(2) of the Social Security Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(2) Section 202(b)(1) of such Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(3) Section 202(c) (1) and (2) of such Act is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(4)(A) Section 202(f)(1)(B), (2), (5), and (6) is amended by striking out "62" wherever it appears therein and inserting in lieu thereof "60".

(B) Section 202(f)(1)(C) of such Act is amended by striking out "or was entitled" and inserting in lieu thereof "or was entitled, after attainment of age 62,".

(5)(A) Section 202(h)(1)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(B) Section 202(h)(2)(A) of such Act is amended by inserting "subsection (q) and" after "Except as provided in".

(C) Section 202(h)(2)(B) of such Act is amended by inserting "subsection (q) and" after "except as provided in".

(D) Section 202(h)(2)(C) of such Act is amended by—

(i) striking out "shall be equal" and inserting in lieu thereof "shall, except as provided in subsection (q), be equal"; and

(ii) inserting "and section 202(q)" after "section 203(a)".

(b)(1) The first sentence of section 202(q)(1) of such Act is amended (A) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's, widow's, widower's, or parent's", and (B) by striking out, in subparagraph A) thereof, "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(2) (A) Section 202(q)(3)(A) of such Act is amended (i) by striking out "husband's, widow's, or widower's" each place it appears therein and inserting in lieu thereof "husband's, widow's, widower's, or parent's", (ii) by striking out "age 62" and inserting in lieu thereof "age 60", and (iii) by striking out "wife's or husband's" and inserting in lieu thereof "wife's, husband's, or parent's".

(B) Section 202(q)(3)(B) of such Act is amended by striking out "or husband's" each place it appears therein and inserting in lieu thereof ", husband's, widow's, widower's, or parent's".

(C) Section 202(q)(3)(C) is amended by striking out "or widower's" each place it appears therein and inserting in lieu thereof "widower's, or parent's".

(D) Section 202(q)(3)(D) of such Act is amended by striking out "or widower's" and inserting in lieu thereof "widower's, or parent's".

(E) Section 202(q)(3)(E) of such Act is amended (i) by striking out "(or would, but for subsection (e)(1) in the case of a widow or surviving divorced wife or subsection (f)(1) in the case of a widower, be) entitled to a widow or widower's insurance benefit to which such individual was first entitled for a month before she or he" and inserting in lieu thereof "(or would, but for subsection (e)(1), (f)(1), or (h)(1), be) entitled to a widow's, widower's, or parent's insurance benefit to which such individual was first entitled for a month before such individual", (ii) by striking out "the amount by which such widow's or widower's insurance benefit" and inserting in lieu thereof "the amount by which such widow's, widower's, or parent's insurance benefit", (iii) by striking out "over such widow's or widower's insurance benefit" and inserting in lieu thereof "over such widow's widower's, or parent's insurance benefit", and (iv) by striking out "attained retirement age" each place it appears therein and inserting in lieu thereof "attained age 60 (in the case of a widow or widower) or attained retirement age (in the case of a parent)".

(F) Section 202(q)(3)(F) of such Act is amended (i) by striking out "(or would, but for subsection (e)(1) in the case of a widow or surviving divorced wife or subsection (f)(1) in the case of a widower, be) entitled to a widow's or widower's insurance benefit to which such individual was first entitled for a month before she or he" and inserting in lieu thereof "(or would, but for subsection (e)(1), (f)(1), or (h)(1), be) entitled to a widow's, widower's, or parents' insurance benefit for which such individual was first entitled for a month before such individual", (ii) by striking out "the amount by which such widow's or widower's insurance benefit" and inserting in lieu thereof "the amount by which such widow's, widower's, or parent's insurance benefit", (iii) by striking out "over such widow's insurance benefit" and inserting in lieu thereof "over such widow's, widower's, or parent's insurance benefit", (iv) by striking out "62" and inserting in lieu thereof "60", and (v) by striking out "attained retirement age" each place it appears therein and inserting in lieu thereof "attained age 60 (in the case of a widow or widower) or attained retirement age (in the case of a parent)".

(G) Section 202(q)(3)(G) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(3) Section 202(q)(5)(B) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(4) Section 202(q)(6) of such Act is amended (i) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's, widow's, widower's, or parent's", and (ii) by striking out, in clause (III), "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(5) Section 202(q)(7) of such Act is amended—

(A) by striking out "husband's, widow's, or widower's" and inserting in lieu thereof "husband's, widow's, widower's, or parent's"; and

(B) by striking out, in subparagraph (E), "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(6) Section 202(q)(9) of such Act is

amended by striking out "widow's or widower's" and inserting in lieu thereof "widow's, widower's, or parent's".

(c)(1) The heading to section 202(r) of such Act is amended by striking out "Wife's or Husband's" and inserting in lieu thereof "Wife's, Husband's, Widow's, Widower's, or Parent's".

(2)(A) Section 202(r) (1) of such Act is amended (i) by striking out "wife's or husband's" the first place it appears therein and inserting in lieu thereof "wife's, husband's, widow's, widower's, or parent's", and (ii) by inserting immediately before the period at the end thereof the following: ", or for widow's, widowers's, or parent's insurance benefits but only if such first month occurred before such individual attained age 62".

(B) Section 202(r)(2) of such Act is amended by striking out "wife or husband's" and inserting in lieu thereof "wife's, husband's, widow's, widower's, or parent's".

(d) Section 214(a)(1) of such Act is amended by striking out subparagraph (A), by redesignating subparagraphs (B) and (C) as subparagraphs (C) and (D), respectively, and by inserting the following new subparagraphs (A) and (B):

"(A) in the case of a woman who has died, the year in which she died or (if earlier) the year in which she attained age 62,

"(B) in the case of a woman who has not died, the year in which she attained (or would attain) age 62,".

(e)(1) Section 215(b)(3) of such Act is amended by striking out subparagraph (A), by redesignating subparagraphs (B) and (C) as subparagraphs (C) and (D), respectively, and by inserting the following new subparagraphs (A) and (B):

"(A) in the case of a woman who has died, the year in which she died or, if it occurred earlier but after 1960, the year in which she attained age 62,

"(B) in the case of a woman who has not died, the year occurring after 1960 in which she attained (or would attain) age 62,".

(2) Section 215(f)(5) of such Act is amended (A) by inserting after "attained age 65," the following: "or in the case of a woman who became entitled to such benefits and died before the month in which she attained age 62,"; (B) by striking out "his" each place it appears therein and inserting in lieu thereof "his or her"; and (C) by striking out "he" each place after the first place it appears therein and inserting in lieu thereof "he or she".

(f)(1) Section 216(b)(3) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(2) Section 216(c)(6)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(3) Section 216(f)(3)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(4) Section 216(g)(6)(A) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

(g)(1) Section 202(q)(5)(A) of such Act is amended by striking out "No wife's insurance benefit" and inserting in lieu thereof "No wife's insurance benefit to which a wife is entitled".

(2) Section 202(q)(5)(C) of such Act is amended by striking out "woman" and inserting in lieu thereof "wife".

(3) Section 202(q)(6)(A)(i)(II) of such Act is amended (A) by striking out "wife's insurance benefit" and inserting in lieu thereof "wife's insurance benefit to which a wife is entitled", and (B) by striking out "or" at the end and inserting in lieu thereof the following: "or in the case of a wife's insurance benefit to which a divorced wife is entitled, with the first day of the first month for which such individual is entitled to such benefit, or".

(4) Section 202(q)(7)(B) of such Act is amended by striking out "wife's insurance benefits" and inserting in lieu thereof "wife's insurance benefits to which a wife is entitled".

(h) Section 224(a) of such Act is amended by striking out "62" and inserting in lieu thereof "60".

SEC. 1003. The amendments made by this title shall apply with respect to monthly benefits under title II of the Social Security Act for months after December 1969, but only on the basis of applications for such benefits filed after September 1969.

SEC. 1004. Section 8332 (j) of title 5 of the United States Code is amended by striking "individual, widow," in the first sentence and substituting in lieu thereof "individual is at least 62 years of age, or if his widow".

AMENDMENT NO. 399

Mr. COOPER (for himself, Mr. BAKER, Mr. COOK, Mr. RANDOLPH, and Mr. BYRD of West Virginia) submitted an amendment, intended to be proposed by them, jointly, to H.R. 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 400

Mr. HRUSKA submitted amendments, intended to be proposed by him, to H.R. 13270, supra, which were ordered to lie on the table and to be printed.

## DISTRICT OF COLUMBIA APPROPRIATION BILL, 1970—AMENDMENTS

AMENDMENT NO. 394

Mr. EAGLETON (for himself, Mr. GOODELL, Mr. KENNEDY, and Mr. MATHIAS) submitted amendments, intended to be proposed by them, jointly, to the bill (H.R. 14916) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes, which were ordered to lie on the table and to be printed.

## ADDITIONAL COSPONSORS OF AMENDMENTS

AMENDMENT NO. 342

Mr. COTTON. Mr. President, I ask unanimous consent that, at the next printing, the names of my distinguished colleague the Senator from New Hampshire (Mr. MCINTYRE) and the distinguished Senator from South Carolina (Mr. THURMOND) be added as cosponsors of amendment No. 342 to the tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 352

Mr. BELLMON. Mr. President, I ask unanimous consent that, at the next printing, the names of the Senator from Florida (Mr. GURNEY) and the Senator from Michigan (Mr. GRIFFIN) be added as cosponsors of amendment No. 352 to the tax bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

## ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 6, 1969, he presented to the President of the United States the enrolled bill (S. 118) to grant the consent of the Congress to the Tahoe regional planning compact, to authorize the Secretary of the Interior and others to cooperate with the planning agency thereby created, and for other purposes.

## NOTICE OF HEARINGS ON MHD

Mr. MOSS. Every Member of the Senate is keenly aware of our Nation's ever-increasing demands for electrical energy and our vital need to find ways of producing that electrical energy that do not pollute our air and waters, by either particulate pollution or by thermal pollution.

In furtherance of this national need, the Subcommittee on Minerals, Materials, and Fuels has scheduled a public hearing for December 18 on MHD which is shorthand for magnetohydrodynamics. MHD is a term used to describe a newly developing means of producing high-voltage electrical energy direcly from coal—including the low-grade coals which are found in such abundance in many of our Western States—or other fuels without going through the costly, cumbersome process of first heating water to make steam with which to turn turbines and generators.

In the MHD process, coal is gasified at extremely high temperature and passed over a magnetic field. The process has at least three great and immediate advantages: First, as I indicated, it is to a large extent pollution free; second, it requires very little water, a matter of great importance in many parts of the West—and in the East, too, in fact—and third, it can utilize the lower grade coals that it is not economically feasible to use in conventional thermal generating plants.

Thus, MHD might be said to tap a new energy resource in such States as Montana and in my own State of Utah.

Earlier this year, Dr. Lee A. DuBridge, Director of the Office of Science and Technology, released an official report entitled "MHD for Central Station Power Generation: A Plan for Action." This report was prepared by a special OST panel of utility executives, scientists, and engineers under the chairmanship of Louis H. Roddis, vice chairman of the Consolidated Edison Co. It reviews the current status of MHD technology and recommends a research and development program designed to explore the huge potential benefits of the process.

In releasing this report, Dr. DuBridge said:

> Making MHD generation a reality will require the cooperation and financial support of the government, the electric utilities and their suppliers. I hope that the report of this distinguished panel will be carefully studied so that we can all find a proper course of action.

It is in furtherance of this recommendation by our Government's top scientist that the Minerals, Materials, and Fuels Subcommittee hearing has been scheduled. At this time, it is the subcommittee's plan to hear only nongovernmental witnesses on the 18th. That is, this first hearing will be confined to the industry. Government experts will be heard at a later date.

The hearing will open at 9:30 o'clock on December 18 in the Interior Committee hearing room, room 3110, New Senate Office Building. Any interested persons are invited to attend.

## SENATOR RANDOLPH COMMENDS TODAY'S YOUTH—CITES NEED FOR REPORTING POSITIVE CONTRIBUTIONS BY YOUNG CITIZENS

Mr. RANDOLPH. Mr. President, too often our news media report the disruptive practices by students and neglect to report adequately the positive undertakings of today's youth. Accenting the negative is newsworthy—the press says—but I believe Americans are also interested in good news. This is not a carping criticism of our modern news media, but rather is an observation of one Senator who pleads for a more positive or balanced approach.

Only a small percentage of students are causing trouble on the high school and college campuses. All suffer as a result. Most of our youth are in school for an education, to participate in campus activities, to gain insight into social problems, and to become involved in meaningful programs for the benefit of mankind, and to improve their skills, thereby better enabling themselves to support a family and become constructive citizens.

Mr. President, I am a strong supporter of youth. I believe in young people. I share many of their visions, their dreams, and their hopes. Since 1942, I have been active in attempting to secure franchise for 18-year-olds, because I have faith in their ability to make decisions and in their knowledge of the world around them. If given the ballot I am convinced they can become active participants in our elective system of government.

Youth are concerned about problems. They question the need for war, poverty, discrimination, and inadequate housing.

We are too often unaware of the positive contributions of youth. As an example, I emphasize that 443 volunteer students at Idaho State University recently began operating a halfway house for former mental patients who planned to enroll at the university or at a local business college.

Camp Titan, in California's San Bernardino Mountains, completed its first summer after being sparked, supported, and supervised by volunteer students from California State College at Fullerton. The camp gave 90 disadvantaged 8- to 12-year-olds 2 weeks in the outdoors. They will be given follow-up counseling, tutoring, and friendship during the coming year.

At Wisconsin State University at Eau Claire, student youth volunteers work at Whynot, a treatment center for alcoholics approximately 25 miles from the campus.

About 800 students from Indiana's Ball State University provide tutorial and recreational services for children in their homes and in centers.

At Southern Connecticut State College, 1,300 sophomores have been organized to work with 160 different community service agencies in 25 Connecticut towns and cities.

There are examples of student volunteer programs reported by the American Association of State Colleges and Universities and brought to my attention by its able executive director, Allan W. Ostar.

The AASCU study points out that student volunteers, like other student activists, are a phenomenon of our time. Each is reacting to what he regards as the inequities of society. The dissident activist attacks society; the student volunteer works to solve its inequities.

These student volunteers are growing in number and, in many cases, have created specific coordinating structures through which to channel their efforts.

At Morehead State University, in Kentucky, the student council plans to establish a Community Service Association, an outgrowth of campus volunteers' increasing interest and participation in service projects.

The University of Northern Iowa has a program to place volunteers in a variety of service programs.

The newly formed Community Involvement Project Committee at Virginia's Norfolk State College is the arm of the student government association which arranges for students to tutor in local public schools.

Providing a needed service to the Community University, a free, student-run series of courses at California State College in San Bernardino, are being given. Student volunteers work in its college information center, established in a low-income neighborhood to recruit minority group students into higher education.

Through the student senate at Bemidji State College in Minnesota, students tutor in local elementary and high schools, work as big brothers and sisters with the community's children and as recreational aides to its aged.

Perhaps the grandfather of all organized student volunteer efforts is the EPIC—educational participating in the community—program at California State College at Los Angeles, a highly organized student-administered operation involving well over 1,000 students. Any community group may ask and receive assistance from EPIC.

Student volunteerism also flourishes on campuses with no single major or official channel for community activities.

At the State University at Buffalo, N.Y., there are 100 student organizations performing services which include tutoring, working with exceptional children at the State hospital and serving disadvantaged persons in the inner city.

Sororities, fraternities, and service groups at Western Kentucky University cleaned a downtown square, painted a local playground, and aided in other community projects.

Students from the State University of New York at Albany set a new record in contributing blood to the Red Cross and raised $5,500 in a telethon for mental health.

Students of the University of Missouri at Rolla, where I have spoken, were recently honored for such activities as raising over $8,000 for the Phelps County March of Dimes, the South Central Missouri Shrine Club, and Boys Town of Missouri during the past year, as well as giving over 200 pints of blood to our soldiers in Vietnam, and doing repair work on St. Louis inner-city churches, centers, and housing areas.

Mr. President, I have mentioned only a few of the worthwhile activities in which today's college youth are involved. The greatest percentage of our young are conscientious and mature people who realize their responsibility in attempting to solve major problems and also to contribute affirmative efforts on vital issues of our challenging times.

---

## THE 50TH ANNIVERSARY OF THE EL DORADO TIMES

Mr. PEARSON. Mr. President, December 1, 1969, marked the 50th anniversary of the El Dorado Times, one of Kansas' finest newspapers. A "Golden Progress" edition was issued to commemorate this historic date.

The first page of this most impressive edition was devoted to a column entitled "Fifty Achieving Years," written by the paper's distinguished editor, Mr. Rolla A. Clymer, a man I feel privileged to call a friend. Mr. Clymer has been associated with the El Dorado Times for all the 50 years of its existence; therefore he is especially qualified to write the history of the community it serves. Mr. President, I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FIFTY ACHIEVING YEARS

(By R. A. Clymer)

The El Dorado Times will be fifty years old on December 1, 1969.

It came into being on that date in 1919 as the result of a merger of the Walnut Valley Times and the El Dorado Republican. Both of these old newspapers were founded by the same man—Thomas Benton Murdock.

It was on March 4, 1870, that Mr. Murdock and J. S. Danford first issued the Walnut Valley Times—which was the first newspaper in Butler county.

In 1881, Mr. Murdock—then the sole owner—sold the newspaper property to Alvah Shelden and moved to Topeka. But the atmosphere of the state capital city was not to his liking and the love of the Walnut Valley kept calling him—so back he came to El Dorado in 1883 and set up the El Dorado Republican. This move displeased the Sheldens, who claimed that when Mr. Murdock sold them The Times, he pledged himself never to operate another newspaper in El Dorado. Despite Murdock's denial, a coolness and a bitter rivalry existed between these two men all the rest of their lives.

When Mr. Murdock died on November 4, 1909, he left the Republican to his widow, Mrs. Marie Antoinette Culbreth Murdock, her daughter Ellina and her step-daughter, Mary Alice Murdock. When Mr. Shelden died on December 17, 1911 his son, Chester C., a capable newspaper man, took over the operation of the newspaper. In 1916, when development was boiling because of the oil boom, Chester sold the paper to J. B. Adams.

During the early years of this century, El Dorado was served by two daily and two weekly newspapers emanating from their respective shops. At that period of time, few towns of El Dorado's size—about 3,500 population—had a daily newspaper, while El Dorado had two.

The oil strike in 1915 quickly caused an upsurge of local retail business and these two newspapers got along acceptably until 1919 when the cost of newsprint zoomed to the skies. Newspapers without a mill contract were left in the cold—and the open market prices vaulted to unheard of prices. The Re-

publican, for example, paid $6,000—or ten cents a pound—for one car of newsprint that under old conditions would have been sold for but little more than one-fifth of that sum.

So, it may be said that the unexpected and exorbitant price of newsprint forced the merger of the two newspaper properties. There were other economic reasons, however, that pointed the move, so the agreement for a consolidation was signed on November 20 of 1919 and the first issue of the present Times appeared on Monday, December 1. The Republican building at 114 East Central, newly built, became the home of the new newspaper. It remained in that location—although much crowded for room—until the new building at 114 North Vine was completed six years ago.

The first board of directors consisted of J. B. Adams, William Allen White, of the Gazette, Emporia; Marcellus M. Murdock, of the Wichita Eagle; Burns Hegler, former manager of the Walnut Valley Times, and R. A. Clymer, former manager of the Republican.

Thus The Times is actually near 100 years old—and will reach that anniversary date on next March 4. It is the direct offspring of the old Walnut Valley Times, and can properly claim that relationship.

That was fifty years ago and, while that period does not seems exactly like a watch in the night, it has gone swiftly.

Vast changes have taken place over the nation in that half-century, while all of Kansas and the Kingdom of Butler and its communities also have been altered—and much for the better we are prone to believe.

The face of the town has been materially changed in those fifty years. The old city hall has been razed and a new municipal complex established on North Vine; whereas South Main had the business play in 1919, the shift of stress now has been taken over by North Main; Hotel El Dorado was built, occupied, abandoned and is now coming back into usefulness in that time; the senior high school, a magnificent structure, has been built north of town; many new business homes have been constructed—some of them gems in their architecture and appearance; Allen Memorial hospital was erected and is now being largely expanded and improved in order to handle the increasing volume of its patients.

The new Bradford Memorial Library has been established on South Washington and the old Carnegie structure it occupied now is the home of the Butler County Historical Society and its museum; the 4–H club building was erected as a clearing house for farm meetings and is now used for just about every other large gathering; Central Park, built largely by WPA labor during the depression, serves as an outlet for many events; whereas the town got its water from the Walnut river in 1919, it now has two large lakes and is in the works for a large reservoir northeast of El Dorado; the Kansas Turnpike was built at this town's edge more than a decade ago, and many enterprises have now moved westward along Central Avenue.

The East Central project not only took many kinks out of US 54 highway but, by a feat of engineering practically secured this community against floods; the old county poor farm has given way to several excellent nursing homes; instead of seven refining plants that were here in 1919, now only two well-managed properties remain—Skelly Oil and Petrofina; the old Santa Fe railroad station long ago disappeared and the town has been without passenger train service for years; the Southwest Trafficway provides a speedy short cut to the Skelly refinery; a handful of modern motels have taken the place of numerous lodging houses; whereas the town had five banks in 1919, it now has three with assets of more than $35 million; a number of small but potentially profitable enterprises have come to El Dorado, whose boosters are working for that "big one"; above all, the establishment here of the Butler County Community Junior College came as one of the town's most prized assets.

In 1919, this town had just finished its participation in World War I—the "war to end all wars." Since then it has passed through World War II and the Korean conflict, and is now trying to emerge from its Vietnam war which is the most baffling conflict in which it ever took part. It has suffered heavy rains and floods, tornadoes and other windstorms, choking drouths (especially that one in the middle 'fifties,) and the Great Depression of the 'thirties which lasted for almost a decade.

It has suffered epidemics of various natures. It has seen thermometers sink to 17 degrees below zero in the winter and rise to 118 degrees above in summer—for the extreme spread of 135 degrees. It has had good business and bad, and yet has preserved along its bounden way. It has undergone a revolution in its roads, both for in-county highways and those leading to distant parts, all smooth-surfaced. Its county has built, and is building, watersheds to hold rainfall where it occurs, and is employing other conservation measures. The town's business volume has vastly increased, and its people today are—as a rule—happy, healthy and strong.

The town had a larger population in 1919 than it has today because of boom conditions. But in 1930 the Skelly Oil company offices were split in two parts and moved to Kansas City and Tulsa. This was one of the heaviest blows the town has ever sustained. But the K–T oil corporation moved here shortly thereafter and, in one way and another, the town kept its stride and has continued to improve.

Without checking the matter in detail, this editor believes that every church denomination in town either has rebuilt its edifice entirely or else has subjected the structure to enlargement and expansion.

El Dorado is one town where the business district is not jammed together. On several of the downtown streets roomy parking lots are provided and more open space appears in the center of town than one will ordinarily find in cities of this class.

In this accounting, no doubt, many items that should have been included have been left out. Let it be sufficient to say that El Dorado is far stronger and more substantial than it was half a century ago, and possesses an enlarged ability to order its own affairs. Many improvements and refinements on every hand indicate that the spirit of progress is still running strongly throughout the community.

El Dorado has suffered some lamentable deaths in fifty years—and the list of them all would comprise a golden chain. But others have risen up to take the places of those who have gone, and many new residents have come into the community to employ their modern intelligence, energy and zeal in the further upbuilding of the community.

This editor was here when the newspaper merger took place and had a hand in forming the nature and policies of the publication. The Times has always hewn closely to the idea that home news comes first and has tried to live up to that ideal. Now your editor has grown old but can testify that the past half-century has been a happy and rewarding one. He is also dead sure that he doesn't know as much as he thought he did fifty years ago.

It has been a great blessing to live here in the midst of the hurly-burly of widespread oil fields—and on the flank of the glorious and ever-wondrous Flint Hills. The people—those whose nativity was here and who came from many of the area's upstanding pioneers, plus those who came from the four quarters of the earth drawn by some function of the oil and refining business—have been fused together in a remarkable melting pot. They have proved to be admirable companions and neighbors—and their true-hearted kindness and brave endeavors have overlain all the achievements that have here been gained.

When motor vehicle license tags were first issued in Kansas, going to each country in the matter of its population enumeration. Butler county carried the figure "9" for years. The last check on the size of its population showed it to be in tenth spot. So the old county has held its own in a population way through thick and thin, and the ups and downs of fifty years.

Butler's forty thousand people have given their county a rich and mellow flavor, and the spirit and personality of its residents will not diminish but rather will grow more pronounced in future years.

Whatever happens in the next fifty years, we anticipate that the Kingdom of Butler will go along as it has gone in the past century and continue to be a shining light in the congregation of Kansas counties.

## NEW YORK TIMES' WICKER CALLS PROXMIRE ANTIPOLLUTION BILL LOGICAL, REASONABLE, FAIR, EFFECTIVE

Mr. PROXMIRE. Mr. President, Tom Wicker, of the New York Times, recently wrote a compelling column on a new approach to water pollution contained in a bill that I introduced last month. The column makes the case for the bill powerfully. Because the column will be of interest to all Members of Congress who are interested in meeting the urgent and growing problem of water pollution, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, Nov. 27, 1969]

LET THE POLLUTERS PAY

(By Tom Wicker)

WASHINGTON, November 26.—Some years ago, Robert Kennedy took an inspection tour of New York Harbor and said of its polluted waters: "If you fell in, you wouldn't drown, you'd dissolve." One foul reason for that, a Federal agency has just disclosed, is the Passaic River, which carries the waste from 29 municipalities and 700 industries into the harbor, after only 10 per cent of the pollutants have been removed by available treatment facilities.

This is a particularly odorous example—New York State is getting 56 per cent of the pollutants out of the waste it dumps into the harbor—of what William Proxmire of Wisconsin has called to the attention of the Senate in a detailed and shocking speech. He said flatly that we are not only failing to end the pollution of American waters, but the situation is actively getting worse—despite $5.4 billion spent in fighting pollution in the last decade by Federal, state and local governments.

Proxmire based his remarks on a General Accounting Office survey of the antipollution program, which concluded that the program of providing Federal aid to municipalities for the construction of sewage treatment plants, while necessary, is about like aiming a toy pistol at the wrong target. Not only is the program underfunded, with a backlog of $2 billion in requests against $214 million in the Nixon budget and $1 billion voted by the Senate; but even if all the demands could be met, it still would not make much difference. The municipalities simply are not the real culprits.

An example from the G.A.O. survey, cited by Proxmire, tells the story. On a stretch of unidentified interstate river, where $7.7

million had been spent on municipal sewage disposal plants since 1957, these facilities had reduced total pollution of the river by 3 per cent—while the amount of industrial wastes dumped into the same river in the same years had increased by 350 per cent. Everywhere the G.A.O. looked, it found the same grim pattern.

CLEANING CHARGES

Since Proxmire and the nine Senators who joined him in introducing a bill for a new antipollution program are well able to distinguish an elephant from a mouse, they have taken dead aim on industrial waste and not with a toy pistol, either. They propose to make industry pay for cleaning up industry's mess, and even to give them an economic incentive to do it.

They would impose a variable system of Federal effluent charges on industrial firms that discharge waste into water. The charges would vary with the strength and toxicity of the waste—the more high-powered, the higher the charge, and vice versa. Most crucially, it would be levied on a per-pound basis, so that the less waste dumped in a river, the lower the total charge.

BENEFITS OF PLAN

The aim is not to penalize but to make waste disposal a legitimate cost of production, rather than a free service provided to industry at public expense. At present, Proxmire explained, many an industry finds it cheaper to pay Federal, state or local pollution fines, if any, than to install up-to-date treatment facilities; so they go on polluting. The proposed variable charge system would make it cheaper, instead, to reduce waste production and improve its treatment—and Proxmire showed that in places where the system has been tried locally, the practical results bore out this theory. Not only did industrial polluters work to reduce the charge levied on them for waste disposal, but the necessary research and development often led to net reductions in over-all production costs.

(Just yesterday, at a scientific conference in Maryland, two physicists described how a "superfired thermonuclear flame" called a "fusion torch" might someday be used to convert gas, liquid and solid wastes back into clear, original atoms.)

The effluents-charge system thus would attack the major cause of water pollution, stimulate the actual reduction or re-conversion of waste materials, and provide a substantial new source of Federal funds (about $1.5 billion in charges the first year), half of which would be devoted to the underfunded municipal sewage facilities program.

The plan is, in fact, so logical and reasonable and fair and effective that someone is bound to charge that it violates the free enterprise system. To which Proxmire has already replied that the public's need for pure drinking water and the sportsman's need for clear fishing water are just as legitimate as industry's need for water disposal but since the public and the sportsmen are already paying for their use of the lakes and streams, so should businessmen.

## THE POET

Mr. CHURCH. Mr. President, it was announced this week that the distinguished Senator from Minnesota (Mr. McCARTHY) has received an award from the National Endowment for the Arts for a poem which was recently published in the New Mexico Quarterly.

This is a rare honor for a Member of the Senate. I have done some research and discovered that never before has a Senator been so recognized as a poet. For EUGENE MCCARTHY, it is richly deserved recognition for a man who is not only a Senator and poet, but a statesman and a man of peace.

In a recent issue of McCalls, there appeared a new poem by our colleague titled "Ares." This remarkable work reflects on the insane arithmetic of war and deplores a world prepared to take more lives than there are to lose. I commend the poem to the Senate and ask unanimous consent that it be printed in the RECORD.

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

ARES

(By EUGENE MCCARTHY)

god, Ares
is not dead.
he lives,
where blood and water mix
in tropic rains.
no NNE, or S
or W, no compass—
only mad roosters
tail down on twisted vanes
point to the wind
of the falling sky
the helicopter wind
that blows straight down
flattening the elephant grass
to show small bodies crawling
at the roots, or dead
and larger ones
in the edged shade, to be counted
for the pentagon, and
for the New York Times.

Ideologies can make a war,
last long and go far
Ideologies do not have boundaries
cannot be shown on maps,
before and after,
or even on a globe,
as meridian, parallel,
or papal line of demarcation.

What is the line between
Moslem and Jew
Christian and Infidel
Catholic and Huguenot
with St. Bartholomew waiting
on the calendar for this day
to come and go?
What map can choose between cropped
heads
and hairy ones?
What globe affirm
"better dead than red"
"better red than dead"?
ideologies do not bleed
they only blood the world.

Mathematical wars go farther.
They run on ratios
of kill and overkill
from one to $x$
and to infinity.
We are bigger, one to two
We are better, one to three
Death is the measure
It's one of us to four
of them, or eight to two
depending on your
point of view.
12 to 3
means victory
12 to 5
forebodes defeat.
These ratios stand
sustained
by haruspex and IBM.
We can kill all of you
three times
and you kill all of us
but once and a half—the game
is prisoner's base, and we

are fresh on you
with new technology.
We sleep well
but worry some. We know
that you would kill us twice
if you could, and not leave
that second death half done.
we are unsure
that even three times killed
you might not spring up whole.
Snakes close again
and cats, do, it is true,
have nine lives. Why
not the same for you?
No one knows about third comings
We all wait for the second, which
may be bypassed
in the new arithmetic.
or which, when it comes,
may look like a first
and be denied.
The best war, if war must be
is one for Helen
or for Acquitaine
No computation stands
and all the programed lights
flash
and burn slowly down to dark

when one man says
I will die,
not twice, or three times over
but my one first life, and last,
lay down for this my space,
my place, my love.

## OIL SHALE AND THE PUBLISHING INDUSTRY—A CASE HISTORY

Mr. PROXMIRE. Mr. President, for some time now I have been interested in the public policy implications of the way in which certain vast oil shale deposits in Colorado, Wyoming, and Utah have been handled by the Federal Government. In the course of my work in this area—work which resulted in the introduction of proposed legislation on the subject in the last Congress—I have been helped by, among others, Mr. J. R. Freeman, formerly editor of the Frederick, Colo., Farmer and Miner, and at present the editor of the Abington Journal, Clark's Summit, Pa.

Mr. Freeman has played a major role in focussing public attention on the issues. In the best traditions of an independent press he published a controversial series of 51 articles on oil shale.

Now the Columbia Journalism Review has published an article by Mr. Freeman setting forth in some detail the specifics behind a decision by Life magazine not to carry a story on oil shale after the story had been placed in page proofs. Mr. Freeman also discusses the subsequent sale to Harper's of a revised version of the story, written by Chris Welles, who wrote the Life article, together with the firing of Mr. Welles by Life.

In my estimation, the Freeman article raises some interesting and provocative questions regarding the workings of the press in this country. We all know of the superlative job Life has done in uncovering scandal and corruption in the great American tradition. The staff is doing the best work in the exposé field being put out in America today. Thus I am not prepared at this time to agree wholeheartedly with everything that Mr. Freeman says. However, I do believe that his article deserves the careful consideration of my colleagues. Consequently, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Columbia Journalism Review, summer 1969, October 1969]

NOTES ON THE ART

(By J. R. Freeman)

It began late in May, 1967, when Chris Welles, a *Life* magazine staffer for about six years, came to my country newspaper office in Frederick, Colorado, to interview me as a follow-up lead to a *Ramparts* magazine article entitled "Teapot Dome 1967?". Written by Adam Hochschild, the *Ramparts* article had noted that I had alerted *Ramparts* to the story and supplied them information.

As Welles skeptically took notes during that first interview, his associate, a *Life* staff photographer, busied himself snapping numerous pictures on the operations and staff of the *Farmer and Miner*, legal newspaper for the area, which I then edited and published.

During the interview I gave Welles a basic summary of the charges made via some twenty-seven articles in the *Farmer and Miner* regarding oil shale lands, in Colorado, Utah, and Wyoming, which former Senator Paul Douglas of Illinois was later to call "the most submerged issue in American domestic politics involving the greatest scandal in the history of our Republic."

I explained to Welles the means and methods by which I believed that large American oil corporations and their front men had virtually stolen thousands of acres of oil shale lands for $2.50 an acre when the land was often selling in excess of $2,000 an acre on the open market. I briefed him in detail on how powerful private interests financed by oil companies were trying to obtain thousands of acres of lands from the Federal Government under guise of invalid and abandoned pre-1920 oil shale mining claims. In such maneuverings by private interests many aspects become difficult to explain and legal situations become vastly complex. Thus it was necessary that Welles be offered everything in my files pertaining to the subject. Since I had been investigating the scandal for more than two years my files had become voluminous.

About two weeks after that first interview, Welles telephoned from Washington to inform me that he was carrying forward his investigation. He also indicated that he was now aware that we were indeed, involved with a huge story that would "shake the nation" once told. Welles also said he would keep in close touch, wanted my continued help, and would be back to Colorado in the near future.

Burdened by the responsibility of producing the *Farmer and Miner* from week to week, Elaine (my associate editor and wife) and I were working under horrible conditions in attempting to lend as much time as possible to research and to investigate the political and economic implications of oil shale while getting a paper out. For this reason we knew that I could not devote much more time to *Life's* efforts gratis, though nothing would have pleased us more.

Therefore when Welles returned to Colorado and suggested that I give him full time for at least a short period of time until he could "speak the language" regarding the oil shale issue, an agreement was drawn up for *Life's* consideration that would pay me $400 a week, excluding expenses, as well as "protect certain federal employees who may give information or leads to either Welles or Freeman, during their pursuit of information dealing with public domain oil shale and related aspects." Welles, as business editor of *Life*, signed the agreement on June 26, 1967. For three weeks thereafter checks from Time Inc. came through to me regularly in $400 amounts, with Welles paying me expenses from his pocket.

Because of the complexities of public land and mineral law and the vast political and economic implications regarding what I believed to be the richest natural resource known to man, containing as much as 2.6 trillion barrels of oil, it was necessary to place Welles in the hands of experts who had been working with me. These included, among others, Robert S. Palmer, executive director of Colorado's Mining and Industrial Board; Senator Douglas, who introduced a bill in 1965 to pay off the national debt from oil shale royalties, and Dr. Morris Garnsey, an economist at Colorado, expert in resource economics of the Rocky Mountain West. Also I urged Welles to interview people like Colleen Connelly, Thomas M. Stewart, Albert B. Logan, and Fred March, attorneys formerly in the Interior Department's Regional Solicitor's office in Denver, who were instrumental in turning the department around on its oil shale policy.

I also made my complete files available to Welles, including hundreds of letters to government officials, and just as many hundreds of documents relating to past oil shale and mineral resource frauds in government operations. Meanwhile, Welles had begun intensive interviews with the likes of Dr. Teil Ertl, a former Interior employee in the Bureau of Mines, portrayed by *The Wall Street Journal* as the possible benefactor of a $40 million fortune through his arrangement with Shell Oil Company and the Federal Government in an oil shale deal.

Though staying in contact with Welles by phone, I did not visit with him between July and September, until I went to Washington to testify before the Senate Interior and Insular Affairs Committee's hearings on oil shale. During his coverage of the hearings Welles told me that he had plans for a ten-page exposé. He said he had a researcher checking out his facts back in New York, and it would probably only be a short "month or so" before his story would be out.

Later I learned that the publication date by *Life* had been fixed tentatively for December, though it was not long after that Welles wrote me that December was out because "the managing editor [then George H. Hunt] said he didn't want such a scandalous type story in a Christmas issue." However, Welles followed up with the phrase, "he promises he'll run it the first or second week in January."

After January had come and gone with no *Life* story, I learned from Welles that he believed his superiors had sent his draft article over to the people at *Fortune* magazine, a Time-Life subsidiary, who brought pressure against the thrust of the Welles article. On February 15 I received the following note from Welles:

I'm sorry to tell you that our advertising department staged a counter-attack on the shale story. I managed to beat them back on about 95% of their demands, but the net effect has been to delay the story three weeks to the week of March 18th. Believe me, this thing has become the cause célèbre around here. But keep the faith, baby. It's going to run.

In the meantime I learned the *Life* story had been killed permanently. A telephone conversation with Welles on March 19 confirmed that the story had been killed, with the management not giving him any real reasons why, after it had been set in type and even page proofs had been pulled.

There is at least adequate basis to speculate that oil interests influenced *Life* management to scrap their oil shale story. Certainly one thing is clear. The then Secretary of the Interior, Stewart Udall, did not want to have the oil shale scandal given wide publicity, lest he find himself trying to explain to the American people why he permitted private interests to file 25,000 new mining claims for metals covering more than four million acres of oil shale public domain containing an estimated two trillion barrels of oil. These 1966 claims could have been prevented had he acted by timely withdrawal of the lands from entry.

Welles never found out precisely what caused the kill. A short time later, after giving up on *Life*, Welles called on Willie Morris, editor-in-chief of *Harper's*, offering to rewrite his oil shale story in condensed form for that publication. Morris reviewed the Welles effort and said that it was "the best story" he had ever seen on the subject.

It was not the first on the subject submitted to *Harper's*. Almost a year before a free-lance writer and novelist, Lois Hudson, had written an oil shale piece outlining aspects of the scandal. With her draft to several publications, none of which, including *Harper's*, accepted her effort, was an accompanying letter from Senator Douglas, who earlier had written her: "I have read your excellent article and like it very much. . . . There is a big battle going on in Interior over this, and I get conflicting reports about it."

Certainly Welles had narrowed down his information to the point that his editors could not tell him where he needed further effort. He had talked to numerous Interior Department officials, including Secretary Udall and Under Secretary John Carver, Jr., as well as the department's chief legal advisor, then Solicitor Frank J. Barry. If *Life* editors thought that the Welles article needed to be supported with additional facts, certainly it would have been a simple matter for *Life* to assign additional talent to assist Welles in reviewing materials then in my possession, which he had not reviewed completely.

So it was that Welles saw no other alternative to get the story, or at least part of it, told, except to sell his piece to another publication after he was assured that *Life* would never publish his facts on the scandal.

Because of the controversy involved, and its national scope, *Harper's* obviously wanted expert advice on the subject. On June 17, 1968, before their August publication of the Welles piece entitled "Oil Shale: Hidden Scandal of Inflated Myth." Mrs. Marion K. Sanders of *Harper's* editorial rooms wrote Professor Garnsey, himself a *Harper's* contributor, with accompanying galley proofs:

"I would be most grateful if you would read the piece yourself and let me know by return airmail if there are any errors of fact in it. Although we have the greatest confidence in the author, it would be reassuring to have another expert view."

Earlier she had already alerted Garnsey that the article was to appear, saying additionally: ". . . This is an updated and revised version of the piece that did not run in *Life*." Upon receipt of the galley proofs, Dr. Garnsey collaborated with me in the preparation of corrections that were sent back in time for the article to be revised and published as planned, though some of the significant corrections were never made.

At *Life*, meanwhile, all hell broke loose. After he realized that time had run out for *Life* to stop the publication of the piece by *Harper's*, Welles told his superiors that he had sold the oil shale story to Willie Morris. This was on July 3.

A conference on the subject was immediately called in the office of the managing editor, Hunt. In the meeting was the magazine's legal counsel, as well as editor Thomas Griffith.

One of the first possibilities at hand for *Life* management to consider in their meeting, which was also attended by the publisher, Jerome S. Hardy, was filing of litigation to secure a court injunction to restrain *Harper's* from publishing the Welles piece. A phone call to *Harper's* informed them that it was already too late. The August issue containing the Welles article had already been printed, and was in the distribution process.

Perhaps the least significant action *Life*

could take was to "crucify" Welles on the "cross of oil shale," which they did as per George Hunt's letter to him of July 10, the first paragraph of which read, "Confirming our conversation of today, I must inform you that as of August 7, 1968, you will no longer be an employee of Time Inc."

Although the version of the *Harper's* article on oil shale is a mere surface approach to the oil shale and related mineral resource scandals involving federally owned lands, it is significant to observe that the thrust of the article has not been refuted by oil company spokesmen or government officials with facts. Two oil companies replied to the magazine, and both were firmly answered by Welles in the November issue of *Harper's*, even though the oil company replies endeavored only to deny the fact that oil companies have delayed putting shale oil into the market place. It is significant that these two companies, Mobil Oil Corporation and Gulf Oil Corporation, did not attempt to dispute the contention that 380,000 acres of oil shale lands were patented or conveyed by the United States through the Interior Department to private interests under dubious circumstances before August, 1960.

It is also interesting to note that while the Welles *Life* article was more extensive in certain aspects than any previously published nationally, nonetheless neither government officials nor oil company spokesmen have ever denied any of the charges made in the *Ramparts* article, which emphasized much more strongly the political implications. Neither has anyone from any part of the spectrum denied any of the more extensive charges outlined in my fifty-one-part series in the *Farmer and Miner*.

The specifics of the Welles firing were made available to a *Wall Street Journal* Washington bureau reporter, Jerry Landauer, who prepared a story appearing in the *Journal's* July 30, 1968, issue. In the *Journal* story it was pointed out that Welles had been given a $2,000 annual raise in salary just after the oil shale story was killed. The *Journal* failed to mention that only a short time before Welles had received his regular annual advancement, the latter complying with usual policy in the organization.

In the various denials by *Life* officials that oil company pressure was responsible for their killing the story, Hunt admitted that such a piece could have an effect on advertising revenues, while the publisher, Hardy, maintained that Welles "couldn't be wronger."

At no time has Welles ever denied he was selling *Life* property—though he laments that such has long been a practice in the industry. He told the *Journal:*

"I didn't want to sell it to a magazine that was directly competitive with *Life*. *Harper's* is a very well respected magazine. I knew from the standpoint of ethics that it would be possible to fault me. But I knew that if I tried to get permission to sell the story on the outside that not only would they say no, but might take legal steps to prevent me from doing it. I was outraged that the story had been killed. This is the biggest story I've ever worked on. After the story was killed, I considered strongly quitting, but I liked working at *Life*, and decided that working it like that would perhaps be a childish act. . . . There is no question from the general atmosphere, from the kind of meetings that were going on, there was no question that the oil industry was aware of the story."

Thus it appears that today's journalistic trend in America, from the eyes of a former country newspaper editor, at least, is such that no one periodical can or will publish the full scope of a major national government scandal without the assurance that such a story will likewise be run by other organs so as to make the atmosphere "safe." Or at least in this case they have not. And therefore the major portions of the oil shale and related minerals resource scandal remain hidden from the majority of Americans, who not only do not know what they actually own in natural resources, nor its value, but more importantly, who may be trying to steal it.

## INTERNATIONAL LEAGUE WORKS FOR RIGHTS OF ALL PEOPLE

Mr. PROXMIRE. Mr. President, the International League for the Rights of Man is striving for the cause of human rights for all peoples throughout the world. An affiliate of the United Nations, the league attempts to educate and inform the world about the state of human rights in all nations, whether these nations consider themselves democratic, dictatorial, or somewhere in between.

In a recent bulletin from the league, Mr. Roger Baldwin, the acting director of the league's activities, described a number of actions that the league has taken in relation to the respect that various nations give to the human rights of their citizens. He stated:

A PROTEST AGAINST THE GREEK GENERALS

Adding to many other projects against the high-handed dictatorship of the Greek military junta, which seized power over a year ago, the League addressed the Secretary-General of the U.N. a plea on behalf of a group of well-known professors and intellectuals recently arrested and held for military court trial charged with opposition to the regime. Charges of tortures of prisoners in Greek prisons were verified by an inquiry conducted for Amnesty International of London, published in book form in Swedish, by James Beckett, an American lawyer married to a Greek citizen. The Greek regime has been condemned by the Council of Europe but its repressions of dissent and opposition appear to continue without let-up.

SOME HUMAN RIGHTS IN SOUTH KOREA

The League affiliate in South Korea reports that the Koreans arrested in Berlin last spring and brought on charges of espionage, tried and convicted, have benefited from governmental clemency. Two condemned to death have been commuted to life, and the others so reduced that they will shortly be freed. The Korean League was active in their behalf. Appeals have been made by the Korean League for help by the International League for Koreans in Japan, a half million of them, who do not enjoy full civil rights; many of whom have been repatriated to North Korea, despite lack of diplomatic relations and possibly under some form of coercion.

U.S. MILITARY RULE OF OKINAWA HIT

The American Civil Liberties Union has long protested the military security restrictions on the Japanese population of Okinawa, which include a travel ban on suspected leftists. Recently a representative of the Japanese Civil Liberties Union, affiliated to the International League, was denied entry, later permitted after protests. But the ban on a woman secretary of the League still stands without explanation. Japan is demanding administrative control over Okinawa with U.S. bases on the same footing as in Japan proper.

The International League for the Rights of Man is performing a valuable service by exposing those nations which are neglecting their recognition of human rights. The United States, I am proud to mention, has already taken a giant step to eradicate the above issue of Okinawa. Just last week, President Nixon announced that this island would be returned to Japan by 1972. The self-determination of the people of Okinawa is coming to fruition, as are their human rights. I hope that the other nations of the world that find themselves under the spotlight by the league will conduct themselves in as fine a manner.

## OIL INDUSTRY LOBBYING

Mr. PROXMIRE. Mr. President, last week we had several crucial votes involving the tax subsidies of the oil industry. Although for the first time the Senate voted to cut the depletion allowance from the inviolate 27½ percent to 23 percent, it failed to do more than slightly modify the most obvious symbol of the oil industry's privileged tax position.

Other decisions affecting the oil industry are going to be made in the future. The most significant of which will be the President's decision whether to continue restricting oil imports and, if so, in what fashion.

In order that we may all know the type and extent of the pressures being mounted by the oil industry to protect their privileged position, I ask unanimous consent that an article on the oil lobby, written by Richard Corrigan, and published in the National Journal be printed in the RECORD at the conclusion of my remarks.

The National Journal is a new magazine but one which is rapidly gaining a well deserved reputation for excellence. It is thorough and fair but is not hesitant to present sensitive issues involving powerful forces.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WASHINGTON PRESSURES—OIL INDUSTRY, UNDER ATTACK, HITS BACK AT FOES

(By Richard Corrigan)

The legendary influence of the oil lobby on what goes on in Washington is being put to a severe test this year.

Decisions now pending in the nation's capital will have heavy impact on the industry's future operations—and might well cost the industry many millions, or even billions, of dollars.

The oil lobby has long been depicted as one of the most pervasive and powerful, capable of bending government policy through the application of money and muscle.

But this year, industry spokesmen are wondering aloud where their supposed power is, why they have been subjected to attacks from so many quarters and why their attackers seem to have the upper hand.

With annual sales of more than $60 billion, the oil industry is certainly not defenseless. Oilmen and their allies are launching counterattacks on many fronts; they have entry to offices on Capitol Hill, to the executive branch departments and to the White House.

ITEM

Michael L. Haider, board chairman of Standard Oil Co. (New Jersey), the nation's biggest oil firm, recently met privately with Mr. Nixon. Afterwards, he expressed optimism about the President's as-yet-undisclosed position on the current review of oil import policy.

Item: Govs. Preston Smith, D-Tex., Robert B. Docking, R-Kan., Stanley K. Hathaway, R-Wyo., and Richard B. Ogilvie, R-Ill., representing member states of the Interstate Oil Compact Commission, met Nov. 7 with the head of the Cabinet import review task force, Labor Secretary George P. Shultz, to support the import control program. (Another delegation of governors who oppose the program met with Shultz Nov. 24.)

Item: High government officials—including Treasury Secretary David M. Kennedy, Interior Under Secretary Russell E. Train and John N. Nassikas, named by Mr. Nixon to head the Federal Power Commission—addressed the American Petroleum Institute's Houston convention Nov. 10 and 11. Their attendance demonstrated Administration concern about relations with the industry.

Item: Interior Secretary Walter J. Hickel was in Houston Nov. 22 and 23. A department spokesman said the Secretary planned to inspect offshore drilling rigs, but a Washington oil representative said industry officials planned to meet with Hickel, and there was speculation that the Alaska pipeline case was discussed.

Items: Rep. Wayne N. Aspinall, D-Colo., chairman of the House Interior Committee, hosted a private party Nov. 22 at a club in the Blue Ridge Mountains near Harper's Ferry, W. Va. While the gathering was mostly for certain Members of Congress, staff aides and Interior Department officials, it was learned that an oil lobbyist helped arrange the meeting and that a few oil company officials were invited.

Industry uneasiness: Despite its Washington connections, the oil industry feels threatened in several areas by the possibility of federal action that would alter existing laws and procedures. Spokesmen for the industry are blaming themselves for failing to get their story across to the public. (Secretary Hickel told Louisiana oilmen Oct. 16, that they had been "so engrossed in selling your products to the people you have neglected to sell your industry to the people.")

As oilmen see it, the public has become ingrained with the idea that the industry enjoys unwarranted tax advantages and other benefits, whereas the public should believe that what is good for oil is good for America. A recent speech by Houston oil executive Michel T Halbouty illustrates this point of view.

Industry dissension: But the industry also has been plagued by divisions within its own ranks. This is to be expected in an industry so diverse, encompassing wildcat drillers, worldwide corporations and fuel-oil distributors, to name just a few components. Nevertheless, dissension within the ranks cannot help the industry present a united front to its critics.

One example of an intra-industry dispute was the endorsement by the Kansas Independent Oil and Gas Association of a sliding depletion scale that would benefit small producers more than major companies. The sliding scale has been advocated by Sen. William Proxmire, D-Wis., a vocal and persistent critic of big oil firms.

Another example is the contention by some independent producers that they should share directly in the benefits of the oil import program. (At present, the Interior Department's Oil Import Administration parcels out quotas for foreign oil only to refineries and to petrochemical firms, which also seek a greater share of imports.) The Liaison Committee of Cooperating Oil and Gas Associations, representing these state and area producers, has a new Washingon lobbyist—Elmer L. Hoehn, who served as oil import administrator during the Johnson Administration.

Competition among major oil companies for special federal benefits also has upset the industry. The current oil import review, for example, was brought on in part by quotas granted during the Johnson Administration to a Phillips Petroleum Co. refinery in Puerto Rico and a Hess Oil Co. refinery in the Virgin Islands. Then, Occidental Oil Corp. in 1968 sought a 100,000 barrel-a-day quota for a proposed foreign trade zone at Machiasport, Maine.

These exceptions to the allocation formula threatened the orderly distribution of quotas. And on Feb. 5, 1969, the American Petroleum Institute asked the incoming Administration to review the import program, presumably as a way of blocking the Machiasport project. But the review has taken on broader aspects, to the dismay of the industry.

Lobby groups: Chief trade association for major oil firms is the American Petroleum Institute, which serves as a statistical and technological clearinghouse for petroleum matters in addition to presenting industry views in Washington. Headquartered in New York, the institute has 8,000 members, a staff of 250, an annual budget of about $5 million and offices in Dallas, Los Angeles and Washington. Its president is former Rep. Frank N. Ikard, D-Tex. (1951-61), a former member of the House Ways and Means Committee.

Another major lobbying force is the Independent Petroleum Association of America, with some 5,000 members. Its immediate past president is Harold M. McClure, Republican National Committeeman from Michigan, who has been quoted as saying he contributed $90,000 to political campaigns in 1968.

Regional and state associations—the Mid-Continent Oil and Gas Association, the Western Oil and Gas Association, the Texas Independent Producers and Royalty Owners Association and others—also maintain Washington representatives, as do other segments of the petroleum industry such as the Association of Oil Pipe Lines.

In addition, major oil companies maintain Washington offices, which generally are clustered along with association offices in the mid-town Connecticut Avenue section of the city.

The natural gas industry, which is closely tied to the oil industry, likewise is represented. One major association is the Independent Natural Gas Association, headed by former Rep. Walter E. Rogers, D-Tex. (1947–67).

Petroleum advisory group: The National Petroleum Council serves as an official bridge between industry leaders and the Interior Department, which is responsible for oil leasing, imports, petroleum research and other federal activities affecting the industry. Council members (107) are appointed by the Interior Secretary; current chairman is Jack H. Abernathy, president of the Big Chief Drilling Co. of Oklahoma City. The council's function is to advise the department—when asked to do so—about questions facing the industry.

A major council report this year on the continental shelf jurisdictional problem recommended that the United States claim seabed resources beyond the continental shelf and slope to the deep-ocean floor. The department (and the American Petroleum Institute) subsequently adopted similar positions.

Opposition: The New England area produces no oil and thus gains no royalty, tax or business benefits from production. But the region is a heavy consumer of petroleum products. It is one focal point for opposition to some current government policies affecting the industry. New Englanders have long complained in particular of high prices—and recurrent shortages—of heating oil, although industry spokesmen say markups by local dealers account for the high prices. Led by Sens. Edmund S. Muskie, D-Maine, and Edward M. Kennedy, D-Mass., and Rep. Silvio O. Conte, R-Mass., the area's congressional delegation has supported the Machiasport plan and attacked the import program and depletion allowance.

Other Northern liberals in Congress are unhappy with the industry for other reasons. Sen. Philip A. Hart, D-Mich., chaired hearings on import policies earlier in 1969 from his vantage point as chairman of the Senate Judiciary Antitrust and Monopoly Subcommittee.

Perhaps worst of all for the industry's public relations, one result of the "taxpayer's revolt" in 1969 has been to publicize petroleum's tax advantages as a symbol of inequity in the U.S. tax structure. House Ways and Means Committee Chairman Wilbur D. Mills, D-Ark., has called the proposed oil depletion allowances changes a symbolic gesture.

* * * * *

In addition to relying on old friends in and out of Congress to forestall changes in federal policies, the oil industry this year has tried to generate grassroots public support for the 27.5 per cent allowance in many ways: nationwide newspaper advertisements paid for by the new Petroleum Industry Information Committee in New York City; notices in Gulf Oil Corp. fuel bills; and letters in Texaco statements to stockholders, to cite a few examples. But these appeals apparently have met with little success.

However, the industry has lost many powerful defenders in the past few years, including former President (and Senate Majority Leader) Johnson and the late Senate Minority Leader Everett M. Dirksen, R-Ill.

The Ways and Means Committee itself was considered an industry bastion until it decided earlier in 1969 to reduce the oil depletion allowance to 20 per cent. Among those favoring the cut was Majority Whip Hale Boggs, D-La., who comes from the same state as Finance Committee Chairman Long.

Interior Secretary Walter J. Hickel, former GOP Governor of Alaska (1967–69), came to Washington billed as a friend of the industry. Following his stormy confirmation hearings in January, during which his connections with the industry were closely inspected, Hickel became embroiled in the Santa Barbara Channel oil pollution incident. Under obvious pressure from the public and mass media outlets, Hickel issued new controls on offshore drilling procedures and there has been talk in industry circles that he resorted to "overkill" in those regulations to rebut any suggestion that he is pro-industry.

Media coverage: The press—apart from trade publications and some oil-state newspapers—generally opposes the industry's positions editorially. The depletion allowance is customarily called a loophole despite industry protestations. *Fortune* magazine and *The Wall Street Journal* have joined other publications this year in questioning the purpose of the oil import program. Press and television coverage of the Santa Barbara Channel still damaged the industry's image. But widespread coverage of the SS Manhattan's Northwest Passage voyage and of oil developments on Alaska's North Slope may have restored some of oil's lost glamour.

MAJOR ISSUES FACING OIL INDUSTRY

Following is a capsule summary of major issues facing the oil and gas industry.

*Imports:* A Cabinet-level task force is reviewing the 10-year-old oil import control program, which restricts entry of cheap foreign crude to 12.2 per cent of domestic production in states east of the Rockies. The task force study is expected to be completed within a month. At stake: A system that assures domestic producers of a market, and costs consumers several billion dollars a year in higher petroleum product prices.

*Taxes:* The House has voted to reduce the oil depletion allowance, which allows oil companies an income tax deduction of 27.5 per cent of gross income from oil production up to a maximum of 50 per cent of net income from the oil property. The House set the depletion figure at 20 per cent. The Senate Finance Committee has approved a rate of 23 per cent and raised the net income limit for small operators (less than $3 million gross) to 65 per cent.

*At stake:* at least $400 million annually in higher industry taxes under the House bill; an estimated $155 million under the Finance Committee's approach which will be subject to attack on the Senate floor by oil industry critics.

Congress did not attempt to revise a tax benefit highly cherished by the oil industry: immediate write-offs for intangible drilling and development costs on oil property. Oil companies may deduct these costs in the year in which they occur, thereby often offsetting large amounts of income from other sources and usually enhancing the value of the depletion allowance for the oil property in subsequent years. Industry critics contend these costs should be capitalized and recovered through depreciation over several years as is done with a factory.

*Pollution:* The Senate and House have passed differing versions of legislation to make oil firms liable for the cost of cleaning up oil spills and blowouts such as the Santa Barbara Channel incident. The Interior Department has stiffened regulations covering offshore drilling and production to avert such accidents. Legislation has been introduced to subsidize the development of pollution-free automobiles. Air and water quality standards being established across the nation under federal review affect industry operations.

*At stake:* the question of how much money industry must pay to prevent and control pollution, and the future of the gasoline-burning internal combustion engine.

*Alaska:* Construction of the planned Trans-Alaska Pipeline System from the oil-rich North Slope to Alaska's south coast is being delayed by Senate and House Interior Committee reviews of possible environmental damage. Meanwhile, legislation is pending before the same committees to settle the land claims of Alaska's natives.

At stake: Development and shipment of petroleum from what appears to be the richest oil field in the United States, and ownership and royalty rights of that oil.

Continental shelf: A Johnson Administration task force on marine sciences suggested in January the formation of an international authority to regulate exploitation of the ocean floor—including oil and gas production. Similar suggestions are under study in the United Nations.

At stake: The question of where U.S. jurisdiction over the continental shelf stops and where the unclaimed ocean floor begins—and who will benefit from ocean floor exploitation.

Gas shortage: There have been widespread predictions within industry and government of a possible future shortage of natural gas. Interstate gas prices are regulated by the Federal Power Commission, which is now reexamining its pricing policies to determine their effect on exploration and production.

At stake: Markets and prices for natural gas, in which oil firms have major interests.

OIL INDUSTRY DISSATISFIED WITH IMAGE

Oil industry spokesmen believe the public has a mistaken idea about the petroleum industry and its work. Following are excerpts from a recent speech by Michel T. Halbouty, Houston oil producer, engineer, banker and former president of the American Association of Petroleum Geologists. The speech was printed Sept. 26, 1969, in the *Oil Daily*.

"We have paid our dues to the IPAA, the API, the Mid-Continent Oil and Gas Association, and to other similar organizations and we expected them to inform the Administration and the Congress of the facts. In the process, those associations have done an excellent job in some areas, and many dedicated oilmen have served them with distinction.

*"Failure in communication*

"But that has been too little by too few. These organizations simply failed to inform and educate the public properly. Frankly, all of us took it for granted that our little red house would never be blown down by those howling wolves. So we find ourselves b hind the eight ball. We now see depletion being hammered down. We see serious attacks being made on other incentives. The mandatory import program is in trouble . . .

"The shortcoming in our own case has been a lack of communication with the people who really count in this country—the people who vote.

"Of course, we have put out the usual standard propaganda—most of it aimed at protecting depletion—and expected it to be swallowed whole. But we have not gone to the public with our story. Full page advertisements advocating the depletion percentage are a nuisance and an affront to the average citizen. They are not even read . . .

*"Understanding the industry*

"We have done little to tell the history of oil and gas or the industry or the men who have made it. We have said little about how this industry ignited and sustained the age of liquid fuel and thereby helped life the shackles of toil from labor.

"We simply haven't put this information out properly, without wrapping it in a package which had the sign, "support depletion," on the outside. The people would automatically support depletion if they knew what our industry means to them. We would not have to ask them to do so . . .

"So, we look to Washington for help. . .

*"Situation in 1969*

"What is happening this year is the answer to that question. When the pressures from home, whether sincere or inspired, get high enough, the elected officials in Washington respond, irrespective of the excellence of oil's representation or even the good of the country.

"The pressures from home have been unduly heavy in favor of doing something about depletion and other incentives. Most of this has come from the heavy-consuming states, but a surprising amount has also come from oil states. And there has been relatively little response to appeals by the industry for letters asking for a continuation of oil tax incentives, despite the flood of suggestions to gasoline users, royalty owners, landowners and stockholders in brochures, company magazines, mail inserts, and other equally ineffective forms.

*"New industry image*

"Why ineffective? The medium is wrong. (Prof.) Marshall McLuhan, the famous communications specialist (of the University of Toronto), says the medium is the message. Oil company appeals and literature to captive audiences, already sold on the idea for selfish reasons, are necessary, but that falls far short of being sufficient.

"The press, in most instances, where it has commented at all, has been opposed to present industry tax incentives. Much of this comment has been totally unobjective; the remainder has been largely uninformed, misinformed, emotional, or naive. But it gets to the public.

"The simple fact is that no one outside the oil industry understands depletion, and no one in the oil industry has successfully explained it.

"But even worse than this is the fact that no one outside the oil industry understands the industry or appreciates it, and no one inside the oil industry has succeeded in telling the industry's story, and, frankly, too many people in the industry don't know the story themselves."

## JESSE KUHAULUA

Mr. FONG. Mr. President, 5 years ago a young man left his native State of Hawaii bound for the Far East. He had decided to take up sumo wrestling, a little known art in the Western World, but a sport followed by millions in Japan.

Sumo wrestling is an ancient sport and an art mastered by few. Jesse Kuhaulua, born and raised on the island of Maui in the State of Hawaii, is one of a tiny group of foreigners who have tried to penetrate the world of sumo wrestling, and he has gone higher than any other foreign competitor before him.

To accomplish this, Kuhaulua maintained an extraordinary self-discipline. At the same time, he became a man of incredible strength and agility, to the extent that he now is one of Japan's 10 top-rated sumo wrestlers who is being recommended as a model for diligent training.

I ask unanimous consent that the text of two articles, an editorial from the Honolulu Star-Bulletin, and an item from the Japan Times, in Tokyo, both of which laud this unusually talented young citizen of Hawaii and the United States, be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Honolulu Star-Bulletin]

MAUI'S SUMO STAR

Jesse Kuhaulua, the Maui boy who decided to take up Japan's ancient sport of sumo wrestling, is now one of the top 10 rated wrestlers in Japan.

Since no foreigner has ever before gone so high, this is a special point of pride to Hawaii and his friends here—but so is the way he has gone about it.

Jesse, who wrestles under the name of Takamiyama, has won the attention and admiration of millions of sumo fans in Japan, who follow the televised matches as avidly as Americans follow baseball or football.

What many Japanese think of him is summarized in the editorial from the English-language Japan Times reproduced on this page.

---

[From the Japan Times]

KUDOS FOR JESSE KUHAULUA

When Jesse Kuhaulua first came to Japan from his native Maui five years ago and announced he was here to become a "rikishi," who of us believed that he would last out the year? After all, the world of "sumo" is a feudalistic realm all its own, which exists only in a very small corner of Japan.

The rikishi lives, eats and sleeps sumo 24 hours a day. Its foods, its customs, and its traditions are entirely foreign, even to most Japanese today.

The life of a novice is a lonely one. He is a servant and slave to his seniors. Many young Japanese tried to make a life for themselves in that strange world, but found that its trials and tribulations were not for members of their affluent generation. Nisei youngsters came from the United States to try their luck and returned home defeated by the environment.

For Jesse, or Takamiyama, it was "total immersion" on a scale which even the institution that coined the phrase may not have imagined. Who knows what loneliness and bitterness he must have suffered? But if he ever lost his sense of humor, or his dignity, the public has never been aware of it. Patiently, he has worked to improve himself and in the process, he has won the respect and liking of sumo fans all over Japan.

In the tournament just ended, he fought as a "sanyaku" for the first time. This is a particularly high ranking, and Jesse is the first non-Oriental foreigner to go up so high in this traditional Japanese sport. In winning a majority of his bouts, he proved that his "komusubi" listing was no fluke. By dint

of hard training, Jesse had finally overcome a weakness in his underpinnings; he has learned not to lose his balance.

A top sumo commentator has suggested that other wrestlers should make him their model for diligent training and has predicted Jesse will go even farther up the sumo ladder.

The important thing is that he has established a place for himself in the strange and difficult world of sumo. And in the process, he has made a lasting impression on the Japanese—and we can be as cynical and as snide as any other people—with his character and demeanor. He is a credit to the people of Hawaii and the United States.

## ERNEST GRUENING: VOICE OF WISDOM AND COURAGE ON VIETNAM

Mr. McGOVERN. Mr. President, no man in America has any more right to be proud of his record of courage and wisdom on the issue of Vietnam than former Senator Ernest Gruening. He was not only one of the very earliest critics of our disastrous Vietnam policy, but he has been one of the most consistent and articulate exponents of peace in Vietnam.

Any one of scores of speeches and articles by Senator Gruening could have saved the lives of tens of thousands of people if it had been heeded by our policymakers. He has again spoken out in the recent November moratorium, calling us away from the folly of Vietnam.

I ask unanimous consent that the text of his address be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY ERNEST GRUENING: PRESIDENT NIXON'S PLAN TO END THE WAR IS A PLAN TO PERPETUATE IT

During his campaign for the Presidency, Candidate Nixon promised the American people that he would stop the war in Vietnam, but that he couldn't reveal his plan at that time. He had to keep it secret, he said, so as not to interfere with the Paris peace talks.

Now his highly suspense-publicized plan to end the war is just the opposite.

Far from being a program to end this unjustifiable, needless, illegal, immoral and monstrous war, it is a blue print to prolong and even to perpetuate it.

That war—and it has been stealthily spread to Laos and Thailand—will *not* be ended as long as President Nixon remains in office. At least it will not be ended by him. It will be ended only by an uprising of the American people, of which let us hope, the demonstrations begun on October 15 and continued today, tomorrow, the day after tomorrow, and as long as may be necessary, put an end to the obscene carnage in Southeast Asia.

For make no mistake. Under Nixon's plan our boys will continue to die, and they will die in vain, just as have the 40,000 fine Americans already killed in combat, and many more will be maimed and crippled like the quarter of a million already wounded, many of whom are blinded, armless, legless, paralyzed.

It was until now Mr. Johnson's war, a war into which the American people were lied and tricked.

It will henceforth be also Mr. Nixon's war, and indeed he repeats the same old falsehoods with which the American people have been misled for the last six years.

For it should be made unmistakably clear that the reasons for our being militarily in Southeast Asia, alleged by President Johnson six years ago and now repeated by President Nixon, are devoid of truth.

It is *not* true as alleged by President Johnson in his State of the Union Message in January 1965 and repeated in his Johns Hopkins speech, and now re-echoed by President Nixon, that we are there because a friendly people asked us to help them repeal aggression. The record is wholly bare of any such request. On the contrary, we asked ourselves in.

The truth is that President Eisenhower offered economic aid and only economic aid to our puppet Diem, but surrounded that offer with conditions which were never fulfilled. No military aid was asked for and none was given by President Eisenhower.

The truth is that we invaded Vietnam unilaterally in violation of all existing treaties—the United Nations Charter, the SEATO Treaty and the pledge to support the Geneva Accords and hold nation-wide elections—and when we started bombing North and South, it was we, the United States, who became the aggressor.

In his campaign for the Presidency in 1964, President Johnson pledged not once, but repeatedly, that he would not send American boys to fight in a ground war on the continent of Asia; pledged not once, but repeatedly, that he would not send American boys to do the fighting that Asian boys should be doing. Yet while he was making these solemn promises to the American people—pledges on the basis of which he was swept into office—plans were being matured in the Pentagon to do just what he had pledged not to do.

Now we know also that the Tonkin Gulf incident of August 1964 was spurious, and that by its misrepresentation to the Congress in the resolution drafted in the White House giving President Johnson a blank check to use American troops as he saw fit anywhere in Southeast Asia, he hornswoggled the Congress—with only two dissenting votes—into giving him that power.

These facts, first disclosed in hearings of the Senate Foreign Relations Committee last year, and now detailed in Joe Goulden's recently published book "Truth is the First Casualty" reveal that the version presented to the American people by President Johnson in a nation-wide televised address and then to the Congress, was false.

The U.S. destroyer, "Maddox", far from being on a routine patrol mission in international waters, was first, a spy ship like the "Pueblo", second, she had penetrated the coastal waters of North Vietnam, third, that at that very time, a raid by South Vietnamese vessels, supplied and directed by us, was taking place on North Vietnamese ports, and fourth, that the "Maddox" had instructions to try to draw away some of the defending North Vietnamese vessels. In other words, she was, from the North Vietnamese standpoint, engaged in hostile operations and they were justified in firing on her. Yet none of their shots hit her. The further allegation that on the next day there was another attack on the "Maddox" and on another American destroyer, the "C. Turner Joy," also proved untrue. In this deception every concerned important U.S. official collaborated—President Johnson, Secretary of State Dean Rusk, Secretary of Defense Robert McNamara, the brothers Bundy, the Gebrüder Rostow, and the high naval command in the Pacific.

President Nixon's plan revealed on November third, if viewed in the most favorable light possible, is nullified by innumerable escape clauses:

"The rate of withdrawal" says President Nixon "will depend on developments on three fronts."

That means that there will be three alibis.

One of those three, he says, "is the progress which may be made in the Paris talks."

Well it's obvious there will be no progress in the Paris talks, and I repeat my oft uttered conviction that there will be no peace by negotiation, for our opponents feel there is nothing to negotiate. They have made that abundantly clear.

"Another factor," says President Nixon, "is the progress of the training program of the South Vietnamese forces." Well, the high rate of desertions from those forces does not augur well for speedy progress; nor is it likely that President Thieu has any eagerness to hasten the American pull-out. Nor has the Pentagon.

Then President Nixon sounds another "note of caution," namely "If the level of enemy activity significantly increases we might have to adjust our time-table accordingly" and to emphasize this hazard further, President Nixon says "If I conclude that increased enemy action jeopardizes our remaining forces in Vietnam, I shall not hesitate to take strong and effective measures to deal with that situation." In other words, he'll send back more troops, resume bombing or whatever.

Well, of course, enemy action is not going to subside, as Ho Chi Minh's letter to President Nixon in reply to his—both released in connection with President Nixon's speech—makes clear. Our adversaries consider that the United States is the intruder, the invader, the aggressor, and they intend to fight for their nation's freedom from foreign control, for independence and for self-determination.

On top of all this hedging are the statements of Defense Secretary Laird, that even after we pull out, we'll have to leave some troops there to keep on training the South Vietnamese. This rigmarole will go on indefinitely.

Let us now turn to another aspect of President Nixon's program. He asserts that the only thing that is not negotiable is "the right of the people of South Vietnam to determine their own future."

That's a fine sentiment, but its implementation as seen on the one hand by President Nixon and on the other hand not only by the South Vietnamese of the National Liberation Front, but by those non-communist South Vietnamese whom Thieu and Ky jailed after the last election, represent a divergence as wide as the distance between the poles. Nixon's program will fasten the corrupt and oppressive dictatorship of Thieu and Ky on the people of South Vietnam. There will be no true self-determination. Moreover, South Vietnam itself has no juridical validity. It was created by the force of American arms and money in violation of our specific pledges. Everyone of its regimes from Diem—our first puppet—on, has been kept in office by our armed might and money. Our imposition of these characters upon the South Vietnamese people has made our allegations that we are there to free the South Vietnamese, a grotesque mockery.

Nor can we on the basis of past performance, put any faith in the numbers game of troop withdrawals. The week after President Nixon announced the withdrawal of 25,000 men—in itself a miniscule figure—the draft call was for 29,000.

And why, if President Nixon wants to scale down our military commitment, does he not suspend the draft for the duration? Instead he and some misguided Senators and Representatives urge reforming the draft law. It can't be reformed. What difference does it make whether our young men are selected by lot or by any other method to become cannon fodder in an unjustifiable war? It is the draft itself that is the atrocity and the injustice.

Consider that under it our young men are asked to fight in a war they consider immoral, to kill people against whom they feel no grievance, maybe get killed or maimed in the process, with the alternative if they follow their conscience and refuse, to go to

jail for five years at hard labor, thereby probably ruining their future career in civilian life. This is an infamous dilemma to which no American, or indeed no member of a society that calls itself free, should be subject. I have never been able to see why the Thirteenth Amendment to the Constitution does not apply to the draft. Let me quote it:

"Neither slavery, nor involuntary servitude except as a punishment for crime whereof the party shall have been duly convicted, shall exist within the United States or any place subject to their jurisdiction."

What is the draft for this war to those who object to it, but involuntary servitude, and where the refusal to serve brings more involuntary servitude? Please note that the draftees are the only ones subject to it. Those who enlisted voluntarily in one of the Armed Services—Army, Air Force, Navy or Marine Corps—committed themselves when they took their oath of enlistment. Even if they now feel, as I and an ever-increasing number of Americans feel about the war, they have made their commitment voluntarily to go wherever they are sent. The draftees have no such choice. That is why I tried twice, while in the Senate, to amend the Selective Service Act to provide that service in Southeast Asia be voluntary. Of course, it did not pass.

This calls attention to the responsibility of Congress in this war. For while we not unjustifiably continue to call this Johnson's war and now Nixon's war, the Congress also shares in the responsibility. It could end this war far more speedily than President Nixon will by refusing to vote for the authorizations and appropriations for this war in Southeast Asia. They would be thereby exercising their constitutional authority of control over the purse. Now would they thereby, as might be alleged, be failing to "back our boys." They would instead be helping to bring the boys back home. Actually, there is enough in the pipeline to carry on for a year or more if not a cent were voted.

There are now movements in both Senate and House to endorse President Nixon's plan, whatever it turns out to be. Let me say that any Member of the Senate and House who so votes will have the blood of every boy who dies down there henceforth, on his head.

Let us not forget that unlike World War I and World War II when our nation was imperiled and when a vital American interest was jeopardized this is not the case in *this* war. Had our nation been attacked as it was at Pearl Harbor in 1941, and when our security was at stake, the American people would have rallied to our country's defense almost to the last man. That is why the Administrations, past and present, have had to resort to mendacious propaganda to make the American people believe otherwise.

Actually our misguided policies have defeated the very objectives they allege we seek.

If our objective had been truly to achieve self-determination for the Vietnamese we would have supported the Geneva Accords as we pledged to do, and allowed the elections for all Vietnam to take place.

If our objective, as alleged, was to halt Chinese southward expansion we would not have sought to destroy the buffer State of North Vietnam, hostile to the Chinese for over a millenium; we would instead have supported Ho Chi Min who not only would have fought any Chinese invaders, as he did the French, the Japanese, and now the Americans, but we would have created a state like Tito's Yugoslavia which the United States supported because while communist, it was not part of what was then called the "Communist Conspiracy."

Actually our policy, instead of defeating communism has laid the groundwork for it in Vietnam where the bombing and slaughter of thousands of non-combatants, the burning of their villages, and the making of millions of refugees, will not endear us or those we have supported in power. What nation will ever again want to be saved by us?

Indeed if the rulers of Russia and China had wanted to devise a policy that would bring us down, they could not have done better than what we have to ourselves. For while we have wrought death and destruction abroad, we have thereby fostered decay and deterioration at home. While we pour our billions into killing in Southeast Asia our long overdue domestic needs go unattended.

Now the only test of a policy proclaimed as one to end the war is whether it will prevent more casualties. It is ghastly to hear the cheerful official releases that only 69 were killed last week. Everyone of them was a mother's son. Every death is one too many.

What is the alternative?

It is to be found in one proposed by a most distinguished Republican, a great American, the senior member of his party in the Senate, George Aiken of Vermont; namely to declare that we have won the war, and get out—NOW!

That would indeed be victory, a stirring demonstration that a great nation can admit by its actions that it has erred, that it will no longer pursue a policy of unrelieved disaster, that it will no longer betray America's finest, noblest, traditions, professions and practices.

Is it not high time that we returned to sanity, that we revert to an America whose historic concern, despite occasional lapses, was for the life, liberty and pursuit of happiness of our own as well as of other people, and whose military mission is one of *defense* of our country and not global policing, with offensive action any where at the behest of the executive?

My friends, it is heartening that Americans, young and old, are to-day again mobilizing to try to put an end to this tragic and shameful involvement. We must all continue to work to achieve that result, and to turn the course of history back to where our country's policies were those we could, as we once did, esteem, love and cherish.

---

## SEGREGATION IN THE SCHOOL DISTRICTS OF ILLINOIS

Mr. STENNIS. Mr. President, according to the 1968–69 HEW school survey, Illinois had a total of 1,920,984 students in the elementary and secondary public schools. Of this total, 1,448,168—or 73.3 percent—were white students; 398,257—or 20.7 percent—were Negro; and the remaining 4 percent—including 3.4 percent Spanish-speaking Americans—were students from other minority groups.

The HEW's IBM racial data on the 1968–69 school survey reflects that there are 25 cities, or school districts, in Illinois having one or more schools where Negro students make up over 80 percent of the school enrollment. However, in these 25 cities, or school districts, there are 364,894 Negro students, or 91.6 percent of all the 398,257 Negro students enrolled in public schools in Illinois.

The extent to which the Negro students in these public schools are segregated is indicated by the fact that in these 25 school districts there are 333,131—or 83.6 percent—of the total Negro enrollment in Illinois public schools enrolled in 322 schools that are 80 to 100 percent Negro and, of this group, there are 319,504, or 80.2 percent of the total Negro enrollment in the State in 279 schools that are 90 to 100 percent Negro segregated. What is more, 303,406 of these Negro students, or 76.2 percent of the total Negro enrollment in the State are in 284 schools, in 21 cities, that are 95 to 100 percent segregated, and there are 265,812 of these Negro students, or 66.7 percent—two-thirds—of all the Negro students in the public schools of Illinois in 246 schools, in 14 cities or districts, that are 99 and 100 percent Negro segregated.

On previous occasions I have talked about racial segregation in Chicago, where 248,677, or 80.6 percent, of its 308,266 Negro student enrollment are attending schools which are 99 and 100 percent Negro, and where 90 percent of the total Negro enrollment of the city are in schools between 90 and 100 percent Negro—but you can take almost any one of the 25 cities or school districts in Illinois which contain 91.6 percent of all the Negro students in the State and, whether the particular school district has a 10-percent Negro enrollment, a 16-percent Negro enrollment, an 18-percent Negro enrollment, a 9-percent Negro enrollment, or a considerably higher Negro enrollment, you will find all-Negro schools or schools that are nearly all Negro—and this means, and the HEW's IBM data on these schools will show, that at the opposite end there is just as much segregation of the white students.

For example, in Chicago, where the white-student enrollment is 219,478, or 37.7 percent of the total, and the Negro-student enrollment is 309,260, or 52.9 percent of the total, only 9,628, or 4.4 percent of the Negro students go to majority white schools and only 25,128, or 11.4 percent of the white students attend schools that have a minority group enrollment of over 50 percent.

In Maywood, Ill., which has a total public school enrollment of 6,396, 48.1 percent of which is white and 44.7 percent of which is Negro, 65.8 percent of the Negro students are in two schools which are between 99 and 100 percent Negro.

In the district of Blue Island, Ill., which has a total enrollment of 6,587, of which 81.8 percent are white students and 16.3 percent are Negro, there is one school with an enrollment of 613, or 57 percent of the total Negro enrollment in the district, which is 100 percent Negro.

Blue Island District No. 130, with a total enrollment of 3,579, 81 percent of which is white and 10.5 percent of which is Negro, has one school comprised of 57.3 percent of the total Negro enrollment that is 100 percent Negro.

Harvey, Ill., District No. 152 has a total public school enrollment of 3,573, which is 74.25 percent white and 24.6 percent Negro, but it has one school comprised of 48.6 percent of the total Negro enrollment which is 100 percent Negro segregated. There are only 241, or 9.1 percent, of the white students attending major Negro schools, and only 166,

or 18.8 percent of the total Negro students attending majority white schools.

In Kankakee public schools, where the Negro enrollment is 19.4 percent of the total, 36.9 percent of the Negro students are in one school which is 97.1 percent Negro segregated.

I bring these figures to the attention of the Senate to show illustrations of the fact that the enforcement of the integration demand of HEW is not a national pattern. These facts show the pattern applies almost exclusively to the Southern States with virtual immunity granted to all other States regardless of rank segregation in many areas of these favored States. Additional figures will be supplied later.

I ask unanimous consent to have the information relating to Illinois printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

ILLINOIS STATE TOTAL

## TAX REFORM ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the pending amendment and the tax reform bill be temporarily set aside until Monday morning at the time designated in the previous order for adjournment, and that the Senate proceed to the consideration of the military construction appropriations bill.

Mr. HRUSKA. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. HRUSKA. What does the previous order provide for with reference to the resumption of the tax reform bill on Monday morning?

Mr. KENNEDY. 9:30 Monday morning.

Mr. HRUSKA. Regardless of whether the military construction bill is disposed of today or not?

Mr. KENNEDY. The amendment of the Senator from Oklahoma would be the pending amendment once we resumed the debate on the tax bill on Monday. It is the suggestion of the leadership that we debate the military construction appropriation bill this evening, but if there were to be any votes on that bill, the votes would come up on Monday morning.

It is the best information of the leadership at this time, in conference with the minority leader and the majority leader, as well as——

The PRESIDING OFFICER. Will the Senator suspend so that we can get order and all Senators may hear the Senator?

The Senate will be in order.

Mr. KENNEDY. The matter was also discussed with the distinguished Senator from Nevada (Mr. BIBLE). The mili-

tary construction appropriation bill is not expected to be controversial, nor is it expected that there will be any votes except on final passage. However, if there are to be any votes, they will come on Monday morning next.

Mr. WILLIAMS of Delaware. Mr. President, do I correctly understand that if we follow this procedure, we will be laying temporarily aside the tax reform bill tonight with the understanding that no action will be taken upon that bill tonight?

Mr. KENNEDY. That is correct.

Mr. WILLIAMS of Delaware. In addition to that, in the event—and I do not anticipate this—if the military construction appropriation bill were to go over to a later hour on Monday, that would not delay the tax reform bill. The Senator does not anticipate that.

Mr. KENNEDY. No; I do not.

If there is going to be any additional votes on the appropriation bill, we will have them at an agreeable hour on Monday, beginning at 11 or 12 o'clock, possibly, to be followed by a rollcall vote for final passage.

Mr. BIBLE. Mr. President, as far as the military construction bill is concerned, we do not anticipate any difficulty at all. We do not know of any amendments that might be called up. However, we cannot be absolutely sure. However, if there were to be any, they would go over until Monday. The only thing we will have on Monday is the vote on final passage. There would be third reading tonight if our plans work out.

Mr. SCOTT. Mr. President, suppose that we reach third reading tonight and there is no demand for a rollcall vote. Could we dispose of the matter tonight?

Mr. BIBLE. The answer would be no, because the majority leader requested that there be a rollcall vote on final passage.

Mr. KENNEDY. Mr. President, it would be our intention that the vote on final passage would be at a definite time, and we could set that at 10 o'clock on Monday morning.

Mr. CURTIS. Mr. President, could we get a limitation of time in which to discuss procedure?

Mr. SCOTT. Mr. President, the Senator from Nebraska asked whether we could have a time limitation on the discussion of procedure. I think that the discussion of procedure is hopefully over.

Mr. CURTIS. Very well, Mr. President. I withdraw my request.

Mr. TOWER. Mr. President, will the acting majority leader make the commitment that there will be no unanimous-consent agreement relative to control of time acted upon tonight?

Mr. KENNEDY. Yes, I will. I think the only question at issue in that regard is the designation of a time certain to have a vote on final passage of the military construction appropriation bill. We will try to get third reading tonight. It would be our intention to ask that the time certain be at 10 o'clock on Monday morning.

Mr. SCOTT. Mr. President, therefore, the Senators are assured that no rollcall votes are anticipated tonight.

Mr. KENNEDY. The Senator is correct.

Mr. TOWER. There will be no unanimous-consent agreement to control time.

Mr. KENNEDY. The Senator is correct.

The PRESIDING OFFICER. The Senate is not in order.

Mr. KENNEDY. Mr. President, with the agreement of the manager of the bill, I ask unanimous consent that a vote on final passage be at 10 o'clock on Monday morning.

Mr. BIBLE. Mr. President, that is entirely agreeable with the manager of the bill.

The PRESIDING OFFICER. Will the Senate be in order?

Mr. KENNEDY. Mr. President, I ask unanimous consent——

The PRESIDING OFFICER. Will the Senator wait until we get order and the Chair can hear the request of the Senator from Massachusetts?

The Senator may now make his request.

Mr. KENNEDY. Mr. President, I ask unanimous consent, if we are able to get third reading on the military construction appropriation bill this evening, that after the half hour that has previously been designated to the distinguished Senator from Maryland, we have a vote on final passage. That will be at 10 o'clock on Monday morning.

The PRESIDING OFFICER. Does the Senator wish to waive rule XII by unanimous consent?

Mr. AIKEN. Mr. President, I object to any vote at 10 o'clock, unless it is 10 o'clock Monday.

The PRESIDING OFFICER. Does the Senator wish to renew his previous request?

## MILITARY CONSTRUCTION—UNANIMOUS-CONSENT REQUEST

Mr. KENNEDY. Mr. President, I ask unanimous consent that the Senate temporarily lay aside the pending amendment and the tax reform bill and proceed to the consideration of the military construction appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

The PRESIDING OFFICER. Is there objection to laying aside temporarily the unfinished business and proceeding to the consideration of the military construction appropriations bill?

Mr. SCOTT. Temporarily laying aside, Mr. President?

Mr. AIKEN. I object to taking up this matter.

The PRESIDING OFFICER. Does the Senator object?

Mr. AIKEN. I object to taking up this matter now.

The PRESIDING OFFICER. Objection is heard.

Mr. AIKEN. We have done damage enough for 1 day.

The PRESIDING OFFICER. Objection is heard.

Mr. AIKEN. I do not know what we might do if we take up another bill.

Mr. MOSS. Mr. President, I send an amendment to the desk and ask that it be read.

The PRESIDING OFFICER. The Chair would advise the Senator from Utah that there is already an amendment pending.

Mr. MOSS. If the Senator wishes to pursue his amendment, I will withhold mine.

The PRESIDING OFFICER. The Senate will be in order. The Senator may proceed when the Senate is in order.

Mr. KENNEDY. Mr. President, will the Senator yield without losing his right to the floor?

Mr. MOSS. I yield.

Mr. KENNEDY. For the benefit of the Members, I do not believe there will be any additional rollcall votes this evening. I am hopeful that, since the rule of germaneness, in any event, does not apply, the Senator from Nevada will be able to talk about this matter.

Mr. BIBLE. As soon as I am recognized, I will talk.

Mr. WILLIAMS of Delaware addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Utah yield further, and to whom, if so?

Mr. MOSS. Mr. President, I understood that the amendment of the Senator from Oklahoma had been laid aside by unanimous consent.

Mr. WILLIAMS of Delaware. No.

Mr. MOSS. What was done when we went through all this colloquy and tried to get on to this matter?

Mr. SCOTT. At the moment, nothing.

The PRESIDING OFFICER. The Chair would say that it was obiter dictum.

Mr. WILLIAMS of Delaware. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. Does the Senator from Utah yield for the purpose of suggesting the absence of a quorum?

Mr. MOSS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, I understand that we are to adjourn. Is that correct? I yield for that purpose.

## ADJOURNMENT UNTIL 9:30 A.M., MONDAY, DECEMBER 8, 1969

Mr. KENNEDY. Mr. President, in accordance with the order previously entered, I move that the Senate stand in adjournment until 9:30 a.m. on Monday next.

The motion was agreed to; and (at 6 o'clock and 8 minutes p.m.) the Senate adjourned until Monday, December 8, 1969, at 9:30 a.m.

# EXTENSIONS OF REMARKS

## THE CHALLENGE OF THE SEAS

**HON. J. CALEB BOGGS**
OF DELAWARE
IN THE SENATE OF THE UNITED STATES

*Saturday, December 6, 1969*

Mr. BOGGS. Mr. President, this year has been one in which all Americans have shared in a great achievment—man has reached the moon. But here on earth there is still much to explore. Just as man is reaching into space, so he is descending into the depths of our oceans.

Oceanographers feel that we have much to gain through marine research. They cite the possibility of a multitude of untapped natural resources at the floor of the ocean and the food that can be reaped through proper cultivation of the sea.

In Delaware, much marine research is currently underway in both private industry and the University of Delaware. The expanding program at the university is certainly stimulating. The president of the university has stated previously that one of his goals is to develop a top marine science program, and I am proud to say, that because of his leadership and the geographical position of the First State, this goal is rapidly becoming a reality.

A recent newsletter entitled "Delaware Business Conditions," published as a public service by the Diamond State Telephone Co. spotlighted the challenge of the seas and the development of marine research in Delaware and the Nation. I ask unanimous consent that this fine article be printed in the Extensions of Remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOOD FROM THE SEA: A CHALLENGE FOR THE 1970'S

For centuries man has utilized the sea as a highway, a hunting ground, battle ground, playground and unfortunately sometimes as a dumping ground. Now with the pressing need to find new sources of food to supply the world's growing population he is again looking to the sea. Within the next 20 years it is estimated that the world's food production must be increased by at least 50 percent. Currently about one-tenth of the total animal protein in the world's diet, or roughly 55 million metric tons of fish valued at $8 billion, are harvested annually by the world fisheries. Yet, according to the authorities this catch could be tripled or even quadrupled with relative ease.

Many feel that the ocean, which covers more than 71 percent of the earth's surface, is a vast reservoir of untapped resources, and oceanographers see the coming decade as one of intense scientific activity, much of it with commercial applications. Many expect that by 1980 men will live and work at depths up to 2,000 feet; manned submersibles will explore deep waters to 20,000 feet; and animals of the sea such as shrimp and shellfish will be raised like cattle. Yet, so little is really known about the ocean that if man is to reap these rich benefits, he must first begin to understand much more about its many intricacies and complexities. This then is the challenge of oceanography in the 1970's.

For the U.S. this challenge is even more meaningful, because of roughly 12 thousand miles of general coastline and nearly 89 thousand miles of tidal shoreline, all with its own special environment. It is essential for our own country to know much more of this vast resource. Since the end of World War II the total catch of this country's fishing industry has remained virtually unchanged, but the demand for fish and fish products has more than doubled. Americans now use roughly 12 percent of the total world's catch, nearly one-third of which is consumed as food. In order to meet this demand, imports of fish and fish meal have grown from 25 percent of the total in 1950 to more than 76 percent in 1968. Last year the commercial fisheries of the U.S. provided 4.1 billion pounds of fish and shellfish valued at more than $472 million. Yet fishermen other than Americans took nearly twice that amount of fish from the waters most readily accessible to the U.S.

There are a number of interrelated reasons for such a dramatic change. While other nations have forged ahead with construction of large vessels of modern design, equipped with new gear and labor saving devices, the U.S. industry has for the most part stood still. Nearly 8,000 new fishing craft have joined the U.S. fleet since 1960, yet less than 1,000 of these are vessels of 5 tons or over and more than 60 percent of American boats are over 16 years old. Few young men are encouraged to take up commercial fishing as a profession and consequently the average age of the U.S. fisherman is advancing rapidly. Then too, many of the bays and estuaries that provide the nursery grounds for 7 of our 10 most valuable commercial fish species have been adversely affected by construction, channel dredging, draining and filling of salt marshes, as well as human and chemical pollution that now exists near many of the major urban and industrial complexes.

Nowhere has the contraction of the fishing industry been more severely felt than in Delaware. A few years ago, Lewes, Delaware was one of the nation's major ports in pounds of fish caught annually. The menhaden, an inedible fish used for oils and fertilizer, was caught in huge numbers in the waters of the Delaware estuary and the Atlantic Ocean. Now menhaden have all but vanished from Delaware's coastal waters. The large processing plants near the town are closed and the fleet of trawlers once sailing from the port have joined other fleets in southern waters.

Although the annual catch made by Delaware's commercial fisheries has now dropped to less than 800 thousand pounds, the amount of fish caught by sport fishermen has risen substantially, reflecting, to a large degree, the increased amount of leisure time now available to the average person. In 1961, some 213,000 man-days were spent in catching nearly 1,200,000 fish, while last year the total catch exceeded 2,600,000 and the man-days spent reached 457,000. Nearly one-half of the anglers were from other states.

Last year the sea trout was the most important fish, comprising 65 percent of the total catch. In 1954, it was the popular croaker which, along with the menhaden, have now disappeared from Delaware waters.

Until 1958, Delaware enjoyed a long and colorful history in oyster production, and many oyster lovers believed the taste of the Delaware Bay oyster to be far superior to its better known cousin the Chincoteague found further south. In 1956 more than 20,000 acres of bay bottom were under lease for the production of oysters. Some 6,000 of these were in Rehoboth and Indian River Bays. The beds are owned by the State but traditionally have been leased to private oyster farmers who dump in shells to build up the bottom and cultivate their oyster crops much as dry land farmers do their crops. The difference is it takes three or more years to get an oyster crop ready for harvest. Today there are only 20 oyster farmers in the State who lease roughly 8,000 acres of bay bottom.

In 1958, Delaware's oyster industry, which ranked seventh in the nation, was virtually wiped out by the appearance of a protozoan parasite called MSX. In a period of one year the annual harvest dropped from 900 thousand bushels to less than 100 thousand affecting nearly 4,000 persons employed in the industry. From a high of $2,750,000 in 1954 the dockside value of Delaware's oyster harvest dropped to less than $30,000 ten years later.

What caused the crippling blow to strike Delaware's oyster industry? Why did the menhaden leave? Was it because of a change in water temperature, subtle changes in salinity, increased pollution or a combination of these factors? No one is really quite sure what it was, but from the marine research carried on at the University of Delaware's Bayside Laboratory near Lewes has come a much better understanding of these problems.

The oyster, unlike the menhaden or other finfish, could not leave when its environment became undesirable. When MSX started killing oysters in Delaware in 1958, marine biologists immediately started looking for a source of seed oysters that were disease resistant. Various types of oyster species were monitored for four years, and it was found that the surviving Delaware oysters were more resistant to MSX than most oysters imported from other geographic areas. In 1962, University biologists started to breed selectively and to rear MSX resistant oysters in the laboratory. A pilot plant for producing them as seed oysters is currently being operated on a regular basis.

During the past 10 years, there have also been significant technical advances in new methods of culturing and harvesting oysters. The use of supplemental material for the oyster beds, artificially reared seed oysters and new marketing techniques give promise of restoring much of Delaware's oyster industry.

One of the peculiarities of the oyster—the ability to pump itself clean—has long been used to purify oysters taken from rivers and creeks subject to pollution. In this process the oysters are transported to areas where the water is clean and where they remain for at least 30 days. This process, called depuration or purification, is the basis of a new commercial venture which has recently opened near Lewes. The company, Aquapure Inc., uses a technique which has been used in Europe for some time but is the first such venture in the United States.

In operation the oysters are placed on trays and immersed in large tanks filled with constantly flowing sea water which has been completely sterilized by ultra-violet light. The oysters, which normally pump anywhere from one to two gallons of water per hour depending on temperature, are held in the tanks for 48 hours. At the end of this time each oyster has pumped nearly 100 gallons of sterilized water through its system and in the process completely cleansed itself of all impurities. Constant bacteria checks are made throughout the process to assure consistent results. The final product is an oyster which, compared with the normal wild oyster, is extremely clean.

Since a somewhat limited beginning in 1953 the operations of University's Bayside

Laboratory have done much to provide a better understanding of the marine environment of Delaware's river, bay and coastal waters. A total of 45 different research projects are now underway. Because of its broad base in marine research, education and advisory services, the Laboratory is also involved in a number of projects for both the State and National organizations. One of these, a recently approved project for the National Science Foundation, includes representatives from the University's College of Engineering for the design of more efficient oyster culture equipment and from the College of Agriculture Sciences for expertise in marketing techniques.

As space has become available, teaching resource facilities have been enlarged and this summer more than 150 graduate and undergraduate students accumulated over 600 credit hours in the nine formal courses offered.

There is little doubt that Delaware's marine program is coming of age and these facilities as well as those who use them should do much to meet the challenge of the ocean in the years to come.

## JUSTICE DEPARTMENT VIOLATES LEGAL ETHICS

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. RARICK. Mr. Speaker, when lawyers paid to represent the U.S. Government donate money to lawyers representing their adversary, at least one of the clients has been unrepresented. And, judging from the record, this unrepresented client has been Mr. and Mrs. American citizen.

Small wonder that the courts ignore the Constitution, overlook the law and facts, and decide cases on the basis of consent agreements between purported adversaries. There was no controversy nor diverse interest when both lawyers worked for the same judgment. Sounds more like a split fee arrangement.

If I hired a lawyer to represent me in a case in court, and then found that he was paying my opposition, I would regard it as highly unethical. In addition to firing the lawyer, I would report it to the bar association for disbarment proceedings.

Mr. Attorney General, the American people have enough unethical conduct with Federal judges. Your staff have no "during good behavior" tenure. If your staff lawyers want to work for the NAACP, give them their liberty—before your Department is faced with demands from the American people for a probe into breach of legal ethics.

I insert a clipping from a local newspaper at this point:

[From the Washington (D.C.) Post, Dec. 4, 1969]

JUSTICE DEPARTMENT LAWYERS GIVE $1,100 TO NAACP

The NAACP Defense Fund, an opponent of the Justice Department in recent school desegregation cases, received more than $1,100 yesterday in 37 checks signed mostly by staff lawyers of the Department's civil rights division.

Fund director-counsel Jack Greenberg said in New York that he had received the checks in the morning mail accompanied by an unsigned letter wishing the fund luck in its money-raising and civil rights pursuits.

In Washington it was learned that many of the contributors considered the donations a form of continuing protest against the civil rights policies of Attorney General John N. Mitchell and Assistant Attorney General Jerris Leonard. Others said their donations were addressed mainly to the fund's most recent fiscal emergency.

Greenberg said the fund, which operates on an annual budget of $3 million, was running $200,000 in the red in October and was further behind now. He said fund-raising was becoming increasingly difficult because of reaction to riots and some violent demonstrations and deep division in some communities over Vietnam.

## OPERATION SPEAK OUT

### HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. ASHBROOK. Mr. Speaker, on November 13, Congressman RICHARD ROUDEBUSH and other Members of the House commented on Operation Speak Out, the program sponsored by the Veterans of Foreign Wars to encourage the "silent majority" to support the President's policy in Vietnam.

"Operation Speak Out" seeks to counteract both at home and abroad the false impression that the anti-Vietnam demonstrations here in Washington in October and November reflected the true feelings of the great majority of the American people. It must be remembered that the main theme of the three organizations which conducted the demonstrations, the Vietnam Moratorium Committee, the New Mobilization Committee, and the Student Mobilization Committee actually called for an immediate and unilateral withdrawal of American troops from South Vietnam—regardless of the consequences to the military forces and people of South Vietnam. This, of course, is contrary to the present policy of the administration and the VFW program helped provide a vehicle for U.S. citizens to put themselves on record.

But "Operation Speak Out" is a continuing effort, Raymond A. Gallagher, commander in chief of the VFW stressed in the December issue of the VFW magazine that citizen participation is not just a vague and meaningless cliché:

Rallies must be held to inspire the people with a patriotic zeal to carry on in the face of adversity. Political leaders must be told what the majority view is. Communities must be mobilized in a drive to counter demonstrations by the radicals. The Flag must be protected from these purveyors of hate. Committees must be organized to defend American principles.

The radicals and the ill-informed who participated in the demonstrations against our policy in Vietnam will be further encouraged unless the call to action cited by Commander Gallagher is heeded and made a continuing mandate by concerned citizens. I include his message, "Let's Be Heard," from the December issue of the VFW magazine in the RECORD at this point:

LET'S BE HEARD

(By Raymond A. Gallagher, Commander-in-Chief of The Veterans of Foreign Wars)

Now is the time for the loyal, hardworking taxpaying, self-sacrificing Majority Americans to Speak Out loudly and clearly on the most important issue of the day, the war in Vietnam.

For too long most Americans have sat back as spectators at the drama that has been and is being enacted in the streets of our major cities and even in our small towns.

They have watched mutely as student radicals have been busily subverting America's will to win in Vietnam and perhaps ultimately to speed the day when Red-rule will be achieved even in the United States.

For Lenin, whose centennial many of these same radicals will be celebrating next year, predicted "America will fall into our lap like a ripe plum."

Probably the vast majority of those who participate in the Vietnam Moratorium have no idea, nor do they care, what they are doing to this country, to its men in Vietnam who are fighting the war or to the American image abroad where American resolve and determination are vital to freedom's survival.

By conducting these demonstrations, aided and abetted by almost total television coverage and supported by some of the biggest names in the entertainment field, these radicals are actually prolonging the war.

They are giving North Vietnam assurance that if the Communists hang on a little longer the Americans will be so sick of the war that they will be only too anxious to leave South Vietnam. So eager to pull out that they might even be willing to pay reparations to North Vietnam.

Only the other day Henry Cabot Lodge, chief U.S. negotiator, reported from Paris that the North Vietnamese have become even more obdurate since the Oct. 15 demonstration. Thus, the prediction of all responsible persons is coming true.

It is certainly conceded that persons do have the right to express their opposition to a government policy, but as Chief Justice Oliver Wendell Holmes stated in a free speech case "no one has the right to shout fire in a crowded theater."

In a sense this rule should apply here, for the current Vietnam crisis is vastly more serious, more deadly to more people than a false alarm in a crowded theater. The welfare of the nation, the security of nearly a half million of America's finest youth and the safety of the nation itself are at stake.

However, since the radicals of this country and the politicians who seem to be taking their cues from this element intend to step up their cacophony of dissent, their high decibel demand for surrender, the Veterans of Foreign Wars is appealing to the great mass of Americans to say to them, "Halt. We have heard your strident voices long enough. Now it is our turn to be heard."

However, combatting the radicals can be successful only if this organization is joined by other like-minded groups and individuals in every city, town and hamlet across the length and breadth of this land.

Public opinion must be alerted to the danger this country is facing and to do this the V.F.W. must have the cooperation of an aroused citizenry. To stimulate the American people every means must be used. They must be made to understand the issues in Vietnam, the problems facing American leadership as that war grinds cruelly on and the Paris "peace talks" drone along fruitlessly.

Unless the majority of the American people—the ones who are making the sacrifices, the ones whose sons are in Vietnam, or have been killed there—realize the gravity of the situation, all will be lost.

Rallies must be held to inspire the people with a patriotic zeal to carry on in the face of adversity. Political leaders must be told

what the majority view is. Communities must be mobilized in a drive to counter demonstrations by the radicals. The Flag must be protected from these purveyors of hate. Committees must be organized to defend American principles.

The majority of Americans must know the truth about our vital interest in Vietnam and armed with this information, go to television stations and demand equal time. Write letters to newspaper editors, so they will know what Mr. Majority American is thinking.

Don't keep silent while the street mob takes control. Let us not lose by default. Let us not stand aside as this country goes the way of ancient Greece and Rome because its citizens were too indifferent, too apathetic, too slovenly to act.

Again, the V.F.W. cannot do the job alone, but the support of backbone groups and individuals everywhere must be enlisted to meet the challenge confronting this nation.

If the United States succumbs, mankind's last great hope will go aglimmering.

## THE MIRACLE OF EVANGELINE

### HON. JOHN R. RARICK

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

*Thursday, December 4, 1969*

Mr. RARICK. Mr. Speaker, great fanfare is currently given to culture and cultural appreciation, but little note is taken of traditional American values.

From the News and Courier of Charleston, S.C., we have a story of community action in the traditional American spirit by free men who are dedicated to perpetuate their American heritage.

The "Miracle of Evangeline" is a short editorial relating how parents in a small Louisiana community have struggled to retain their God-given rights of authority and decision concerning their children. Now that the bureaucrats in government have federalized the once public schools, this community has converted a cattle auction barn into an independent center of education boasting an enrollment of some 2,500 ambitious and earnest young people—the type who seek and will suffer to attain an education.

Perhaps this story of daring, ingenuity, and community spirit has not been reported by the biased and prejudiced national press because they fear the example might serve as an inspiration to others. Citizens banding together to gain freedom at considerable personal sacrifice, should be news—but it is censored.

Every American who appreciates the struggle of our forefathers against tyranny will join in complimenting the Honorable Mayner Fontenot and his fellow evangelinians of Ville Platte, La., for their display of true American perseverance and courage. We wish them well, and commend them for keeping alive this flame of liberty, no matter how small, for their posterity knowing that it will blaze again across our land.

Mr. Speaker, I ask that the editorial from the News and Courier be made a part of my remarks so that all our colleagues may be reminded that people who are determined to be free and to plan their own destiny will do so, not because of Federal programs, Federal aid or someone else's ideas—but in spite of them:

[From the Charleston (S.C.) News & Courier, Dec. 2, 1969]

MIRACLE OF EVANGELINE

From a roundabout source we have obtained an account of a private school system established by citizens of Evangeline Parish in Louisiana. The system, including a high school housed in an abandoned cattle auction barn, is serving 2,500 pupils. The elementary department, housed in various buildings throughout the parish, has an enrollment of more than 1,800, and more than 600 are in the high school.

Mayner Fontenot of Ville Platte, La., has said in a letter, which was passed on to us, that little publicity has been given to this effort by citizens of a rural region. In a two-week period they contributed more than $300,000 to set up an alternative school system to the public schools, which had been forced by court order to comply with federal guidelines.

"It is my opinion," Mr. Fontenot wrote, "that something has transpired to prevent the television stations and larger newspapers from publicizing our efforts to retain our God-given right of choosing how to educate our children. Having only a small weekly newspaper in our area, I am reluctant to believe that these larger newspapers will be generous enough to print our efforts . . . We have set the pace for our state, and for myself, I wouldn't trade places with any other citizen of this nation."

A summary of the campaign to establish this "instant" school system—accomplished in about six weeks—is entitled "The Miracle of Evangeline—Fruit from Our Labor." It tells about volunteer work by carpenters, truck drivers, painters, plumbers, laborers, poor and wealthy, parents and children, who worked and planned.

"Dedicated teachers who had come forth to join us worked 13 hours per day," the document reports, "put their skills and experience in high gear to recruit teachers and to plan a system of education second to none. Realizing that they would have shortages of both equipment and facilities, they achieved magnitude with what they had . . . Our giant had then fed its appetite for learning . . . We will have unsurpassed school spirit in our academy and will be demanding of our teachers. And they will send out into our society true Americans dedicated to the survival of their country."

We pass along this story, which was news to us, for the information of readers and the inspiration of the public. Evangeline Parish is not a rich territory in money. Obviously it is populated by people who care, a force greater than money.

# SENATE—*Monday, December 8, 1969*

The Senate met at 9:30 o'clock a.m. and was called to order by the Acting President pro tempore (Mr. METCALF).

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

O Thou to whom we owe the gift of life and the privilege of work, let Thy truth inform our minds and Thy precepts guide our actions this day. Let no thought command us which might hinder communion with Thee, nor any word be uttered that is not meant for Thine ear. For the welfare of all the people, let the service of this place transcend prejudice and party. In personal life and corporate action, may we witness to that righteousness which exalteth a nation. So may we labor aware of Thy presence that our hearts may be at peace.

In the name of Him heralded by wise men and worshipped by kings. Amen.

## THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Saturday, December 6, 1969, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that statements be limited to 3 minutes with relation to the routine morning business to be transacted at the conclusion of the remarks of the Senator from Maryland (Mr. MATHIAS).

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## WAIVER OF CALL OF CALENDAR UNDER RULE VIII

Mr. MANSFIELD. Mr. President, I ask unanimous consent to waive the call of the calendar of unobjected-to bills under rule VIII.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMITTEE MEETINGS DURING SENATE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that all committees be authorized to meet during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Maryland (Mr. MATHIAS) is recognized for half an hour.

## SENATE JOINT RESOLUTION 166—INTRODUCTION OF A JOINT RESOLUTION RELATING TO A FOREIGN POLICY REAPPRAISAL—VIETNAM AND BEYOND

Mr. MATHIAS. Mr. President, I send to the desk a joint resolution for appropriate reference.

The ACTING PRESIDENT pro tem-

pore. The joint resolution will be received and appropriately referred.

The joint resolution (S.J. Res. 166), to repeal legislation relating to the use of the Armed Forces of the United States in certain areas outside the United States and to express the sense of the Congress on certain matters relating to the war in Vietnam, and for other purposes, introduced by Mr. MATHIAS (for himself and Mr. MANSFIELD), was received, read twice by its title, and referred to the Committee on Foreign Relations.

Mr. MATHIAS. Mr. President, today we face a new world. We have a new administration. Our Republican platform quotes Lincoln:

> The dogmas of the quiet past are inadequate to the stormy present. Let us disenthrall ourselves.

The resolution which I am introducing would contribute to the disenthrallment of our foreign policy.

Central to this disenthrallment will be disengagement from Vietnam. But withdrawal will be only the beginning. It will produce a vacuum, not a policy, and our current foreign policies are in disarray. At the same time as we prepare to Vietnamize the war, we discover that in a very real sense the war has Vietnamized American diplomacy.

This is no criticism of our present leaders. They are the inheritors, not creators, of this Asian thralldom that has allowed our foreign relations to suffer a kind of multiple sclerosis. But it is no partisan service to deny our current plight. It is virtually undeniable. The degree of enfeeblement is symbolized by the diminution of our foreign aid to a level less than one-third the size maintained during the Eisenhower administration when the need and absorptive capacity of the less-developed countries was less than it is today. It is further symbolized by a steady and severe decline in our foreign investment as a proportion of the gross national product. And it is dramatized by the pervasive belief in underdeveloped countries—as well as among many of our young people—that the United States is fundamentally imperialist.

Again, the current administration is not at fault. In fact, its proposal for tariff preferences for the less developed countries represents a perception of current realities more disenthralled than the approaches of previous Presidents. Nonetheless, our relations with the world need a complete and thoroughgoing reappraisal in view of the convulsive changes transfiguring the international scene.

Indeed, it is a measure of the change that it may well not be accurate in a sense, to speak any longer of the world arena as chiefly international. It may well be that the most important movements and institutions today are supranational and that to a great extent the nation-state is obsolescent, despite the continuing nationalist clamor. In all likelihood, for example, the emergence of the multinational corporation—and the tenfold increase in trade among the developed countries—will be seen in history as developments vastly exceeding the Vietnam conflict in real significance.

In the necessary reappraisal of policy, the U.S. Senate is constitutionally constrained to play an important role. It is with this fact in mind that I present the resolution I am introducing today.

There are five central points.

The first section of my resolution would repeal the mortmain of past congressional resolutions that have been interpreted as relinquishing broad authority to the Executive to intervene militarily around the world. All these resolutions, like the state of emergency proclamation, are based on an essentially negative view of the American world mission. In each instance, we imply the principle that military containment of international communism is the chief function of our foreign policy. The resolutions applied this principle in 1955 to Quemoy, Matsu, and Formosa; in 1957 to Lebanon and other Middle Eastern countries; in 1962 to Cuba and Latin America; and in 1964 to North Vietnam. All these resolutions were enacted without termination dates and are based on assumptions of dubious validity today.

Let us take the Middle Eastern resolution, for one example. It states that on Presidential determination, and at the request of the other nation, the United States is "prepared to use armed force to assist nations against armed aggression from any Communist-controlled country." Let us disenthrall ourselves. The United States remains willing to prevent aggression in the Middle East and to preserve the integrity of nations there not because potential aggressors in the region are "Communist controlled" but because we have solemn ties of treaty and sentiment in the region. Our commitment to Israel, moreover, does not derive from the fact that Egypt—a country that has virtually exterminated its domestic Communists—receives military assistance from the Soviet Union. We are resolved to defend Israel because the principles on which this country was founded and for which our sons have shed so much blood in World War II, and after, would be traduced by inaction in the face of a major threat to that valiant democratic state. Similarly, our support for Lebanon is based on positive affinities of ideology rather than on a false assumption that the other Arab States are part of an international Communist movement. Beyond these relationships, our desire for stability and peace in the region derives from its importance as a producer of oil. In this regard the already significant and now increasing Soviet petroleum investments and purchases in the area to some extent give the Soviet Union a similar interest in maintaining peace and stability. The joint resolution of 1957 thus embodies an essentially false notion of the trends and threats in the Middle East. It should be repealed; new policies should be debated; and if necessary a new resolution or other appropriate legislation enacted.

Similar points could be made in relation to the Cuban resolution of 1962. This enactment is based on an exaggerated notion of the capacity of Cuba to subvert other Latin American countries and on a correspondingly exaggerated notion of the usefulness of direct American intervention to suppress insurgencies in the region. Although the Cubans might wish they were so effective, it is a dire misconception to suppose that the widespread unrest in Latin America is fomented from Cuba and under some circumstances might be ended by attacking that country.

The Formosa resolution, enacted in 1955, is outdated by the remarkable success of the Nationalist Chinese in arming themselves and fortifying their island redoubts. Unless the Communist Chinese use nuclear weapons, the Nationalist army and air force are more than capable of taking care of themselves. In any case, Congress should not relinquish its authority to participate at the time in any decision by the United States to go to war with Communist China in defense of Quemoy and Matsu.

Though it is the most recent, the Tonkin Gulf resolution is the most questionable of all. I will not here reiterate all the arguments which have surrounded that precipitate enactment. Suffice it to say that in response to a confused exchange of fire in the Tonkin Gulf, the resolution apparently authorized an overwhelming and substantially ineffectual extension of the Vietnam war into the north through bombing of an intensity exceeding even that undertaken against Germany during World War II. As long as the resolution remains on the books, it may be interpreted as authorizing further attacks. Yet American public opinion would not accept such a drastic step, nor would the Congress acquiesce in it. I therefore believe we should repeal the Gulf of Tonkin resolution.

The second section of my proposal relates to perhaps the single most important of all the cold war enactments, promulgated by President Truman on December 16, 1950, without congressional endorsement or ratification. This was the Presidential proclamation declaring a state of national emergency at the time of the outbreak of the Korean conflict. That state of emergency—with its myriad derivative provisions—remains in effect. My resolution would create a special committee comprising six members of each body of Congress including three from each Foreign Relations and Foreign Affairs Committee. It would wait on the President to advise him on the matter of termination of the state-of-emergency proclamation and report back to the Congress before the end of the 91st Congress. The Constitution did not envisage a state of emergency to be the normal state of affairs. As we enter the seventies, we should reappraise the domestic requirements of our inevitable embroilment in world tensions and difficulties.

It should be clearly understood that by proposing repeal of these resolutions and termination of the Korean state of emergency, I do not mean to advocate a new isolationism for the United States. On the contrary, I believe that the Vietnam war has already given American policy elsewhere an isolationist cast. And I think that unrealistic or militaristic postures of commitment discredit the kind of deep and responsive world involvement which we will have to maintain in the coming decades of change.

The world is moving from its present stage of archaic international conflicts to new forms of global cooperation and competition shaped by changing social, economic, and technological realities.

If we wish to influence these developments, we must first understand them—we must not hide behind dogmas proclaimed in the 1950's. War is most often a product of diplomatic failure. In the future, resort to arms will be more likely if we dogmatize rather than disenthrall our diplomacy. We must develop a modern diplomacy adaptable to current realities.

I am fully aware that it may become necessary in the future for the United States to employ military force in fulfilling treaty commitments. If we do, however, it will be imperative that we have a clearer understanding of international politics than was manifested in Vietnam. The slogans of the fifties, rigidly applied to an underdeveloped country, will never again suffice to persuade our young people to risk their lives in war. No event in recent history has so reduced the flexibility of American power in the international arena—so discredited the military among our youth—as the conflict in Vietnam.

If the United States is to develop foreign policies suitable for the seventies, worthy of the support of those who have been estranged from our policies in the sixties, we must begin to develop them now. I suggest that we start by clearing away the debris of cold war dogmas—and resolutions—that encumber and stultify our policies today. My present legislation—the resolution introduced today—would repeal those four resolutions as of the end of the 91st Congress a year from now.

The last three sections of my resolution deal specifically with the necessity of disengagement in Vietnam. They are designed to give congressional corroboration and specific substance to the framework of the troop withdrawal plan announced by the President. The time has come to formally replace the Johnson plan with the Nixon plan. Section 3 would declare support for the President's efforts to achieve a political solution and would endorse his plan for accelerated withdrawal of all American forces from South Vietnam. This section also urges the President to take appropriate action to seek creation of an international peacekeeping force under United Nations or other appropriate international auspices. I have urged creation of such a force since 1962. The force is still needed now to prevent further hostilities in the country and to prevent reprisals against any of its people after the U.S. withdraws.

Section 3 is based on the proposition that no plan for American military withdrawal will end the war unless the present South Vietnam Government adopts a plan for its own political withdrawal. Central to such a plan is the development of political processes leading to creation of a durable political order embracing all groups in South Vietnam. The Thieu-Ky regime was chosen by a little over one third of the vote in elections restricted to areas controlled by the military and to candidates accepted by them. The regime has since narrowed its base of support by replacing a civilian Prime Minister with a military associate. Even supporters of the Thieu-Ky regime allege it would be unable to prevent massacres after we leave.

Under my resolution Congress would urge leaders from all religious, political, and ethnic groups in the country to initiate serious discussions designed eventually to produce a new broadly based government—a government that can survive our departure and prevent resumption of the conflict. Needless to say, in order for meaningful political discussions to occur, the Thieu-Ky regime would have to release from prison those leading political figures incarcerated essentially for advocating or attempting such discussions.

Section 4 is designed in part to provide additional incentives for the success of the Paris negotiations, in part to fulfill the humanitarian mandate of the American world role. This section would urge the President to invite other nations to participate with the United States in the formulation of a multilateral plan for the reconstruction of war-ravaged areas in Southeast Asia. It also asks the President to submit to Congress as soon as possible any legislation needed to carry out the plan.

Alexis de Tocqueville once said:

> The most important time in the life of a country is the coming out of a war.

The final stages of the Korean war were marred by bitterness and recriminations. Let us hope that we can come out of the Vietnam war and come together to face with realism and responsibility the new challenges of the 1970's.

In a sense, today the United States, in fact, can be considered as emerging from three wars: From the Vietnam war, from the cold war, and perhaps to some extent from the arms race. The transition will be difficult. In making it, I say again, let us disenthrall ourselves. I hope this resolution will represent a small step at least toward a proclamation of peace.

Mr. SCOTT. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. SCOTT. Mr. President, I congratulate the distinguished Senator from Maryland for his excellent, thoughtful, and concerned presentation, for his openmindedness, for presenting views which warrant the most thoughtful consideration, and for expanding the dialog on the war in a constructive and helpful way.

I would not want to be misunderstood. I have been for broad support of what the President stands for.

I know that we have only one Commander in Chief, one negotiator. But the Senator has suggested certain avenues of approach to be followed not only during the war but also America's role in the postwar period. The Senator was editorially commended for this very wise approach which he is giving toward the Vietnam problem.

I hope that the ensuing dialog will be on the high level which has been postulated here by the Senator from Maryland.

It is a good thing that we examine our posture, that we see if we cannot do it better, and that we seek for ways by which we can improve the prospects for peace.

The Senator has made a most valuable and encouraging contribution. I again express my appreciation for his presentation of these views.

Mr. MATHIAS. Mr. President, I thank the distinguished Senator from Pennsylvania for his very generous comments. I point out that I only follow his own example in trying to expose ideas for consideration in the hope that out of that consideration a discussion and debate on policies worthy of being followed may be pursued.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. COOPER. I join the distinguished Senator from Pennsylvania and, I am sure, also the Senator from Montana in paying tribute to the distinguished Senator from Maryland, upon his excellent recommendation.

The direct and forthright approach of the Senator's remarks go to the core of the problem and the danger we face in becoming involved in a war when our chief, deep interest is not at stake.

The agreements were entered into years ago. We are in a different situation in view of the circumstances that exist today.

At the time these agreements were entered into, there was great fear of a Communist surge in both Asia and Europe. It was necessary to enter into treaties to assure the other countries that they would have our support, in the belief that our security was involved.

I do not think that situation exists today.

Like the Senator from Pennsylvania, I support the President in his program in Vietnam. However, I think it is necessary, as the Senator says, that we disenthrall ourselves from the treaties that we entered into years ago.

They are uncertain in stating the type of aid we will provide. Each one calls for aid in accord with the constitutional process. But they do not define the constitutional process. And "constitutional process" has been taken in the past, as in Southeast Asia, particularly, to be a decision by the Executive.

The Senator's proposal has great merit. As the Senator knows, the subcommittee of the Senator from Missouri (Mr. SYMINGTON) is now examining our commitments around the world. We have heard a great deal of testimony on commitments in various countries, which were unknown by the Congress or the people.

The Senator has gone to the heart of the problem. I am sure that his proposal will receive great support. And I congratulate him for what he has done today.

Mr. MATHIAS. Mr. President, I am very grateful to the Senator from Kentucky for his remarks. I am very much encouraged by his comments.

His own sensible and thoughtful leadership in this area over the years has been a bulwark for the case to be made. I hope the Senator will continue to make his contributions.

Mr. MANSFIELD. Mr. President, I ask

unanimous consent that the Senator may be permitted to continue for an additional 10 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. MATHIAS. I yield.

Mr. MANSFIELD. Mr. President, I join the distinguished Republican leader of the Senate and the distinguished senior Senator from Kentucky in what they have just had to say about the remarkably well thought out, temperate, and sound speech which the distinguished Senator has just made.

I am very much interested, very much intrigued and very much impressed with the proposal suggested by the distinguished Senator from Maryland (Mr. MATHIAS). As I understand his resolution, what he is doing is, in effect, stating that the Congress should have a hand in bringing about the ending of the war in Vietnam and that the responsibility should not be continued to be placed in the hands of the President alone. That was the interpretative effect of the administration at the time of the Tonkin resolution, an interpretation with which I thoroughly disagreed at its inception and disagree with just as much today.

The distinguished Senator from Maryland is not seeking to repeal the Tonkin Gulf resolution alone but all the other resolutions which have been passed by the Congress in haste with little discussion and practically no study and, certainly, very little sound interpretation over the years since the Second World War. I refer, for example, to the Formosan resolution, the Mid-East resolution among the better known as examples of what should perhaps not be in existence now and, therefore, should be looked into to see if any validity remains for their retention.

The restudy of all these resolutions would be a most worthy endeavor for the Congress to undertake because, unless the Congress does so, they remain on the books and as long as they remain on the books, they give any President unprecedented power.

In addition, Senator MATHIAS supports President Nixon's efforts "to achieve a political solution in Vietnam" and he also asks that the Congress declare itself in favor of "accelerated withdrawal of all U.S. forces in South Vietnam" and I agree.

These are worthy objectives and they call for a stepup in U.S. troop withdrawal. May I say, incidentally, that the President is exceeding his 60,000 withdrawal rate set for no later than December 15 by continued withdrawal above and beyond that figure. I commend him for this unpublicized action. It would be my hope, Mr. President, that the Congress would be able to work with the President to bring about a speedy end to the tragic war in Vietnam, a withdrawal of all troops as soon as possible and a settlement on the basis of which we would be able to get out of Southeast Asia on a lock, stock, and barrel basis.

Mr. President, it is my practice to give as much support as I can on matters of foreign policy to an incumbent President. Whether Democrat or Republican, a President's responsibilities are very heavy in these matters and he carries them on behalf of the entire Nation. I have tried, therefore, to present my personal views to the President in private and in public, to give him the benefit of any doubts which I may have on a particular course of policy.

That has been my practice ever since I became majority leader of the Senate. It was followed with President Kennedy and President Johnson. It is being followed with President Nixon. However, even as the President has his responsibilities, I have mine as a Senator of Montana and of the United States. When it is incumbent on me, in my judgment, to express my views on an issue, in public, I must do so in the discharge of the duties which are vested in my by the Constitution.

With respect to the Tonkin Gulf resolution, I joined with all Members of the Senate present, except two, in voting for the measure. I did so because President Johnson asked for the resolution to provide a display of Government unity in an effort to prevent the initial U.S. military involvement from widening. Other Members were similarly persuaded despite personal and long-standing doubts as to any U.S. military involvement on the Southeast Asian mainland. It was not my understanding, then, nor of any Member of the Senate so far as I am aware that a blank check was being written for an involvement of whatever depth or extent the State and Defense Departments decreed. When it appeared that the resolution was being interpreted as a blank check, Members of the Senate began increasingly to express their opposition to that interpretation and to the tragic U.S. involvement in the war which stemmed from it.

That there are now grave reservations about the resolution has nothing to do with partisan politics. The reservations are expressed by Members of both parties. On my part and on the part of other Democratic Members of the Senate, these reservations began to be expressed during a Democratic administration.

One can never reconstruct a situation precisely as it was several years ago, and what has been done cannot be undone. However, I do know that I supported the Tonkin Gulf resolution in 1965 because it was what President Johnson had sought as a way of preventing our deep military involvement, and it obviously failed in its purpose. I would be happy, indeed, to consider repeal of this resolution if President Nixon or Congress, or both together, were to request it as a step toward shortening the path to peace—in the words of the distinguished Senator from Maryland, making a small step in that long-sought direction.

Mr. President, it is time to break with the past, to face up to the present, and to prepare for the future. This, the Senator from Maryland seeks to do, and I commend him for his initiative and ask that I be allowed to join him as a cosponsor. The Senator has come up with what could be the ideal resolution and has pointed the way to peace for all of us. I congratulate him for the statement he has made this morning. He has earned the thanks of the Senate, the people of this country, and the administration.

Mr. MATHIAS. Mr. President, I am more than grateful—I am very humble—in the light of the generous remarks of the distinguished majority leader.

I think that both he and I in this matter want to look forward to better days. In this resolution we are not trying in any sense to conduct a witch hunt on the mistakes of the past, but we are trying to look forward to a better conduct of foreign policy in the future.

As the distinguished Senator from Kentucky has said, these various resolutions were the accumulation of years. They are like barnacles on a ship's bottom which are impeding our progress into the future, and we want to clean the hull and move forward.

I am very grateful to the distinguished majority leader for offering to become a cosponsor, and I appreciate his support and encouragement in this matter.

Mr. MANSFIELD. Mr. President, the gratitude and thanks of the Senator from Montana go out to the distinguished Senator from Maryland for the initiative he has just shown.

I ask unanimous consent to have my name added as a cosponsor of the Mathias resolution.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## SERVICE OF BUREAU OF INDIAN AFFAIRS TEACHERS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar No. 562, S. 2619.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 2619) to amend section 5723(b) of title 5, United States Code, relating to length of service required by teachers in Bureau of Indian Affairs schools when travel and transportation expenses are paid to first post of duty.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2619

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That section 5723(b) of title 5, United States Code, is amended by inserting after the word "months" the words ", or for one school year

if selected for a teaching position in the schools operated by the Bureau of Indian Affairs,".

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–567), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF MEASURE

The purpose of S. 2619, which was drafted and submitted by the Department of the Interior, is to reduce to a school year the time teachers appointed to positions in schools operated by the Bureau of Indian Affairs must agree to serve without loss of travel and transportation expenses. Present law, set forth in title 5 United States Code 5723(b), requires that Federal agencies may pay travel and transportation expenses of new appointees only if the appointee agrees to serve and serves a full 12-month year, unless separated by reasons beyond his control for reasons acceptable to the hiring agency.

In the case of the Bureau of Indian Affairs teachers, as with teachers generally, the school year is usually of approximately 9 months duration—from late August or early September through May or the first part of June. Most teachers have no immediate teaching functions in the interval between the close of one school year and the beginning of another. Yet under present law, teachers who may wish to resign after 1 year nevertheless must remain at their posts until the beginning of the following school year in order not to have to repay their travel and transportation expenses.

Many Bureau of Indian Affairs schools are in relatively remote areas that are difficult of access.

The present situation creates many problems for the Bureau as well as for the teacher. If a teacher is not going to continue his employment for another school year, it is to the Government's interest and advantage to know this by the end of the school year in order to assure that a replacement is recruited and on duty by the start of the next school year. Severe administrative problems occur when an employee resigns after the beginning of the school year, the severity being further compounded when an employee waits until the completion of his 12 months of service to submit his resignation.

Enactment of the proposed bill would alleviate this situation by relieving teachers who complete a school year of service of any obligation to repay travel expenses to the Government, regardless of the reason for their resignation. The Bureau schools would benefit through some savings in salaries and would better fulfill its responsibilities to Indian children as a result of knowing sufficiently early in the year the vacancies that it will have to fill and thus be able to recruit quality teachers.

The measure involves no expenditure of Federal funds; rather, as stated, some savings would be realized.

## THE CALENDAR

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Nos. 565, 566, 567, and 568.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## FORT DONELSON NATIONAL BATTLEFIELD

The bill (H.R. 13767) to authorize the appropriation of funds for Fort Donelson National Battlefield in the State of Tennessee, and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–570), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND

Fort Donelson was originally authorized by the Congress as a national military park in 1928 (45 Stat. 367; 16 U.S.C. 428 et seq.). In 1960 (Public Law 86–738; 74 Stat. 875) it was redesignated as a national battlefield and enlarged to include not more than 600 acres.

An appropriation of $226,000 was authorized for the acquisition of the additional lands and interests in land.

Pursuant to this authority the entire amount authorized has been appropriated and expended. Not unlike other situations, the original land acquisition cost estimates were too low; consequently, approximately 87 acres within the park boundaries remain unacquired at this time, but this legislation does not attempt to deal with the unacquired lands.

NEED AND COST

H.R. 13767 authorizes the appropriation of $12,721.25 plus interest, as provided by law, to provide for the payment for deficiency judgments rendered against the United States by the U.S. District Court for the Middle District of Tennessee, Nashville Division. When the declarations of taking were filed with respect to the 72.3 acres involved, $10,660 was deposited in court as the estimated fair market value of the properties. At that time, title vested in the United States and it became liable for their fair market value as determined by the court. Inasmuch as the United States is now obligated to satisfy the judgments incurred in these actions, the enactment of H.R. 13767, as amended, is essential. Until satisfied, interest on the judgments will continue to run.

COMMITTEE RECOMMENDATION

The Committee on Interior and Insular Affairs recommends the enactment of H.R. 13767.

## INDEPENDENCE NATIONAL HISTORICAL PARK

The bill (S. 2940) to amend the act of June 28, 1948, as amended, relating to the acquisition of property for the Independence National Historical Park was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 2940

*Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,* That the first sentence of section 6 of the Act entitled "An Act to provide for the establishment of the Independence National Historical Park, and for other purposes", approved June 28, 1948 (62 Stat. 1061, as amended; 16 U.S.C. 407r), is further amended by striking out "$7,950,000" and inserting in lieu thereof "$11,200,000".

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–571), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE

The purpose of S. 2940 is to provide an increase in the funds authorized to be appropriated for Independence National Historical Park in Philadelphia, Pa. The new funds, if appropriated, will be used to acquire the last remaining tract of commercial land within the boundaries of the park.

NEED

Creation of Independence National Historical Park was provided for by an act of Congress passed in 1948. Since that time all the property authorized to be acquired within the three city blocks that make up what is known as project A, as well as the property within other units of the park, has been acquired either by the United States or by the State of Pennsylvania, the city of Philadelphia, or private nonprofit organizations, with one exception. The exception is the parcel with which S. 2940 is concerned. This parcel is occupied by three buildings—one of them a 16-story office building, the two others small structures—which, the committee was advised, are completely out of keeping with the historic structures in the remainder of Independence National Historic Park—Independence Hall, Carpenters Hall, Philosophical Hall, Library Hall, the First and Second Banks of the United States, and others.

In April 1967, the Reliance Insurance Co., the owner of the three buildings on the parcel to be acquired under S. 2940 gave the National Park Service an 18-month option to purchase its holdings for $3,250,000. The Park Service testified that it was a figure satisfactory to the Service based on its own appraisal.

Independence National Park attracted 2,750,000 visitors in 1966. About 7 years from now the bicentennial of the Declaration of Independence will be celebrated and it will center on this park. Estimates are that as many as 6 million visitors will attend the various events that will be held. It is the hope of the Park Service that the modern buildings which intrude on the historical scene can be acquired and demolished and that the area can be landscaped before that time in order that as authentic a picture as possible of the scene as it was at the time this country declared its independence will be available.

The Reliance Insurance Co.'s option will expire in January of 1970. The committee was assured, however, by an officer of the company—its vice president and general counsel—that he will recommend to the board of directors that it be extended a reasonable time if this is necessary to enable S. 2940 to be enacted and appropriations to be obtained which will allow the purchase to be consummated. He stressed, however, that the company has been kept waiting for some time now, that it has moved its own offices to a different location, that it has felt unwarranted in making improvements in the structures that ought to be made if it is to be leased out on a long-term basis, and that it has, accordingly, been granting only short-term leases. The committee sympathizes with the position in which the company finds itself. It also appreciates the difficulties that would ensue if the option were allowed to expire without being exercised, particularly those which would stem from the loss of an opportunity to acquire at what appears to be a very reasonable price.

COST

The cost of acquiring the land and buildings with which S. 2940 is concerned is $3,250,000. The cost of demolishing the buildings and landscaping the property is estimated at $580,000. This cost will be partially offset by revenues derived from presently outstanding leases.

## CHICKAMAUGA AND CHATTANOOGA NATIONAL MILITARY PARK

The Senate proceeded to consider the bill (H.R. 9163) to authorize the disposal of certain real property in the Chickamauga and Chattanooga National Military Park, Ga., under the Federal Property and Administrative Service Act of 1949, which had been reported from the Committee on Interior and Insular Affairs, with an amendment on page 1, line 6, after the word "property", strike out "under that Act" and insert "subject to the retention by the Department of the Interior of a reversionary interest in perpetuity with respect to any portion of such property not utilized for educational purposes under that Act,".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–572), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

BACKGROUND AND NEED

The Chickamauga and Chattanooga National Military Park is located in the States of Georgia and Tennessee. It was originally established in 1890; however, it was not administered as a part of the National Park System until 1933. The tract of land (consisting of approximately 155.46 acres) involved in H.R. 9163 was acquired by the War Department in 1898, but its historic association with the Civil War battle which took place in the area is remote and its physical location in relation to the main portion of the park is tenuous—it is merely an appendage connected with the park at a common corner.

Under existing law, lands reserved for, or dedicated to, national park purposes are not subject to the usual disposal procedures for surplus Federal properties. For this reason, H.R. 9163 authorizes the Secretary of the Interior to designate the lot (specified in the bill) as excess property so that it may be utilized or disposed of by the Administrator of General Services in accordance with the provisions of the Federal Property and Administrative Services Act of 1949. The committee was advised that Catoosa County, Ga., is most interested in acquiring the property for the development of an educational complex.

AMENDMENT

On page 1, line 6, strike out "under that Act" and insert "subject to the retention by the Department of the Interior of a reversionary interest in perpetuity with respect to any portion of such property not utilized for educational purposes under that Act,".

PURPOSE OF AMENDMENT

Testimony before the committee indicated that the lands involved were not needed for park purposes or by any other Federal agency, and that the State and local governments wanted it for the purpose of developing an educational complex. The amendment would assure the use of these lands for educational purposes and would protect against any future proposals that would permit them to fall into private ownership. The adoption of the reversionary amendment would protect the government against such a possibility.

COST

No Federal expenditures are contemplated under the terms of H.R. 9163 other than the usual administrative costs associated with the disposal of excess Federal properties.

---

## ELIMINATION OF CONSTRUCTION DETAILS ON PASSENGER VESSELS

The Senate proceeded to consider the bill (H.R. 210) to eliminate requirements for disclosure of construction details on passenger vessels meeting prescribed safety standards, and for other purposes, which had been reported from the Committee on Commerce with an amendment strike out all after the enacting clause and insert:

That section 4400 of the Revised Statutes, as amended (46 U.S.C. 362), is amended—

(1) by inserting in the second sentence of subsection (b) between the words "information" and "as" the following: ", and shall specify the registry of any vessel named,", and

(2) by inserting between the second and third sentences of subsection (b) thereof the following new sentence: "The passenger notification and promotional or advertising literature inclusions required by this subsection, except the inclusion of the country of registry of the vessel, do not apply to voyages by vessels meeting the safety standards prescribed in subsection (c) of this section.".

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time, and passed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 91–573), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of the bill is to amend section 4400 of the Revised Statutes, as amended (46 U.S.C. 362), to eliminate the requirement to publicly disclose compliance with safety standards where such vessels meet prescribed safety standards and to require that the registry of any vessel named in promotional literature or advertising be specified therein.

BACKGROUND OF THE LEGISLATION

In 1966, the Congress enacted Public Law 89–777, which required all ships to meet certain minimum fire, safety, and financial standards, and to include a statement in all advertising of ships sailings as to the safety standards with which the vessel complied or did not comply. This requirement for notice of compliance with safety standards was reasonable and desirable at the time the law was passed because safety standards did not apply uniformly to all cruise ships, foreign and domestic. Vessel owners, however, were required to alter their vessels to meet the prescribed requirements by November 2, 1968. Since that date all passenger vessels, both U.S. and foreign flag, sailing from U.S. ports, with U.S. nationals, must meet the standards set forth in the International Convention for Safety of Life at Sea of 1960, as modified by the amendments proposed by the 13th session of the Maritime Safety Committee of the Intergovernmental Maritime Consultative Organization (IMCO), contained in annexes I–IV of the note verbale of the Secretary General of that organization, dated May 17, 1966. The net result at this time is that passenger vessels using U.S. ports must conform to these fire and safety standards. The Coast Guard enforces these requirements.

NEED OF THE LEGISLATION

Thus, since November 2, 1969, no vessel, American or foreign flag, can sail from an American port without complying with the convention safety standards and, because of present uniform safety standards, the requirement to disclose compliance with particular safety requirements can be eliminated. There is, therefore, no longer any reason for disclosure of such compliance at the time of booking, nor for the advertising requirements.

Testimony during the hearing on this bill indicated that during the period these disclosure requirements have been in effect, there has been a pronounced change in the pattern of promotion for steamship passenger transportation and cruises. Travel agents, who have been counted on to produce a majority of the travel business, either cannot afford or will not incur the additional cost of purchasing more advertising space to include the required safety text, nor will they sacrifice promotional text for a description of safety standards. Advertising by these agents consequently has dropped appreciably. The disclosure requirements have also proven unduly expensive and burdensome where the use of radio and television is involved and the result has been that passenger vessels have been virtually precluded from effectively using those media. Since the safety notice requirements have proven burdensome and since the interest of safety is little served by the compulsory recitation that mandatory standards have in fact been met, H.R. 210 would simply eliminate the need for the safety notice in advertising of ships which meet the required standards. A witness from the Coast Guard assured the committee that passage of the bill would in no way adversely affect passenger safety.

THE AMENDMENT

The House of Representatives amended H.R. 210 as it was originally introduced in that body in order to require that advertising of passenger ships include notice of the registry of the ship. However, the technical form of that amendment created a possible ambiguity as to what agency should administer the requirement of disclosure of registry and as to what penalties would attach to failure to comply. The amendment adopted by the Committee clarifies those ambiguities and authorizes the Secretary of the Department in which the Coast Guard is operating to promulgate regulations with respect to disclosure of registry. However, since the principal purpose of H.R. 210 is to remove costly and burdensome restrictions on promotion of travel by passenger ship, it is not intended that the statement as to the vessel's registry be accomplished in any particular manner, so long as the promotional literature or advertising includes the required specification as to the country of the vessel's registry in a manner which reasonably discloses the information.

COST OF THE LEGISLATION

The bill will not result in any increased cost to the Government.

CONCLUSION

This bill should be of some assistance to our ailing U.S.-flag passenger fleet and will eliminate an unnecessary burden on passenger vessel operations.

---

## ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## COMMUNICATIONS FROM EXECUTIVE DEPARTMENTS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORTS OF COMPTROLLER GENERAL

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on management of the Project One Hundred Thousand Program, Department of the Army, dated December 8, 1969 (with an accompanying report); to the Committee on Government Operations.

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on need to improve project transition management by the Department of Defense, dated December 8, 1969 (with an accompanying report); to the Committee on Government Operations.

FAMILY PLANNING SERVICES AMENDMENTS OF 1969

A letter from the Secretary of Health, Education, and Welfare, transmitting a draft of proposed legislation to amend the Public Health Service Act to provide for special project grants for the provision of family planning services and related research, training, and technical assistance (with an accompanying paper); to the Committee on Labor and Public Welfare.

## REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HRUSKA, from the Committee on the Judiciary, without amendment:

S.J. Res. 154. Joint resolution to authorize and request the President to proclaim the month of January of each year as "National Blood Donor Month" (Rept. No. 91–578).

By Mr. HRUSKA, from the Committee on the Judiciary, with an amendment:

H.J. Res. 10. Joint resolution authorizing the President to proclaim the second week of March, 1970, as Volunteers of America Week (Rept. No. 91–579).

By Mr. MOSS, from the Committee on Interior and Insular Affairs, with amendments:

S. 1148. A bill to amend the Revised Organic Act of the Virgin Islands (Rept. No. 91–580).

By Mr. McGEE, from the Committee on Post Office and Civil Service, with an amendment:

H.R. 9233. An act to amend title 5, United States Code, to promote the efficient and effective use of the revolving fund of the certain functions of the Commission, and for Civil Service Commission in connection with other purposes (Rept. No. 91–581).

By Mr. McGEE, from the Committee on Post Office and Civil Service, with amendments:

H.R. 13000. An act to implement the Federal employee pay comparability system, to establish a Federal Employee Salary Commission and a Board of Arbitration, and for other purposes (Rept. No. 91–582).

By Mr. YARBOROUGH, from the Committee on Labor and Public Welfare, with amendments:

S. 2523. A bill to amend, extend, and improve certain public health laws relating to mental health, and for other purposes (Rept. No. 91–583).

By Mr. EASTLAND, from the Committee on the Judiciary, without amendment:

H.R. 11503. An act for the relief of Wylo Pleasant, doing business as Pleasant Western Lumber (now known as Pleasant's Logging and Milling, Inc.) (Rept. No. 91–585); and

S. Res. 239. Resolution to refer S. 2807, together with all accompanying papers, to the Chief Commissioner of the United States Court of Claims (Rept. No. 91–584).

## EXECUTIVE REPORT OF A COMMITTEE

As in executive session, the following favorable report of a nomination was submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

Henry J. Tasca, of Pennsylvania, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to Greece.

## BILLS AND A JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time and, by unanimous consent, the second time, and referred as follows:

By Mr. PACKWOOD (for himself, Mr. MURPHY and Mr. HATFIELD):

S. 3218. A bill to provide a method for paying costs of fires caused without negligence in connection with national forest timber sales operations; to the Committee on Agriculture and Forestry.

(The remarks of Mr. PACKWOOD when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. JAVITS (for himself, Mr. DOMINICK, and Mr. PROUTY):

S. 3219. A bill to amend the Public Health Service Act to provide for special project grants for the provision of family planning services and related research, training, and technical assistance; to the Committee on Labor and Public Welfare.

(The remarks of Mr. JAVITS when he introduced the bill appear later in the RECORD under the appropriate heading.)

By Mr. MATHIAS (for himself and Mr. MANSFIELD):

S.J. Res. 166. Joint resolution to repeal legislation relating to the use of the Armed Forces of the United States in certain areas outside the United States and to express the sense of the Congress on certain matters relating to the war in Vietnam, and for other purposes; to the Committee on Foreign Relations.

(The remarks of Mr. MATHIAS when he introduced the joint resolution appear earlier in the RECORD under the appropriate heading.)

## S. 3218—INTRODUCTION OF THE OPERATIONS FIRE FUND ACT—METHOD OF COMPENSATING FOR COSTS OF FOREST FIRES CAUSED WITHOUT NEGLIGENCE

Mr. PACKWOOD. Mr. President, today I introduce on behalf of myself and the Senator from Oregon (Mr. HATFIELD) and the Senator from California (Mr. MURPHY), a bill to provide a method for paying costs of fires caused without negligence in connection with national forest timber sales operations. So-called "operations fires" are fires which occur without negligence in the harvest of timber on national forest lands.

One of the many problems faced by the timber industry is involved here. Fires totally without negligence on the part of the operator are occasionally started by friction of logs rubbing on the forest floor, or when metal strikes metal or rock. These fires usually occur where generally great care is exercised by the operator, but the control and cost of the fire can be an overwhelming burden for one operator.

Of course, where fires are caused with negligence, then the responsibility lies with the operator, but I am speaking specifically about fires caused without negligence by the operator.

The Operations Fire Fund Act which I propose, and which has been introduced also on the House side, is designed to meet this problem by spreading the risk of these nonnegligent fires to the entire industry, providing an incentive for care and meeting the entire cost of suppressing such fires from deposits by operators.

In section 2 of this proposed act a fund would be created from deposits by timber purchasers, based on cut of national forest timber. A limit placed on the amount of the fund to meet the total cost of suppressing operations fires over the past 3 years, with excess funds transferred to miscellaneous receipts of the Treasury.

Section 4 should establish a board to fix the rates of deposits into the fund by regions, review expenditures from the fund, and establish additional amounts timber purchasers must pay toward the initial cost of suppression. It is anticipated that in the western regions the purchased would assume the obligations for the first $2,500 in suppression cost for each operations fire. The remaining cost of suppression would be met fully through the operations fire fund.

I believe this bill will provide a fair and inexpensive method to meet the problems of suppressing the nonnegligent fires occurring from time to time in the harvest of timber from national forests.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 3218) to provide a method for paying costs of fires caused without negligence in connection with national forest timber sales operations, introduced by Mr. PACKWOOD, for himself and other Senators, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

## ADDITIONAL COSPONSORS OF BILLS

S. 2674

Mr. COOK. Mr. President, I ask unanimous consent that, at the next printing, my name be added as a cosponsor of S. 2674, to amend title 37, United States Code, to provide for the procurement and retention of judge advocates and law specialist officers for the Armed Forces.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

S. 2852

Mr. INOUYE. Mr. President, I ask unanimous consent that, at the next printing, the name of my colleague, the gentleman from Hawaii (Mr. FONG), be added as a cosponsor of S. 2852, to amend the Shipping Act of 1916, as amended, to require common carriers by water in the domestic offshore trade to obtain a certificate of convenience and necessity, and to require contract carriers by water in such trade to obtain a permit.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## TAX REFORM ACT OF 1969—AMENDMENTS

AMENDMENT NO. 401

Mr. ERVIN submitted an amendment, intended to be proposed by him, to the bill (H.R. 13270) to reform the income tax laws, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 403

Mr. BELLMON submitted an amendment, intended to be proposed by him, to House bill 13270, supra, which was ordered to lie on the table and to be printed.

AMENDMENT NO. 407

Mr. TOWER. Mr. President, I send to the desk an amendment to be printed, along with an explanation of the amendment and a letter from the Department of the Treasury supporting it.

I submit the amendment on behalf of the Senator from Alabama (Mr. SPARKMAN) and myself. It would take the place of current amendments Nos. 297 and 298. For the benefit of Senators interested in those amendments, this is a new compromise amendment and a letter from the Treasury Department supporting it.

I ask unanimous consent that an explanation of the amendment, together with the letter of support from the Department of the Treasury be printed in the RECORD.

The ACTING PRESIDENT pro tempore. The amendment will be received and printed, and will lie on the table; and, without objection, the amendment, explanation, and letter will be printed in the RECORD.

The amendment (No. 407) is as follows:

Page 387, strike out lines 17 through 25 and lines 1 through 7 on page 388 and insert in lieu thereof the following:

"(4) USED SECTION 1250 PROPERTY.—In the case of section 1250 property acquired after July 24, 1969, the original use of which does not commence with the taxpayer, the allowance for depreciation shall be determined in the following manner:

"(A) in the case of such section 1250 property which is residential rental housing (as defined in paragraph (2)(B) having a remaining useful life on the date of acquisition of 30 years or more, the allowance for depreciation under this section shall be limited to an amount computed under any of the methods provided for in paragraph (1);

"(B) in the case of such section 1250 property which is residential rental housing (as defined in paragraph (2)(B)) having a remaining useful life on the date of acquisition of between 20 and 30 years, the allowance for depreciation under this section shall be limited to an amount computed under—

"(i) the straight line method,

"(ii) the declining balance method, using a rate not exceeding 125 percent of the rate which would have been used had the annual allowance been computed under the method described in clause (i), or

"(iii) any other method determined by the Secretary or his delegate to result in a reasonable allowance under subsection (a), not including—

"(1) the sum-of-the-years digits methods, or

"(2) any other method allowable solely by reason of the application of subsection (b)(4) or paragraph (1)(C) of this subsection; and

"(C) In the case of such section 1250 property which is either residential rental housing (as defined in paragraph (2)(B)) having a remaining useful life on the date of acquisition of less than 20 years, or which does not qualify as residential rental housing, the allowance for depreciation under this section shall be limited to an amount computed under—

"(i) the straight line method, or

"(ii) any other method determined by the Secretary or his delegate to result in a reasonable allowance under subsection (a), not including—

"(1) any declining balance method,

"(2) the sum-of-the-years digits method, or

"(3) any other method allowable solely by reason of the application of subsection (b)(4) or paragraph (1)(c) of this subsection."

Page 393, strike lines 1 through 7 and insert the following:

"(iii) in the case of residential rental housing (as defined in section 167(j)(2)(B) other than that covered by clauses (i) and (ii) or in the case of rehabilitation expenditures (as defined in section 167(k)(3)) allowed with respect to section 1250 property, 100 percent minus 1 percentage point for each full month the property was held after the date the property was held 60 full months; and

"(iv) in the case of all other section 1250 property, 100 percent minus 1 percentage point for each full month the property was held after the date the property was held for 120 full months."

Page 393, line 8, strike out "Clauses (i), (ii), and (iii)" and insert in lieu thereof; "Clauses (i) and (ii)."

The explanation, presented by Mr. TOWER, is as follows:

EXPLANATION OF THE TOWER-SPARKMAN AMENDMENT

This amendment deals with real estate depreciation on any existing residential buildings which are conveyed after July 24, 1969. It also concerns the tax consequences of a sale or disposition of all types of property which involves a sale price above basis.

PRESENT LAW

(A) Depreciation of New Improvements

Under present law, the original owner of any type of real estate project may depreciate the improvements upon any one of these bases or upon a combination of two: straight line, sum-of-the-years-digits, or double declining balance.

(B) Depreciation of Existing Improvements

Existing improvements which are conveyed may be depreciated by their new owner on the 150% basis; this method provides for some acceleration during the initial years of ownership, but not as much as either sum-of-the-years-digits or the double declining balance methods.

(C) Recapture Provisions

If real estate is sold in the first year of the holding period, then all the depreciation deduction taken during that time is taxable at ordinary income rates to the extent that it is recaptured by the sale. For the next eight months (from months 13 through 20) all depreciation in excess of straight line which is recaptured by the sale is taxed at ordinary income tax rates. Beginning the twenty-first month, the percentage of the excess depreciation recaptured at the time of sale which is taxed at ordinary rates declines 1% for each additional month of the holding period. Thus if the owner holds for ten years, he is assured of full capital gains treatment.

PROPOSED CHANGES BY THE SENATE FINANCE COMMITTEE

(A) Depreciation of New Improvements

The Senate Finance proposal would retain all existing depreciation methods for new residential construction, but would limit new commercial and industrial facilities to the 150% method.

(B) Depreciation of Existing Improvements

Second and subsequent owners of all depreciable real property would be limited to the straight line method of depreciation regardless of the type of property.

(C) Recapture Provisions

The Senate Finance Committee has proposed three separate formulae as to tax consequences, depending on the type of property which is being sold or disposed of:

(1) Certain low and moderate income rental housing projects assisted under Federal or State law which involve limited dividend mortgagors receive the same treatment as before (i.e. 100% capital gains treatment at the end of the tenth year.)

(2) New residential construction, other than these special housing projects, would be subject to full recapture at ordinary rates on the excess over straight line for ten years, then, beginning the first month of the eleventh year (121st month), the percentage of the excess depreciation which is taxed at ordinary rates declines 1% per month for each additional month of the holding period. Full capital gains treatment is assured in 18 years, 4 months.

(3) Used residential and both new and used nonresidential buildings are subject to full recapture of the excess depreciation over straight line recaptured at the time of sale at ordinary income tax rates, regardless of when the sale takes place.

CHANGES EFFECTED BY THIS AMENDMENT

(A) Restoration of Accelerated Depreciation to Second and Subsequent Owners of Residential Construction.

This amendment would restore accelerated depreciation to second and subsequent owners of residential real property. However, the rate of the acceleration would be based on the estimated future useful life of the project.

(1) If the remaining useful life is less than twenty years at the time of transfer, the purchaser would be limited to the straight line method.

(2) If the remaining useful life is between twenty and thirty years, the purchaser would be entitled to depreciate at the rate of 125% of straight line.

(3) If the remaining useful life is thirty years or more, the purchaser would be entitled to the 150% method. However, second and subsequent owners of commercial and industrial property would be limited to the straight line method as recommended by the Senate Finance Committee.

(B) Changes in the Recapture Formulae

The amendment would alter the recapture formula recommended by the Senate Finance Committee in two respects:

(1) For the owners of residential construction (both new and used), there would be a full recapture of all the excess depreciation taken over straight line at ordinary income tax rates if there were a sale in the first five years. Thereafter, beginning the first month of the 6th year (61st month), the percentage of the gain taxed as ordinary income would decline 1% per month. Thus residential property held for 13 years, 4 months would be entitled to full capital gains treatment at the time of sale. This provision would also apply to the special 5-year write-off for rehabilitation expenses incurred on low-rent housing.

(2) For owners of other types of new construction, there would be full recapture for the first ten years, and then, beginning the first month of the eleventh year, the percentage of the gain taxed as ordinary income would decline at the rate of 1% per month. This is the same provision as the Senate Finance Committee recommended for residential construction. (Note, this provision would have no effect on second and subse-

quent owners of nonresidential construction inasmuch as they are limited to the straight line depreciation method.)

The letter, presented by Mr. TOWER, is as follows:

THE DEPARTMENT OF THE TREASURY,
*Washington, D.C., December 8, 1969.*

Hon. JOHN G. TOWER,
*U.S. Senate,*
*Washington, D.C.*

DEAR SENATOR TOWER: You have requested a statement of the position of the Treasury Department on Amendments 297 and 298 to H.R. 13270, the Tax Reform Act of 1969, which you have proposed. In general, these amendments would change the provisions of the bill which allow only straight-line depreciation in the hands of a second owner (so-called "used" property) and which eliminate the phase-out of recapture of the excess of accelerated over straight-line depreciation for buildings and other real estate improvements. They would allow 150 percent declining balance depreciation if the life of the property exceeds 30 years, 125 percent if the life is between 20 and 30 years, and straight-line depreciation if the life is less than 20 years. The phase-out of recapture would be reinstituted to begin after the fifth year of ownership.

The Treasury Department will support these amendments if they are limited to housing, rather than being applicable to all real estate construction as they are in their present form. Treasury would also support a reinstatement of the phase-out of recapture beginning after the tenth year for real estate improvements other than housing if it were coupled with a limitation of Amendments 297 and 298 to housing.

It is my understanding from recent discussions with officials of the Department of Housing and Urban Development that HUD will also support the amendments in this revised form.

Sincerely yours,

JOHN S. NOLAN,
*Deputy Assistant Secretary.*

AMENDMENT NO. 408

Mr. WILLIAMS of Delaware submitted amendments, intended to be proposed by him, to House bill 13270, supra, which were ordered to lie on the table and to be printed.

AMENDMENT NO. 409

Mr. KENNEDY (for himself and Mr. PEARSON) submitted an amendment, intended to be proposed by them, jointly, to House bill 13270, supra, which was ordered to lie on the table and to be printed.

(The remarks of Mr. KENNEDY when he submitted the amendment appear later in the RECORD under the appropriate heading.)

## AMENDMENT OF MIGRANT HEALTH ACT TO INSURE MIGRANT PARTICIPATION IN PROGRAM DEVELOPMENT AND IMPLEMENTATION—AMENDMENT

AMENDMENT NO. 402

Mr. MONDALE. Mr. President, I submit an amendment to S. 2660, a bill to extend and otherwise amend certain expiring provisions of the Public Health Service Act for migrant health services, that would provide for participation of the migrant agricultural worker in program development and implementation.

I am today proposing that section 310 of the Public Health Service Act, which provides money for migratory farmworkers' health care, be amended by adding language that will guarantee participation by the target population in the development and implementation of migrant health programs.

The Migrant Health Act was passed in 1962 with the avowed purpose of providing health care for migrant farmworkers. Before passage of the act, adequate health care was the exception rather than the rule for migrant families. Migrant farmworker families were excluded from traditional health services taken for granted by all the rest of society.

Now, through 116 project grants in 36 States, physicians and hospitals are involved in upgrading the health of farmworkers. The present appropriation of $8 million limits provision of service to only about one-third of the target population, and in many instances, even those services are inadequate or incomplete because of the shortage of funds.

Although the act is improving health care services for migrants, recent hearings in Washington and in the Rio Grande Valley of Texas on the extension of the act, point up the need to involve the consumer population in project development and implementation.

Too often Federal funds are not being used to their fullest advantage. A lack of knowledge on the part of migrants about available facilities and program components still prevails. Many programs lack an adequate outreach component. Too often programs do not take into account the total poverty of migrant families, so that health care is not matched with services to meet related needs of food, shelter, clothing, and other familiy needs. Special effort and innovation in organizing and delivering services to make them more accessible for the use of geographically and socially isolated migrants is often lacking. Some programs have not explored the possibility of developing new sources of personnel to supplement available professional personnel, such as aides drawn from among migrant families.

Some programs are in the hands of local, county, or State health departments that are insensitive to the needs of migrants or operate heedless of the dignity of the individual. Many local public health programs are already starved for funds, and thus use Migrant Health Act funds to operate their regular programs. Programs are often entwined with legal and policy exclusions from certain local services. Language problems often cause confusion in the delivery of needed services, and staff members are often not bilingual in areas where Spanish is the prevailing tongue. In other instances, health care was not related to the needs of the individual or the family. Experts have documented the fact that greater attention to preventive medicine might obviate the high costs of curing advanced stages of disease.

I am convinced that insufficient health care for the rural poor and the migrant will remain the rule, rather than the exception, until we tap the vast wisdom, understanding, loyalty, and pride of the poor. It is the poor themselves who know most about the details and the solution to their predicament.

My amendment represents a modest, inexpensive device for guaranteeing that those who are excluded from health care be permitted to participate in the development and implementation of programs that are intended to improve their health.

My amendment simply requires that before grants are authorized, the Secretary must be satisfied that persons broadly representative of all elements of the population to be served have participated in the development, and will participate in the implementation, of such programs.

The purpose is abundantly clear. It is to have the input of the poor in the implementation and delivery of health care so that the Government and the people get the most for their dollar.

I ask unanimous consent that this amendment be printed in the RECORD at the close of my remarks.

The ACTING PRESIDENT pro tempore. The amendment will be received and printed, and will be appropriately referred; and, without objection, the amendment will be printed in the RECORD.

The amendment (No. 402) was referred to the Committee on Labor and Public Welfare, as follows:

AMENDMENT NO. 402

At the end of the bill insert a new sentence as follows:

"SEC. 2. Section 310 of the Public Health Service Act is further amended by adding immediately after the final sentence thereof the following new sentence: For the purposes of assessing and meeting domestic migratory agricultural workers' health needs, developing necessary resources, and involving local citizens in the development and implementation of health care programs authorized by this Section, the Secretary must be satisfied, upon the basis of evidence supplied by each applicant, that persons broadly representative of all elements of the population to be served have been given an opportunity to participate in the development of such programs, and will be given an opportunity to participate in the implementation of such programs."

## DISTRICT OF COLUMBIA APPROPRIATION BILL, 1970—AMENDMENTS

AMENDMENTS NOS. 404 THROUGH 406

Mr. TYDINGS submitted three amendments, intended to be proposed by him, to the bill (H.R. 14916) making appropriations for the government of the District of Columbia and other activities chargeable in whole or in part against the revenues of said District for the fiscal year ending June 30, 1970, and for other purposes, which were ordered to lie on the table and to be printed.

## ADDITIONAL COSPONSORS OF AMENDMENT

AMENDMENT NO. 346

Mr. PACKWOOD. Mr. President, I ask unanimous consent that the names of the Senator from Illinois (Mr. SMITH) and the Senator from Alaska (Mr. STEVENS)

be added as cosponsors of my amendment No. 346 to the pending tax reform bill, H.R. 12370.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

## EQUAL EMPLOYMENT OPPORTUNITY COMMISSION

Mr. SCOTT. Mr. President, the Washington Evening Star on December 6, 1969, published a page 1 article attacking the Equal Employment Opportunity Commission. The article was full of distortions and misinformation. The source of the information was admittedly "unhappy personnel" of the agency.

This kind of attack cannot go unanswered, for it seriously impairs the effectiveness of the Commission and the important work which Congress empowered it to undertake.

William H. Brown III, Chairman of the Equal Employment Opportunity Commission, today held a news conference to set the record straight. I ask unanimous consent that his prepared statement be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

Title VII of the Civil Rights Act of 1964 established the Equal Employment Opportunity Commission as a non-partisan agency, protected from the divisive and sometimes destructive forces of the political arena. Since I became Chairman on May 6, 1969, I have tried to direct the energies of this Commission to the important task of eliminating job discrimination, and to keep the Agency out of politics. This has been a difficult task, since the nature of the problem we deal with is at the heart of some of the nation's most crucial social ills, and accordingly is the subject of political controversy. Yet, if the Commission is to succeed in its task—the elimination of discrimination in employment—it must not become bogged down in political combat.

It is important to consider what effect such disputes have on the Agency's staff. EEOC is made up of individuals strongly committed to the proposition that every American should have a chance to work according to his abilities. Theirs is an extremely difficult task, and I think it is grossly unfair to involve them in the kind of political pulling and hauling which should be reserved for political campaigns.

For these reasons, I was greatly disturbed by the article which appeared in the Washington *Evening Star* on Saturday, December 6, containing an irresponsible attack on the Commission. The sources for this story were admittedly "unhappy personnel within the Agency." No one in a responsible position in the Commission was interviewed.

I note that the name of former Chairman Clifford L. Alexander, Jr. was mentioned in the article. I urge Mr. Alexander to repudiate the article, for he knows better than anyone else that it is based on inaccuracies and distortions. Ordinarily, I would not comment on an article of this kind, but the credibility of this Agency in the minds of the people it seeks to serve is of utmost importance to our eventual success. Accordingly, I feel compelled to set the record straight and respond to these misstatements.

I think it is important to look at the situation as I found it on May 6 when I became Chairman. The Commission's backlog of cases was steadily increasing and had in fact reached the point where the Commission's processes were in danger of being overwhelmed. The operations of the Commission, including investigations, decisions and interpretations, and conciliations, were seriously understaffed. In the field the high rate of turnover among young investigators, combined with a shortage of trained cadre, seriously hampered the effectiveness of these offices. There was no working manual for investigatiors; there was no working manual for conciliators; there was no systematic training program for either investigators or conciliators. Despite these problems there was a policy of delegating compliance responsibilities to the field offices, without providing a structure to ensure a uniform high-quality work product. The field offices, in effect, had become 13 different Equal Employment Opportunity Commissions.

This was the situation on May 6. Now, we are told that the Commission's problems are a recent development.

*The Evening Star* reports that there are "99 vacancies among the EEOC's 615 positions, here and in the field." In fact, the Commission has 629 authorized positions, 613 of which are filled.

The *Star* reports that "11 of 15 supergrade positions are vacant." In fact, only 6 of these positions are vacant and we are vigorously recruiting highly qualified individuals to fill these positions. I might point out that prior to my appointment as Chairman four of these supergrade positions—Deputy Executive Director, Deputy General Counsel, Director of Technical Assistance, and Chief of Education Programs—remained vacant for a year or longer. As of May 1 of this year, seven supergrade positions were vacant, and five additional vacancies occurred following the resignation of Clifford Alexander as Chairman.

In this respect, the present vacancies are not a novel problem. But the solution to the problem. I believe, has been made more difficult by the Commission's history of filling positions by adjusting agency structure and activities to accommodate the needs of personal and political associates. The result has been that the Commission's activities and its reputation have been seriously impaired.

The *Star* reports that meetings of the Commission "have dropped from once a week to once every two or three weeks." This is a distortion. Up to the time that Mr. Alexander became Chairman, meetings were held on the average of once a week. During Mr. Alexander's chairmanship, meetings were held once every two or three weeks. Since I have become Chairman, meetings have been held with the same frequency.

The article parrots the frequently made, but baseless claim that I am against this Commission holding public hearings. As recently as last Monday, in an open hearing before the House General Subcommittee on Labor I reiterated that I fully intend to hold public hearings. My testimony is a matter of record. Two months ago, I directed the Commission's Office of Research to begin preparation for hearings. It has been busy collecting information to aid the Commission in determining the scope and location of the next hearing. This time, the preparation for this hearing will include a follow-up procedure, because *I* do not regard public hearings as mere publicity stunts to be forgotten once the television cameras are turned off.

Perhaps the most remarkable charge that was leveled was that the Agency's backlog of cases has continued to rise since my taking office and that I have allowed the situation to worsen with no attempt to alleviate the problem.

These are the facts: At the beginning of FY 1968, this Agency had a backlog of 1,476 respondent investigations. By the end of FY 1969, that figure had increased to 2,556 respondent investigations. Part of this problem stems from inadequate funding. I think it is important to note, however, that prior to my Chairmanship, the weaknesses in Agency procedures that contributed to the problem were ignored. Repeated requests from responsible members of the staff to make basic changes in the Agency procedures were, in many instances, not even acknowledged. In attention to the problems of the backlog and the personnel policies I described, frustrated efficient implementation of the provisions of Title VII, and demoralized those staff members who cared more for civil rights than rhetoric.

In sum, on May 6, 1969, I became Chairman of an institution which was no more prepared to perform the task set out for it by Congress than it was at its inception. Things are changing.

For the first time in the history of the Commission, a comprehensive study has been made of the compliance process as it actually operates.

This critical analysis was distributed to the field directors and the heads of our Washington division, with an invitation for comments and recommendations.

Then there was a no-holds barred meeting of the field directors and the various division heads. Out of this came a new, streamlined and more effective compliance procedure which was voted on and adopted by the Commissioners in a meeting on November 13. We believe the new procedure will help eliminate the backlog and greatly speed up future case handling.

In short, we are now doing that which should have been done long ago. We are establishing procedures and hiring personnel to carry forward a meaningful compliance program. It would be naive to suppose that the Commission's problems will be resolved in a short time. They will not. There are other handicaps—statutory as well as the cumulative effects of past mismanagement that will still have to be worked out. But this Commission is determined to make Title VII of the Civil Rights Act of 1964 work and work effectively.

It would be tragic if this Agency, which for the first time is beginning to develop an effective compliance program were to fall victim to a reckless political attack.

## DETERIORATION OF SERVICE BY WESTERN UNION

Mrs. SMITH of Maine. Mr. President, if others have had the same continuing experience with Western Union that I have had, I am sure that they have shifted more and more away from using Western Union and toward using long-distance telephone.

The deterioration of service by Western Union began many years ago, as far as my home State of Maine is concerned. Western Union stopped delivering telegrams in most areas of Maine after 5 o'clock in the afternoon. Instead, Western Union started putting late afternoon telegrams in the mail or using the telephone to relay the messages. Western Union closed offices in town after town in Maine.

I have much sympathy for the Western Union employees in Maine for what they have to take in customer resentment at the company management deficiencies of Western Union.

Irresponsibility and poor service have become the normal Western Union pattern—not the exception to the rule.

It is happening all the time. For example, this past Saturday, late in the day, I received a Western Union telegram sent from Terre Haute, Ind., the day before.

Such slow delivery is bad enough. But the telegram sent by three residents of Terre Haute challenged me with the statement of "notice with interest your

figures on numbers of Vietnamese killed by U.S. troops and allies. We must admit grave doubts as to your accuracy. If unfounded—why?"

Since I have never set forth any such figures or statistics, my assistant placed a long-distance telephone call to the first signer of the Western Union telegram to inquire as to the basis for the telegram. He did not chance sending a Western Union telegram in making the inquiry.

The signer of the telegram was promptly reached. He stated that what the three senders of the telegram had done was to make the inquiry in another telegram to another Senator who had stated such figures and statistics, and had asked that several other Senators be sent a copy of such telegram.

Then on Sunday—2 days after the original telegram—Western Union sent a corrected telegram to me stating:

The following is a copy of a telegram we sent to Senator ——— on above date.

And then stating text of telegram originally sent to me.

It is obvious that the only reason that Western Union troubled to make the correction was the inquiry in the long-distance telephone call that my assistant made to the first signer of the original telegram.

Only a short time before, when a joint telegram was sent to me and another Senator, Western Union did not trouble to deliver the message to me. I had to learn about the undelivered message from the other Senator.

These two instances of such erroneous, sloppy, and irresponsible lack of service by Western Union are not exceptions to the rule. Instead they have become par for the course.

## ORIGIN OF KHRUSHCHEV'S STATEMENT "WE WILL BURY YOU"

Mr. FULBRIGHT. Mr. President, we have all heard a good deal in the past decade about the phrase, "We will bury you," attributed to former Premier Khrushchev. I had heard some time ago that this phrase had never been used by Mr. Khrushchev in a formal speech but was a remark attributed to him in the course of a conversation with a number of Western diplomats at the time of the Suez crisis. On November 17, I wrote the Department of State and asked them to provide an account of the history of this remark.

The Department has replied, in a letter dated November 26. I think that this reply will be of interest to Senators and of some historic interest to readers of the RECORD. I therefore ask unanimous consent that my letter of November 17 and the Department of State's reply be printed at this point in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

NOVEMBER 17, 1969.

Hon. WILLIAM P. ROGERS,
*Secretary of State,*
*Washington, D.C.*

DEAR MR. SECRETARY: Reference is often made by Members of the Senate to Mr. Khrushchev's alleged statement in a speech that "We will bury you." It is my impression that this phrase was never used by Mr. Khrushchev in a formal speech but was simply a remark attributed to him in the context of a conversation that he had with a number of Western diplomats during a discussion of the invasion of Egypt at the time of the Suez crisis.

I would appreciate the Department of State's account of the history of this remark.

Sincerely yours,

J. W. FULBRIGHT.

DEPARTMENT OF STATE,
*Washington, D.C., November 26, 1969.*

Hon. J. W. FULBRIGHT,
*Chairman, Committee on Foreign Relations, U.S. Senate, Washington, D.C.*

DEAR MR. CHAIRMAN: The Secretary has asked me to reply to your letter of November 17, 1969, asking for the Department's account of the history of Chairman Khrushchev's remark, "We will bury you."

According to western journalistic accounts, this statement was made by Khrushchev at a reception for Polish leaders on November 18, 1956, at the Polish Embassy in Moscow. Both at this reception, and at a similar one the previous evening at the Kremlin, Khrushchev was in a belligerent mood, and his intemperate remarks concerning the actions by Britain, France and Israel in the Middle East, caused a number of western officials to walk out. Since the "We will bury you" remark was not reported to the Department officially, it may be that it was made after western officials had left the room where Khrushchev was speaking. In the official Soviet text of the Chairman's remarks issued the next day, the "We will bury you" phrase was not included, and on October 5, 1957, the Soviet news agency TASS, responding to citation of this quotation by Ambassador Lodge at the United Nations, charged that it was merely "the fruit of idle talk by those who are instructed to handicap the improvement of Soviet-American relations."

During another reception at the Polish Embassy in Moscow on September 4, 1959, however, Khrushchev did not so much deny the remark as complain that he had been misunderstood. Addressing himself to noncommunist countries, he said: "Mind, we shall not dig your grave in the physical sense." Khrushchev repeated this explanation during his visit to the United States when, at the National Press Club in Washington on September 16, 1959, in response to a question on the quotation, he said:

"What I meant was not physical burying of anyone at any time, but a change of the social system in the historical development of society . . . At the reception in question, I said that during historical development and in the historical sense Capitalism will be buried; that Capitalism will be supplanted with Communism."

Khrushchev's belief that he had been misunderstood is clear from the Russian text of his remarks at the Press Club. In the question addressed to him, the verb "to bury" was translated by the Russian words "zakopat' v zemlyu", which has only the literal meaning of "to bury in the ground." However, the word he claimed he used was "khoronit,'" which has both a literal and a figurative meaning in Russian. To quote the authoritative Russian dictionary edited by Professor Ushakov, the verb "khoronit'" can mean: "To consider obsolete, perished, unnecessary or to bury in oblivion." Thus, it appears that by using this word, Khrushchev had in mind the deterministic necessity, according to Marx and Lenin, that Capitalism would eventually be replaced by Communism.

During his subsequent years in office, Khrushchev frequently used the metaphor of "burying Capitalism" but always was careful to deny its literal meaning. For example, in a speech at Split, Yugoslavia on August 24, 1963, he admitted:

"I once said that we—that is, the communist system—will bury Capitalism, and the bourgeois ideologists began to distort my words, stating that I would bury Capitalism with a spade. Why should we need that? It is not we who will do that; it is the working class, the working people of the capitalist countries themselves who will . . . establish their own power."

I hope that you will find this information useful. If I can be of any further assistance, please do not hesitate to call on me.

Sincerely yours,

H. G. TORBERT, Jr.,
*Acting Assistant Secretary, for Congressional Relations.*

Mr. FULBRIGHT. Mr. President, I further ask unanimous consent to have printed in the RECORD a letter from a constituent from Greenland, Ark. This woman, having no experience in high diplomacy, has the perception to see that if we continue to follow the extravagant and foolish policy of expending our resources and manpower in remote areas of the world where our vital interests are not involved, we will "bury ourselves."

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

WHAT ABOUT THAT?

To the EDITOR:

They are telling us that there has been an overwhelmingly favorable response from "the great silent majority" to Mr. Nixon's speech on Vietnam.

They say the telegrams have poured into the White House in greater numbers than can ever be recalled and that Mr. Nixon is delighted. All this in response to a speech that said nothing, except that he means to keep this war going. That's hard to believe. I think rather that the American people are on the receiving end of a monstrous snow job, which the administration hopes will take some wind from the sails of the anti-war demonstrations soon to occur all over the nation.

They are asking people to demonstrate for Mr. Nixon and his "secret plan" by marching in parades, flying the flag, wearing red white and blue armbands and burning their headlights. Apparently it's okay to demonstrate if you do it for Mr. Nixon's "secret plan" which he cannot reveal at this time. I cannot believe that the majority of the American people will support in blind faith the man who has proven so false since his election a year ago.

Mr. Nixon was elected President of the United States for one reason, he promised to end this insane war and there were just enough of us foolish enough to believe him. I deeply resent being called un-American because I oppose this horrible, unreasonable war. I further resent being placed in the position of being unable to fly my country's flag because to do so would say that I support Mr. Nixon and this war which he has lovingly taken to his bosom. I love my country dearly. I do pledge allegience to her flag, but not to the power-mad politicians whose greed and vanity got us into this mess without regard for the suffering they cause or the blood on their hands.

They are not gods to be kindly obeyed as they would have us to believe, since they are our elected officials. They want us to be silent alright, while they send our children to be slaughtered in whatever obscure corner of the world they see fit, for whatever reason, without the consent of the "great silent majority". It's incredible to me that the people in the high offices of government, especially the President, cannot see what this war is doing to our country. We are committing suicide in this pathetic little country, and if we are to survive as a nation this war must be stopped. They say it's the communists who are behind all the anti-war demonstra-

tions, that they want us to stop fighting. How absurd.

Why should they want us out of Vietnam? They are bleeding us to death of everything we have, of our precious sons and our nation's wealth. It's to their great advantage to keep us there, so that we will finally be so weakened from pouring our resources into this bottomless pit that we will not be able to resist when they are ready to risk out and out war with us. Red China can and is supplying men in overwhelming numbers. Russia and her satellites can and will supply the enemy with weapons indefinitely. If this is how we fight communism, we can do nothing but lose for time is on their side.

We should not be surprised, they have always told us how they mean to conquer us, and our leaders are falling unerringly into the trap they have set. Mr. Nixon wants to "negotiate an honorable peace" with people who are without honor, and it is to their advantage to keep us fighting, and our leaders will not allow us to fight to win. When my son was ten years old, I heard them say on the newscasts that this war would probably last 20 years. A little over two months ago, he was killed in Vietnam. Mr. Nixon's form letter with the rubber stamp signature said he was sorry. The people of our beloved nation are going to wake up. I pray God it won't be too late.

How many of our sons can we afford to sacrifice? I wonder how many people who have lost boys feel it was worth their son's life? I am unable to muster up any enthusiasm for our President's "secret timetable," it's going to come too late for us, and hundreds of thousands of other brokenhearted families. What about that Great Silent Majority, Mr. Nixon?

Mrs. DOROTHY LEDBETTER.

GREENLAND, ARK.

## GIANT IN THE SENATE

Mr. GRIFFIN. Mr. President, the date of his retirement, January 2, 1971, is still months away. But the announcement by Senator JOHN WILLIAMS, of Delaware, that he will not run again has already left a profound impact upon the Senate and the Nation at large.

Unless this giant in the Senate can be convinced to reconsider and run again, the Senate and the Nation will suffer a loss that cannot be measured.

Mr. President, I ask unanimous consent that an article published in the December issue of Nation's Business be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

### A GIANT IS LEAVING THE SENATE

When John J. Williams decided in 1946 he wanted to run for the U.S. Senate, he was a small town Delaware feed grain merchant without political experience, a following or connection in his party's state organization.

"I couldn't use that old line about my friends urging me to run," he recalls candidly. "I don't remember anybody ever asking me. In fact, most of my friends thought it was a pretty farfetched idea."

And the assumption by a 42-year-old novice that he could enter state politics at the top certainly didn't sit well with Delaware's Republican leaders.

"I had never met the state chairman," Mr. Williams says. "He was a little peeved that someone would be so brash as to announce a Senate candidacy without talking to him. But I went into it on the principle a man has a right to seek office in this country without the consent of anybody."

Most politicians, when asked why they pursue public office, come up with high-flown answers about service to nation and mankind, etc. John Williams' explanation is far more direct: "I thought I'd like to try it and I did."

"Oh, I'd been pretty concerned as a businessman about the trend in the country toward too much centralization of power in Washington," he adds. "But I didn't have any great noble drive."

Drive or no drive, he began traveling around the state, working long, gruelling days, to make himself and his views known.

Veteran Delaware Republicans, anticipating a Democratic victory, had shied away from making their party's Senate race. By the time they sensed that a Democratic success might not be inevitable after all, that the national mood was for a change after the long Depression and war years, Mr. Williams was well ahead for the nomination.

He went on to defeat the Democratic incumbent by nearly 12,000 votes out of 113,500 cast.

Sen. Williams had entered the feed grain business with his brothers immediately after finishing high school and leaving the family farm. Now, a brother took over responsibility for the store.

"There was nothing big about it, but we made a living," the Senator recalls. "He did all right after I left, so I guess I wasn't as important as I thought I was."

### INTO THE BIG TIME

In Washington, the political novice and small businessman, lacking a college education and possessing a speaking style that ranged from an almost inaudible whisper to a rasp, joined a body composed mostly of lawyers or professional men—men long on political experience, on education, on knowledge of big business and finance, and on dramatic oratory.

But it was the grain merchant from Millsboro, Del., who was to rock the Truman Administration with disclosures of staggering corruption in the Internal Revenue Service and elsewhere in government, who was to assail the conduct of Sherman Adams in another Administration and was to bring about the downfall of Bobby Baker in still another. And John Williams' grasp of high-level economics and tax policies, acquired through long, hard work and study, was a major factor in forcing Lyndon Johnson to surrender and accept spending limits in return for Congressional passage of the 10 per cent income tax surcharge.

Now, at 65, Sen. Williams has announced he will retire when his present term ends in 1970. He is approaching the final year of his Senate days, working and fighting as hard as ever for causes he has championed from the moment he arrived—honesty, efficiency and economy in government.

He has earned a title given few others in the nation's history: "The conscience of the Senate."

In the late 1940's, information came to Sen. Williams of graft in key federal tax offices across the country. He began digging, but, in his unflagging insistence on accuracy and fairness, it would be more than two years before he made his first speech on the subject.

The trail led slowly but inexorably from lesser lights in regional offices to the highest echelons of Internal Revenue, the Justice Department and the White House itself. Resignations, indictments and convictions followed.

But party lines play no role in Sen. Williams' outlook on governmental ethics.

Sherman Adams, known as the "assistant president" during the Eisenhower Administrations, came under fire in 1958 for accepting gifts, including a $2,400 rug, from an industrialist having problems with government agencies. Sen. Williams was as outspoken as he had been when a Democrat was in the White House. "There can be but one code of ethics for public officials," he told the Senate.

"I condemned the deep freezes," he said in a reference to a famous gift to a Truman aide, "and I will not defend the rugs now."

### ENTER THE BAKER CASE

It was a brief, newspaper account of a civil suit that launched the Senator on one of the best-known of his many battles against corruption in government. A disgruntled owner of a vending machine company had filed suit against Robert G. "Bobby" Baker, secretary to the Democratic Senate majority. The owner said he had paid Baker for help in obtaining a contract that went somewhere else.

"I wasn't interested in where any contract went," Sen. Williams recalls, "but I did want to know why a Senate employee was being paid to get somebody a contract."

He began digging into the affairs of Baker, the ex-page who had risen to the influential secretary's post under the patronage of the majority leader at the time, Lyndon B. Johnson of Texas. The Delaware Senator wanted to know whether Baker had used the job to further what turned out to be extensive, outside business interests.

"It just descended like an avalanche," Sen. Williams says. "In a short period of time I had developed enough information that I was convinced something was bad."

He took it to Senate leaders, suggesting a meeting with Baker. "I wanted to outline the things that bothered me and Baker could respond. Then I—and they—could evaluate his responses." Baker could not be reached for an initial meeting.

A second meeting was arranged after a firm pledge from Sen. Mike Mansfield, Mr. Johnson's successor as majority leader, that Baker would be there. But Sen. Mansfield arrived alone, downcast, Baker had resigned.

"We can't stop here," Sen. Williams commented. He insisted on the full-scale investigation that led to Baker's conviction of income tax evasion, theft and conspiracy to defraud the federal government. The shock waves set into motion by the Baker case launched a new era of concern on Capitol Hill about standards of conduct expected for Congressional members and staffs.

The Senate adopted a code of ethics providing for a combination of public and private reports on financial interests. Sen. Williams says that development was "a giant step forward," but more should be done.

### IT'S HOW YOU GOT IT

He advocates establishment of procedures, with proper safeguards, for evaluating Congressional income tax returns when doubts arise. He sees little value in a proposal pressed frequently by Senate liberals to require public disclosure of financial holdings as of a given date each year.

"It's not what you own, it's how you got it," the Senator says. "The tax return is the key."

Sen. Williams has been constantly at work on issues less-publicized than Capitol Hill ethics.

He has clashed with government officials repeatedly as he has issued well-documented broadsides of waste and inefficiency in housing, agriculture, public works, welfare and many other programs.

A mark of the fairness that has won him high praise from other Senators in both parties in his unfailing practice of giving advance notice to anyone he intends to talk about in connection with inefficiency or dishonesty.

The accomplishment Sen. Williams ranks as the high point of his career as a legislator was the passage in 1968 of the bill making spending cuts the price the Johnson Administration had to pay for approval of the 10 per cent income tax surcharge.

"I'm certainly not proud to have a tax attached to my name," says Sen. Williams, co-author of the bill. But he sees a far more overriding consideration: "I am thoroughly

convinced that if Congress had not acted on both taxes and spending—they had to be tied together—the American dollar would be gone today."

He adds a cautionary note: "We're not out of the woods yet. Merely raising taxes and putting the money into the government spending stream further aggravates the situation."

Conceding that spending limit loopholes later eroded the impact of the original bill, Sen. Williams says that's why he fought all the harder in 1969 not only for greater cuts but for ironclad assurances they will be made.

NOBODY'S PERFECT

Looking back over his years in the Senate, would he have done anything differently?

"Oh, goodness, yes," he responds quickly with a smile. "You make a lot of mistakes. I often wonder what I was thinking about on some of them."

(His candor once threw off a Democratic opponent who declaimed from a campaign platform that he just couldn't understand how Sen. Williams had voted the way he did on a certain issue. The Senator's reply: "I don't understand why I voted that way either. At the time it seemed to be the right thing to do—but it wasn't.")

One place where Sen. Williams will leave no mark after 24 years in the nation's capital is the party-going scene which many of his colleagues frequent. While his mail is heavy with the invitations that all Senators—particularly senior members—receive to cocktail parties, dinners, receptions, diplomatic functions and the like, he rarely attends any of them.

He lives quietly in Washington throughout the week and spends his weekends in Delaware, often at favorite hunting or fishing sites.

The Williamses have a daughter and three grandchildren. When he came to the Senate Sen. Williams boasted of being "the youngest grandfather" in the membership. The passage of time has enabled him to escalate to the claim of being "the youngest great-grandfather in the Senate."

His decision to retire was made in characteristically direct fashion—he cited his long-held view that no Senator should embark on a new term after 65.

The Senator has no specific plans for retirement years—that feed grain business no longer is in the family—but guarantees, "I'm not going home and prop my feet up. I'm not going to lose interest."

He's concerned about the nation's future, and holds that violence and anarchy, on campus or city street, "cannot be defended or tolerated and must be dealt with affirmatively."

At the same time, he adds, "we adults have to recognize that, as we start to correct the situation, we have to look at our own houses.

"When men holding high positions of trust betray that trust, we are creating in the minds of young people an element of doubt about the moral standards we are following ourselves and are asking them to follow."

RESPECTFUL OPPOSITION

John Williams is a conservative by anybody's yardstick.

But it was one of the most liberal of liberal Democrats, William Proxmire of Wisconsin, who said of him:

"I feel he is the one member of this body who is its most able sentinel. I hope . . . that this remarkable man will reconsider his decision to retire."

And another Democrat, Majority Leader Mansfield, summed up Sen. Williams' career in a fashion that will draw little dissent from those who have followed it:

"He has been a giant and his departure from the Senate will leave a void that will be almost impossible to fill."

## VIETNAMIZATION OF THE WAR

Mr. McGEE. Mr. President, a distinguished strategist, Britain's Sir Robert Thompson, has recently returned from Vietnam—where, indeed, he formerly served his own government—with the view that the Vietnamization of the war there can be carried off successively if America is prepared to provide needed support for the Saigon government for some time to come.

That is the substance of Sir Robert's report to the White House, according to reports appearing lately. In his view, according to a dispatch by J. F. Ter Horst, published in Sunday's Washington Star, up to 100,000 men may be needed for from 3 to 5 years to insure the success of the strategy, with some smaller number required for 10 or even 15 years. These would not be, in the main, combat forces, however. And, as Mr. Ter Horst observes, such a policy would require public support. It would require patience. It is a policy which aims at the long-haul, but at a much lower cost in lives and dollars, with the goal of wearing out the enemy's hope of achieving a Communist South Vietnam.

Mr. President, I ask unanimous consent that Mr. Ter Horst's report on Sir Robert Thompson's strategy be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BRITON BACKS VIETNAMIZATION

(By J. F. Ter Horst)

President Nixon's "outside expert" on Vietnam has some strong notions on how such wars should be conducted. If the President heeds his advice, American boys may be in Vienam for many years. But Saigon might evade Hanoi's clutches.

Sir Robert Thompson, the British strategist who kept Malaysia from falling to Communist guerrillas, made the point to Nixon at the White House on Wednesday, as he had two days earlier with Henry A. Kissinger, the President's adviser for national security affairs.

The thrust of the Briton's position is that "Vietnamization" of the long and costly war will work, and not merely to pave the way for U.S. troop withdrawals. If the United States goes at it properly, and if public patience can be maintained, he believes South Vietnam can be denied to the Communists just as Malaysia has been.

BACK FROM VIETNAM

He conferred with Nixon and Kissinger on his return from a tour of South Vietnam for the Rand Corp., one of the "think tank" groups which advise government agencies on policy alternatives. He had last seen Nixon two weeks before the President's Nov. 3 speech on Vietnam.

That address hinted at consideration of such a strategy, if not outright acceptance.

Press Secretary Ronald L. Ziegler says he assumes the British specialist will be meeting with other members of the administration.

Ziegler said Nixon found the report "highly interesting" and that the President probably would be seeing him again from time to time.

"Sir Robert Thompson went (to South Vietnam) with the total encouragement and, to some extent, on behalf of the administration," Ziegler said.

LONG-HAUL STRATEGY

In conversations with U.S. military advisers and others, Thompson advocates what he calls a "long-haul, low-cost strategy" for keeping South Vietnam afloat.

It is essentially the same plan he designed for defeating Red guerrillas in Malaysia in the 1950s, plus modifications for Vietnam devised while serving as head of the British advisory mission in Saigon from 1961 to 1965. He has set it down in a little-noticed book, "No Exit From Vietnam."

What he advocates above all is the adoption of a policy to build a strong South Vietnamese government (not necessarily democratic) and an end to the strategy of destroying the enemy militarily.

There would be counter-insurgency forces, to be sure, but mainly nationalist forces, not Americans. They would guarantee physical security first to key areas, such as Saigon, Hu and Da Nang, and gradually extend their security perimeters until they overlap.

Instead of trying to decimate the Viet Cong, he advocates that they be pushed out, denied access to local support and kept perpetually on the run until such time as they lose morale, weaken and grow weary of further conflict.

Meantime, the cleared areas would permit Saigon to begin local control through a civil service responsive to the national government.

To make this work, in his view, the United States must preserve its military presence in Vietnam indefinitely.

Forces could be scaled down, though. He shares the view that U.S. combat units could be withdrawn and probably considerable support forces, too, in time.

But in his view, there must be sufficient U.S. military strength on the ground and in the air—say 100,000 men—for three to five more years to achieve minimum Vietnamization results. For complete success, he thinks 10 or 15 years would be required.

Nixon, however, would have several other factors to consider before following this strategy.

First, he would need to have public support. If he can get the war down to a low-cost, low-kill level, it's possible the American public would tolerate a long-time U.S. presence in Vietnam just as it has tolerated one in South Korea for nearly two decades. The United States still has a 56,000-man force in Korea.

Second, the Briton's strategy would run into trouble if North Vietnam decided to mount large-scale offensive warfare in a classic military sense. So Nixon would need some enemy "cooperation" for success with such a plan, or must keep sufficient U.S. forces there as added insurance—or both.

---

## THE LEAGUE OF WOMEN VOTERS AND POLITICAL RIGHTS FOR WOMEN

Mr. PROXMIRE. Mr. President, The Human Rights Convention on Political Rights for Women was signed on March 31, 1953. Forty-two nations have placed their signature on this declaration. The United States has not, as yet, seen fit to do likewise. When, and if, this Nation ever does join in an international commitment to the political rights for women, it will be in large part due to the efforts of the League of Women Voters.

The League of Women Voters has worked for years for the advancement of political rights for women. The origin of this league reveals a large part of its character. The origin was documented in a bulletin recently sent out by the League. It stated:

On February 13, 1920, six months before the 19th Amendment to the United States Constitution was ratified, delegates of the

American Woman Suffrage Association held a victory convention in Chicago, at which the following wire from President Wilson was read:

"Permit me to congratulate your Association upon the fact that its great work is so near its triumphant end that you can now merge it into a League of Women Voters to carry on the development of good citizenship and real democracy . . ."

Carrie Chapman Catt, President of the American Woman Suffrage Association, which had spearheaded the 72-year drive for the American woman's franchise rights, described the function of the new organization:

"In the League of Women Voters we have an anomaly; we are going to be a semi-political body. We want political things; we want legislation; we are going to educate for citizenship. In that body we have got to be non-partisan and all partisan."

And so, in 1920, a National League of Women Voters emerged, with the goals of educating the new electorate and lending active support on legislative issues. Mrs. Catt was named Honorary President, Mr. Maud Wood Park was elected National President, and the work of the League of Women Voters began. What started as an experiment to promote the participation of women in government and to help 20 million enfranchised women carry out their new responsibilities, has grown through the years into a unique, nonpartisan organization that promotes political responsibility among all citizens.

The importance of the League of Women Voters cannot be exaggerated. The educational value of this organization has been highly valuable and significant to the democratic system of which it is a part.

The example of the League of Women Voters dramatically illustrates the necessity of ratifying the Human Rights Convention on Political Rights for Women. The league has shown its capabilities in this area. It is up to this Chamber to recognize this fact, to ratify the Convention of Political Rights for Women and, therefore, to make our national commitment to political rights for women an international one.

## FINNISH INDEPENDENCE DAY

Mr. GRIFFIN. Mr. President, thousands of Americans of Finnish descent throughout this great land observed and celebrated the independence of their ancestral homeland on December 6. On this day in 1917, Finland declared its independence from Soviet rule.

While that date each year is of special significance for Finnish-Americans, it is a date which is of importance to all Americans because all have been enriched by the contributions of Finnish culture to our lives.

I am particularly pleased to call attention to Finnish Independence Day since thousands of Finnish-Americans now make their homes in Michigan.

The settlement of Finns in America coincides with the founding of the earliest colonies. The first Finns arrived in the 17th century as part of a Swedish colony that settled in what is now Delaware. Their colonial settlement extended throughout the Middle Atlantic and New England States.

The mid-19th century witnessed the largest influx of Finns to America. Their settlement was extended to the Midwest and California, the Pacific States and Alaska.

Understandably, the great majority of Finns were attracted to those regions of the United States which most closely resembled their native land. Consequently, the areas with the largest Finnish populations are in the Northern States and the Pacific coast: Michigan, Minnesota, Ohio, Wisconsin, New York, Massachusetts, Washington and California.

By 1930, Michigan had the largest Finnish population. It is in Michigan's Houghton County, in the beautiful Upper Peninsula, that the concentration of Finnish population can be found.

Finnish contributions to life in America are visible throughout the country. The institutional life of these civic-minded people can be seen in their many churches and workers halls. Historical markers dot the landscape.

Suomi—soo'-me—College in Hancock, Mich., stands out as a living testament to the Finnish commitment to higher learning. At Suomi are embodied the Finnish-American Historical Archives.

Perhaps the most widely known of all Finnish contributions to America is the work of the the late architect, Gottlieb Eliel Saarinen. Saarinen's creations, which add contemporary beauty to the landscape of the United States and other countries, include the General Motors Technical Center in Detroit, the American Embassy in London, the Kresge Auditorium and Cylindrical Chapel of MIT, and the Chicago Tribune building which was fundamental in revolutionizing skyscraper architecture in America.

Thus it is with sincere appreciation for their many-faceted contributions to the enrichment of American culture that I take pride and pleasure in paying tribute to all Americans of Finnish descent.

## ELEMENTARY AND SECONDARY EDUCATION ACT FUNDING

Mr. CRANSTON. Mr. President, last April President Nixon recommended substantial cuts in federally assisted library programs for fiscal year 1970. He made no budget recommendations for funds for school library resources, textbooks and other instructional materials provided for under title II of the Elementary and Secondary Education Act. He also reduced by almost 50 percent funds for public library services and cut all funds for the construction of public libraries under titles I and II of the Library Services and Construction Act.

Unless Congress at the very least restores these cuts, school and public libraries will face unbearable financial burdens in fiscal year 1970, and education, generally, will suffer. In California, for example, the dollar effect of the proposed cuts are the following: ESEA II, from $4,786,011 in fiscal year 1969 to zero in fiscal year 1970; LSCA I, from $2,666,778 in fiscal year 1969 to $1,154,367 in fiscal year 1970; and LSCA II, from $1,376,957 in fiscal year 1969 to zero in fiscal year 1970.

Mr. President, I recently received a letter from Mrs. Alma B. Polk, chairman of the Legislation Committee of the California Association of School Libraries. In that letter she describes the impact of ESEA II funds in California and the Nation. Because the HEW appropriations bill will soon come to the floor for consideration, I ask unanimous consent that the portion of her letter describing the impact of ESEA II be printed in the RECORD.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Since Title II funds became available in California, approximately 1500 new school libraries have been established by local education agencies, more than 12,000 existing libraries have been expanded, and 143 Phase II exemplary libraries have been established. With the funds available to date, nearly six million library books have been purchased, more than 350,000 periodicals have been obtained, and nearly 800,000 audiovisual items have been added to library collections.

On the national level, new library and instructional materials were made available to approximately 44.6 million children and 1.8 million teachers, in fiscal year 1967. In FY 1966–67, 8,487 new libraries were established, and existing libraries were improved in 91,000 public elementary schools and 41,500 public secondary schools. Loans of materials to private schools benefited 3.1 million students. Many states have reported an increase in local and state financial support of school libraries, as a result of the "seed" money from ESEA Title II.

## THE BIAFRA ISSUE WILL NOT GO AWAY

Mr. PEARSON. Mr. President, in this holiday season it is only natural that we look inward and pause to enjoy our good fortune and the fine company of our friends and neighbors. But even now we must face some heavy responsibilities that will not go away. One of these is our humane duty to help those less fortunate than ourselves. Nowhere is this duty more evident than in Biafra where more than 1,000 women and children still die daily from starvation.

Mr. President, we all know that poverty and hunger still stalk millions of Americans. And clearly we should take whatever steps are necessary to cure these evils in our society. But our domestic concerns should not be used as an excuse for failing to respond to desperate cries for help in other quarters of the globe. We are all together on this fly-speck in space as our brave Apollo astronauts have so forcefully reminded us and we simply must redouble our efforts to support the mercy airlifts that are the only link to life for millions of our fellow human beings in faraway Biafra.

Without in any way wishing to influence the course of military and political events in the bitter civil war which now divides Nigeria and Biafra, many Americans have supported the effort by the Joint Church Aid, USA religious relief consortium which has shouldered the major responsibility for keeping the planes flying. But they must be prepared to do more if all the good work they have done thus far is not to be lost. Another $9 million is needed if these flights are to continue for the next 6 months. I hope that all concerned Americans will respond to this appeal in time.

Mr. President, yesterday the Washington Post published an excellent article, written by Henry Owen, discussing in an optimistic tone the immediate future needs of the current relief operations. I ask unanimous consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BIAFRA SITUATION IS NOT HOPELESS ONE

(By Henry Owen)

Few Americans probably read a short news item last week announcing that an emergency drive was being launched to raise private U.S. funds for starving children in Biafra; the main headlines that day were about Songmy. But even more lives are at stake in Biafra than Vietnam. As many as two million Biafran children will live, or grow up stunted in mind or body, depending on what is done in the months ahead.

There is a widespread view in this country that the situation is beyond repair. This is dead wrong. It rests on three misconceptions:

*Misconception No. 1* is that the only answer to Biafran starvation is ending the war. The fact is that food relief is highly effective. It has already saved the lives of as many as two million Biafrans, mostly children.

*Misconception No. 2* is that relief hinges on opening a surface corridor between blockaded Biafra and the outside world. This would be the best answer, and negotiations to this end are important. But massive relief can pass, and has passed, through the existing air corridor. Earlier this year there were as many as 40 cargo flights per night and this largely met food needs. Now there is about half that number of daily flights; but this is still saving the lives of most children in the vulnerable age group. Clearly, air relief works.

*Misconception No. 3* is that there is a "right" side and a "wrong" side in the dispute between Biafra and Nigeria over relief, and that this should somehow condition our approach to the problem.

Nigeria is doing what comes naturally to any government, including our own a century ago: using force to put down secession. It is using a time-honored method—blockade—to this end, and is no more anxious than the Union was in the Civil War to weaken that blockade by letting civilian supplies through. Biafra, on the other hand, believes that it is reliving the American Revolution—trying to create a new nation. Facing a militarily hopeless situation, its leaders are not above using the plight of children to dramatize their case to the world.

Our business is not to judge these two governments, but to prevent them from destroying a whole generation of Biafran children. The lives of these children rest largely on a small fleet of airplanes, which fly in to Biafra every night from the nearby Portuguese island of Sao Tomé. Twenty-five crew members have lost their lives so far in these flights. Although they are mounted by Joint Church Aid International, an ecumenical organization which draws on several countries for crews and funds, the lion's share comes from the United States.

It will cost about $9 million to keep these flights going another six months. Perhaps by then the war will be over. Translating this $9 million into children's lives is difficult, because reliable data are scarce, but it seems to work out at a little over $10 per child; relief agencies estimate that 1,000 children are dying daily now and that this would increase to about 5,000 if the flights were to stop.

Most of the costs of Joint Church Aid are met, directly or indirectly, by the U.S. Government. But some private funds must be raised. Earlier this year, Biafran relief was "in" and that money was easy to raise. Now people seem to be bored with the whole thing, and it is hard to come by.

Few Americans would pass a child on the verge of death and not fork up a few dollars to save him. But it's hard to picture that child without seeing him, and it's harder still to send the money to an anonymous New York Post Office box number (Box 4030, Church Street Station, New York City, in case you're interested) than to hand it over in person. But this is what the whole thing hinges on.

The need is not only to keep the flights going, but to expand them—in order to save the children who are still dying. The obstacle here is a shortage of bases outside Biafra from which to mount these flights. Joint Church Aid is using its existing base to capacity. Before June, the International Committee of the Red Cross was mounting as many as 20 flights nightly from other bases. When one of its planes made the mistake of flying at dusk and was shot down by the Nigerian air force, Red Cross officials suspended flying until an agreement for daytime flights could be worked out with Nigeria and Biafra. This was a tragic—if understandable—miscalculation. That agreement was never reached.

Even if the Red Cross should decide to resume night flights, it would probably find the countries from which it formerly flew reluctant to permit new flights—for fear of offending Nigeria. Ditto for other nearby countries which might otherwise provide new bases. Perhaps vigorous efforts at persuasion by the United States and other interested countries would do some good. More distant African bases may be available, but it would only be economical to use them for high value cargo—protein, vitamins, etc.—in view of the large fuel requirement. The idea of stationing a carrier off the coast has come to nothing. Apparently no country (not even Great Britain or France) believes that it can spare one from urgent operational needs; or perhaps they are deterred by the possibility of Nigerian attack.

So the problem—whether we are talking about keeping up existing flights or expanding them—boils down to one simple question: How seriously do people outside Biafra take the whole business? It has receded from the headlines, but children are still dying. In the wake of Songmy, our response to their need may tell a good deal about what kind of country America really is.

## BRONSON GENTRY RECEIVES VOLUNTEER SERVICE AWARD

Mr. GRIFFIN. Mr. President, the city of Detroit and the State of Michigan are fortunate to be able to count Bronson (Butch) Gentry as a resident. Recently Mr. Gentry was named to receive the 1969 Lane Bryant Award for Distinguished Volunteer Service.

Mr. President, I ask unanimous consent that an article published in the Detroit Free Press of December 2, 1969, and a statement by the Lane Bryant awards committee be printed in the RECORD.

There being no objection, the items were ordered to be printed in the RECORD, as follows:

TOP CIVIC AWARD WON BY JANITOR

Bronson (Butch) Gentry, a Detroit janitor who spends his spare time trying to improve living conditions in his east side neighborhood, has won the $5,000 Lane Bryant Award for Distinguished Volunteer Service.

Gentry, who works as a janitor for the Borg-Beck Division of the Borg-Warner Corp. and lives at 744 Tennessee, will accept the award Thursday night at a dinner at the State Department in Washington, D.C. George Romney, secretary of the Department of Housing and Urban Development, will be the guest speaker.

Raphael Malsin, president of Lane Bryant Inc., which makes the $5,000 award annually, will present it to Gentry.

He has been active for years as a community organizer. He led the fight to improve Maheras Field, a recreational facility which was deteriorating badly. He also organized a citizens' vigilance committee to maintain discipline on school buses.

Last February, Gentry won the Detroit Police-Citizen Award for outstanding contributions to police-community relations.

THE LANE BRYANT VOLUNTEER AWARDS, DECEMBER 4, 1969

The historic flight of Apollo 11 has given a whole new meaning to the word impossible. That which for so many centuries stood as a symbol of the unattainable, now is a shinning beacon of man's potential for achievement. And, while illuminating the magnificient heights to which man can aspire, the very success of the moon landing cast a harsh glare on the so-called impossible tasks we still face here on earth.

The Age of the Moon must give way to the Age of Man as the world faces its mounting social ills. Through the centuries, man has efficiently and successfully sought out physical boundaries to conquer. Now he must apply the same determination in seeking out the answers to some of the most compelling questions he has ever faced: how to rebuild decaying cities, feed the hungry, curb overpopulation, restore the purity of the atmosphere and the waters, heal the sick, revise crumbling educational systems, and initiate learning where there has been none. The list is long; the task is great.

For many quiet Americans around the world and in the United States, these *impossible* conditions do not present a new challenge, but rather a rededication to solving problems they have been successfully battling for years. It is these Americans that the Lane Bryant Volunteer Awards have sought out and honored from their inception in 1948.

In reading about the work of the winners and finalists, an important common denominator emerges—self-help through mutual involvement. True, each provided aid and support to those in need. But, wherever possible, they have gone a step further . . . they taught others how to begin working toward their own support and a life of self-reliance and dignity.

The purpose of the Lane Bryant Volunteer Awards is to bring this work to the public attention—not to "whitewash" social ills, but to highlight them and the positive action combatting them. Raphael Malsin, founder of the Volunteer Awards said of them: "They serve as a kind of x-ray into the inner workings of our society. They illuminate the trouble spots, they highlight the symptoms, they show us the best and the worst. They are a kind of laboratory where we can see healing ideas being tested. They are a tribute to the power of individuals, the best kind of individuals."

The 1969 Volunteer Awards are a tribute to those who would not—could not—be thwarted by the *impossible*.

STATEMENT BY THE AWARDS COMMITTEE

On a Monday morning in Detroit, young children cross at the once dangerous corner of Kitchner and Jefferson—safely. They might have been killed or seriously injured, as others had been, while the community was unable to secure a traffic light.

On a Tuesday evening in Detroit, parents attend a "coffee conference." They speak informally with their children's teachers—gaining valuable insights—bridging the gen-

eration gap. They might have been sitting at home, asking one another where they had failed.

On a summer day in Detroit, a group of youngsters swim in their recreation area's new pool. They might have been out vandalizing a supermarket.

On Thanksgiving day in Detroit, a woman serves her fourteen children a fine turkey dinner, though they had been living on meager funds. They might have had very little to be thankful for.

The outlook for many Detroit citizens might have been very bleak . . . if it were not for the efforts of Bronson Gentry.

The city of Detroit, like many others, has experienced its share of restlessness, disorder, vandalism and crime. With his strong belief in community self-help, Bronson Gentry organized his neighbors into groups able to take action against these social ills.

As scoutmaster of a troop he founded, Mr. Gentry guided his young men in an exhibition aimed at curbing vandalism. In addition, he sponsored a program on crime and vandalism for local merchants and churches, and was instrumental in organizing and directing a citizens' vigilance committee to maintain discipline on school buses.

An urban renewal program elsewhere in the city resulted in a housing shortage in Mr. Gentry's neighborhood, as well as overcrowded schools and increased crime. Mr. Gentry took action. He petitioned City Hall for the improvement of Maheras Field, a recreational facility that had deteriorated to the extent that it was no longer safe for children. As a beginning he requested the construction of baseball diamonds, to be followed by a new field house, and finally, a swimming pool. The city's initial response was good. However, when the next fiscal year arrived, the money was suddenly diverted elsewhere. But not for long. Mr. Gentry went to work once more, and the money was reallocated for Maheras.

Bronson Gentry waged an unrelenting campaign for neighborhood conservation, undertaking an ambitious battle to have dangerous and dilapidated houses torn down. He offered reasonable plans for the use of lots left vacant, organized alley cleanups, improved street lighting, initiated more frequent garbage pick-ups and regular police patrols. He saw to it that traffic lights were installed on busy street corners where they were desperately needed, and worked to rid the streets of abandoned and junked cars.

A leader in the volunteer anti-crime patrol which keeps a watchful eye on the city, Mr. Gentry went "into the streets" with a large group of men to "cool things down" when a summer disturbance threatened to erupt into a riot. As a result of his activities in this area, he recently received the Police Citizen Award in recognition of his outstanding contribution to police-citizen cooperation and understanding. The *Detroit News*, originator of the award, felt that Mr. Gentry displayed a unique sense of the individual's obligation to the community.

Recognizing the problems of overcrowding in the schools, Bronson Gentry led the fight for the construction of a new school. As head of a Project Advisory Committee, he prepared educational specifications for the new facility, which is now located next to Maheras Field, affording the area's children a place to play after school without having to cross dangerous intersections. Another first for the school is a community kitchen-lounge for informal parent-teacher conferences.

Bronson Gentry has demonstrated an unusual rapport with neighborhood youngsters. One of his most successful undertakings has been his work with boys involved in vandalism or petty theft. Paroled in his custody and "sentenced" to a few weeks of work in his basement, they spend every free hour working with saws and lathes, learning how to build, to create, to spend time constructively. Youngsters rarely want to leave when the "sentence" has been completed.

As chairman of the Youth Recreation committee of the Riverview Community Council, Mr. Gentry leads the area's boys and girls in projects designed to benefit needy families. Among their yearly activities is the distribution of Thanksgiving baskets to large families, widows and senior citizens.

Bronson Gentry is not a professional; he is a janitor in a local factory. He is concerned about his community, and is an indomitable force in its preservation. With his help, the future just might be a great deal brighter for the citizens of Detroit.

## SCHOOL DESEGREGATION IN THE NORTH

Mr. CASE. Mr. President, the distinguished Senator from Mississippi (Mr. STENNIS) in recent weeks has commented frequently, both on the floor of the Senate and in hearings on appropriations for the Department of Health, Education, and Welfare, on continuing school segregation outside the South.

In my view, the situation which the Senator from Mississippi has pointed up should be of concern to all of us.

Indeed, many of us are concerned about segregation regardless of where it exists. The distinguished leader of my own party in the Senate, the Senator from Pennsylvania (Mr. SCOTT), as well as both Senators from Massachusetts (Mr. KENNEDY and Mr. BROOKE), just recently have expressed their concern with this situation.

As I pointed out during hearings on the Health, Education, and Welfare appropriations, I believe there is some justification for feeling that the South is taking the brunt of the desegregation effort while the rest of the country is being let off more easily.

Mr. Leon Panetta, head of the Office for Civil Rights in the Department of Health, Education, and Welfare, agreed with me on this point.

But I disagree with any contention that the situation in the North justifies diminishing the pressure for desegregation in the South.

In my view, two wrongs do not make a right. We must get at the problems in the North, but not at the expense of our efforts to correct even more severe problems in the South.

Let me demonstrate what I mean by a more severe problem in the South.

On Tuesday, the Senator from Mississippi commented on minority group enrollment in schools in my own State of New Jersey.

Because I wanted to have some basis for determining the relative severity of the problem in my State, I asked the Department of Health, Education, and Welfare, which provided the figures on New Jersey to the Senator from Mississippi, for a comparison of the situation in my State with that of Mississippi.

The analysis shows that 87.4 percent of the black students in Mississippi are enrolled in all black schools while less than 1 percent of the black students in New Jersey are similarly enrolled.

On the other side of the coin, 6.7 percent of the black students in Mississippi are enrolled in schools which have a majority enrollment of nonblack students while the comparable figure for New Jersey is 41.2 percent, according to HEW.

A comparison of Jackson, Miss., with Jersey City and Newark, N.J., shows similar results. I do not want to dwell on this point or appear to minimize the need for corrective action in my State or other areas outside the South by presenting this comparison.

My purpose is only to show that the greatest need for desegregation efforts still is in the South, and those efforts must not be diminished as we seek to make additional efforts outside the South.

I would welcome the support of the Senator from Mississippi in developing legislation which would direct greater effort toward eliminating the problem throughout the country.

Legislation to accomplish this can be worked out. I shall be glad to join Senators toward that end. I believe such legislation should be permanent in nature, not limited to a single year, as an amendment to an appropriations measure would be.

Mr. President, I ask unanimous consent that a table showing the comparison of minority group assignments to schools in New Jersey and Mississippi, which I have referred to in this statement, be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

MISSISSIPPI AND NEW JERSEY—SCHOOL ASSIGNMENTS BY RACE, FALL 1968

| Reports | Mississippi | | New Jersey | | Jackson, Miss. | | Jersey City, N.J. | | Newark, N.J. | |

## FORMER VICE PRESIDENT HUMPHREY DISCUSSES FOREIGN AID

Mr. McGEE. Mr. President, Hubert Humphrey, who served among us as a Member of the Senate and as Vice President, has authored a newspaper column, published in today's Washington Daily News, to which I invite the attention of the Senate. The article expresses very well my own feelings on the subject of foreign aid and urges us not to take the easy road of reducing President Nixon's foreign assistance request this year. Mr. Humphrey deals with the reality of foreign aid's political unpopularity. But he deals as well with the need to spur an end of want in other places around the globe in the name of peace. I ask unanimous consent that his column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

WE MUST HAVE THE COURAGE TO CONTINUE OUR PARTNERSHIP WITH OTHER NATIONS

(By Hubert Humphrey)

Frustration over the war in Vietnam has made it fashionable to talk about the use of American power in terms such as the arrogance of power, the limits of power, the discipline of power.

This is useful, but we must not delude ourselves into believing that by not exercising our power we are not influencing developments in the world.

The world has become too small. We cannot turn our back on the hunger and poverty, and the rising expectations.

While we do not want the military overcommitment of another Vietnam, we must continue to seek peace thru national development, national security, and control of the arms race.

We cannot buy peace with an $80 billion a year defense budget. It has been proved over and over again that real peace does not come out of the barrel of a gun.

As Pope John XXIII said, "Where there is constant want, there is no peace."

Helping other nations is not always easy. There is controversy, there is waste, and American aid does not mean other nations will march to the beat of our drum.

Since the end of World War II, we have given $56 billion in economic aid and $36 billion in military aid to other countries. In addition, we have loaned out another $40 billion.

Several weeks ago, the House authorized $2.2 billion in foreign aid for this current 1969–70 fiscal year. This is $400 milion under what was requested by the Nixon administration. The Senate now must act.

President Nixon requested $375 million for military assistance plus $605 million in economic assistance for Latin America, $625 million for the Near East and South Asia, $440 million for Vietnam, $234 million for East Asia, and $185 million for Africa.

The President recognizes the political unpopularity of foreign aid. During the campaign he said, "Let us remember, the main purpose of foreign aid is not to help other nations but to help ourselves."

His 1969–70 foreign aid request is the smallest of the options presented to him at a March meeting of the National Security Council, and it represents a cut of $138 million from the budget request of the outgoing Johnson administration.

President Nixon is probably right in his political assessment. A large foreign aid request would have come under sharp attack in Congress.

But, as a nation, we cannot be very proud of our steadily declining investment in the development of other nations. We cannot be proud of the fact that we spend 40 times more on our military as on our efforts to bring about peaceful change. We cannot be proud of the fact that six other nations invest a greater share of their resources in helping others.

The have-not nations have been growing at an economic rate of about 5 per cent a year. Except where oil has been discovered, no poor country has been able to make significant progress without foreign aid.

This growth rate can be accelerated if we do not continue to cut back our foreign aid investment.

We now invest less than four-tenths of 1 per cent of our gross national product in foreign aid. The Commission on International Development headed by Canada's former prime minister, Lester Pearson, recommends a goal of seven-tenths of 1 per cent by 1975—almost double our current level.

I think we should meet that goal. We can afford to take at least an additional $2 billion of the $80 billion a year we are spending on the military and invest it in peaceful change.

To avoid the political problems, that sometimes go with foreign aid, we should channel more of our investment thru multilateral development agencies such as the World Bank, the Asian Development Bank, the Inter-American Development Bank, and others.

We should try to separate our short-term political interests from our foreign aid program. We have learned by now that we cannot buy allies, but we can invest in development. Development is the new name for peace.

We should re-examine the practice of tieing aid to the purchase of goods in this country. It adds to costs. Foreign aid donors should reduce and gradually eliminate these restrictions.

Terms on loans must be liberalized. Too many have-not nations are so deeply in debt that they must use long-term loans to pay off short-term loans. Future loans should be at interest rates of 2 per cent or less over a term of 25 to 40 years.

None of these steps will have any lasting significance if we do not defuse the population time bomb.

If birth rates are not cut, we will see growing famine, social unrest, and political instability. It is estimated that the world population will double by the year 2000.

If a nation can cut its birth rate in half, it can raise its living standard by 40 per cent in a single generation.

Family planning is one of the best investments we can make in the developing nations.

We must have the moral and political courage to continue our partnership with other nations.

The majority of the world's people still go to bed hungry each night; four million people will die of starvation next year.

Helping these poor countries achieve some semblance of economic progress and stability is the only sensible thing we can do in this increasingly warlike world.

I urge the Senate to not take the easy political road of reducing President Nixon's foreign aid request. As President Kennedy said, "Peace and freedom do not come cheap." We can do better.

## DEATH OF MRS. BEATRICE KENEN

Mr. SCOTT. Mr. President, it is my sad duty to inform this body that Mrs. Beatrice Kenen, the wife of Mr. I. L. Kenen, executive director of the American-Israeli Public Affairs Committee, died Monday at the George Washington Hospital.

The Kenens have been our friends for many years, and I want to take this opportunity to notify the Members of this body of her untimely death. The last time I spoke with Mrs. Kenen was at the White House reception in honor of Mrs. Golda Meir, Prime Minister of Israel.

Mrs. Kenen was known especially for her role in the Hadassah organization which supports hospitals and children's activities in Israel. She served as staff director of 23 U.S. national Hadassah conventions.

The former Beatrice Bein, Mrs. Kenen was born in Brooklyn, N.Y. She graduated from the University of Toledo in 1926. In 1927 she married Mr. Kenen, a newspaperman who later became a leader of pro-Israel groups. In addition to serving as executive director of the American-Israel Public Affairs Council,

he is editor of "Near East Report," a widely read periodical.

Mrs. Kenen also leaves a son, Dr. Peter Kenen, who is the provost of Columbia University. The Kenens have made their home in the National Capital area since 1953. They lived previously in Cleveland, Ohio, and Riverdale, N.Y.

Funeral services will be held at 2 p.m., Wednesday, at Temple Sinai in Washington, D.C.

Mrs. Scott and I offer our condolences to Mr. Kenen and the Kenen family for their loss. She was a great Jewish woman. We loved her dearly.

## BOB ROBERTS TELLS IT LIKE IT IS

Mr. MURPHY. Mr. President, in September, Mr. Harry Barker who is general manager of radio station KQMS in Redding, Calif., broadcast an editorial originally aired by Bob Roberts of radio station KVI in Seattle, Wash. Many in our Nation have been asking searching questions about our country and demand: "tell it like it is."

Mr. President, Mr. Roberts has done that and, to his great credit, so has Mr. Barker. I ask unanimous consent that the KQMS editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

KQMS EDITORIAL

The following is an editorial by Harry Barker, General Manager of KQMS Radio:

It isn't often that we re-broadcast an editorial broadcast previously on another station, but we believe this one written and delivered by Bob Roberts of KVI—Seattle, Washington, is worthy of your consideration, and ours as well. We quote Mr. Roberts:

There's something that needs to be said about this country. And since no one seems to have the gumption to say it, I guess it's up to me . . .

I have had it up to here with persons who are trying deliberately to tear my country apart. And it's way past time to throw at me that tired old wheeze about being a flag-waver. You're damned right I'm a flag-waver, and I got a right to be one the hard way.

I have had it with pubescent punks, wallowing in self-pity, who made a display of deploring their birth into a world which . . . to use their sissy expression . . . they didn't make.

Well, I didn't make the world I was born in either. And neither did the men who are worthy of respect. They just went about and made something out of it.

The men I grew up with were fetched up in a logging camp. They were the immigrant sons of every cast-off race there is. And they didn't have a hell of a lot of knowledge at home to start them off, either . . .

But I can write you a song about the son of a Po Valley coal miner who became a nationally renowned physicist; about doctors, lawyers, teachers, forestry specialists, conservation experts and men of the cloth . . . in the Seattle-Tacoma area . . . who came out of that logging camp. And about the son of a Danish mechanic who is one of the best friends I've got . . .

So don't give me your whinning, whimpering, self-pitying-claptrap about how this country is letting you down . . .

I have had it with hippies, brainless intellectuals, writers who can't write, painters who can't paint, teachers who can't teach, adminstrators who can't administrate, entertainers who fancy themselves as sociologists, and Negroes who castigate as "Uncle Toms," the very men who have done the most to demonstrate to all of us the most important quality in America . . . individual enterprise and responsibility . . . Dr. George Washington Carver, Archie Moore, Bert Willis, Booker T. Washington, Roy Wilkins, Justice Thurgood Marshall, Duke Ellington, Count Basie, Nat Cole, the Mills Brothers and their father . . . and many more . . .

I've had it with those cerebral giants who think it's smart to invite drug advocates to lecture in their classrooms, and with teaching curiosities like that one in the Mercer Island School District who invited a Black Power spokesman to dispense a lecture of flag-burning . . .

I've had it with people who are setting about deliberately to rip mankind's noblest experiment in decency . . .

And I'm going to tell you something. If you think you're going to tear down my country's flag and destroy the institutions my friends and members of my family have fought and died for, you're just going to have to climb over me first . . .

And, buddy, you'd better get up awful early in the morning.

We wholeheartedly agree with Mr. Roberts, and appreciate his permission to deliver it to the people of Northern California.

## POLLUTION

Mr. MOSS. Mr. President, I wish to commend the nine Members of the House of Representatives who, in a press conference last week, called for a 10-year national commitment to clean up the environment. Their concern with the growing pollution of this planet is well founded and in full accord with the warnings that I have been issuing for many months past.

If we continue to pollute our water and our air and pile up our wastes, our globe will eventually become uninhabitable. This may sound farfetched, especially coming from a Senator who represents a Western State of wide-open spaces, but the telltale figures are there. There is scarcely a river left in the United States that is not polluted, and some of them to the point of being totally unusable for any purpose, other than as a sewer. Even our greatest rivers, such as the Hudson, the Potomac, and the Mississippi, are polluted to the point that contact with their waters in many places is dangerous and must be prohibited. Lake Erie is all but dead now.

And our air in our cities is polluted. Recently I read an article in the press that attributed the death of some children in Chicago to polluted air. And we know that figures show that at various times when pollution is heavy over London, there is a sharp rise in the incidence of death and disease. So pollution is taking its toll in our big cities, and indeed more and more into our countryside. Even in my beautiful city of Salt Lake City our skies are black and temperature inversion puts us under a blanket hidden from the sun. We have known for years the pollution in Los Angeles and New York, but now we are aware that it is in the small cities of our land as well.

And finally, there is the problem of solid waste disposal. The open garbage dump is no longer tolerable, but the cost of disposal increases when treatment is necessary. Some cities send their solid waste by train many miles in order to find a place to dump it in an unpopulated area. For years some cities have taken their garbage to sea and dumped it in the ocean. Incineration is used and cut and fill disposal on the land is useful. But whatever method is used, there must be sanitary disposal and the solid waste must not be used to become an air pollutant.

These are problems to which this country must address itself now. In fact, all the countries of the world must face up to the problem now. As our population continues to increase and as our use of goods with their wrappers and bottles and surrounding material increases, we must have ways of disposing of our garbage without polluting our waters and our skies. Recently I addressed a dinner meeting in New Haven, Conn., on this subject. I ask unanimous consent that this speech be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

OUR ENVIRONMENTAL CRISIS

Ladies and gentlemen, I propose to talk to you tonight about the Nation's environmental crisis—about the staggering pollution of our air and our water.

I am sure you know about this galloping national disease—there is scarcely a citizen or a community in the United States which has not been affected to a greater or lesser degree.

When the Mormon pioneers arrived in Salt Lake valley in 1847 it was barren and dry. But the air was clean and the streams from the mountains ran clear and sparkling. Today smoke and smog choke the skies of this magnificent Utah land of Zion, and the sparkling streams empty into the river Jordan and into the Great Salt Lake grimy and laden with refuse.

What has happened is a by-product of industrial civilization—a by-product almost no part of the country has escaped, including I am sure, your own beautiful and prosperous Connecticut.

The mass of our people out across this country really only became aware of the massive pollution of our waterways and our air about ten years ago.

Since that time we have experimented and legislated in the hopes that we could develop the means to save what is left of our life support system. But although we have passed more laws, and spent more money and conducted more experiments than ever before, the fact remains that we are losing the battle.

We are actually further behind now than we were ten years ago in cleaning up our waterways and keeping pollutants out of the air. Experts are plainly frightened. Smog is no longer a joke. Water is unfit to drink. Rubbish is burying the affluent society which produced it.

Something new and greater must be done—and done soon—if mankind is to survive.

Lake Erie is all but dead. One scientist has suggested that the only way it can be saved is to punch a hole in the bottom, and let the heavy gook drain out, as it would in a bathtub.

The fabled Potomac is an open sewer as it runs through the Nation's Capital. Fish are dying and our birds are disappearing.

The great Mississippi River is already badly polluted by the time it reaches St. Louis, but from that point onward, it is so filled with petro-chemicals and other industrial oils, chemicals and slaughterhouse

wastes that State health departments and the Federal public health service have posted signs forbiding people to even eat lunches along the banks of it, let alone go wading in the water, or water skiing.

The concentration of infectious bacteria in just the spray from the river, when deposited on a person's face or lips, can cause typhoid, colitis, hepatitis, diarrhea or infections in the bloodstream.

The same is true to a greater or lesser degree of all of our rivers—large and small—just name any one of them.

We have water, water everywhere, and not an unpolluted drop to drink.

No death certificate has yet ever cited polluted air in the United States as a cause of death, but the U.S. Surgeon General says frankly that air pollution is killing and disabling Americans in every area of the Nation. Our lung cancer rate is twice as high in large metropolitan areas as it is in rural areas, and experts tell us it contributes significantly as a cause or aggravating factor in acute respiratory infections, chronic bronchitis, chronic constrictive diseases, ventilatory diseases, pulmonary emphysema, bronchial asthma as well as in lung cancer.

We hear people say:

"Technology created pollution. It can also solve it."

Technology has offered us many ways to control pollution—spectacular ways. It has shown us both how to control municipal wastes, and how to cease degrading our environment with industrial processes. But the adjustments which must be made are so enormously expensive that we have just nibbled at them.

The Federal Government has not been willing to spend the money that must be spent, nor have the States and the communities.

Some segments of our industrial community have responded and are already making changes in their processes to curb environmental contamination, but other segments have placed profits before people, and continue to save money by making dirty air and polluted water pay part of the price we give for the constantly improving products and services we all enjoy. Even tax incentives have not moved them to action.

How much would an all-out assault on pollution in the United States cost?

Hold on to your chair while I tell you.

If all forms of pollution were to be tackled, the combined municipal, State, Federal, industrial and private expenditures could rise as high as ten billion a year for twenty years—or a total of 200 billion dollars.

Ladies and gentlemen, the time has come to review our national priorities. We *can* have a clean environment. We do *not* have to pollute our streams. We do *not* need to litter our landscape. We do *not* have to suffer the pollution of our air.

The only serious question which remains is the emphasis we are willing to place on these programs and the amount of money we are willing to pay to implement them.

In the late 1950's the Nation decided to embark on a space program which would put us ahead of our competitors. I think that we can say that 10 years and nearly $30 billion later, we are ahead.

Twenty years ago, following a massive war, we decided that never again would the peace be sacrificed due to the lack of military capacity to respond to threats to the peace. I think we can say today that we have the military capabilities to so respond.

A lengthy discussion of our computer technology, our transister technology and our transportation technology would only indicate the extent to which we have the capacity to deal with problems which confront us. The critical difference between that which we have done in space and defense and medicine and what we *need to do* to protect the environment is the sense of urgency and immediacy with which our leaders view the challenge.

If the Federal Government indicated immediacy by making a total financial commitment to the development, installation and operation of pollution control facilities for all communities and for all industries, on the scale of the space program of the defense program, we would achieve pollution control.

Are these unrealistic responses to a problem whose solution should be a cost of doing business or living in this country?

Industry uses air and water to produce goods and leaves waste by-products in the air and the water. Pollution should be one of the costs of doing that business. The cost of controlling pollution should be a part of the cost of the product.

Communities are people. People pollute whether they burn their garbage in their backyard, burn it in community incinerators, or deposit their wastes in the river that flows nearby. This pollution is a cost of living, and the residents of a community have an obligation to pay the cost of pollution abatement.

Investments by cities, industries, and the Federal government should be items of highest priorities. But how high on the list of national priorities is it? Where does pollution rank with defense, space, urban renewal, mass transportation, welfare assistance, food stamps, law enforcement, and a host of other vital public issues?

Apparently no such assessment has been made by this administration. We know that defense expenditures are important. We are told that both the Mars landing and the search for biological life on the planets are important. And now we have been told that Federal investment in a supersonic plane is important.

But there is little indication of how far the present administration is willing to go to meet domestic problems which will not wait for solution. Pollution pays no attention to timetables dictated by political pressures or lack of leadership.

The President's environmental quality council has announced that we will have a low-emission motor vehicle by 1990: Approximately 15 years later than is urgently necessary.

But that council has said nothing about funds needed to construct municipal waste treatment facilities. It has said nothing about proposals to allow a rapid write off for industrial pollution control equipment.

Leadership and commitment must be forthcoming if this Nation wants to avoid an environmental debacle during the next two decades.

Just a couple of weeks ago the United States Senate took a giant stride toward water pollution control. We voted to appropriate 1 billion dollars for the fiscal year 1970 to implement the Clean Water Restoration Act of 1966. This is the first time that Congress has *appropriated* as much money as the Congress had *authorized* for a water pollution control program.

When we passed the bill some four years ago we led the States and municipalities to believe that we would make a billion dollars a year available for matching construction grants for waste treatment plants.

That we finally did so this year was a signal victory for national priorities over budgetary expendiency.

However, even a full funding only a small part of our nation-wide needs can be met. The States responded to the incentive we offered in the 1966 act. They have approved bond issues. They have raised taxes. They have set water quality standards on the assumption that the Federal Government would meet its commitments.

So, if this full $1 billion remains in the appropriation bill—and it has yet to run the gamut of the House-Senate conference committee—the Federal Government is only beginning to meet its commitment to the States.

Some of us in the Senate are also trying to increase funds for the Air Quality Act of 1967, which is the basic air pollution control legislation. The administration requested only 18 million for fiscal 1970. I have asked that the full authorization of 45 million be appropriated by the subcommittee handling this bill. We will know in a few weeks how successful this has been. If we don't win in committee, we will fight on the floor of the Senate.

So, as I say, we are making some progress, but by no means enough progress.

We really do not yet have the sense of public urgency in this country—the fear, the anger, the outrage—that we must have if we are to reclaim our environment.

There's a story about Noah Webster, the dictionary man. Bathing, it's said, was abhorrent to him. One time a woman standing behind him at a gathering, said to a companion, "That's Noah Webster, he smells badly." Webster turned and said: "Lady, you smell badly: I stink!"

The story usually is told to emphasize the misuse of the adverb. I tell it to emphasize a word: stink. Some people think it is not a nice word. To me it is a working word; it has impact. Nice words, like nice guys, as Leo Durocher once said, don't win.

Without stink, it might be said that we would have very little pollution control. If people cannot smell it, or see it, or taste it; if it does not cause illness—in short, if it does not affect them directly, they do not care whether anything is done about it or not.

Sometimes even when they can smell it and see it they will do nothing about it unless forced.

The same people who vote down sewage plants and school bonds, buy television sets, transistor radios to carry about, power lawn mowers for postage stamp lawns, clothes dryers, and air conditioners. Some of them probably spend more in a year on cigarettes than the bonds would cost.

I do not criticize their spending. I merely point out that they will put up money for things they want—in fact, will go into debt. And in this nation the art of making people want things, including what they don't need, has been developed to the point where it dominates our economy, if not our culture.

We are on a collision course with our environment, and I am troubled by inaction on nearly all environmental fronts.

Not that we aren't spending a great deal more money on the protection of the environment than we did a year ago or ten years ago—we are.

Not that we are not more capable of policing environmental hazards than we were a year ago or ten years ago—we are.

Not that we aren't more capable of understanding environmental pollution than we were a year ago or ten years ago—we are.

But we are simply not doing enough. We are simply not racing fast enough against time.

We won't stave off catastrophe until all of us are sufficiently aroused about the rape of our environment—as aroused as we all are now about the rape of Mylai.

We must feel as strongly about ending pollution as we do about ending the war in Vietnam.

We must all of us—the Federal Government and all other levels of Government, our industrial leaders and all other levels of industry, our scientific leaders, and all members of the scientific community, and the rank and file of our people—the entire mix that makes up America—we must all start agreeing on what must be done, and be willing to finance it, individually and collectively.

If we do not, I predict that in a few years you will be seeing moratoriums to end the pollution of our environment, and pollution protests instead of war protests.

## THE SILENT MAJORITY

Mr. McGOVERN. Mr. President, the discussions in recent weeks of the virtues of silence—especially when it has majority approval—makes pertinent the observations of Mr. Arthur Hoppe in today's Washington Star.

I ask unanimous consent that Mr. Hoppe's column be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THANK GOODNESS FOR MR. AGNEW

Mr. Agnew has again spoken out outspokenly against "the outspoken minority" which is trying once more to lead The Silent Majority astray.

It's fortunate The Silent Majority has a spokesman of Mr. Agnew's caliber to keep reminding it of its righteousness. And he's absolutely correct. Down through history, The Outspoken Minority has time and again attempted to confuse, boggle and mislead The Silent Majority with results that could have proved disastrous.

All this is well documented in that well-documented work "A History of The Silent Majority", or "They Said It Couldn't Be Done." Excerpts follow.

The Silent Majority, as we know it today, dates from biblical times. One of the earliest allusions appears in the story of Noah.

Noah, a hare-brained fanatic, warned of a dire flood and built a huge ark on dry land. And, oh, how The Silent Majority laughed as he sat marooned on his vessel over the years while the flood he awaited never came.

In classical times, The Silent Majority flowered, reaching its peak during the Roman Empire when it fully approved a welfare program of bread and circuses and trusted hired mercenaries to dispose of such minor problems as the Huns and Visigoths.

Down through the Middle Ages. The Silent Majority was silently active.

In religion, it gave its silent support to the Inquisition and the massacre of the Huguenots, all to the greater glory of God. And if it hadn't enthusiastically backed The Crusades, the Middle East today might be in the hands of the Moslems.

It is this quality of supporting the right war at the right time that has so enhanced the reputation of The Silent Majority. Let us merely point out that if The Silent Majority in France hadn't wholeheartedly cheered on Napoleon, it's doubtful the Russians would now all speak French.

The contributions are endless. In science, who suppressed the wild theories of Copernicus and Galileo? In medicine, who scoffed at the weird concept that diseases are caused by evil little organisms no one can see? In the arts . . .

But why go on? The examples of The Silent Majority's steadfast stand for the truth are legion.

So Mr. Agnew's right. Trust The Silent Majority.

Why if it weren't for The Silent Majority's enthusiastic approval, we wouldn't be fighting a glorious crusade today in Asia.

And if you don't believe it's a glorious crusade, you can ask the one true hero of The Silent Majority—the man who received more votes from The Silent Majority than any other candidate in history—our beloved President, Lyndon B. Johnson.

So thank goodness for Mr. Agnew. It can be safely said that he's the most brilliant, forceful, representative spokesman for The Silent Majority in this whole flat world.

## PROPOSED DEPARTMENT OF NATURAL RESOURCES AND ENVIRONMENT

Mr. MOSS. Mr. President, a report published in yesterday's Washington Post indicates that the Nixon administration is moving toward support of a departmental reorganization which I have long favored. Carroll Kilpatrick wrote that protection of America's physical resources will become a more dominant Nixon theme next year, and that Secretary of the Interior Hickel has recommended establishment of a Department of Natural Resources and Environment. In 1965, I introduced legislation to create such a department. My bill was reintroduced in the 90th Congress and again this year. The progressive deterioration of the environment, plus the Nation's expanding need for raw materials, makes the establishment of this agency ever more important. I commend the President for making natural resource protection a matter of high priority and pledge full support for the creation of a Department of Natural Resources and Environment.

Mr. President, I ask unanimous consent to have printed in the RECORD two articles published in the Washington Post of Sunday, December 7, 1969—the one by Carroll Kilpatrick, which I have mentioned, and one concerning a major installation of Bethlehem Steel which will reduce the pollution pouring into Lake Erie.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

NIXON TO PRESS IMPROVEMENT IN QUALITY OF 1970 EVIRONMENT

(By Carroll Kilpatrick)

The quality of the environment and the need to protect the nation's land, water and other physical resources is now expected to be a dominant Nixon administration theme next year.

The President began work several weeks ago on the State of the Union address—his first—which he will deliver to a joint meeting of Congress next month.

As the message began to take shape, the environment was the major domestic theme, officials said last week.

Mr. Nixon himself pulled aside the curtain a bit when he told the nation's governors and their wives that when he speaks to them next, in February, it would be on how to challenge young Americans "to move forward on the whole subject of the quality of life in America," including environment.

Earlier this year, Mr. Nixon established the Environmental Quality Council and has met a number of times with it.

In addition to attacking air and water pollution, the President said that the emphasis should be on "how we can move forward on all fronts so that life in this country in addition to being very rich and very strong can also have that extra dimension of idealism" that caught the imagination of the world at the time of the birth of the Republic.

A high official said that one example of what the President was talking about was a $15-billion Interior Department plan to attack water pollution.

Secretary of the Interior Walter J. Hickel has proposed a plan whereby the federal government would cooperate with the states and local communities in attacking this serious problem. It would be a 20-year, pay-as-you-go plan with the federal government guaranteeing the principal costs and the local governments guaranteeing the interest costs on the necessary bonds.

Hickel has estimated that it would cost $10 billion to protect the rivers and lakes from the discharge of sanitary sewers and $5 billion from the discharge of storm sewers. He said storm sewers can be almost as polluted as sanitary sewers.

Hickel has argued that a "national commitment" must be made, with the federal government providing guidance and the capital investment and local communities doing the work.

This fits the President's concept of the new federalism, Hickel believes. The pay-as-you-go feature amortizes the huge cost over a period of years, making it possible to launch the program without large initial expenditures.

Hickel also has recommended the establishment of a new Cabinet department, that would be known as the Department of Natural Resources and Environment, to take over much of Interior's work and other environment work scattered in other departments.

BETHLEHEM STEEL PUSHED INTO CURBING LAKE ERIE POLLUTION

(By Philip D. Carter)

LACKAWANNA, N.Y.—All but hidden amidst the sooty, clamorous expanse of Bethlehem Steel Corporation's Lackawanna plant is a $27-million monument to public rage, state power and the alchemic art of public relations.

The monument is a scattered complex of new devices for reducing the corporation's share of the pollution of Lake Erie.

The devices are there because a concerned public demanded them and an aroused state government required them. Mining gold from a leaden duty, the corporation last week treated newsmen to a tour of what one executive proudly described as a "real ringdinger of an anti-pollution plant."

The occasion, as such things go, was auspicious.

According to the corporation's figures, 6.5 per cent of Bethlehem's entire capital investment for the past five years has gone for water and air pollution abatement. In the next five years, executives predicted, the figure will rise to 11 per cent.

At the corporation's shiny new $1-billion plant at Burns Harbor, Ind., a centralized $43-million water-treatment facility is holding the plant's pollution of Lake Michigan well within the margins permitted by the state. The treatment plant—unlike the Lackawanna facilities—was part of the steel mill's original design.

The corporation's executives do not try to deny their past sins—which, particularly on Lake Erie, have long been conspicuously visible.

Together with the 600 other industries and scores of communities ringing the lake, the corporation for decades used Lake Erie as a handy giant sewer, discharging uncounted tons of wastes into its waters with scarcely a second thought.

Combined with the unceasing runoff from farmlands laden with fertilizers and insecticides, plus chronic spillage from oil wells and tankers, this steady corrosion of the natural balance of the lake's ecology has taken a devastating toll.

Once-clean beaches have been closed to the public. Fish have died by the millions. Heavy silting has vastly accelerated the natural, gradual filing-in of the shallow lake's floor.

Today, the hottest scientific argument about Lake Erie is whether it is dead or merely dying. Bethlehem Steel, like other corporations, is belatedly paying for its share of the blame.

The company's abrupt turn-around is

directly traceable to a September, 1966, edict from the state department of health that Bethlehem clean itself up by January, 1970, or shut down.

The order had a sharply bracing effect on an industry which—like others—previously saw no profit in controlling pollution.

A less tangible—but equally significant—motivation for Bethlehem's rapid efforts to clean up the Lackawanna plant was its growing awareness that pollution had suddenly become bad public relations.

"Hell, every time Bill Mauldin draws a pollution cartoon, there's a blast furnace in the background belching black smoke," a Bethlehem executive observed last week. "We were what you might call highly visible."

Particularly on Lake Erie.

After Niagara Falls, just north of nearby Buffalo, the Lackawanna plant is easily the most prominent landmark on the eastern shore of the lake—a hunking, gray, five-mile-long jumbo of coke ovens, blast furnaces, slabing mills, sheet mills and bar mills employing 19,000 workers.

"We were a big, fat target," an executive confided, "and we took our licks."

As a consequence, Bethlehem officials talking to the press are as likely to discuss "environmental quality control" as corporate earnings.

The public relations department has led the refrain. "Item No. 1" in a fat publicity kit given newsmen on last week's tour of the Lackawanna and Burns Harbor plants began with this announcement:

"Process water returned to Lake Erie by new water quality control facilities at Bethlehem Steel Corporation's Lackawanna plant is as clean as the original lake water."

Not all the Lackawanna facilities were in operation at the time of the visit. Because of a construction strike and delays in winning state approval of several anti-pollution projects, the bulk of the water used by the plant was being returned to Lake Erie untreated.

Company officials estimated that normally half the 325 million gallons of water "borrowed" daily from Lake Erie is polluted during use in the plant. Of that 162.5 million gallons, only 16 million were being treated last week. But the rest, executives assured visitors, would be under treatment next year or not much later.

Most of the facilities now in operation or under construction are high-rate filters, much like those for swimming pools, for removing solid particles and oil from water used in processing hot steel.

Other clarifiers, officials said, will be installed to clean waste water from basic oxygen and blast furnaces. In addition, they said, the toxic water collected from coke ovens will soon no longer be discharged into the lake.

Two other anti-pollution plans of the corporation have encountered significant objections. Although approved by the state, a plan to use a deep disposal well to dispose of water containing hydrochloric acid has been attacked by geologists who argue that too little is known about the region's subsurface geology to risk the project.

The company has argued in response that the acid wastes will be injected into saline water trapped below "protective and impervious" rock layers 3,800 to 4,300 feet below the earth's surface where they will pose no threat.

The plant's other remaining pollution problem remains unresolved. Like other industries, the Lackawanna plant has been dumping solid wastes—primarily slag from steel furnaces—into the lake. The company contends that fishing has actually been better around the slag piles than elsewhere in the lake, but conservationists have objected.

SQUARE MILE SOUGHT

Now the corporation hopes to acquire from the state a square mile of shallow lake water within which it can dump its wastes and seal them off behind a watertight barrier. Again, conservationists and others have objected and the state has not yet approved the project.

Barely mentioned in the course of last week's tour was the Lake Erie plant's system of disposing of human wastes collected in its sanitary sewer system. When questioned, officials revealed that the sewage is simply released into the sewer system of the city of Lakawanna. The city dumps its sewage in the lake.

Company officials repeatedly argued during the tour that municipalities—not industries—are the nation's biggest polluters. But it is industry, they said, which is called upon to foot the bill.

"These (anti-pollution) facilities," said John E. Jacobs, Bethlehem's vice president for operations, "contribute absolutely nothing to our profitability or our efficiency. . . . Sometimes it seems to us that industry is the only segment of our society called upon to spend the money to control the pollution that we all are making."

The fact, however, is that in New York state, voters five years ago endorsed a $1-billion bond issue that is the backbone of the nation's most ambitious state water pollution program. The program focuses on cleaning up the state's sewage-clogged rivers and lakes.

Originally, the program was intended to spread the burden for pollution control among three different sets of taxpayers—state, local and federal.

Although Congress has repeatedly authorized the Federal Water Pollution Control Administration to pay as much as 30 per cent of New York's anti-pollution costs, actual federal contributions have averaged only about 7 per cent.

However, Congress last week appropriated a record $800 million to assist states and communities to construct waste treatment plants and facilities. The Nixon administration had proposed spending $215 million on the plan.

Of the amount appropriated, New York's share will be a relative drop in the bucket. Hard-pressed New York municipalities, which were supposed to contribute 40 per cent of the funds for the state's original anti-pollution program, have in fact relied largely on state assistance. As a consequence, even with new federal assistance the state's $1 billion for treating municipal sewage will have virtually disappeared by the end of 1970.

By then, Bethlehem's Lackawanna plant will no longer be polluting Lake Erie, and its anti-pollution plant will be a practical as well as a public relations success. But like public waters elsewhere in the state, Lake Erie will be little clearer or cleaner than before.

It may be too late to win an audience, but Bethlehem Steel would like the world to know that it does not feel entirely responsible.

## THE VICE PRESIDENT AND THE MEDIA

Mr. DOLE. Mr. President, I read the statements of the Senators from New York (Mr. JAVITS and Mr. GOODELL) criticizing the Vice President of the United States for his speeches about the news media and assuring the media that they have "champions" in the Senate and do not need to be inhibited.

Mr. President, I was very much interested in their comments and certainly want to take them in "good faith, equanimity, and understanding" as one of the Senators requested. But what the Senators ask the Senate and the administration to do, I fear they have not done with the Vice President's speech. References to the Vice President's "Menacing tones," "abusive words for commentators," and "divisive rhetoric and simplistic solutions" are "not particularly conducive to rational debate."

Mr. President, I have read the text of all the speeches delivered by the Vice President about the media. Throughout his speeches he emphatically denied advocating any kind of news censorship.

Rather, as I interpreted the Vice President's remarks, he was seeking to stimulate discussion on the responsibility of the media in reporting the events of our day to the American people. It is apparent from the ensuing discussion that he has achieved this objective. But what concerns me is the overreaction of many in the communications industry. Instead of stimulating self-analysis, many have tried to cloud the issue by trying censorship and intimidation. At the same time, those who saw political advantage in defending the media set out to attack the Vice President by disregarding the thrust of his speeches.

I was happy to note that the Senators from New York admitted that the Vice President had raised some important questions and had every right to do so. What they specifically criticize, is the "manner" in which he did it.

Mr. President, I do not agree that the context of the Vice President's speeches has been improper. They have received wide coverage because of their dramatic content, thus fulfilling the Vice President's objective and it is hoped, providing the basis for a dialog on the proper role of the media in a free society. I hope we shall hear more from the Senators from New York in the form of substantive recommendations on the "cure" for the failings of our media. I found none in the remarks of the Senators. Our purpose is not to "sanitize" the news, as it has been implied would be the result of the Vice President's recommendations, but to present all the facts to the American people in an honest and thorough manner, not seeking to play one-upmanship with one another by selecting only the most dramatic occurrences and editing them in the most consumable package.

## ARMISTICE DAY SPEECH BY LT. GOV. J. JOSEPH GARRAHY, OF RHODE ISLAND

Mr. PELL. Mr. President, the other day in Newport, R.I., Lt. Gov. J. Joseph Garrahy, gave an excellent and courageous speech concerning our problems of today. I thought he was particularly thoughtful in his discussion of our present position in Southeast Asia.

Because I believe that his speech would interest Senators, I ask unanimous consent that it be printed in the RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ARMISTICE DAY SPEECH

Fifty-one years ago today an armistice was proclaimed which ended World War I—A conflict in which 115,000 American men died to make, in the tragic phrase of Woodrow Wilson, "The World Safe for Democracy." That

terrible conflict was called by contemporaries "The War to End All Wars," and the armistice which we commemorate today was hopefully regarded as the dawn of a new era of peace and international accord. But the optimists who dreamed this dream were wrong, and other wars and other truces followed and many more Americans died in a noble but perhaps vain pursuit of those elusive ideals of peace and democracy.

The great tragedy of today is its lack of permanency. For in twelve of the fifty-one years since that "lasting" peace was triumphantly proclaimed, the United States has found itself actively embroiled in a major foreign war.

This record seems to vindicate the view of the famous sociologist Harry Elmer Barnes who criticized us for going in to the tragic paradox of engaging in perpetual war in order to secure perpetual peace. His indictment, though harsh, deserves more than passing consideration.

On this day traditionally set aside to celebrate the establishment of peace, it is only proper, and indeed essential that we dedicate ourselves to finding a means of regaining and restoring that peace which we all so earnestly seek and desire.

Our attention, therefore, must inevitably focus on Vietnam and the task of finding a solution to our Asian dilemma. It is this formidable task that perplexes and divides our troubled nation today.

I have no pat solution to this great national problem, for my views of this conflict, like those of so many Americans, are ambivalent, and not precisely defined. Yet, after witnessing the effects of our involvement for the past five years and examining the reasons advanced to justify our commitment to that far-off land, I have developed some thoughts, some impressions, and especially some questions which I would like to share with you now.

Today is a day not only reserved to commemorate peace but also one to honor those veterans who dedicated their life or a portion of it towards defending or achieving peace. Our first duty today is to admire, respect, and commend those veterans of our current conflict for the heroism and valor, both individual and collective, which they have displayed. The war they have been called upon to wage is perhaps more difficult than any in which we ever been involved. It is a guerrilla war, one fought in an unhealthy climate and upon most difficult terrain. It is one where the enemy is not easily recognized, and one where friend or neutral is scarcely distinguishable from foe. It is a limited war, and one whose purposes and goals, never clearly defined, are steadily becoming more obscure. Finally, and of paramount importance, it is a war which lacks the undivided support of the American people. A sizable, articulate, vocal and sincere segment of our citizenry strongly oppose it. Never in American history, including the internally divisive war of 1812, has so much criticism and so little national backing been given to an American military effort.

Those conditions considered cumulatively indicate that our American fighting men in Vietnam, our veterans to be, are struggling under a greater handicap than any other American soldiers in our history. In the face of such adversity their courage, their dedication, and their spirit of sacrifice must be a source of awe and admiration for all our countrymen, as it certainly is for me.

This admiration or the efforts, and achievements of our fighting men, however, should not cause us to accept unthinkingly or passively the wisdom of the policy which placed those men in Vietnam. The validity of our position is and should be a debatable issue, for even an American citizen has the right to question the policy which has been set forth by those charged with the administration of our Government. To act with herd-like conformity would be to make a mockery of our vaunted liberty.

I have spoken of the sizable, articulate, vocal, *and sincere* segment of our people who strongly oppose what they term "our Vietnam nightmare." Their views deserve, indeed command, the respect and attention of our policymakers. These discontented Americans have not only the right but the duty to express their responsible dissent to a war which they feel has weakened their country at home and abroad.

Let me make emphatic and clear however, that my concept of *rational* dissent does not extend to such destructive protests against American involvement in Vietnam as rioting, sedition, or the desecration of our flag and the corresponding exaltation of the flags of our opponents. These remonstrances are not merely in poor taste, they are equivalent to moral treason, and therefore, intolerable.

It is most unfortunate that the actions of extremists have caused some Americans to take a dim view of any citizen who opposes our present course in Vietnam, for I feel that the rational dissenters have raised many formidable objections to a continuation of the conflict.

They have raised many valid doubts: they have posed many questions which demand a prompt and correct reply: they have challenged the wisdom of our system of priorities. Is the country of South Vietnam or for that matter, the entire Southeast Asian peninsula essential—not merely desirable, but is it essential to our national security? Can any settlement we reach with the government of North Vietnam be effectively sustained in the absence of sizeable American military force? Have the 40,000 American lives expended in the Vietnam conflict brought us any closer to peace in that troubled land? Is our continued Vietnam involvement generating international respect for the United States, or is it actually producing friction, suspicion and bad feelings between America and her allies and especially, between us and the many neutral or non-aligned nations of the world community? Can solutions to our grave internal problems be developed expeditiously in an atmosphere charged with dissention and controversy stemming principally from the conduct of a divisive foreign war? Is that war diverting our attention and dissipating our energy for coping with more urgent domestic crises? Does it, in fact, exaggerate and inflame those crises?

These are the questions which are foremost in my mind today. They demand an answer. And it is obvious from the manner in which I framed these vital issues that my answers point to the irresistable conclusion that our rapid, though not reckless, removal from Vietnam is essential. My conclusion is not authoritative, I can offer no timetable nor any precise formula, but after much deep introspection, I can offer my firm conviction that our present policies must be drastically modified in the direction of disengagement. To this end, let us not conceal our mistake. If indeed we have made one, by invoking the cry of national honor—for honor without righteousness is not only hollow but dangerous.

In conclusion, may I suggest that not only celebration but also meditation should mark this armistice day, because of the immensity of the problems confronting us. It is our duty as Americans to grapple with questions similar to those which I have modestly proposed. Then it is our collective duty to work to reestablish, this time with more enduring success, the peace which today we so wistfully commemorate.

Thank you.

## CONCLUSION OF MORNING BUSINESS

Mr. MANSFIELD. Is there further morning business?

The ACTING PRESIDENT pro tempore. Under the previous order, morning business has not yet begun.

Is there morning business? If not, morning business is concluded.

## TAX REFORM ACT OF 1969

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the unfinished business be laid before the Senate.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The BILL CLERK. H.R. 13270, the Tax Reform Act of 1969.

The Senate resumed consideration of the bill.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Oklahoma.

Mr. WILLIAMS of Delaware. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, with the consent of the Senator from Oklahoma (Mr. BELLMON), I ask that his amendment be withdrawn. The Senator from Oklahoma is working on a technical change which I think may clear up the objection.

The ACTING PRESIDENT pro tempore. The yeas and nays have been ordered on the amendment. The Chair advises the Senator from Delaware, who is not the author of the amendment, that it requires unanimous consent to withdraw the amendment.

Mr. WILLIAMS of Delaware. I have the consent of the Senator from Oklahoma, and I ask unanimous consent that the amendment offered by the Senator from Oklahoma (Mr. BELLMON) be withdrawn.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Delaware? The Chair hears none, and it is so ordered.

The bill is open to further amendment.

Mr. WILLIAMS of Delaware. Mr. President, for the information of the Senate, the Senator from Oklahoma (Mr. BELLMON) is working on a modification of his amendment. It will be offered at a later time.

Since there are no amendments pending, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. TALMADGE in the chair). The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

## MILITARY CONSTRUCTION APPROPRIATIONS, 1970

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the pending business be laid aside temporarily and that the Senate proceed to the consideration of calendar No. 558, H.R. 14751.

The PRESIDING OFFICER. The bill will be stated by title.

The BILL CLERK. A bill (H.R. 14751) making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Appropriations.

Mr. MANSFIELD. Mr. President, the ranking Republican member of the Military Construction Appropriations Subcommittee, the distinguished Senator from Delaware (Mr. BOGGS), is on his way over to the Chamber. The ranking Republican member of the full committee (Mr. YOUNG of North Dakota) is present.

Mr. YOUNG of North Dakota. Mr. President, I may say to the distinguished majority leader that I discussed it with the Senator, and it is satisfactory with him to proceed.

Mr. MANSFIELD. Mr. President, I present today for the consideration of the Senate, H.R. 14751, an act making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1970, and for other purposes.

It is not my intention in presenting the bill to give detailed figures concerning each line item. The line item breakdown and explanation are contained in the report which has been placed on each Senator's desk.

Before going into the recommendations of the Appropriations Committee, I would like briefly to summarize the pertinent facts pertaining to the bill.

The original budget as submitted last January requested new obligational authority of $2,558,450,000. The revised construction budget, as submitted in April, reduced the foregoing figure to $2,003,918,000. The reduction was accounted for mostly by the deletion of $600,000,000 in construction money for the Safeguard missile. The military construction authorization bill recently passed by the Congress approved funds in the amount of $1,626,926,000.

On November 13, 1969, the House passed H.R. 14751, with new obligational authority amounting to $1,537,177,000. The House construction bill was based upon the House-approved authorization and did not reflect the authorization act as passed by the Congress. Thus, it was the task of the Appropriations Committee to make numerous adjustments in H.R. 14751 to reflect the additions and the deletions of projects made in the authorization act.

The total of the military construction appropriation bill, as reported by the Senate Committee on Appropriations, is $1,690,064,000. This is an increase of $152,887,000 over the amount provided by the House. The total bill, as reported to the Senate, is $313,854,000 under the budget estimate of $2,300,918,000. By way of a general explanation, these figures reflect a general reduction in appropriations as follows: Army, 24.7 percent; Navy, 23.1 percent; Air Force, 22.2 percent; and Department of Defense agencies, 43.7 percent.

The Military Construction Subcommittee of the Senate Appropriations Committee held joint hearings again this year with the Military Construction Subcommittee of the Armed Services Committee chaired by the able Senator from Washington (Mr. JACKSON). These joint hearings were most productive in saving time of the Senators and witnesses of the Department of Defense. Additional hearings by the Senate Appropriations Subcommittee were held to hear testimony on appeal items in the bill and projects which had been authorized in previous years.

Before going into the construction appropriations for each of the services and the Department of Defense, I will mention a number of committee actions taken on large construction items. The largest single reduction made by the House was $82.5 million due to so-called unobligated balances remaining from previous years. The committee felt that this reduction was too large in view of the unobligated construction balances that remained as of October 1, 1969; thus, the committee restored to the bill $51 million of the House reduction. The request this year by the Department of Defense to finance the North Atlantic Treaty Organization infrastructure program amounted to $34 million in new obligational authority. This amount represents a 29-percent contribution by the United States to the NATO construction program. The full amount was allowed. The largest single item in the bill was $688,476,000 for family housing. A breakdown of this account will be discussed later in my presentation.

I am sure that the Senators are very interested in how much money is in this bill for the Safeguard missile. Actually, there is $14,100,000 which includes $1,400,000 for planning. The remainder will be used to construct research and development facilities on the Kwajalein Island. The funds to start construction on the new sites at Malmstrom Air Force Base and Grand Forks Air Force Base, N. Dak., will be implemented with funds appropriated in prior years.

There are no funds in this bill for construction in South Vietnam. As of August 31, 1969, there remained available prior year funds for construction of approximately $214 million. The Department of Defense declares that these funds will provide for the military services requirements through fiscal year 1970.

The committee approved $25 million for the emergency fund administered by the Secretary of Defense. The House had reduced this fund by $10 million. In restoring the funds, the committee felt that the Secretary must have a construction fund from which to withdraw required amounts in unforeseen emergencies. Past experience has proven that the Secretary of Defense has administered this fund in a most prudent manner.

Other large items approved were: $16,814,000 for a cadet activities building at the U.S. Military Academy, West Point, N.Y. This structure has been needed for a long time and indications are that with the increase of the cadet corps to 4,400 students, the Academy cannot wait until future years for the construction of this building. Also $9,891,000 was approved for an administration and classroom building at Brooke Army Medical Center, Tex. This structure is urgently needed now to relieve an intolerable condition of overcrowding and to overcome maintenance problems on World War II structures that are now being used.

Under the Navy appropriations, the committee deferred a hospital at Camp Pendleton, Calif. It was not with prejudice that this project was deleted. The planning on this hospital is only about 60 percent complete and information furnished to the committee indicated that the cost could go as high as $25 million. It was the consensus of the committee that the Navy should come in with this project next year with firm estimates as to its ultimate cost.

Additions were made for a number of projects that were required because of hurricane damage at Gulfport, Miss. Also added were urgent operational projects for safety reasons and four other projects that were requested because of destruction by fire.

ARMY

The committee approved an appropriation of $297,597,000 for construction within the Army, exclusive of family housing. This is an increase of $57,151,000 from the amount of $240,446,000 approved by the House and a decrease of $98,003,000 from the budget estimate of $395,600,000. The foregoing amount will provide for troop housing and community facilities, research and development facilities, and hospitals.

NAVY

For military construction for the Department of the Navy, the committee has approved an amount totaling $305,377,000. This is an increase of $33,772,000 from the $271,605,000 allowed by the House and a decrease of $91,823,000 from the budget estimate of $397,200,000. The amount appropriated for the Navy will provide for the modernization of naval shipyards, naval air facilities, pollution abatement facilities and recruit training facilities at Orlando, Fla. Of course, included in the Navy totals are facilities for the Marine Corps ground and aviation facilities.

AIR FORCE

The committee has approved for the Department of the Air Force $302,349,000. This is an increase of $48,844,000 over the $253,505,000 allowed by the House and a decrease of $86,751,000 from the budget estimate of $339,100,000. The money recommended for the Air Force will allow for new projects in operational training, maintenance and supply categories. Also approved were personnel support facilities which encompass medical facilities and all types of related construction. Also there are a number of projects which will enhance the Air Force's research and development capability.

RESERVE FORCES

The committee approved the following amounts for the Reserve forces which

were the same as the budget estimates and the amounts allowed by the House: Army National Guard, $15 million; Army Reserve, $10 million; Naval Reserve, $9,600,000; Air Force Reserve, $5,300,000, and Air National Guard, $13,200,00.

DEPARTMENT OF DEFENSE AGENCIES

The committee recommends an appropriation of $43,165,000 for the Department of Defense Agencies. This is $31,335,000 under the budget estimate of $74,500,000 and $14,445,000 over the amount allowed by the House. The large part of this appropriation is the $25 million allowed for the Secretary of Defense's contingency fund.

FAMILY HOUSING

The committee has recommended $688,476,000 in new appropriations for the 1970 military family housing program. Within this total is $124,791,000 for the family housing construction program. The approved appropriation will provide for the construction of 4,800 units of family housing and the relocation of 444 units of old housing. The remaining part of the above-stated total amount for family housing consists of debt payments of mortgage principles on Capehart and Wherry housing indebtedness, reconditioning of family quarters in need of repair, leasing of housing for military personnel and maintenance and operation of military housing throughout the United States and overseas.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD the comparative statement of appropriations for fiscal year 1969 and the extension of the amounts contained in the bill for fiscal year 1970.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR 1969 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR 1970

| Item | New budget (obligational) authority, fiscal year 1969 | Budget estimates of new (obligational) authority, fiscal year 1970 | New budget (obligational) authority recommended in the House bill | Amount recommended by Senate committee | Senate committee bill compared with— New budget (obligational) authority, fiscal year 1969 | Budget estimates of new (obligational) authority, fiscal year 1970 | House allowance |
|---|---|---|---|---|---|---|---|
| Appropriations: | | | | | | | |
| Military construction, Army | $548,126,000 | $395,600,000 | $240,446,000 | $297,597,000 | −$250,529,000 | −$98,003,000 | +$57,151,000 |
| Military construction, Navy | 291,513,000 | 397,200,000 | 271,605,000 | 305,377,000 | +13,864,000 | −91,823,000 | +33,772,000 |
| Military construction, Air Force | 222,141,000 | 389,100,000 | 253,505,000 | 302,349,000 | +80,208,000 | −86,751,000 | +48,844,000 |

| Total appropriation amounts | 1,758,376,000 | 2,003,918,000 | 1,537,177,000 | 1,690,064,000 | −68,312,000 | −313,854,000 | +152,887,000 |
| Portion applied to debt reduction | −82,898,000 | −86,618,000 | −86,618,000 | −86,618,000 | −3,720,000 | | |
| Grand total, new budget (obligational) authority | 1,675,478,000 | 1,917,300,000 | 1,450,559,000 | 1,603,446,000 | −72,032,000 | −313,854,000 | +152,887,000 |

Mr. MANSFIELD. Mr. President, this concludes my summary of the military construction bill. I will be glad to answer any questions concerning the committee action and to explain any additions or deletions of projects which may have been made.

Mr. BOGGS. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. BOGGS. Mr. President, the military construction appropriations bill now before this body represents, I believe, an accomplishment in economy—but one which will meet the immediate construction needs of the armed services.

The bill would appropriate $1,603,466,000 in new construction money in fiscal year 1970 for the three services, for family housing, and for the Defense agencies.

The bill represents a decrease of $72,032,000 from the total appropriated for fiscal year 1969, and it is $313,854,000 less than the budget estimates sent to the Congress.

I would like to point out that more than 40 percent of the money appropriated by this bill—or $688,476,000—is intended to be spent on family housing. It will provide 4,800 new units, relocation of 444 units, and maintenance for 364,480 units.

It contains no money for construction in South Vietnam. The Defense Department requested none.

The bill contains $14.1 million for development of the Safeguard antiballistic missile, of which $12.7 million will go for research and development at Kwajalein Island and $1.4 million for planning.

Mr. President, I would like to commend the Senator from Montana (Mr. MANSFIELD) and the Senator from Nevada (Mr. BIBLE) for their fine leadership in developing the bill, and the Senator from Kansas (Mr. PEARSON), the Senator from Hawaii (Mr. FONG), the Senator from Wisconsin (Mr. PROXMIRE), and the Senator from Texas (Mr. YARBOROUGH) for their participation. Mr. Vorley M. Rexroad and Mr. Edmund L. Hartung contributed fine staff work. In addition, the members and staff of the Armed Service Committee were most cooperative and helpful during our joint hearings on this bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the committee amendments be considered and agreed to en bloc, and that the bill as thus amended be regarded as original text for purposes of amendment, provided that no point of order shall be considered to have been waived by reason thereof.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendments agreed to en bloc are as follows:

On page 2, line 7, after the word "Code," strike out "$240,446,000" and insert "297,597,000".

On page 2, line 17, after the word "appropriation," strike out "$271,605,000" and insert "$305,377,000".

On page 3, line 1, after the word "Code," strike out "$253,505,000" and insert "$302,349,000".

On page 3, line 10, after the word "Code," strike out "$28,720,000" and insert "$43,165,000".

On page 5, line 12, after the word "law," strike out "$689,801,000" and insert "$688,476,000".

On page 5, line 17, after the word "Construction," strike out "$31,061,000" and insert "$30,461,000".

On page 5, line 25, after the word "Construction," strike out "$42,714,000" and insert "$41,989,000".

SENATOR GOODELL QUESTIONS FUNDS FOR BIOLOGICAL BUILDING AT DUGWAY

Mr. GOODELL. Mr. President, among certain funds for Army Materiel Command, listed on page 11 of the committee report, is one item in this military construction appropriations bill which causes me particular concern.

The item is a "sampler processing building" to be constructed at the Dugway Proving Ground in Utah.

Dugway, it will be recalled, is a major testing ground for chemical and biological warfare—CBW.

The cost of this new building, viewed as part of a $1.6 billion military construction appropriation, is relatively small and almost escapes notice.

Perhaps it is an oversight that funds are still being allocated for this "sampler processing building." If not, I would like to know why we are expanding facilities for germ sampler containers at Dugway.

Is germ field testing at Dugway to continue? I would hope not. I think we should know that the Pentagon has justified this new building in terms of germ field testing in the winter.

In view of President Nixon's CBW policy statement on November 25, we should be cutting down on construction at Dugway; not expanding.

It was in October that the Pentagon testified in Senate joint hearings on this new expenditure for Dugway. According to the Pentagon:

DUGWAY PROVING GROUND, UTAH

This sampler processing building will provide a facility for loading, unloading, de-

contaminating, and servicing 1,400 heated biological sampler containers used in the installations field test program. At present, animal holding rooms must be used to process these containers. These rooms are needed for holding infected animals and animals for various studies. Processing sampler containers in these rooms reduces the space available for holding these animals by one-half. When short notice urgent test requirements are received, other ongoing projects and normal operations must be disrupted. In addition, crowded conditions among the animals risks cross-infection, sample quality, and personnel safety. Safety of employees and the animals points up the need for the best possible test facilities.

First, I would like to call attention to the Pentagon's reference to Dugway's "field test program" with germ agents.

On many occasions, I have expressed my opposition to outdoor testing of germ agents as well as chemical agents. It is my firm conviction that public health safety as well as a clean and healthy environment require a flat ban on such outdoor testing.

It appears from the Pentagon's October testimony that the need for this new building at Dugway was based on plans for expanding biological weapons development.

The "sampler processing building" is for heated biological sampler containers. I understand that these sampler containers are used in outdoor winter testing for the purpose of developing weapons. Processing the sampler containers is basically to detect distribution and survivability of germs after munitions explosions.

On November 25, President Nixon made a historic announcement on chemical and biological weaponry. He renounced first-use of these weapons in war. He called for an about-face in the Pentagon's germ research. No longer is the Pentagon to develop germ weapons. Rather, germ weapons are to be dismantled. All future biological research is to be confined to defensive measures such as immunization and safety devices.

Mr. President, Dugway Proving Ground is a site for weapons testing. Are we to assume that its biological facilities are now to be converted to immunization research?

If not, is Dugway gearing up for work on some safety device which would require this particular "sampler processing building?"

Regarding safety devices, we are aware that the Penatgon has in the past worked on what might be called an antibiological weapons monitoring system—BWMS. Beyond the question of whether such a monitoring system could work, I wonder now whether it is really necessary.

Again, I come back to the questions: Is outdoor testing of germs agents to continue at Dugway? What would be the purpose of future field test missions? Do we really need this "sampler procession building?" Can we not reasonably hope that germ facilities at this weapons testing site are no longer needed?

It should be noted that immunization research, to which President Nixon referred, is presently being conducted at Fort Detrick in Maryland and the Communicable Disease Center in Atlanta, Ga., as well as in numerous hospitals and medical schools across the Nation.

In view of President Nixon's new policy directive for the Pentagon's biological program, it would seem that construction of a new biological building at Dugway is not needed and the cost of this building can be saved.

Mr. President, this is a time of inflation. It is a time of heavy Government spending. It is a time when taxes weigh heavily on those who can bear taxes least.

Equitable and sound tax reform can ease the tax burden.

Incisive review of Government spending requests can lead to cuts in wasteful expenditures mounting to billions of dollars.

The Senate has shown its determination to stop unnecessary spending.

Even before President Nixon's CBW policy statement, Members of Congress were closely examining Pentagon requests for the chemical and biological weapons program.

In the military procurement bill, $16 million was cut from money requested for research on deadly gas and germ weapons.

In the military construction bill, the Committee on Armed Services and the Committee on Appropriations in both the Senate and House took the initiative to cut approximately $5 million from Pentagon requests for new facilities and equipment for germ warfare.

These cuts are welcome and the committee members are to be commended for their careful scrutiny of budget requests.

Still, if more trimming can be done, we should do it.

We must not spare the "meat-ax" or the "scalpel" in cutting out waste.

On the "sampler processing building" for Dugway, the scalpel can be put to good use. If the item is not needed now due to President Nixon's action; if new justification by the Pentagon is untenable, then funds should be deleted.

Mr. YARBOROUGH. Mr. President, as a member of the Military Construction Appropriations Subcommittee, I wish to commend our able chairman, the distinguished majority leader, for his hard work and leadership in producing this important bill. The bill that is before the Senate today is a balanced and reasonable measure and provides the necessary funds for the construction of facilities that are vital to our military personnel.

The Senate version of this bill includes over 50 percent more for Texas projects than was in the bill which passed the House of Representatives. The victory in the Senate means a great deal for Texas. As a member of the Military Construction Appropriations Subcommittee of the Senate, I was able to work for this substantial increase for Texas. We were able to hold this increase in the full Senate Appropriations Committee and today we won a major victory when the Senate agreed to the $75 million for Texas.

The Senate bill includes many projects which were not in the House bill, but I am most pleased on the appropriation of $9,891,000 for the Medical Field Service School at Brooke Army Medical Center in San Antonio which was not in the House bill. This school trains the medical personnel who have done such an outstanding job of saving lives of wounded Americans in Vietnam. It is essential that this lifesaving Medical Field Service School have the very best training facilities.

The total for Texas in the Senate bill is $75,184,000. The bill which passed the House of Representatives had only $47,630,000 for military construction in Texas. The Senate bill is an important improvement over the House bill in that it recognizes the vital needs of many of our military installations by providing housing and other facilities.

The following indicates the amounts appropriated for the military installations in Texas. These figures are the ones in the Senate bill and include the sums added to the House passed bill:

| | |
|---|---|
| Army: | |
| Aeronautical Maintenance Center | $1,178,000 |
| Fort Bliss | 4,309,000 |
| Brooke Army Medical Center | 9,891,000 |
| Fort Hood | 21,050,000 |
| Fort Sam Houston | 524,000 |
| Red River Army Depot | 1,396,000 |
| Subtotal | 38,348,000 |
| Navy: | |
| NAS Chase Field | 2,769,000 |
| NAS Corpus Christi | 496,000 |
| NAS Kingsville | 3,876,000 |
| Subtotal | 7,141,000 |
| Air Force: | |
| Bergstrom AFB, Austin | 415,000 |
| Brooks AFB, San Antonio | 736,000 |
| Carswell AFB, Fort Worth | 236,000 |
| Ellington AFB, Houston | 954,000 |
| Goodfellow AFB, San Angelo | 957,000 |
| Kelly AFB, San Antonio | 5,347,000 |
| Lackland AFB, San Antonio | 12,414,000 |
| Laredo AFB, Laredo | 496,000 |
| Laughlin AFB, Del Rio | 1,771,000 |
| Randolph AFB, San Antonio | 1,151,000 |
| Reese AFB, Lubbock | 954,000 |
| Sheppard AFB, Wichita Falls | 3,829,000 |
| Webb, AFB, Big Springs | 435,000 |
| Subtotal | 29,095,000 |
| Total | 75,184,000 |

Mr. President, I commend all the members of the Military Construction Subcommittee of both parties and their able staffs for the excellent work on this bill. I urge all of my colleagues in the Senate to join with me in full support of this bill.

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed and the bill be read a third time.

The bill (H.R. 14751) was read the third time.

Mr. GRIFFIN. Mr. President, I ask for the yeas and nays.

The yeas and nays were ordered.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Virginia (Mr.

BYRD), the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Minnesota (Mr. MONDALE), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. ELLENDER), and the Senator from Alabama (Mr. ALLEN) are absent on official business.

I further announce that, if present and voting, the Senator from Alabama (Mr. ALLEN), the Senator from New Mexico (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Virginia (Mr. BYRD), the Senator from West Virginia (Mr. BYRD), the Senator from Nevada (Mr. CANNON), the Senator from Louisiana (Mr. ELLENDER), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MCCARTHY), the Senator from Minnesota (Mr. MONDALE), the Senator from Connecticut (Mr. RIBICOFF), and the Senator from Missouri (Mr. SYMINGTON) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of Illness.

The Senator from Pennsylvania (Mr. SCHWEIKER) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

The Senator from Florida (Mr. GURNEY) and the Senator from Illinois (Mr. SMITH) are detained on official business.

If present and voting, the Senator from Arizona (Mr. GOLDWATER), the Senator from Florida (Mr. GURNEY), and the Senator from Illinois (Mr. SMITH), and the Senator from Alaska (Mr. STEVENS) would each vote "yea."

The result was announced—yeas 82, nays 0, as follows:

[No. 188 Leg.]

So the bill (H.R. 14751) was passed.

Mr. BOGGS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. MANSFIELD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MANSFIELD. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives on the disagreeing votes of the two Houses thereon, and that the Chair be authorized to appoint the conferees on the part of the Senate.

The motion was agreed to; and the Presiding Officer appointed Mr. MANSFIELD, Mr. BIBLE, Mr. PROXMIRE, Mr. YARBOROUGH, Mr. RUSSELL, Mr. SYMINGTON, Mr. BOGGS, Mr. PEARSON, Mr. FONG, Mr. YOUNG of North Dakota, and Mr. GOLDWATER conferees on the part of the Senate.

Mr. BYRD of West Virginia subsequently said: Mr. President, on behalf of the Senator from Montana (Mr. MANSFIELD) I ask unanimous consent that the Senator from Arizona (Mr. GOLDWATER) be excused from service as a conferee on H.R. 14751, the military construction appropriations measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

## TAX REFORM ACT OF 1969

The Senate resumed the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

The PRESIDING OFFICER (Mr. HOLLINGS in the chair). The Senator from Hawaii is recognized.

Mr. INOUYE. Mr. President, I call up my amendment 319.

The PRESIDING OFFICER. The amendment will be stated.

The ASSISTANT LEGISLATIVE CLERK. On page 370, beginning on line 23, strike out all through line 7, page 377 (section 515, committee amendment).

Mr. INOUYE. Mr. President, I ask unanimous consent that the names of the Senator from Oregon (Mr. PACKWOOD) and the Senator from South Carolina (Mr. HOLLINGS) be added as cosponsors of my amendment.

The PRESIDING OFFICER. Without obection, it is so ordered.

Mr. INOUYE. Today I wish to speak in behalf of my amendment to H.R. 13270 which would delete section 515 of the Senate Finance Committee version of the Tax Reform Act. Section 515 relates to profit-sharing plans.

Section 515 of the Senate bill would have the following effects: First, distributions to employees would be taxed at ordinary income rates upon distribution in an amount equal to employer contributions after 1969; second, employers' contributions after 1969 toward the purchase of the employers' securities would be taxed at ordinary income rates upon distribution to the employee in an amount equal to the cost basis of contributions; and third, it establishes a special 5-year "forward" averaging method for the ordinary income part of a lump sum distribution. I believe that these provisions would destroy valuable incentives upon which our business firms and their employees rely, and I urge that the Senate strike out this entire section of the bill.

Upon present law, an employer who establishes a qualified employee pension, profit-sharing, stock bonus, or annuity plan is permitted to deduct his contributions to the trust, moreover, income earned by the trust is exempt from tax if the employee trust is exempt. Upon retirement the employee who receives annual benefit payments is taxed at ordinary income rates. The exception to this rule is the payment of the benefits in a lump sum distribution from the plan, in which case the payment is taxed as a long-term capital gain. I am particularly concerned that this highly successful feature of profit-sharing plans will be adversely affected by the changes proposed in section 515.

The Committee on Finance decided during its deliberations to deny such favorable capital gains treatment to lump sum distributions on the grounds that they are in reality deferred compensation at more favorable tax rates than other compensation received for simliar services. It was noted in the committee report that taxpayers with adjusted gross incomes in excess of $50,000 gain more and that there have been a number of distributions of over $800,000.

It cannot be denied that there probably are individuals who receive large distributions at favorable rates. However, it must be noted that tax exempt profit-sharing plans are not inequitable. All profits are distributed on a nondiscriminatory basis, from janitor to president, because of the regulations which govern qualification as a tax exempt profit-sharing plan. Furthermore, a survey made in 1968 showed that 90 percent of the lump sum distributions made involved distributions of less than $30,000 and that almost 70 percent feel in the range of from $500 to $10,000. Far from being a device for the rich, lump sum distributions affect millions of members in all income groups.

Since 1942, when the provision giving long-term capital gains treatment to lump sum distributions was added to the Code, over 80,000 companies have adopted deferred tax-qualified profit-sharing programs, covering over 5 million employees. More than 10,000 of these plans were established in 1968 alone. Clearly profit-sharing plans are popular with both employers and employees, and their continued growth is a clear affirmation of their success.

It has been alleged that distributions are actually deferred compensation and ought to be treated as ordinary income. However, this is not usually the case. Most corporations consider profit sharing as additional incentive and make their distributions in addition to ordinary compensation and benefits. Article II, section 1 of the constitution and bylaws of the council of profit-sharing industries makes it clear that its concept of profit sharing is a procedure for payment in addition to prevailing rates of pay.

Lump sum distributions from qualify-

ing profit-sharing plans are further distinguished from simple deferred compensation, or ordinary income, by the fact that it is risk capital. After the employer makes his contribution, it is the employee alone who is affected by changes in the investment of the contribution. Thus any number of factors, including inflation and bad stock or bond markets, could severely reduce the amount an employee would ultimately receive. Since the individual employee has no direct control over the investment of the funds, it would be erroneous to call it deferred compensation. Rather, the contributions have been invested in a manner that would ordinarily yield capital gains treatment.

Furthermore, the proposed change is defective because the distributions represent "bunched income" which has accumulated over a period of years, perhaps an entire working lifetime. The committee's answer is a complex amendment permitting averaging the gross "ordinary income" less the amount received during the year as compensation and less the capital gains after one has passed the age of 59½ in the year of distribution. This method still ignores the fact that averaging could push an elderly employee into a tax bracket higher than the level at which the contributions were originally made.

I have been advised there are over 40 steps involved in determining what the tax will be.

Apart from the claims of equity, there is another compelling reason why we should not tamper with the tax treatment of profit-sharing plans. Three decades ago a subcommittee of the Committee on Finance found that profit sharing contributes to harmonious labor-management relations and to labor peace and contentment. This astute observation is no less true today. Profit sharing enables employees to share in the fruits of the corporations for which they work. Where equity participation is not possible because the business is a partnership or close corporation profit sharing gives employees a valuable and substantive stake in the soundness of the business. Through profit sharing an employee is afforded an opportunity to share in the benefits of ownership and to accumulate funds for his retirement or his beneficiaries. It is, I believe, an intelligent response of the free enterprise system to demand for participation in the profits of one's business.

I fear that any change in the status of employer contributions may retard the further growth of plans. Taxation of lump sum distributions at ordinary rates may diminish the attractiveness of these plans and discourage further participation in them. I believe that profit sharing is a valuable financial incentive that must be preserved. I urge my colleagues who share my interest in the continued viability of profit-sharing plans to join me in this amendment to strike out section 515 of the tax reform bill.

Mr. President, in closing, I wish to briefly discuss the revenue effects of the proposed change. At the outset, it is estimated that the revised method of taxation would produce less than $2.5 million of additional revenue in the year 1970, and in 1971 it is estimated that $5 million of additional revenue would be produced; and by 1979 it is estimated $50 million of additional revenue would be produced.

While this is intended to be a tax reform bill practical considerations which may outweigh the modest revenue recoupment, under lump sum distribution, cannot be ignored because increased burdens which would be cast on the tax collecting agency must be balanced against any estimated revenue gains which might result from the changed method of taxation. I really believe the increased administrative costs might eliminate all the revenue gained and lead to a net revenue loss.

The committee, in estimating these additional revenues, naturally assumed that all of the profit sharing plans in effect today would continue in effect. I am convinced, with this amendment, it would serve as a damper to these plans and discourage not only further development of plans but close up present plans.

In view of the great care otherwise exercised to see that revenue cutting portions of the bill are matched by revenue increases, this possibility should not be ignored.

Therefore, once again I urge my colleagues who share my interest in the continued liability of profit-sharing plans to join me in this amendment to strike section 515 of the tax reform bill.

## CONCERN OF YOUTH ABOUT ENVIRONMENTAL CONTROL

Mr. PACKWOOD. Mr. President, there is no more critical problem facing our Nation today than that of the pollution of our entire environment. In recent months, we have seen a great surge of interest and concern by the youth of America to reverse the current situation. I was greatly encouraged to see from my mail of late that this concern extends down to the elementary school level. What better weapon do we have in meeting this problem than the education and concern of our young people?

I have received some really delightful letters from the fourth grade students of Bend, Oreg.

What an encouraging sign. Without further comment, I should like to introduce these young "concerned Americans" to all Senators by letting them read their letters to me, and ask unanimous consent to have them printed in the RECORD for that purpose.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

BEAR CREEK SCHOOL,
*Bend, Oreg., November 25, 1969.*

DEAR SENATOR PACKWOOD: We have been studying our State and *national pollution problems*. Our class decided that they would like to express their feelings to their government representatives. Enclosed you will find some of their letters. Please address any replies to the above address so that we can share the letter or letters with each other.

Sincerely,

MRS. GRAHAM.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: We are studying on pollution and some of the places I went were polluted. We went past a hill that had cans, beer bottles, paper, plastic paper, sticks. We want clean water, land, air. We should not have no deposit bottles or cans. Because everybody just throws them on the street and leaves them there.

Sincerely,

CINDY WELANDER.

---

BEND, OREG.,
*November 24, 1969.*

DEAR SENATOR PACKWOOD: I don't like the pollution that is going on, and I'm sure you don't like it either. I wish we could outlaw cans then we could have returnable jars and bottles. That would stop land pollution a lot. What I don't get is that how can we stop air pollution. Can you stop pollution? I'm trying.

Sincerely,

DONALD IPOCK.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: I think that there should be a law that there should not be any no return no deposit bottles or cans. There is too much pollution these days. It is a disgrace. If you can help us please do.

Sincerely,

DAVID COCHRANE.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: People just don't listen when we tell them not to litter because they are destroying America. I just think they're too lazy to even get up and throw it in the garbage. I think we should make 5 cents on the bottles and cans then instead of throwing them on the ground. We could take them to the store and get 5 cents out of them. I don't think we should put our sewage in the lakes and rivers, because we have a lot with not having to start more. The air is so bad that some day we won't be able to see the sun because of the air pollution. Instead of burning our garbage we can bury it. Well I just hope you stop all of this and make America beautiful. And another thing people cause air pollution by smoking. Cigarettes are hazardous. America is getting ruined slowly.

Sincerely,

TOBI RAMSEY.

---

BEND OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: We have been studying about pollution and we would like to have it stopped. It is not good for your health. It does not keep America green and pretty like it should be. Every time I see anyone throw trash out the window or anything I pick it up and put it in the trash can. We want to have clean air, too.

Sincerely,

DEANNA STEVENS.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: We have been studying on pollution in school. We want to know if you could help us keep Oregon beautiful. We want you to help make no deposit, no return bottles into return bottles. After people drink out of these bottles they throw them on the ground. It is getting so bad that it is looking terrible. I hope you can help.

Sincerely,

MARY MILLER.

---

BEND, OREG.,
*November 24, 1969.*

DEAR SENATOR PACKWOOD: Can you stop pollution? We go camping every weekend. There is paper, cans, beer bottles, other things around. They should clean it up, but they don't. Do something about it. We want it to stop.

Help stop pollution please.

Sincerely,

BILLY WAYNE CONLEY.

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: I hope you can do something about all this unnecessary wasting of clean air, water, and land. It can kill people and wildlife, and it will.

There is water pollution in Lake Erie. It used to be a favorite fishing ground. Now it's a water filled garbage dump! I don't want this happening to Oregon and the other States of the United States of America.

Nobody and nothing can survive without air. The air is fit to breathe if we keep it that way. In this last century the earth's atmosphere has risen ½°. If it rises to 4° warmer then the polar ice caps would melt and flood all the coastal cities.

If you have any literature on air, water, and land will you please send it to me and I'll take it to PURE meetings. There is a lot of rivers and lakes in Oregon and they're fun to fish in, go swimming, water skiing, and just plain old fun. Let's keep it that way please.

Sincerely,

JERRY JOB.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: Have you been thinking about litter? Well I have. Can you help it? I wish I could. Don't you think you can? I think that you shouldn't put sewer in the Deschutes River. I like that. I hope you can help it. I am a fourth grader. I would help stop pollution too! I'm helping all I can. Pollution is getting bad.

Sincerely yours,

CARLA WILKINS.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: We have been studying pollution. I want you to outlaw no deposit no return bottles and cans. The people who buy beer, pop, and other things in bottles and cans will not throw their cans and bottles away, if they know they are returnable for about five cents. People who throw away these cans and bottles should get fined and thrown in jail. But if anybody throws away cans and bottles the cans and bottles will not be there very long. If a little kid sees them and wants some money he will pick up every last can and bottle he can see.

Yours truly,

JON LEAGFELD.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: Do you know what our states are coming to? It is just pollution now. It would help if you outlaw beer cans and pop cans because when people are finished with them they throw them down. If you could put it in bottles with a 5¢ deposit. That will help land pollution a little. Now it is a problem to stop water pollution and air pollution.

Sincerely yours,

CAROL COULTER.

---

BEND, OREG.,
*November 25, 1969.*

DEAR SENATOR PACKWOOD: It is our duty in Bend to not throw trash out. It would be a help if they would outlaw cans and have all bottles returnable with five cent charge. I think that would help a great deal about the litter problem. There should be a law about mill and construction companies putting there wastes in rivers and streams and lakes. The mills should have a pond to put their logs in and why should the construction companies dump dirt in the water. If we don't stop the air pollution it will melt the polar ice caps and the coastal cities will drown by water.

Sincerely,

BRIAN MOODY.

BEND, OREG.
*November 25, 1969.*

DEAR SENATOR PACKWOOD: I am a fourth grade girl. I would like to help stop pollution. We are making posters for pollution. We would like you to vote to help stop pollution. I think we should not let people put sewage in the Deschutes River and all the rivers of Bend. If you could stop people from selling smokes it would stop some of the air pollution.

Please help us.

Thank you.

Sincerely,

MARETTA LOUISE SEUELL.

---

BEND, OREG.
*November 24, 1969.*

DEAR SENATOR PACKWOOD: I would like to know why kids can't vote on litter? Why won't there be cars and airplanes go by electric to stop pollution? And have no deposit cans and deposit bottles.

Sincerely,

KIMBRELL CUMMINS.

---

BEND, OREG.
*November 24, 1969.*

DEAR SENATOR PACKWOOD: Would you please make no deposit no return bottles. Because this town is going to be pretty polluted. The teen-agers and the parents are the ones who make this town polluted. Not us little kids. Water is the hardest to keep clean. Because when somebody cleans up the ditches in this town, people put it back in it. Land is hard to keep clean too. And so is air.

Sincerely,

BRIAUNA MICHELLE HOLLY.

## MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Leonard, one of his secretaries.

## EXECUTIVE MESSAGES REFERRED

As in executive session, the Presiding Officer laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the Committee on Armed Services.

(For nominations this day received, see the end of Senate proceedings.)

## TAX REFORM ACT OF 1969

The Senate continued with the consideration of the bill (H.R. 13270), the Tax Reform Act of 1969.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Hawaii.

Mr. WILLIAMS of Delaware. Mr. President, I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

Mr. WILLIAMS of Delaware. Mr. President the Treasury strongly supports section 515 of the Tax Reform Act as reported by the Senate Finance Committee. This provision would deny capital gains treatment—on a prospective basis only—for the portion of a lump-sum distribution from a qualified pension or profit-sharing plan to the extent it consists of contributions by the employer. To prevent distortion in tax liability which might result from including several years income in the gross income of 1 taxable year, this provision contains a special averaging provision.

The Treasury believes that employer contributions to a pension or profit-sharing plan should be treated as ordinary income. Such amounts are compensation for services rendered. They do not cease to be compensation and are accumulated in a tax-exempt trust for the benefit of the employees.

There have been statements circulating recently to the effect that this provision will result in a tax increase for recipients of relatively small distributions and a tax decrease for recipients of large distributions. These statements are incorrect. In fact, most recipients of relatively small distributions, that is, $20,000 or less—would have a smaller tax liability than they now have with capital gains treatment because of the favorable averaging rule provided. High paid corporate executives will generally have a greater tax liability. This demonstrates that capital gain treaments is inappropriate as an averaging device in that it has uneven effects depending upon income size. A 5-year average as proposed in the bill provides the same type of averaging benefit to all taxpayers, regardless of income size.

The Treasury believes that existing law provides an unwise incentive for employees to elect lump-sum distributions from pension and profit-sharing plans to obtain capital gains treatment; aside from this tax benefit it would normally be in their best interest to receive periodic distributions. Section 515 of the bill will tend to remove this unwise incentive. This will strengthen the effectiveness of the private pension system in providing for the continuing needs of employees after retirement.

Mr. President, there is $55 million involved in the pending amendment and, if agreed to, it would mean one more step backward from the so-called tax reform which has been approved by the committee and strongly endorsed by the Treasury Department.

To summarize, I point to existing law, where the employer's contribution to the private pension plans, plus all appreciation thereon, as a result of the investment, is and can be accepted as a lump-sum payment and receive favorable capital gains treatment. Under the committee bill, we would provide that the employer's contribution would be subject to regular, normal income tax, but that the capital gains treatment would apply only to the appreciation in the investment of the contributions. I certainly think that this is one loophole we should close. By all *means*, I hope that the amendment will be rejected.

I say again that there is $55 million involved. If we keep whittling away here, there will soon be nothing left.

Mr. MILLER. Mr. President, will the Senator from Delaware yield?

Mr. WILLIAMS of Delaware. I yield.

Mr. MILLER. Is it not true that the way the committee handled this item was to make it prospective and operational?

Mr. WILLIAMS of Delaware. That is correct.

Mr. MILLER. So that those who will

retire, let us say, next January or February, would find no change whatever insofar as their lump sum payment is concerned and as to how the tax law would handle it over what is now the case.

Mr. WILLIAMS of Delaware. The Senator is correct. This is completely prospective only, but it is a correction long overdue in the Revenue Code.

Mr. MILLER. Is it not true that especially in a case of the employee with a farily long term of service, the great bulk of the lump sum payment is attributable to the accumulation in a tax-free trust rather than to payments made by an employer as a contribution to the trust in previous years?

Mr. WILLIAMS of Delaware. That is correct.

Mr. MILLER. Is it not true that the committee's action leaves the capital gains at least on the great bulk of the payout alone?

Mr. WILLIAMS of Delaware. Yes. That should be subject to capital gain because it is capital appreciation the same as it would be if it was a private investment. But on the other hand, the employer's contribution to the pension fund is a part of the income of the individual and even though it is deferred income it should be taxed at regular rates. The committee bill also provides an averaging provision so it does not hit him in the high bracket all in 1 year.

Mr. MILLER. In the case of the situation where the employee has made a contribution down through the years, as well as the employer, that portion of the lump-sum payment which is attributable to the employee's own contribution is merely a return of income which he has previously paid taxes on and is not taxed at all under the committee bill.

Mr. WILLIAMS of Delaware. That is true. It is not taxed either under existing law or in the Finance Committee bill.

Mr. MILLER. I thank the Senator from Delaware.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Hawaii.

Mr. LONG. Mr. President, I personally voted to support the position taken by the distinguished Senator from Hawaii (Mr. INOUYE) in committee. I would have felt constrained to stay with the committee position except for the fact that members of the committee have been voting on the merits of these matters as they felt about the matter in the committee. I believe this does involve a Sears & Roebuck retirement plan, does it not, I ask the Senator?

Mr. INOUYE. The Senator is correct.

Mr. LONG. Many people who have such retirement plans working in States to the north, east, and west of us are planning and hoping, when they earn their retirement, to take a lump sum settlement, pay a capital gains on it and then move to warmer climates, such as Florida, or perhaps Louisiana, or California, or Hawaii—where climates are not so harsh on elderly people and they may live out their remaining years in modest comfort.

To tax this settlement as ordinary income does impose a considerable burden upon them, without involving a great deal of tax revenue, and it causes very much inconvenience to a lot of people who are planning to retire and move to some other place from where they worked; is that not correct?

Mr. INOUYE. The Senator is absolutely correct.

Mr. LONG. I have talked to people involved in this Sears & Roebuck pension plan, and I do not really regard it as a loophole, where people have earned their retirement over a long period of time, that they are permitted to have capital gains treatment. I think that, while perhaps some people might receive an undue tax advantage, the overwhelming bulk of the people affected are those with modest means, who work hard for the retirement benefits to which they are entitled, and I would, therefore, very much dislike to see capital gain treatment taken away from them. Thus, I shall vote for the Senator's amendment.

Mr. INOUYE. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Hawaii.

Mr. WILLIAMS of Delaware. Mr. President, with reference to the effect of this amendment, I would like to read some figures given in the President's 1963 tax message relating to a proposal to deal with this problem. These are actual cases where employees received very large lump-sum distributions and gained the benefit of the low capital gains tax on these distributions.

I ask unanimous consent that a table listing these lump-sum distributions be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

1. The following lump-sum distributions were received under the pension plan of Employer M within the period from 1954 to 1960:

| | *Amount* |
|---|---|
| Employee A | $524,164 |
| Employee B | 503,670 |
| Employee C | 428,617 |
| Employee D | 342,280 |
| Employee E | 335,647 |
| Employee F | 314,556 |
| Employee G | 283,643 |

2. The following lump-sum distributions were received under the profit-sharing plan of Employer N during the years 1960 through 1962:

| | *Amount* |
|---|---|
| Employee A | $800,000 |
| Employee B | 400,000 |
| Employee C | 365,000 |

During 1962, over 10 employees received lump-sum distributions of $200,000 or more under this profit-sharing plan.

3. A lump-sum distribution of $843,000 was received under the pension plan of Employer O in 1959.

4. A lump-sum distribution of $332,348 was received under the pension plan of Employer P in 1961.

Mr. WILLIAMS of Delaware. Mr. President, this table, which as I said, is derived from information in the President's 1963 tax message shows one employee receive a lump-sum distribution of $524,164. Another employee received $503,670. Yet another employee received $428,617, and so forth on down the line.

I think the Senate should be aware of what we are voting on here. We are dealing with large benefits for certain individuals who are deferring their salary income and who under present law only pay a tax at capital gains rates when they receive that deferred income. This is one of the loopholes that preceding Presidents as well as the present President, have recommended should be corrected. The committee's bill does deal with the loopholes.

I hope the amendment which would strike the reform from the bill will be defeated.

Mr. LONG. Mr. President, about $10 million is involved in this amendment——

Mr. WILLIAMS of Delaware. The original estimate was $5 million in 1971, $10 million in 1972 and $55 million ultimately.

Mr. LONG. I am advised that about $10 million is involved in this amendment.

Mr. President, in the bill we have increased the capital gains tax from a 25 percent tax up to a 37½ percent tax. So the capital gains tax, by virtue of this bill, becomes a graduated income tax. To be sure, it is not a graduated income tax going up as high as the tax on ordinary income, but now we have it, by vote of the Senate, up to 37½ percent.

So if one who is making a substantial income receives a lump sum distribution from a pension plan, he would have under the bill a substantial increase in tax on the lump sum distribution by virtue of what we have done in increasing the capital gains tax rates—the top rate, in fact, is increased by 50 percent.

That being the case, it would seem to me that the people who were retiring under the Sears, Roebuck or Proctor & Gamble retirement plans would have their taxes increased substantially, anyway.

I tend to agree with the Senator from Hawaii. I do not like to see these people taxed more than others. It may be that my opinion may put me at variance with others, but I find myself in sympathy with these people who want to retire and move to a pleasant climate.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Hawaii. On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. MANSFIELD. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Virginia (Mr. BYRD), the Senator from West Virginia (Mr. BYRD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Minnesota (Mr. MONDALE), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that the Senator from Alabama (Mr. ALLEN), the Senator from Nevada (Mr. CANNON), and the Senator from Louisiana (Mr. ELLENDER) are absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON), and the Senator from Virginia (Mr. BYRD) would each vote "yea."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Pennsylvania (Mr. SCHWEIKER) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

On this vote, the Senator from Alaska (Mr. STEVENS) is paired with the Senator from Arizona (Mr. GOLDWATER). If present and voting, the Senator from Alaska would vote "yea" and the Senator from Arizona would vote "nay."

The result was announced—yeas 50, nays 37, as follows:

[No. 189 Leg.]

YEAS—50

So Mr. INOUYE's amendment was agreed to.

Mr. INOUYE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LONG. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 392

Mr. RIBICOFF. Mr. President, I call up amendment No. 392.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to state the amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, reads as follows:

On page 23, line 16, strike the phrase "one-fifth of 1 percent" and insert in lieu thereof, the phrase "one-tenth of 1 percent (for taxable years beginning in 1970, one-fifth of 1 percent)."

On page 24, after line 20, insert the following new subsection:

"(c) ADJUSTMENTS IN RATE OF AUDIT-FEE TAX.—The Secretary or his delegate shall maintain such records as are necessary to reflect accurately both the costs of administering the provisions of this chapter and the total taxes collected under subsection (a). He or his delegate shall report annually to the Joint Committee on Internal Revenue Taxation the total amount of the taxes collected under subsection (a) and the total costs of enforcing the provisions of this chapter and shall recommend to the committee the rate of audit fee which shall reasonably approximate the costs of such audit."

The PRESIDING OFFICER. Does the Senator wish to consider the amendments en bloc?

Mr. RIBICOFF. Yes, I ask unanimous consent that the amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, the amendment is being offered on behalf of the Senator from Nebraska (Mr. CURTIS), the Senator from Utah (Mr. MOSS), the Senator from Illinois (Mr. PERCY), and myself.

Mr. President, I ask unanimous consent that the names of Senators HATFIELD, TOWER, JAVITS, RANDOLPH, and HRUSKA be added as cosponsors of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, the purpose of the amendment is to carry out the recommendation of the Finance Committee.

On page 27 of the report, the committee pointed out that for the first time they were establishing a user charge to pay for the cost of auditing the assets of foundations. However, on a study of the actual costs, there is no question that after the first year a fee of one-fifth of 1 percent will bring in twice as much money as necessary to audit foundations.

Since this is not a tax, but is really a service charge, it is our feeling that the rate should correspond with the actual cost to the Internal Revenue Service for auditing the assets of foundations. And, as a consequence, we do believe that after the first year it should be lowered to one-tenth of 1 percent of assets.

At the suggestion of the Senator from Illinois (Mr. PERCY), we added an additional sentence to provide: "and the total costs of enforcing the provisions of this chapter and shall recommend to the committee the rate of audit fee which shall reasonably approximate the costs of such audit."

Mr. President, since the Percy amendment would require the foundations to pay out 6 percent of assets, there is no justification whatever, for charging them this extra money.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. CURTIS. Mr. President, I wholeheartedly support the amendment.

There was a clear-cut vote in the committee on whether we should have a tax for revenue or an audit fee so that the foundations could be thoroughly, automatically, and continuously audited. The committee turned down the idea of a tax for revenue and agreed to the audit fee proposal. In this action, we were in accord with the principle advocated by the Treasury.

The Treasury advocated a 2-percent tax on income.

The committee based the charge on the assets of the corporation and for a very valid reason. The foundation that hoarded its assets and did not produce very much income would pay a low tax. The foundation that produced all the income they could and paid it out would have to pay a higher tax.

There are several places in the bill where they are required to ascertain the value of their assets.

So, first the committee fixed a tax on assets. I point out that if we transfer the Treasury's recommendation of 2 percent on income to assets, that is equivalent to one-tenth of 1 percent at 5 percent. And we have already provided for a 6 percent tax.

The amendment will bring in all of the money we need. We want a thorough audit. It will be in line, I think, with what many members of the committee wanted. It will correspond in amount to the amount the Treasury recommended.

I hope the amendment is agreed to.

I thank the Senator for yielding.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. PERCY. Mr. President, I indicate my solid support for the amendment. I appreciate very much the acceptance by the Senator from Connecticut of the suggested amendment language.

I think the Senate Finance Committee took a major step forward in recognizing that there should be a charge against assets rather than against income.

I think the implication of the House version of the bill is that there is to be an income tax imposed on foundations. And nothing could be more ridiculous or harmful, because what would we do if we had a 7-percent tax on income of foundations?

We would take the 7 percent of income away from the foundations from which it goes mainly to education, health, and basic research. We would then move that income into the Treasury Department, appropriate the money through Government channels to the very same type agencies for the very same purposes. However, we would deduct the cost of the administration of the Government. We would have Government employees rather than foundation personnel. And we would lose the benefit of receiving all the volunteer help received by the charitable, educational, and health institutions that are in the volunteer private sector. Moreover, past experience has indicated that we cannot always be sure these Treasury funds would go toward priority programs.

Actually, we would be shrinking the benefits that would be received by the people of the United States as a result of our action.

This amendment is intended to make clear that we are not seeking to impose on income tax for revenue purposes, but

only a charge to provide an amount sufficient to cover the audit services to be performed by the Treasury Department and which the foundations themselves are quite willing to pay for. I therefore fully support the amendment.

Mr. RIBICOFF. The Senator is correct. We are not really at variance with the Finance Committee.

I again praise the Finance Committee for even thinking of putting this into the pending bill. Once the audit is made, the Government and the country for the first time, will really know what foundations are all about, where their assets are, where they are going, and what they are doing.

I commend the Finance Committee for taking a step that would accomplish this.

We are trying with this amendment to bring the bill into line with what the report says the intentions are.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. RANDOLPH. Mr. President, I commend the able Senator from Connecticut for offering the amendment with the cosponsorship of other interested Senators. I have listened to his presentation, and to the remarks of the Senator from Nebraska (Mr. CURTIS), and the remarks of the Senator from Illinois (Mr. PERCY); and I am gratified at the apparent feeling of unity in reference to this matter. I trust that the Finance Committee, through its leadership on both sides of the aisle, will believe that this approach—which is a strengthening amendment, as it were, and a clarification—can be incorporated in the pending bill. The Senator from Texas (Mr. TOWER) also has been interested in this amendment and other Senators have indicated their support.

I emphasize that it is very important to realize that in most of the foundations there are persons by the hundreds throughout the United States who are working as volunteers. The officers and directors of the foundations are often paid nothing for their work. The moneys that are contributed from the foundations to worthy causes are carefully considered; and, by and large, programs of the educational institutions, the merited scholarships, and the additions to our medical facilities—all programs vital to the progress of our American society—have been carried forward by volunteers—people who are knowledgeable and realistic as to local and national needs and perform a service without compensation.

It is right that such people be encouraged, that these concerned citizens continue their work, and that we not duplicate with unnecessary government, through employees of the Federal structure, in such bookkeeping.

Mr. RIBICOFF. I thank the Senator.

Mr. President, I ask unanimous consent that the name of the Senator from Kansas (Mr. DOLE) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. CRANSTON. Mr President, I should like to speak in regard to and in support of the Senator's amendment, with particular reference to the amount that would be made available for audit purposes by the amendment.

Ever since I learned of the action taken in the other body to deal with this topic, and then the action taken in the Senate committee, I have been seeking to ascertain how much money would be required by the Bureau of Internal Revenue to conduct the audit authorized by the bill. The amount appeared to me, initially, to be excessive, and I base that upon my own knowledge of auditing costs acquired through service as State Comptroller in California.

The Bureau of Internal Revenue was quite reluctant, and the Treasury Department was perhaps even more reluctant to come up with a figure. I kept pressing for a figure. On Friday I was told informally that a figure would be made available to me during the day, in the form of a letter that would be signed as soon as the top person became available to sign the letter. We managed to learn informally from somebody of high position in IRS—a person I think totally knowledgeable in this area—that the amount made available by the committee bill was more than was required and that the amount proposed in the pending amendment was totally adequate for the sort of audit that Congress wishes.

Then, for whatever the reason may be—the IRS letter was not made available. The formal statement was withheld, without explanation I suspect that the reason may well be that the Treasury or the Bureau of the Budget would like to have the extra $25 million that would be made available by the committee bill. That, of course, amounts to taxing the foundations an extra $25 million, roughly, which is contrary to the will of the committee; because the committee has made plain that it does not want a tax, that it simply wants to make available whatever funds are adequate for the audit. I am sure all of us agree that the audit would be very helpful, and that adequate funds should be made available to cover its cost.

So I strongly urge—and I base this upon the information that comes from the executive branch—support of the amendment, which would make available the funds required, and no more than are required, for the audit we all want.

I would also like my name to be added as a cosponsor of the amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the name of the Senator from California (Mr. CRANSTON) be added as a cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. The Senator is correct. Originally, when we were drawing this amendment, we thought we would make it one-tenth of 1 percent, beginning the first year. But after discussions with the staff, we found that one-tenth of 1 percent would not quite cover the first year. It is estimated that this will cost approximately $25 million a year, and the $25 million a year will be covered after the first year by one-tenth of 1 percent. The one-fifth of 1 percent will bring in in excess of $25 million. In any event, once the audit is made and the IRS knows the actual cost, they will make a recommendation; and when the recommendation is made, if it requires more than one-tenth of 1 percent, we can increase the one-tenth of 1 percent figure.

So it is certainly the desire of the cosponsors to make sure that the general tax revenues in no way pay for the cost of the audit, but that actual cost of the audit will, throughout the years, be borne by the foundation, by the adjustment of tax rates.

Mr. CRANSTON. I thank the Senator for that response, and for his fine work in this matter.

Mr. PERCY. Mr. President, will the Senator yield?

Mr. RIBICOFF. I yield.

Mr. PERCY. One thing that I think should be pointed out is that the one-fifth of 1 percent in the first year would provide approximately $50 million. With that amount, 5,000 men could be hired at $10,000 a year each. I cannot imagine that the Treasury Department anticipates requiring or hiring that type of force. But whatever they require to do a thoroughly adequate job, that is what our intention is, and that is the intention of the foundations. The intention is not harassment; no one is thinking about that. The intention is a thorough audit and to make certain that they can verify what has transpired.

I think we have helped considerably by requiring annual public accounting and an annual CPA report to be made by the foundations. The Treasury Department certainly can rely on and use the material that is developed by the CPA's. So that when the amount drops back to the equivalent of approximately $25 million a year, I think that still will be more than adequate. If for any reason they require more, the amendment I have added—and which I appreciate the Senator from Connecticut accepting—provides for the Treasury Department to inform the Congress whether an escalation or decrease in audit charges are necessary or desirable.

Mr. RIBICOFF. The Senator is correct.

Mr. PERCY. And this is perfectly acceptable to the foundations. They recognize that it may be reduced or increased. I cannot imagine that it would be increased, but we have made adequate provision.

I also wish to affirm that which was stated by the Senator from Connecticut regarding the increase we have now made over the committee bill in the percentage of assets to be paid out by the foundations. There is no question—and I reiterated it when I offered the amendment increasing the payout from 5 to 6 percent—that it is going to require some adjustment on the part of some foundations that have been paying out considerably less than this. But, having done that—and I hope it will be sustained by the conference, and I have every reason to believe that it will be—we do not wish

to add a punitive tax of any kind at this stage.

Mr. LONG. Mr. President, the tax that was levied for audit purposes in the Finance Committee bill was fixed at the rate in the bill because we wanted to be sure that it would yield enough revenue to meet the costs of the audit work. Since that time, this Senator has made some studies and has consulted with our staff. I have been advised that after the first year less money may be needed for audit purposes than in the first year.

We really have no desire to collect more than is needed for audit purposes. We believe that the amount suggested by the Senator's amendment will be adequate for this purpose. If it is not, we can increase it later, and the amendment contemplates that.

The major benefit of this bill, if it becomes law—and I believe it will—is that for the future we can expect to have these foundations do a great deal more work with their resources than they have done in the past. I am pleased to see the Senator from Illinois nodding, because the bill moves in that direction—to make them pay out more of their resources for charity, for education, and for other worthy purposes.

We believe the foundation provisions of the bill will do a world of good, not by raising revenue but by regulating the activities of foundations and requiring a significant benefit to charity to flow from their resources. So, in justification, the amendment seeks to tailor the revenue raised more closely to the audit needs after the first year. It would not change the amount raised in the first year, while we are determining how much is to be needed.

I have no objection to the amendment. If we find the amount of revenue in the second year and the third year is not enough for audit purposes, we would have little difficulty increasing the tax to achieve whatever revenue might be needed for that purpose.

Mr. WILLIAMS of Delaware. Mr. President, I do not argue with my friend, the Senator from Connecticut. The question is: Is that all we wanted to achieve? There is not a taxpayer in America who would not be delighted to have his tax obligation limited to the cost of auditing his returns.

The bill as it was passed by the House and sent to the Senate was based on the premise that these foundations would be taxed at 7.5 percent on their investment income. Under that proposal $65 million of revenue would have been produced in the first year, and thereafter it would have advanced to $100 million. The Committee on Finance, in changing the method of taxing foundations to a tax on assets instead of on income would provide $40 million of revenue the first year, which would rise eventually to $55 million. The pending amendment would not change the revenue in the first year but would thereafter cut the amount back by at least one-half, on the average, so that eventually it would result in a $27½-million cutback.

This is a question of degree. How far do we want to go toward taxing these foundations? Again, it is erosion, but recognizing there are only about 12 or 14 shopping days before Christmas and that the Senate is dealing with a Christmas package and also realizing the overgenerosity of the mood of Congress I shall not delay the Congress by requesting a record vote on something for which I know they would vote.

Mr. RIBICOFF. Mr. President, it should be pointed out that what I am trying to do is to carry out the thinking of the committee. On page 27 of the report of the Committee on Finance it is stated:

> The committee views this tax as a supervisory fee and as an indication of the amount of funds needed by the Internal Revenue Service for proper administration of the Internal Revenue Code provisions relating to private foundations and other exempt organizations.

I think the Senator from Delaware will agree that the 1 percent in the first year is more than enough to cover all the supervision we need. In the first year if it is indicated that one-tenth of 1 percent in subsequent years is not sufficient, then the provision on page 2 of the amendment which requires the Internal Revenue Service to make this known and recommend what is needed to pay for the supervision, does give the Committee on Finance and the Congress an opportunity to raise that one-tenth of a 1 percent.

Again, I say it was not the intention of the committee at any time during the consideration of the measure to provide that the Treasury was to make money to pay for the costs. My amendment carries out the thinking and the wishes of the Committee on Finance.

Mr. WILLIAMS of Delaware. Mr. President, I shall not delay the Senate by arguing the matter further. There were some members of the committee who felt the purpose of the bill was to raise revenue for the U.S. Government.

Mr. GOODELL. Mr. President, will the Senator yield?

Mr. PERCY. I yield.

Mr. GOODELL. Mr. President, I wish to commend the distinguished Senator from Connecticut and the distinguished Senator from Nebraska for offering the amendment. I ask unanimous consent to be added as a cosponsor of the amendment.

The PRESIDING OFFICER (Mr. MUSKIE in the chair). Without objection, it is so ordered.

Mr. GOODELL. Mr. President, I would like to direct a comment to the chairman of the committee. I think the important part of the change that has been made in the Senate on this question was made in the Committee on Finance. We can differ as to how much is necessary to enforce the auditing of the foundations, but the critical change was made in the committee to raise the money necessary by a supervisory tax on the assets of the foundations rather than on income.

I would like to ask the distinguished Senator from Louisiana if it is his feeling that the Senate conferees will stand very strong on the principle that whatever tax we have to audit the foundations, it should be a tax on assets rather than income.

Mr. LONG. Mr. President, the Senator from Louisiana will stand by the Senate position, but I think I should make it clear that while I believe the Senate will prevail numerically in the conference on this bill with regard to a great number of the committee amendments and floor amendments, I think I would be misleading the Senate if I said that I think we can make the House agree in terms of dollars of revenue.

Mr. GOODELL. I understand.

Mr. LONG. That is a different matter. What is being discussed here involves a very small amount of revenue. But I believe when the House takes a look at this bill and sees the revenue shortfall—which because of floor amendments is going to be far greater than that of the House bill—I think the House is going to insist on prevailing in terms of dollars, although we may prevail in other regards.

Mr. GOODELL. I understand that in committee there was overwhelming sentiment with regard to a supervisory tax based on foundation assets rather than income.

Mr. WILLIAMS of Delaware. That sentiment was about the same as the overwhelming sentiment against the Gore amendment.

Mr. GOODELL. I hope not.

Mr. WILLIAMS of Delaware. That includes many of the other amendments.

As one potential conferee I am speaking on many of the other amendments in this better than $10-billion Christmas tree package. The Senate is going to pass a bill providing over a $10-billion loss in revenue as the result of adoption of the many amendments we have passed—and I am not speaking of this amendment in particular.

Any number of Senators have said to me, "I voted for that amendment, but you can eliminate it in conference." In my opinion those who voted for these amendments and who want to brag about their votes back home had better send to conference only those conferees who will stand by the amendments. Personally I would not serve as a conferee unless it were understood that we should try to bring back a good bill in spite of Senate action.

Mr. GOODELL. Mr. President, I am glad the Senator has made this point. I voted with him on the Gore amendment.

We are not talking here about the revenue-raising principle: we are talking about the principle of whether foundations should be taxed on income or on assets, so that a tax will not be raised at a later day which would make it a full tax on income.

Mr. WILLIAMS of Delaware. Mr. President, I recognize that generally it is the obligation of the conferees to go to conference and defend the position of the Senate without regard to the individual position of conferees. I recognize that as a general principle. But I am speaking here of not just the Gore amendment, but the more than $10 billion overall revenue loss which has been added to this bill by floor amendments which has no relation to tax reform. I want to clarify my position as a potential conferee. On this amendment, I supported in committee the principle that these foundations should pay taxes. I still think they

should, and as a potential conferee I have not changed my mind. I think other Senators feel differently. I think the Senator from Louisiana expressed that quite well.

Mr. GOODELL. On the Gore amendment we had a rollcall vote. We are not going to have a rollcall vote in the Senate to test the sentiment of Senators of this principle. Conferees will be going to the conference without the overwhelming sentiment of the Senate as expressed in a rollcall vote. That is why I raised the point. I think that overwhelmingly the Senate would back up the Committee on Finance to tax assets only enough to audit the funds. We would oppose the position taken in the House.

Mr. LONG. Mr. President, so far as I am concerned, I have never felt that the presence or absence of a rollcall vote made the least bit of difference when we went to conference on something that the Senate wanted to do. When the Senate wants to do something, that is what it wants to do. It is generally my impression that if something can be agreed to by a voice vote, whether it happens to be unanimous or not, if agreed to, that is the expression of the Senate. But, if a Senator wants to make a record and have a rollcall vote, that is his privilege. So far as I am concerned, however, it does not mean that the Senate is any more for an amendment than if we agreed to it by a voice vote.

The committee was closely divided on the issue of the audit fee concept, but that concept did prevail in the committee. When we go to conference, however, we certainly cannot guarantee that we will run over the House conferees in order to prevail because, as we all know, that cannot be done.

Mr. RIBICOFF. May I say, for the benefit of my colleagues, that I have the utmost confidence in the conferees of the Senate Finance Committee. I have discussed this amendment with the chairman and the ranking minority member and I think they understand how the Senate feels. They certainly will back up their basic report. I am satisfied that the Senator from Louisiana, whether this is a rollcall vote or a voice vote, understands the sentiments of the Senate. I have the utmost confidence that he will do everything he can in conference to have those sentiments prevail.

I do not seek to delay the proceedings of the Senate any further. We are all anxious to get this bill over with. But it should be pointed out that even the remarks of the distinguished Senator from Delaware in what he was talking about, the amendments that were added to the bill, costing huge sums of money, he kept on saying that he does not include this amendment, he does not include this amendment.

Mr. President, I ask unanimous consent that the name of the Senator from Hawaii (Mr. INOUYE) be added as a cosponsor to the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIBICOFF. Mr. President, the fact that so many Senators wish to be cosponsors of the amendment should be getting the message across to the chairman.

Mr. LONG. So far as I am concerned, if people want to insist on delaying the Senate with rollcall votes before taking something to conference, that is all right with me, but either a rollcall vote or a voice vote will make no difference in conference.

Mr. WILLIAMS of Delaware. I agree that there is no difference whether we have a rollcall or a voice vote. I only said that I would not ask for a rollcall vote in order to expedite the business of the Senate. We have already spent more time talking about having a rollcall vote on this amendment than it would have taken to have the rollcall itself. Let us vote either on a rollcall or on a voice vote and get on with our business.

Mr. MOSS. If I understood the Senator from Delaware correctly, he spoke of the amendments that had been added in the Senate that would cost money and he said that as a potential conferee he was going to see that they were rectified in conference. It seems to me that the Senator is announcing in advance that if things that do not accord with his view on the tax bill, he will not support them as a conferee if he goes to conference on the bill as one. Is that correct?

Mr. WILLIAMS of Delaware. I was not necessarily speaking of this amendment. I said we have already approved amendments which will result in a loss in revenue of nearly $12 billion. We just cannot afford such irresponsible action, and I would not be bound as a conferee to do so. I want that clearly understood.

Mr. MOSS. I understood there were other amendments, not just this one.

Mr. WILLIAMS of Delaware. The amendments that have been added on the floor to the bill will cost over $10 billion next year. Another $1.7 billion of additional cost will be added in later years. I do not think we can afford that. There will be an effort made later to correct it, but if we do not correct it I want to make it clear that I would not be bound as a conferee to pledge to support those amendments.

Mr. MOSS. That is the point I wanted to have clarified. When the Senator says in advance that he could not support any of the amendments that have been added to the bill, he is saying that he would apparently——

Mr. WILLIAMS of Delaware. Senators might be interested in knowing that some of the Members who have offered amendments have come up to me later and said, "I do not care if you delete that amendment in conference." [Laughter.] I will not be a party to such political hypocrisy.

Mr. RIBICOFF. I have such confidence in the conferees that a voice vote will be satisfactory.

SEVERAL SENATORS. Vote! Vote! Let us vote.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut (Mr. RIBICOFF).

The amendment was agreed to.

AMENDMENT NO. 390

Mr. CURTIS. Mr. President, I call up my amendment No. 390 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

Add a new section which reads as follows:

"That (a) section 6015(f) of the Internal Revenue Code of 1954 (relating to return considered as declaration or amendment) is amended by striking out 'February 15' and inserting in lieu thereof 'March 15'.

"This amendment shall apply with respect to taxable years beginning after December 31, 1968."

Mr. CURTIS. Mr. President, I shall try to be very brief in my explanation of the amendment. It does not involve any revenue. It will not cost the Treasury Department one dime. It will not raise any additional money.

Mr. President, I ask unanimous consent that the names of the distinguished Senator from Iowa (Mr. MILLER) and the distinguished Senator from North Dakota (Mr. YOUNG) be added as cosponsors of this amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CURTIS. Mr. President, I am offering the amendment primarily because the distinguished Senator from South Dakota (Mr. MUNDT), who would have offered it as an amendment to the bill, cannot be here.

Here is the situation: Farmers just cannot file their income tax returns in advance and make an estimate because of the hazards of weather, of price, of inability to market, of high expenses, and so forth, when they do not know whether they will have a profit, as a result.

In years gone by, farmers have been required to make their tax returns early. That worked all right for awhile, but today the situation has changed. Many farmers find it necessary to seek outside employment. The wives of many farmers also seek outside employment, and the time comes for a farmer to file his tax return before his wife has received her W–2 form or he has received one, which creates a tremendous burden in the rural areas.

Last year, in my State, we had a series of snowstorms all through the time farmers were required to file their tax returns. They still will have to file them ahead of other people, who have until April 15.

The pending amendment would extend the time for farmers to file a return from February 15 to March 15.

I repeat, it does not involve any revenue. It is merely procedural. I cannot imagine the Treasury finding it difficult. I am offering the amendment on behalf of the Senator from South Dakota (Mr. MUNDT), as well as myself and the other cosponsors.

It is my hope that it can be accepted. If, when we get to conference, there are some problems that none of us know about now, they will have to be taken into consideration at that time. But I believe it is just and fair and will cost the Treasury Department nothing.

Mr. MILLER. Mr. President, will the Senator from Nebraska yield?

Mr. CURTIS. I yield.

Mr. MILLER. I commend my colleague from Nebraska, and also the distinguished Senator from South Dakota (Mr.

MUNDT), for sponsoring the amendment. I am very much pleased with it, and join him in urging its adoption.

To point up what the Senator from Nebraska has just said, early this year there were very severe hail storms and snowstorms and very, very cold weather out in our part of the country, which prevented many farmers from filing their returns by February 15. Because they failed to do so, even though the reasons were most understandable, some of them still had penalties for not filing declarations of estimated tax. We learned from the Treasury Department that those penalties were mandatory and could not be waived for good reason.

So the result of this amendment, by granting an additional month, will be to avoid the problem altogether.

I commend again the Senator from Nebraska for bringing this matter to the attention of the Senate. I hope the amendment will be adopted.

Mr. CURTIS. I thank the Senator. This amendment will not stop the flow of money into the Treasury. These farmers are anxious to make their returns as soon as possible.

Mr. WILLIAMS of Delaware. Mr. President, if the chairman of the committee is willing, I would have no objection to taking the amendment to conference. I think it should be, not only because of the arguments that have been made, but also for the following reason: No one in the country knows what final action we are going to take on the tax bill. The investment tax credit, for example, is supposed to be repealed effective last April. Yet how can a man compute his tax return by January or February unless he knows whether or not he can take investment tax credit?

It is unfortunate that we are in this position. I pointed out last August that we should have settled it. But we did not do so, and because people will be required to file income tax returns for 1969 without either they or the Treasury or for that matter, Congress knowing what the tax law will be. I think we have no choice but to accept the amendment.

Mr. LONG. Mr. President, in view of the statement of the senior Senator from Delaware, I find myself in agreement. I am willing to go to conference with the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

AMENDMENT NO. 316

Mr. CURTIS. Mr. President, I now have a small amendment that I shall call up which will affect revenues. I want to be very frank about it. I do not think it will amount to much, but in this complex bill not everything could be reached in the committee, and I do not want to be in the position of misleading the Senate or my colleagues. I shall explain what the amendment is.

Mr. President, I call up my amendment No. 316 and ask that it be printed in lieu of its being read.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment (No. 316) is as follows:

Page 262, line 4, strike out the closing quotation marks, and after line 4 insert the following:

"(c) EXCEPTION.—Subsection (a) shall not apply to the component members of a controlled group of corporations within the meaning of section 1563(a)(2) on a December 31, for their taxable year which include such December 31, if—

"(1) the aggregate taxable incomes of the members of such group for their taxable years which include such December 31, does not exceed $100,000, and

"(2) such controlled group makes an election under section 1562(a) which is effective for the taxable years of such members which include such December 31."

Page 262, strike out lines 5 and 6 and insert the following:

"(2) Section 1562 (relating to privilege of controlled groups to elect multiple surtax exemptions) is amended—

"(A) by inserting after 'A controlled group of corporations' in paragraph (1) of subsection (a) 'described in paragraph (4)';

"(B) by adding at the end of subsection (a) the following new paragraph:

"'(4) CONTROLLED GROUPS ELIGIBLE TO MAKE ELECTION.—An election under paragraph (1) may be with respect to a specified December 31 after 1969, only—

"'(A) by a controlled group of corporations within the meaning of section 1563(a)(2), and

"'(B) if the aggregate of the taxable incomes of the component members of such group for their taxable years which includes such December 31 does not exceed $100,000.';

"(C) by striking out paragraph (2) of subsection (a) and inserting in lieu thereof the following:

"'(2) YEARS FOR WHICH EFFECTIVE.—An election by a controlled group of corporations under paragraph (1) shall be effective with respect to the taxable year of each component member of such group which includes the specified December 31.';

"(D) by striking out 'section 1561' in paragraph (3)(A) of subsection (a) and inserting in lieu thereof 'sections 1561 and 1564'; and

"(E) by striking out subsections (c), (d), and (f)(1) of such section 1562."

Page 262, lines 8 and 9, strikes out "items relating to sections 1561 and 1562" and insert "item relating to section 1561".

Page 272, line 22, insert "paragraphs (1) and (3) of" before "subsection (a)".

Page 272, line 24, after the period insert the following: "The amendments made by paragraph (2) of subsection (a) shall apply with respect to taxable years beginning after December 31, 1973, except that, if a controlled group of corporations so elects (as such time and in such manner as the Secretary of the Treasury or his delegate prescribes), such amendments shall apply with respect to such controlled group and its component members with respect to any taxable year beginning after December 31, 1969, and before January 1, 1974."

Mr. CURTIS. Mr. President, if Senators will follow me, I will state what is involved in the amendment.

A small corporation is taxed at 22 percent. When its income gets above 22 percent, the tax becomes 48 percent. That is a national policy. It is a good policy. But, as sometimes happens, loopholes spring up.

A great business concern, operating from the Atlantic to the Pacific, organized each retail outlet—if they were retail outlets—as a separate corporation, and thus got the lower tax on each one. The committee, with the concurrence of the Senate, plugged that loophole, so that a giant concern, as a parent corporation, could not organize dozens and dozens of subsidiaries and have each subsidiary treated as a small business. We provided that they must all be put together and taxed as one entity and that they have only one surtax exemption.

What I am getting at is that this amendment is not only a small business amendment; it is an amendment of great concern to small towns and rural areas. An individual, or perhaps a group of individuals, in order to keep a town alive, in order to prevent businesses from going broke, will own two or three businesses. It may be the local newspapers. It may be retail establishments. It may be small manufacturing concerns. Actually, each one of them is a small business.

Under the bill as it came from the House and the bill as reported by the Senate committee, they would be merged together, and so, in reality, they would not be treated as a small business.

We call those corporations brother and sister corporations, where the same owners own substantially all the stock of the others.

My amendment continues to plug the loophole in the case where great corporations break down their individual operations into small corporations and therefore have them all treated as small businesses. I am in favor of plugging that loophole. It brings in about $350 million. But I think it goes a little too far.

My amendment provides that where there is a group of brother and sister corporations and those small businesses are in the same community, if the total income—not the income of each one, but the total income from all of them—does not exceed $100,000, they operate under the existing law.

I think this is a sound proposal and gives proper recognition to small business. It does not interfere with the plugging of a larger loophole.

I have before me a letter from a public spirited man in a small community. He writes:

> I own 5 unrelated small businesses which I started and built up. They average about $10,000 a year profit.

Then he states that the House bill and the bill as reported by the Senate would take away this small-business advantage because the businesses have similar owners. I think that procedure is wrong. We need little businesses in our communities. Someone may say, "Well, that man is wealthy." Perhaps he is. But the community needs small businesses. Such a man will either close out or will sell his businesses to a gigantic concern, thus adding to trusts, mergers, and bigness.

This amendment is a small-business addition to what the House and the Senate have done. Again I say, as I did in connection with the previous amendment, that should it develop that in considering this amendment in conference it is found to be difficult or unworkable, or that there are instances in which it would promulgate an injustice, I would be the first to concede that it ought not be the law.

Senators may wonder why these amendments are offered on the floor of the Senate, not in committee. Frankly,

if Senators will notice, the bill contains 585 pages. The committee worked night and day and worked fast. Some of these items were brought up immediately afterward.

I believe the amendment is good. I hope that it will be agreed to. I would be greatly pleased if the chairman saw fit, without a yea-and-nay vote, to take it to conference. In any event, it is my hope that the amendment may be in the bill, because without it, the conference will have its hands tied, that we are abusing a loophole that they intended to apply to great businesses, there is no escape to preserve the separate corporate entity for tax purposes of some very small businesses.

Mr. President, I hope the amendment will be agreed to.

The PRESIDING OFFICER. Does the Senator ask unanimous consent that his amendments be considered en bloc?

Mr. CURTIS. Yes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LONG. Mr. President, this is an area in which the Senate Finance Committee. I am happy to say, was tougher than the House of Representatives in the area of tax reform. The House would have plugged the loophole on the use of multiple surtax exemptions by a number of commonly controlled corporations by phasing out the special tax advantages over an 8-year period. The Finance Committee believed these special benefits should not be allowed to continue for that long a period and voted to phase out the advantages over a 5-year period.

The Senator's amendment would continue these special benefits in some cases, would cost $50 million in revenue, and would benefit only a relatively small number of people in this country. I might explain that, as it stands today, once the 5 percent surcharge goes off, small corporations—and all corporations, for that matter—will pay a 22-percent tax on the first $25,000 of taxable income. Above that level of income, they will pay a 48-percent tax.

I am aware, and I am sure most Senators are aware, of instances where what in reality is a large business enterprise has split up its activities into a large number of corporations in order to take advantage of this provision of the law. If the income of each of the corporations is kept below the $25,000 income level, they save annually, in taxes, $5,000 for each corporation. If they are able to do business in a fashion that permits them to keep their earnings inside the company, rather than paying it out in dividends, large amounts of money can be accumulated in these corporations. If an individual has, let us say, 8 or 10 such corporations, he can save a great deal of money.

At one time the law permitted a person to have any number of these corporations. A person could have as many as 100, or 200 or 300 corporations, if he wanted to organize that many. If he was able to carry on his business in such a fashion, he would be paying no more than 22 percent tax for each corporation. On the other hand, if that person had his investment in one corporation and carried on his business through that one corporation, he would be paying a corporate tax of more than 50 percent. And if he had been making that much money as an individual, he could be paying a marginal tax of up to 77 percent.

We restricted this loophole in 1964; the House has now voted to tighten it again, and the Senate Finance Committee has sought to restrict it even further than the House.

The Senator's amendment, however, would maintain this loophole permanently in the law to the extent the corporation's income was not over $100,000. It would seem to me that since this is a loophole available to almost anyone in almost any line of endeavor we should reject the amendment to continue the loophole, which would give tax advantages to the individuals affected of almost $50,000,000, according to the Treasury's estimate.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. LONG. I yield.

Mr. CURTIS. I agree with the Senator in the main, though with one distinction. The loophole we were dragging was a situation where big business broke itself up, so to speak, into little businesses, to get the advantage of the lower rate. I am talking primarily about unrelated businesses. It could not be big business, because if the whole group together have $100,000 in income, my amendment would not apply. To meet that situation, where several little businesses are really little businesses, but maybe they have the same ownership—and that is very different from a gigantic, nationwide business, that deliberately breaks itself up into little pieces to obtain a lower tax rate—is the purpose of the amendment.

Mr. LONG. Mr. President, if we are going to make exceptions to what the committee has done, to eliminate the use of multiple surtax exemptions, I suppose this would be about as good an exception as any; and if the Senate wants to vote an exception, I suppose it might as well vote this as some other one, as far as equity and merit are concerned. I must say, however, that this amendment would have a major revenue impact of $50 million, and I submit that it does not take many amendments like this to so strike away at the reform we have in this bill that soon there will be little reform left.

So, Mr. President, I feel compelled to resist the amendment, and I hope very much the amendment will be rejected.

I ask for the yeas and nays, Mr. President.

Mr. CURTIS. Mr. President, one more thing, on the $50 million loss of revenue. I have tried for several days to ascertain the estimated loss of revenue. The Treasury were unable to say. It is actually difficult.

I am not disputing my able chairman's statement, but I doubt very much if the impact would run anywhere nearly that amount And after all, in this area, we are increasing the revenue by about $350 million, and if my amendment is adopted, these little businesses will not only have to pay the 22 percent, they will have to pay the surtax and they will also have to pay an additional 6 percent, under existing law, which was added a few years ago to meet this multiple corporation problem.

I have no way of proving that it will not run to $50 million, but I am thoroughly convinced that it will not.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator withhold that request?

Mr. LONG. I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. WILLIAMS of Delaware. Mr. President, as much as I respect the arguments that have been made, I support the position of the chairman of the committee in opposition to this amendment. The Treasury's estimate is that the amendment involves a $50 million annual revenue loss.

The amendment, in general, would permit a "brother-sister" controlled group of corporations—a group of corporations controlled by five or fewer individuals—to elect multiple surtax exemptions under section 1562 if the aggregate taxable income of the members of the group does not exceed $100,000 for the taxable years which include the December 31 with respect to which the election is in effect. Other controlled groups would be limited to only one surtax exemption. The amendment would apply to taxable years beginning after December 31, 1973.

During the transition period such a group would be subject to the normal transition rules unless it elected to have the special section 1562 rule apply earlier than December 31, 1973.

The Treasury is opposed to the amendment since it would permit some business enterprises to claim multiple surtax exemptions while other enterprises would be limited to only one exemption. It is the position of the House bill, the Senate Finance Committee and the Treasury Department that one business enterprise—whether conducted in multiple corporate form or departmental form—should be allowed only one surtax exemption. There is no logical reason to grant a brother-sister controlled group of corporations more favorable tax treatment than other controlled groups of corporations.

The PRESIDING OFFICER. The question is on the agreeing to the amendment of the Senator from Nebraska (Mr. CURTIS).

The amendment was rejected.

Mr. TALMADGE. Mr. President, I desire to ask a question of the distinguished manager of the bill.

I note that the bill eliminates the continued privilege of claiming multiple surtax exemptions and would phaseout the privilege over a period of 5 years. As the chairman of the committee knows, I have been concerned about the great amount of litigation generated in this

field by the Internal Revenue Service which appears to run counter to congressional intent. Is the chairman similarly concerned in this regard?

Mr. LONG. Mr. President, the provision gradually eliminating multiple surtax exemptions for affiliated corporations will eventually also eliminate difficulties of statutory interpretation that have arisen under sections 269 and 1551 which were enacted, as their legislative history indicate, for the purpose of insuring the denial of surtax exemptions and accumulated earnings credits to corporations organized in connection with the direct or indirect splitup of an existing business.

The Congress was aware, through information introduced in hearings and otherwise, of the practice in several industries of forming a new corporation to engage in business in a separate marketing location, often within the same State or same metropolitan area, not previously served, and of the formation of the new business corporation by the direct or indirect transfer of property consisting of money or credit used to buy from the transferor inventory, fixtures and similar property, and by the parent's guarantee of a lease of property and the furnishing of its organizational experience and business know-how.

Questions have been raised by the Internal Revenue Service whether the statute should be applied to deny such corporations their surtax exemptions. The Congress did not intend section 1551 to be applied to corporations formed in the course of an expansion of a business into a new geographic area or into a different type of operation, but rather intended the establishment of facts within the industry practices previously described to be sufficient, without more, to demonstrate that the securing of a surtax exemption or an accumulated earnings credit was not a major purpose of the organization of such a corporation. The application of section 269 in similar circumstances was understood and intended to be similarly limited for the same reasons.

The courts have applied sections 1551 and 269 in a manner consistent with this intention of Congress and it is expected that the Internal Revenue Service will recognize this limit upon the scope of these sections in its audit activities with respect to taxable years prior to January 1, 1974, when the phaseout of multiple surtax exemptions for all affiliated corporations now provided by this committee will become fully effective.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. LONG. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

PREFERRED STOCK DISTRIBUTION

Mr. RIBICOFF. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to state the amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFFICER. Without objection, it is so ordered. The amendment will be printed in the RECORD.

The amendment ordered to be printed in the RECORD reads as follows:

On page 303, strike lines 14 and 15 and insert in lieu thereof the following: "apply to any distribution (or deemed distribution) with respect to preferred stock (including any increase in the conversion ratio of convertible stock) made before January 1, 1991, pursuant to".

Mr. RIBICOFF. Mr. President, this amendment remedies what appears to be an inadvertent error in section 421 of H.R. 13270—relating to stock dividends.

The stock dividend provisions of the bill contain transitional rules for stock issued before the effective date. In general, these transitional rules provide that existing law—and not the new provisions in the bill—will apply to stock dividends paid before 1991 on stock that was outstanding on January 10, 1969, and to certain other stock, including stock received as stock dividends in earlier years.

However, with respect to one kind of stock—preferred stock—the transitional rules apply not to all types of stock dividends but only to dividends accomplished by increasing the conversion ratio of convertible preferred stock. It is my understanding that this provision was drawn to cover all the known cases.

It has come to my attention that some existing preferred stock pays stock dividends directly. My amendment would apply the transitional rules to this case as well as all others.

Section 305(b)(4) of the Internal Revenue Code as added by section 421(a) of the pending tax reform bill, provides that the distribution of stock dividends will be treated as a taxable distribution "if the distribution is with respect to preferred stock, other than an increase in the conversion ratio of convertible preferred stock made solely to take account of a stock dividend or stock split with respect to the stock into which such convertible stock is convertible."

The provision is apparently retroactive in effect, applying to distribution made after January 10, 1969, without reference to the date when the securities were issued—section 421(b)(1) of the bill. Section 421(b)(4) provides transitional rules but does not provide relief for a stock dividend in convertible preferred stock, pursuant to the terms relating to the issuance of such stock which were in effect long before January 10, 1969.

It is not believed that either the Congress or the Treasury intended to give such retroactive effect to the new section 305(b)(4). Thus, the recent amendment of the Treasury regulations under section 305 provides that stock dividends in discharge of preference dividends is to be treated as a taxable distribution—see section 1.305–3. However, the change is not applicable to a distribution "made on or before December 31, 1990, or made with with respect to stock outstanding on September 7, 1968. (T.D. 6990, FR Doc. 69–487, par. 2.)

Likewise, H.R. 13270 as passed by the House of Representatives also provides that the amended section 305 "is not to apply to a distribution of stock—or or rights to acquired stock—made or considered as made before January 1, 1991, with respect to stock outstanding on January 10, 1969." This evidence points conclusively to the fact that amended section 305 would not act retroactively.

Thus, this amendment simply clarifies by making explicit in the bill that new section 305(b)(4) will not apply to a stock dividend of convertible preferred stock made before 1991 pursuant to issuance terms of that stock which were in effect before January 10, 1969.

Mr. President, I want to emphasize that this amendment would not, in any way, change the present tax status of convertible preferred stock dividends. This amendment does not confer new rights, but only clarifies that present rights will not be canceled retroactively.

Mr. TALMADGE. Mr. President, I am informed by the staff that the amendment is all right. However, it is not supposed to affect existing law.

Mr. RIBICOFF. The Senator is correct.

Mr. TALMADGE. With that understanding, and with the approval of the distinguished ranking minority member of the committee, I am delighted to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut.

The amendment was agreed to.

REAL ESTATE INVESTMENT TRUST

Mr. MILLER. Mr. President, I send to the desk an amendment and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

Page 222, line 17, after "57(a)(9)" insert "and, in the case of a real estate investment trust, the items of tax preference set forth in sections 57(a)(2) and (3)".

Mr. MILLER. Mr. President, section 442 of the pending bill, relating to the computation of earnings and profits, prevents the benefit of accelerated depreciation from being passed through to the holder of a beneficial interest in a real estate investment trust as a tax-free dividend. Thus, the preference has been taken out of such a distribution to the holder of a beneficial interest, and he should not be taxed on a preference section 442 denies him—and the Finance Committee, I am sure, did not intend to do so. Due to an oversight, the minimum tax provided by the bill treats accelerated depreciation as if it were received as a preference by the holder of a beneficial interest in a real estate investment trust, and is to this intent in conflict with section 442. My amendment eliminates the conflict by removing accelerated depreciation as a preference in the hands of such a holder in section 58 relating to the minimum tax.

Mr. President, I have discussed the

amendment with the technical staff of the committee. They recognize that there was an oversight and that this is purely a technical amendment to reflect the intention of the committee.

I hope that the acting manager of the bill is willing to accept the amendment.

Mr. TALMADGE. Mr. President, I should like to confer with the staff and the ranking minority member of the committee, and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. TALMADGE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. TALMADGE. Mr. President, I have conferred with the ranking minority member of the committee and the staff, and we see no objection to the amendment, based on the explanation of the author of the amendment. On that basis, we are perfectly willing to take it to conference.

Mr. MILLER. I thank the Senator.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

The PRESIDING OFFICER. The bill is open to further amendment.

Mr. WILLIAMS of Delaware. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNLIMITED CHARITABLE DEDUCTION

Mr. RIBICOFF. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. RIBICOFF. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment is as follows:

On page 189, after line 14, insert the following:

"(g) ELIGIBILITY FOR UNLIMITED CHARITABLE DEDUCTION.—

"(1) Section 170(b)(1)(C) (relating to unlimited charitable deduction for certain individuals), as amended by subsection (a) of this section, is amended by adding at the end thereof the following new sentence: 'In the case of a separate return for the taxable year by a married individual who previously filed a joint return with a former deceased spouse for any of the 10 preceding taxable years, the amount of charitable contributions and taxes paid for any such preceding taxable year, for which a joint return was filed with the former deceased spouse, shall be determined in the same manner as if the taxpayer had not remarried after the death of such former spouse.'

"(2) The amendment made by this subsection shall be applicable to taxable years beginning after December 31, 1957."

Mr. RIBICOFF. Mr. President, this amendment makes a provision to allow a remarried widower who files a separate return to be entitled to the same result that would be obtained if he had not remarried.

The pending tax reform bill gradually phases out the unlimited charitable deduction.

The technical amendment which I propose would remedy an inequity during this phaseout period. It adds an additional sentence to section 170(b)(1)(c) of the Internal Revenue Code.

To file for an unlimited charitable deduction the taxpayer must refer to his tax returns for the previous 10 years. In the case of a taxpayer whose spouse has died, and who now is unmarried and files a separate return, the taxpayer is permitted to refer to his previous joint returns with his deceased spouse.

My amendment would simply allow the same taxpayer who has remarried following the death of his first spouse, but who continues to file a separate return, to use the same procedure of referring to his previous joint returns in filing for the unlimited deduction.

Justice requires that a remarried widower who files a separate return should be entitled to the same result that would be obtained if he had not remarried. There can be no loss of revenue and the single fact of remarriage should not deprive the taxpayer of a just result.

Mr. President, I have discussed this proposal with the Senator from Georgia (Mr. TALMADGE), the Senator from Louisiana (Mr. LONG), the Senator from Delaware (Mr. WILLIAMS), and the staff.

Mr. TALMADGE. Mr. President, the Senator from Delaware (Mr. WILLIAMS) and I have discussed this matter with the staff. We think it has a great deal of merit. I urge that the amendment be agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Connecticut.

The amendment was agreed to.

The bill is open to further amendment.

Mr. TALMADGE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MILLER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. RANDOLPH in the chair). Without objection, it is so ordered.

AMENDMENT NO. 344

Mr. MILLER. Mr. President, I call up my amendment No. 344 and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. MILLER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with, and that the amendment be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment, ordered to be printed in the RECORD, is as follows:

On page 546, after line 12, insert the following new section:

"SEC. 915. SPECIAL TAX TREATMENT FOR PROPERTY ACQUIRED WITH FUNDS OBTAINED THROUGH VIOLATION OF CRIMINAL LAWS.

"(a) DENIAL OF CAPITAL GAIN TREATMENT.—"IN GENERAL.—Part IV of subchapter P of chapter 1 (relating to special rules for determining capital gains and losses) is amended by adding after section 1252 (added by section 516(c) of this Act) the following new section:

" 'SEC. 1253. SALES AND OTHER DISPOSITIONS OF PROPERTY ACQUIRED WITH FUNDS OBTAINED THROUGH VIOLATION OF CRIMINAL LAWS.

" 'In the case of the sale or other disposition of property any part of which was directly or indirectly purchased with, or any part of the financing of the purchase price of which was directly or indirectly secured by, money or other property obtained through violation of the criminal laws of the United States, of any State or possession of the United States, or of the District of Columbia, gain on such sale or disposition shall be treated as gain from the sale or exchange of property which is neither a capital asset nor property described in section 1231.'

"(2) CLERICAL AMENDMENT.—The table of sections for such part IV is amended by adding at the end thereof the following new item:

" 'Sec. 1253. Sales and other dispositions of property acquired with funds obtained through violation of criminal laws.'

"(b) LIMITATION TO STRAIGHT LINE DEPRECIATION.—Section 167 (relating to the depreciation deduction) is amended by inserting after subsection (1) (added by section 441(a) of this Act) the following new subsection:

" '(m) PROPERTY ACQUIRED WITH FUNDS OBTAINED THROUGH VIOLATION OF CRIMINAL LAWS.—In the case of property any part of which was directly or indirectly purchased with, or any part of the financing of the purchase price of which was directly or indirectly secured by, money or other property obtained through violation of the criminal laws of the United States, of any State or possession of the United States, or of the District of Columbia, subsections (b), (j), and (k) shall not apply, and the allowance for depreciation under this section shall be limited to an amount computed under the straight line method.'

"(c) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning on or after January 1, 1969."

Mr. MILLER. Mr. President, the purpose of the amendment is to make it clear that our tax laws, which provide for capital gains treatment benefits and for depreciation in excess of the straight line method of computing depreciation, will be confined to what may be called legitimate taxpayers."

In the case of those who derive their income from violation of criminal laws of the United States, or of any State, territory, or possession of the United States, or of the District of Columbia, my

amendment would not prevent them from acquiring property; but it does provide that if they do acquire property, the benefit of capital gains treatment upon the sale of that property, or the benefit of depreciation in excess of the normal straight line depreciation, may not be obtained by them.

Mr. President, the amendment is really directed at a problem which most of us know exists: The entry into legitimate business of those who are engaged in criminal activities, such as the Mafia, and those who profit from the distribution of narcotics who are using their illegally obtained moneys and property to go into legitimate businesses, and especially the real estate business.

There have been some interesting accounts of the movements of the Mafia into New Jersey land deals. Mr. President, I ask unanimous consent to have printed in the RECORD an article from the New York Post of Friday, November 7, 1969, entitled "IRS Probing Mafia's Jersey Land Deals."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

IRS PROBING MAFIA'S JERSEY LAND DEALS

(By Jonathan Kwitny)

The Internal Revenue Service is investigating two corporations involved in the lucrative New Jersey land speculation deals of Mafia racketeer Anthony (Little Pussy) Russo.

The IRS Newark office summoned the records of the corporations Oct. 29, a spokesman for the office told The Post yesterday.

The records had been in the hands of the New Jersey State Investigative Commission, which subpenaed them last summer as part of its overall investigation of Mafia affairs in Monmouth County, where Russo makes his home.

The land deals—financed in large part by more than $800,000 in bank loans—were described in a series of articles in The Post last month. Prominent political figures served as attorneys in some of the deals.

NIXON'S ROLE

The IRS spokesman said revenue agents were examining the records as part of a strike force assigned by President Nixon to attack the Mafia in New Jersey.

The IRS' interest in the records came to light last week when Russo's attorney, William Pollack, went to court to try to get the records back from the SIC. The attempt failed when the SIC revealed the records had been taken by revenue agents.

The law firm of Democratic National Committeeman David T. Wilentz represented the Russo interests in several of the transactions.

The Wilentz firm still is representing one of the corporations—Donato-Russo Enterprises Inc.—in a land condemnation case against the New Jersey Transportation Dept.

In the case, two court-appointed commissioners awarded Donato-Russo Enterprises $110,000 for about 1¾ acres of substantially unimproved property.

Both the state and Donato-Russo are appealing the award, according to Wilentz.

EARMARKED FOR HIGHWAY

The price appears to be about three times what Russo paid for the land approximately two years before it was condemned by the state for highway use.

Russo sought the land as part of a larger tract for $160,000. He covered the purchase with a loan from The Edison Bank, of which Wilentz' son and law partner, Warren Wilentz, is a director and legal counsel.

Warren Wilentz, a former county prosecutor, was Democratic nominee for U.S. Senator from New Jersey in 1966.

In elections Tuesday, Middlesex County Democrats suffered their worst defeat in the 42 years since David Wilentz took over as party boss in the county. The county Republican organization made Wilentz' representation of Russo a prime issue in the closing weeks of the campaign.

A DENIAL

In another development, New Jersey Assemblyman Chester Apy denied an earlier story in The Post that he and his law partner gave Donato-Russo a $65,000 interest-free mortgage loan to help finance Russo's land speculation in West Long Branch.

Apy said that he and his law partner, Milton Abramoff, represented Joseph's Enterprises, a corporation that was buying the property from Donato-Russo for $225,000. His law firm had nothing to do with Russo, Apy said.

"I wouldn't recognize Russo if I fell over him," Apy declared.

Apy said that as closing date on the sale of the property by Donato-Russo to Joseph's was drawing near in 1966, the Russo firm asked for an advance of the $65,000 down payment his clients had agreed to make. His clients were willing to advance the money, he said.

"We weren't going to let our clients pay the money over carte blanche," Apy said. "We had to have some security, in the form of the mortgage. Because some of the funds came out of the trust account into which some of their funds had been placed, that mortgage was made out to us as trustees."

"NOT UNCOMMON"

Apy said such a mortgage naming attorneys as trustees was "a not uncommon practice."

Apy said the mortgage bore no interest because the loan was essentially a down payment on the property.

Except for the $65,000 advance, Joseph's obtained the purchase money by mortgaging the property. Two of the mortgages—one securing a $75,000 bank loan—were foreclosed on in 1968 when Joseph's went bankrupt.

"I didn't know who Russo was until early this year," Apy said.

"It would have been one thing to be representing Donato-Russo. But we were on the other side. Our interest was completely opposed to Russo. We were trying to get the best deal we could for our clients," Apy said.

He said neither he nor his law partners ever had represented Russo.

Mr. MILLER. Mr. President, other articles indicate that the syndicates, the narcotics peddlers, and the Mafia are moving into real estate operations in Florida. There is no question that they have moved into other areas of this country.

It seems to me that if we would provide that property acquired by such illegally obtained money could not have depreciation taken on it at all that we might have a problem under the principle of deprivation of property without due process of law. That is why my amendment leaves intact the straight-line method of computing depreciation. Congress has provided for faster depreciation writeoffs and, as a result, capital gains can be increased. This policy was established by Congress to encourage legitimate businessmen to get into real estate activities which would be beneficial to the people of this country. But I am quite sure that Congress did not intend the benefits to go to illegitimate operators, those deriving income in violation of the criminal laws of this country and using it to engage in profitable real estate operations.

My thought is that the amendment would serve a twofold purpose: First, it would discourage people who derive income from criminal activities from getting into the real estate business and, second, if they did get into the real estate business, it would provide our law enforcement officials with an extra weapon to deal with such criminals.

Mr. President, I do not claim any great pride of authorship in drafting the amendment. I can understand that there may be some perfections which may be needed. I regret that I did not have the opportunity to offer the amendment during the deliberations of the committee on the bill, because, frankly, the degree to which the illegal operators have invaded legitimate businesses was not brought to my attention until after the committee had reported the bill to the Senate.

I believe that the amendment is timely. In fact, I would suggest that it is overdue.

I hope that the distinguished Senator in charge of the bill will see fit to accept the amendment.

Mr. TALMADGE. Mr. President, the distinguished majority leader and I have discussed this amendment. We have also discussed it with the staff, and we can see some complexities to its enforcement; however, it has a desirable and laudable motive and, therefore, we are entirely agreeable to taking it to conference where we can take a closer look at it and discuss it with the Internal Revenue Service and others to determine whether it is practicable.

Mr. MILLER. Mr. President, I appreciate that consideration. Let me repeat that I regret very much I did not have the opportunity to compose the amendment and have the full committee consider it. The only reason was that the problem was not brought to my attention until after the committee had considered and reported the bill.

I would also suggest that the Department of Justice, particularly its Criminal and Tax Divisions, would have an interest in this piece of legislation.

Mr. TALMADGE. Mr. President, I urge the Senate to adopt the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Iowa.

The amendment was agreed to.

NONFARM INCOME

Mr. HANSEN. Mr. President, I offer two amendments and ask that they be stated.

The PRESIDING OFFICER. The amendments will be stated.

The assistant legislative clerk proceeded to read the amendments.

Mr. HANSEN. Mr. President, I ask unanimous consent that further reading of the amendments be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered; and the amendments will be printed in the RECORD at this point.

The texts of the amendments are as follows:

On page 189, beginning with line 23, strike out all through line 22, page 190, and in lieu thereof insert the following:

"(a) GENERAL RULE.—In the case of a taxpayer engaged in the business of farming and whose nonfarm adjusted gross income (as defined in subsection (e)(1)) exceeds $50,000, the deductions attributable to such business which, but for this section, would be allowable under this chapter for the taxable year shall not exceed the sum of—

"(1) the gross income derived from the business of farming for such taxable year, and

"(2) the higher of (A) $25,000 plus one-half of the amount by which the excess of the aggregate of the deductions attributable to such business over the gross income derived from such business for the taxable year exceeds $25,000, or (B) the amount of the special deductions (as defined in subsection (e)(2)) for the taxable year."

On page 193, line 3, after "gross income" insert the following: "(taxable income, in the case of a corporation)".

On page 190, beginning with line 23, strike out through line 4 on page 191 (relating to special rules on treatment of farm losses) and insert in lieu thereof the following:

"(b) MARRIED INDIVIDUAL AND MEMBERS OF CONTROLLED GROUPS.—

"(1) MARRIED INDIVIDUALS.—In the case of a husband and wife who file a separate return, the $50,000 and $25,000 amounts specified in subsection (a) shall be $25,000 and $12,500, respectively. The preceding sentence shall not apply if the spouse of the taxpayer does not have any income or deductions attributable to the business of farming for the taxable year.

"(2) MEMBERS OF CONTROLLED GROUPS.—In the case of a controlled group of corporations (as defined in section 1563(a)) the $50,000 and $25,000 amounts specified in subsection (a) shall be devided equally among the component members of such group unless all component members consent (at such time and in such manner as the Secretary or his delegate prescribes by regulations) to an apportionment plan providing for an unequal allocation of such amounts."

Mr. HANSEN. Mr. President, I ask unanimous consent that these two amendments be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HANSEN. Mr. President, let me try to explain the purposes of the amendments.

In the area of farm losses I strongly support the committee's efforts to correct the abuses which exist under the present law.

On page 96, of the committee report, the committee states, "These rules have allowed some high income taxpayers who carry on limited farming activities as a sideline to obtain a substantial tax loss (which does not represent an economic loss) which is then deducted from their high bracket nonfarm income." The report goes on, "In recent years, a growing body of investment advisers have advertised that they would arrange a farm investment for wealthy persons. Emphasis is placed on the fact that after tax dollars may be saved by the use of 'tax losses' from farming operations."

However, the dollar limitations of the committee bill apply only to individuals or estates. Corporations including subchapter S corporations and trusts are not given the benefit of the dollar limitations. Thus, these taxpayers may currently deduct only one-half of their farm loss against nonfarm income.

Mr. President, I represent a State whose economy is in a large measure based on agriculture. A large and increasing number of farm and ranch operations are owned by family corporations. But they are small corporations.

Small family operations often incorporate. They are taxed either under the corporate or subchapter S provisions of the Internal Revenue Code. The reasons they incorporate have nothing to do with tax avoidance. But unless my amendment is adopted, a taxpayer in this situation would be heavily penalized.

How can we say that one rancher who is not incorporated and has a farm loss of $5,000 is able to offset the full farm loss against his nonfarm income, but a rancher living next door who has incorporated his ranch and has a $5,000 farm loss can deduct only one-half of his farm loss—$2,500—against his nonfarm income. These two taxpayers are in the same economic situation.

The picture I have outlined is found throughout rural America. These are not the high-income taxpayers who carry on limited farming activities as a sideline to obtain a substantial tax loss which does not represent an economic loss. They are not wealthy persons. Relief provided by the dollar limitations should be made available to these small operations that are incorporated or held in trust.

The adoption of my amendment would mean that any taxpayer whether it be an individual, estate, trust, or corporation—including subchapter S corporation—would be entitled to deduct his losses in full if his nonfarm income is less than $50,000. If the taxpayer exceeds $50,000 then all the taxpayers would be allowed to deduct a farm loss in full to the extent it does not exceed $25,000 but he is allowed to deduct only one-half of the loss in excess of $25,000. These are the provisions which the committee bill applies to individuals and estates. In equity they should also be applied to corporations and trusts.

I urge my colleagues to support this amendment.

Mr. TALMADGE. Mr. President, the distinguished Senator, the ranking minority member of the committee, and I have conferred. We have also conferred with the members of the staff on the amendments. We think they have merit, and we urge the Senate to adopt them.

The PRESIDING OFFICER. The question is on agreeing to the amendments en bloc of the Senator from Wyoming.

The amendments were agreed to.

---

## CALL OF THE ROLL

Mr. TALMADGE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk called the roll, and the following Senators answered to their names:

[No. 190 Leg.]

| | | |
|---|---|---|
| Aiken | Bellmon | Brooke |
| Allott | Bennett | Burdick |
| Baker | Bible | Byrd, W. Va. |
| Bayh | Boggs | Case |
| Church | Hruska | Pearson |
| Cook | Hughes | Pell |
| Cooper | Inouye | Percy |
| Cotton | Jackson | Prouty |
| Cranston | Javits | Proxmire |
| Curtis | Jordan, N.C. | Randolph |
| Dodd | Jordan, Idaho | Ribicoff |
| Dole | Long | Russell |
| Dominick | Magnuson | Saxbe |
| Eagleton | Mansfield | Scott |
| Eastland | Mathias | Smith, Maine |
| Ervin | McCarthy | Smith, Ill. |
| Fannin | McClellan | Sparkman |
| Fong | McGee | Spong |

| Hansen | Moss | Williams, Del. |
| Harris | Murphy | Yarborough |
| Hart | Muskie | Young, N. Dak. |
| Hartke | Nelson | Young, Ohio |
| Hatfield | Packwood | |
| Hollings | Pastore | |

The PRESIDING OFFICER. A quorum is present.

### CHILD'S INSURANCE BENEFITS

Mr. MOSS. Mr. President, I call up my amendment at the desk and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The LEGISLATIVE CLERK. The Senator from Utah (Mr. Moss) proposes an amendment:

On page 514 after line 6 insert section 903:

"(a) section 152 of the Internal Revenue Code of 1954 (relating to definition of dependent) is amended by adding at the end thereof the following new subsection:

"'(f) CHILD'S INSURANCE BENEFITS PAID UNDER SOCIAL SECURITY ACT.—For purposes of subsection (a), amounts received by an individual as a child's insurance benefit under section 202(d) of the Social Security Act shall not be taken into account in determining whether such individual received more than half of his support from the taxpayer.'

"(b) The amendment made by subsection (a) shall apply to taxable years ending on or after the date of the enactment of this Act."

Mr. MOSS. Mr. President, the amendment is not numbered. It is a measure that was pending to the social security bill. I include it here because it logically belongs here, I believe.

This has to do with the income that a child is entitled to by reason of a social security benefit. A child's social security benefits are considered to be the child's own contribution to his support. And in a lower income family, that may cover a substantial part of that child's expenses.

That child's mother or father must, therefore, keep detailed records of expenditures for each child in order to claim dependency. And this is sometimes very difficult to do.

So, in order to help widows and widowers in these circumstances, I have offered an amendment which would allow the taxpayer to disregard the child's benefit payments as far as determining whether the child could be claimed as a dependent.

The impact of the amendment is not great. And the amount of money involved is not great. However, it does impose a very onerous burden on many families.

This is nearly always the circumstance where a widow or widower is involved. The only way a child would receive benefits under social security would be to have

a parent die and therefore be entitled to some social security.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. MOSS. I yield.

Mr. CURTIS. Is the Senator's amendment printed?

Mr. MOSS. Yes, it is printed and is at the desk. I do not have it printed and distributed, no.

Mr. CURTIS. It is in writing, but it is not printed?

Mr. MOSS. It was printed as a bill that I had introduced earlier, and now that language is stated as a proposed section in the tax bill.

Mr. CURTIS. Will the Senator state again just what his amendment would do?

Mr. GRIFFIN. Mr. President, may we have an order?

The PRESIDING OFFICER (Mr. MATHIAS in the chair). Senators will take their seats. The Senate will be in order.

Mr. MOSS. This amendment provides that when a child is entitled to some social security benefit of a deceased mother or father, the taxpayer with whom he lives is relieved of the burden of keeping an accounting of all the various expenses that go into maintaining that child, and the taxpayer does not have to count the social security as against it.

Under present circumstances, the taxpayer must prove that he contributed 51 percent or more to the support of the child, in order to take the child as a dependent on his tax return. This amendment would simply relieve him of that burden as to the money the child is getting as a social security benefit.

The amount involved is not great. The problem it poses for many rather poor families is great, and I have received many letters about it over a considerable period of time.

The purpose is to relieve the taxpayer of accounting for the social security payment that comes to the child, in determining whether or not the taxpayer contributed 51 percent. As we all know, it is difficult, anyway, to account for exactly what it costs to support a child—how much of the rental of the house, how much of the food that is consumed, the cost of his clothes, the cost of his toys, and all the other things. This would simplify the procedure. Therefore, I think it is a meritorious amendment, and I ask that it be adopted.

Mr. CURTIS. Mr. President, will the Senator yield for a question?

Mr. MOSS. I yield.

Mr. CURTIS. Can the Senator give us an idea of the range in dollars of benefits paid to children? I take it that this would be benefits paid by reason of the death of a parent.

Mr. MOSS. That is correct. This is the dependent's benefit that comes because of the death of a parent.

Mr. CURTIS. Is it not true that the benefit is paid to the surviving parent?

Mr. MOSS. If the child has a guardian and he is a minor, so far as actual accounting for it is concerned, there is a guardian. But the amount involved is relatively small for each child. The child might get $50 or $40 or some such amount per month.

What I am trying to do is to get relief from a rather onerous tax return burden.

Mr. CURTIS. I wish the Senator would refresh my mind as to how high a child's benefit goes. The Senator from Nebraska does not have that figure before him. It is conceivable that many of these benefits are small and that the taxpayer would be saved from an onerous accounting system. On the other hand, it may be that the benefit is sufficient so that totally it pays or nearly pays for the support of the child. I do not know, but I shall find out.

Mr. PASTORE. Mr. President, will the Senator yield for a question?

Mr. MOSS. I yield?

Mr. PASTORE. Is it not a fact that the present procedure, more than anything else, amounts to a nuisance? So far as dollars and cents are concerned, this is not the significant issue nor is it the question here. Under the present law, any time a child receives any benefit—and rarely will it exceed $600 a year—perforce, the individual who claims that dependency must show by documentary proof that he has contributed more than 51 percent to that child's sustenance during that year. Is that correct.

Mr. MOSS. That is correct.

Mr. PASTORE. How can one measure the water that the child drank, the electricity he used? This is impossible. It is merely a nuisance; that is all it amounts to. I am surprised that it is even in the law.

Mr. MOSS. This happens very frequently in low-income families, where the nuisance is compounded in trying to compute the amount.

Mr. GORE. Mr. President, the committee feels duty bound to oppose the proposed amendment.

The claiming of a foster child as a dependent is a question that has given a great deal of concern to the Internal Revenue Service and the Department of the Treasury. It is true that if a foster parent claims a child for a dependent, consideration must be given to the social security benefits which that child receives. One simple way for the foster parent to avoid the necessity of keeping the records and making the records available is not to claim the dependency.

We argued a good deal about the level of personal exemption. Perhaps we did not make it high enough. But if this amendment is adopted, it would be possible for a nonblood guardian to claim one, two, three, or several children as dependents, even though he might make no more than a $1 contribution to their support.

So, agreed that the present system is vexatious to some people, nevertheless, the possibility of a considerable inequity would be created. The committee feels that if one claims a personal exemption for a dependency, that dependency should be reduced by the contribution to that child's upkeep that comes from social security sources. It might be that the social security would be as much as $1,000 a year. Yet, the foster parent, by contributing $1, could claim an exemption of $800 from his own income.

Mr. CURTIS. Mr. President, will the Senator yield?

Mr. GORE. I yield.

Mr. CURTIS. Mr. President, there may be some cases in which some relief ought to be granted; but I think this is a matter that should be considered when social security is considered and hearings are held. It could well be that there are some situations in which what the distinguished Senator from Utah is trying to do ought to be done. But a number of factors are involved here.

In the first place, social security income for the purpose of taxation is not income. It is free of tax and has been all through the years.

I do not know what the effect of this amendment would be in case the surviving parent is left with three or four youngsters, all of whom are drawing benefits.

I would be very reluctant to oppose the amendment, for humanitarian reasons. I think that a child who has lost a parent should have every break there is, but I am thoroughly convinced that to do justice in this situation the matter should be explored in hearings and presented when we have social security legislation.

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. GORE. I shall yield in just a moment.

Mr. President, I join the Senator from Nebraska in the views he has just expressed, and I join him also in suggesting to the able author of the amendment that when we have hearings on the social security bill the committee would carefully go into the matter.

Mr. CURTIS. I would be willing to make that a pledge.

Mr. WILLIAMS of Delaware. Mr. President, the Senator from Tennessee and the Senator from Nebraska have just expressed the thought I was going to make. I think, as the Senator from Rhode Island has pointed out, there is an inequity here that needs to be dealt with, but I am afraid the proposal before us could be subject to possible abuse.

I think with proper committee hearings and study consideration could be given to this matter. I would join in saying that as a member of the committee we will give it study and try to work out some solution.

The Senator from Tennessee points out that it would be possible, where someone was receiving $800 to $1,000 a year in benefits to support the child, for that person to contribute as little as $1 or $5 for the support of the child and still claim the child as an exemption. Perhaps that is not the intention of the Senator from Utah. I think there probably is a way to prevent that and to achieve the objective he seeks to achieve.

Mr. President, I join the chairman in a pledge that we will give this matter our attention and try to come up with a solution.

Mr. PASTORE. Mr. President, we are dealing with a bill that is loaded with favoritism. There is no question about it. One who has exemplified that more dramatically than anybody else on the floor of the Senate has been the Senator from Tennessee. Look how picayune they are in this situation. You are saying if a widow is left with three children and she collects social security benefits for each one, just a small amount at best—and we

are talking about a widow—a widow, before she claims a child as a dependent, if she has a little bit of a job on the side earning a little income, because her husband left her and she is supporting the three young children, has to document the fact that she contributed more than 50 percent to support them. We are picayune.

Foster parents are paid by the State. They cannot claim the benefits because they are being paid by the State. We are talking about widows. I am familiar with a dozen situations in my State where widows were left penniless, where they might have a little job in a department store and get $50 a month for each child; but at the end of the year they would have to document the fact that they contributed more than 50 percent.

We have all of this dillydallying about adjusting this matter when we are loading the bill with a 23-percent oil depletion allowance, benefits for this group, benefits for that group; and, yet, we will not take care of that widow this afternoon. I am ashamed, really ashamed.

Mr. GORE. Mr. President, we are not talking about widows here, although that is a favorite subject and I am very sympathetic to it.

Suppose this widow remarries and she has three, four, or five children, and that from social security there is a considerable contribution for their upkeep. This measure would set up the legal possibility that a foster parent who has not legally adopted the children——

Mr. PASTORE. But who is supporting them.

Mr. GORE (continuing). Might be supporting them to the extent of $1 a year——

Mr. PASTORE. Mr. President, will the Senator yield?

Mr. GORE. No; I will not yield just now.

Mr. PASTORE. Very well.

Mr. GORE. The Senator is talking about widows. I am talking about someone who is married. The former widow——

Mr. PASTORE. I will answer that question.

Mr. GORE. The Senator said this is picayune. It is not picayune.

This is a principle which is proposed to be established in a tax law making it possible for one to claim a personal exemption, the full exemption for the support of a child when, as a matter of fact, the person might actually be making only a miniscule contribution toward the support of the child.

This is not a large item; no large amount is involved, and I do not wish to take a great amount of time to debate it. However, it is a principle that is wrong. Let the committee, when it has hearings on the social security, examine this matter carefully and then recommend a decision to the Senate.

Mr. MOSS and Mr. PASTORE addressed the Chair.

Mr. GORE. Mr. President, I yield first to the author of the amendment.

Mr. MOSS. Mr. President, I think the summary of this proposal which has been given by the able Senator from Rhode Island puts it in perspective. What we are talking about is a relatively small amount of money and a relatively small group of people. Generally, they are people of limited income.

I supported the able Senator from Tennessee when he fought on the floor——

Mr. PASTORE. That is right.

Mr. MOSS (continuing). To increase the personal exemption. A person may claim from $600 to $800.

Mr. PASTORE. Or $1,000.

Mr. GORE. It should be $1,000.

Mr. COOK. Mr. President, may we have order?

Mr. MOSS. We have $800. Now we want to turn around and say that in order to claim a child, a dependent child who has a small amount coming under social security from a deceased parent, we are going to force that person to set up an accounting system whereby he can show the amount he spends in supporting that child is greater than the amount the child got from social security.

Mr. GORE. Mr. President, I wish to say to the able Senator that I do not want to debate this matter for a long time, but the Senator talks about a small amount. The amount can be $109 per month per child. As a matter of fact, on the average today the children of a deceased worker receive $71 a month. Is the Senate going to say that $109 a month can be ignored and that even though the foster parent makes but a miniscule contribution to the upkeep of that child he can still claim $800 as an exemption for each child? I say in principle that is wrong.

Mr. MOSS. Mr. President, will the Senator yield?

Mr. GORE. I had promised to yield to the Senator from Connecticut.

Mr. RIBICOFF. Mr. President, what concerns me has a great bearing on what the Senator from Utah proposes. The maximum amount one can receive under social security for a child is $109 a month; and that is $1,308 a year. The average payment made for a child under social security is $71 a month, which comes to $852 a year. It is obvious if $71 is the average, many, many persons are below the $71 a month.

Mr. COTTON. Mr. President, may we have order? I am trying to listen to the Senator.

The PRESIDING OFFICER (Mr. MATHIAS in the chair). The Senate will be in order.

Mr. RIBICOFF. Mr. President, I think all of us realize it takes more than $852 a year to support a child, and a parent or foster parent would have to make a substantial contribution.

I would hope the committee would take this amendment to consider it in conference. But I think I can sympathize with the Senator from Tennessee because we are getting ourselves into the same position we did when we discussed the Byrd-Mansfield amendment. The Senate is going to have to wrestle with a complete review of the Social Security System. It seems that will take place, as far as this body is concerned, sometime next May or June. I know that members of the Committee on Finance will go into this matter thoroughly. However, I do wish to say there is a great deal of merit in what the Senator from Utah advocates. To my knowledge this is the first time it has been called to the attention of the Senate. It has been overlooked and consideration should be given to what the Senator from Utah advocates because it has much merit.

Mr. MOSS. I thank the Senator.

Mr. President, will the Senator from Tennessee yield?

Mr. GORE. I yield.

Mr. MOSS. Mr. President, I simply want to ask this question. What is the poverty level now that has been set as the official poverty level in this country below which the family income should not fall?

Mr. GORE. I believe, for a family of 4, it is $3,600.

Mr. MOSS. If we compare the $71 average that the children get under social security, we can see that no one will be lifted out of the poverty level by having the contribution to a child come into the family income. The onerous obligation of itemizing and trying to justify all the expenses of a child will not be worth the amount of money involved. Therefore, I think we should have this provision in the tax bill, to say that that may be ignored in filling out a tax return for a family whose mother is usually a widow.

Mr. GORE. Mr. President, I wish to close by saying that I did not think and do not now think that an $800 exemption is sufficient. I was happy that the Senate supported that much, however inadequate it is. But here is an amendment offered to make a special provision. It would be the only place in the law I know of in which we would allow a taxpayer to claim full exemption for the support of a child when, as a matter of fact, the degree of support could be minuscule. I think this is a bad principle, but I do not wish to take the time of the Senate further. Let the Senate work its will.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Utah (Mr. Moss).

As many as favor the amendment will say "aye."

As many as oppose the amendment will say "no."

The "noes" appear to have it.

Mr. PASTORE. Mr. President, I call for a division.

The PRESIDING OFFICER. A division is called for. As many as favor the amendment will rise and stand until counted. (After a pause.) Those who oppose the amendment will rise and stand until counted.

Mr. PASTORE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. PASTORE. Mr. President, I ask for the yeas and nays.

Mr. COOK. Mr. President, a parliamentary inquiry.

Mr. PASTORE. Mr. President——

The PRESIDING OFFICER. The clerk will call the roll.

Mr. PASTORE. Mr. President, I ask for the yeas and nays.

Mr. WILLIAMS of Delaware. Mr. President, regular order.

Mr. ALLOTT. Regular order, Mr. President.

The PRESIDING OFFICER. Does the Senator from Rhode Island withdraw his request for the call of a quorum?

Mr. PASTORE. Mr. President, temporarily, I do. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays on this amendment having been ordered, the clerk will call the roll.

The legislative clerk called the roll.

Mr. BYRD of West Virginia. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Virginia (Mr. BYRD), the Senator from Florida (Mr. HOLLAND), the Senator from Massachusetts (Mr. KENNEDY), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that the Senator from Alabama (Mr. ALLEN), the Senator from Nevada (Mr. CANNON), and the Senator from Louisiana (Mr. ELLENDER) are absent on official business.

I further announce that, if present and voting, the Senator from Louisiana (Mr. ELLENDER) would vote "nay."

On this vote, the Senator from Nevada (Mr. CANNON) is paired with the Senator from Florida (Mr. HOLLAND). If present and voting, the Senator from Nevada would vote "yea" and the Senator from Florida would vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Colorado (Mr. DOMINICK), the Senator from Pennsylvania (Mr. SCHWEIKER) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

If present and voting, the Senator from Colorado (Mr. DOMINICK), and the Senator from Arizona (Mr. GOLDWATER) would each vote "nay."

The result was announced—yeas 46, nays 41, as follows:

[No. 191 Leg.]

YEAS—46

So Mr. Moss' amendment was agreed to.

Mr. PASTORE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MOSS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 303

Mr. FANNIN. Mr. President, I call up my amendment No. 303.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk proceeded to read the amendment.

Mr. FANNIN. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

"SEC. 122. POLITICAL ACTIVITIES OF TAX-EXEMPT ORGANIZATIONS.

"(a) DENIAL OF EXEMPTION.—Section 501 (relating to exemptions from tax) is amended by redesignating subsection (e) as (f) and by inserting after subsection (d) the following new subsection:

"(e) PROHIBITION ON CERTAIN POLITICAL ACTIVITIES.—No organization described in subsection (c) or (d) shall be exempt from taxation under subsection (a) for any taxable year in which any part of its income or of the amounts received for its support (including, in the case of a membership organization, dues, assessments, fees, or other charges imposed on members) is used, directly or indirectly—

"(1) to support or oppose any candidate for public office,

"(2) to support or oppose any political party, or

"(3) to carry on any voter registration."

(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1969.

Mr. FANNIN. Mr. President, I ask for the yeas and nays on my amendment.

The yeas and nays were ordered.

STRIKING A BETTER BALANCE

Mr. FANNIN. Mr. President, this amendment in spite of all the anguished cries of big labor leaders, is an eminently fair and just proposal. Every reaction I have received to this amendment, other than those who are tied to special interest groups, has been favorable.

The rank and file of major labor organizations as well as other membership organizations favor this approach, I believe, and were it not for the intimidation and coercion that exists in these situations, I believe those in charge would hardly risk a free and open referendum within their own ranks on such a proposition.

Mr. President, in a speech here in Washington on July 25, 1954, our late President, Dwight D. Eisenhower, said:

Free government makes as its cornerstone the concept, or the idea, that men are equal, they are equal before the law, they have equal rights and equal opportunities in the governments maintained to protect them.

It is in pursuit of this concept, Mr. President, that I have introduced this amendment.

It has been estimated that over a hundred million dollars were spent by labor unions in the last national elections, not including wages and salaries of those in everyday activities that are truly involved in political endeavors. One of the things which makes this practice so iniquitous is that much of this money is collected by the union leaders under arrangements which give a man no choice but to belong to a union. Then his money, taken from him by the force of law, may be and often is, spent contrary to the political desires of the member. I would be just as opposed to any business organization utilizing dues or assessments in this manner.

It is not the purpose of this amendment, Mr. President, to penalize one group at the expense of another. The purpose plainly and simply is to strike a better balance than we have had heretofore in these matters. Very little investigation is required, Mr. President, to discover that under the interpretation of section 501(c) of the Internal Revenue Code, union leaders have enjoyed an immunity to the "no politics" rule that has been applied to other tax-exempt organizations in the civic, fraternal, business, and professional fields.

There are those, Mr. President, who charge me with antilabor bias in introducing this legislation. It is simply not true, it has not been true, and I trust that it never shall be true. This amendment is protective of the members' rights.

Our country is blessed with the finest in working men and women the world has ever known. They are better trained, more highly skilled, and in many instances more highly motivated than any other major industrial nation in the world. However, Mr. President, there are those who are leaders in the labor movement, and I do not include them all, who are bent on removing incentive; committed to the dissolution of those qualities that made America great because it was built by great people. They are the greedy ones who no longer regard a good day's work for a good day's pay as a proper goal to be attained.

To those who are critical of me, and who would betray the labor movement into the sloughs of lethargy and sloth, I would recall the words of the great-grandfather of the labor movement in America, Samuel Gompers.

Sixty-three years ago, Mr. Gompers recognizing the coming dangers if great political power became concentrated in the hands of a few men, said:

It is doubtful to my mind if the contributions and expenditures of vast sums of money in the nominations and elections for our public offices can continue to increase without endangering the endurance of our Republic in its purity and in its essence . . . the necessity for some law upon the subject is patent to every man who hopes for the maintenance of the institutions under which we live.

Mr. President, we have had a "law upon the subject" to use the words of Mr. Gompers; but it has not prevented the danger which he saw approaching from

coming about. I refer to an article on the Federal Corrupt Practices Act which I inserted in the RECORD on December 1, 1969, at page 36199. This article from the highly respected Congressional Quarterly publication indicates that not only does that law have so many loopholes as to be ineffective, but even the loose provisions of the existing law are not enforced. I dare say there is no single group in our Nation able to wield so powerful a weapon as the quantity of money and help which labor officials can pour into national and local election campaigns.

The history of labor organizations using money from their general treasuries to contribute to political campaigns, or to pay the salaries of campaign workers donated by the unions is well established. The allegation is broadly made by labor leaders that all of their contributions are voluntary, but such a statement is not seriously defended in detail.

As just one example, I cite the oral arguments of one Joseph Rauh, formerly head of the Americans for Democratic Action, who argued a case for the United Auto Workers before the Supreme Court of the United States:

Mr. RAUH. We have never had the type of funds on voluntary dollars—

Justice REED. You can't get as much from voluntary dollars as you can from dues?

Mr. RAUH. Well, sir, a union man thinks he has paid, when he has paid his dues, he thinks he has paid for bargaining, for legislation, and for political activity. He doesn't feel he should pay a second time for political activity. That is why it is so hard to raise voluntary contributions . . . When he pays his dues, he has paid for his political action. (Cong. Rec. 10/27/69 pg. 31551ff.)

Just last year the AFL–CIO assessed its members a nickel per member to amass an additional election campaign fund of $850,000; all of it without paying a penny in taxes. Just think of the magnitude of money available through assessment privileges. We could possibly cut union dues in half by this amendment.

Union tax free dues build up a fantastic wealth. The best estimates place combined union income at around $75 million per month. Total union wealth is estimated at more than $4 billion. Union businesses are legion in the multimillion-dollar range and the income from hotels, motels, banks, transit lines, apartment and office buildings, and life insurance firms flows into union coffers free of tax levy.

In the October 11, 1969, edition of the AFL–CIO News, Mr. President, I quote from an article on page 20 headlined "Labor Renews Crusade for Tax Justice." One of the three major goals listed in the leading resolution reads as follows: "The elimination of the loopholes of special tax privilege for wealthy families and businesses." Notably absent from the resolution is the plugging of the special tax loopholes for wealthy unions.

AFL–CIO President George Meany addressed the Atlantic City crowd with these words, and I quote from the AFL–CIO paper:

Washington is crowded with well-heeled lobbyists who represent every group that has a selfish interest in perpetuating the special tax preference that they now enjoy.

That was a very candid statement of Mr. Meany, especially in light of his statement to an AFL–CIO gathering on August 28, 1969, in which he said:

I think frankly, we have the most effective lobby in Washington. We don't go bragging about our lobby. We don't brag that we are lobbyists. We don't talk about it. But actually, we are lobbyists.

Mr. President, this is an outstanding display of candor on the part of Mr. Meany. I have no hesitancy in attesting to the effectiveness of the union lobbyists.

There have been some, Mr. President, who have accused me of singling out unions for special punitive legislation. That is not true.

The amendment before you applies to all organizations presently designated tax exempt under the Internal Revenue Code. Everyone is treated exactly alike before the law. That is the fair and equitable way. It has been said by union spokesmen that there is no measure of justice in this amendment. I am told that in telegrams to various Senators, labor councils across the country have reminded us of the tax-exempt status of such organizations as the National Association of Manufacturers, the American Medical Association, the chambers of commerce, National Right To Work Committee, and other similar groups. Mr. President, this amendment does apply to those and all similar organizations. This is not favoritism, it is fairness, and no legislator can in conscience vote on any other basis.

The principle with which we are here concerned, Mr. President, is fairly straightforward. Shall an organization, either fraternal, professional, religious, labor, or other, be in effect subsidized by the taxpaying public to work in opposition to the interests of a significant portion of that public?

Certainly everyone in America is free, or should be, to contribute to the political candidate of his choice, and to work on his behalf as a private citizen. The difficulty arises when such activity is permitted, even encouraged through the use of tax-exempt funds. An organization which is exempt from taxation is by its specialized status, shifting the burden to the remaining tax base. We here are simply saying that if you wish to engage in political activity of the type so described—support or opposition of candidates and parties and voter registration—that you then pay taxes like everyone else who engages in such activity.

May I make it perfectly clear, Mr. President, that we are not seeking to restrict the free expression of voter responsibility and patriotic efforts. This should certainly be a part of every civic minded organization's program. But actual voter registration should be, I believe, primarily the responsibility of the political parties. The Senate Finance Committee has expressed its reservations about the motivations behind many voter registration drives as being politically motivated—and as such, they should not be carried out with tax-exempt money.

Now a word about free speech, or expression of opinion by unionists. My amendment would not restrict in any way the right of an individual to express himself as far as politics are concerned in his individual views. If a union official wishes to be for or against a certain political candidate as a private matter, that is his business, his right, and he may certainly employ it. If, on the other hand, he wishes to use his official position as a union official to coerce other members of his union into voting for or against a candidate or party, then I believe he is jeopardizing the tax-exempt status of the union in the same fashion as a chamber of commerce president; acting in his official capacity would be threatening the tax-exempt status of his chamber by making official pronouncements in favor or in opposition to a candidate.

Mr. President, I close as I began with the words of our late and beloved President, Dwight Eisenhower. They enunciate the principle to which my amendment is dedicated. I trust we shall be true to them:

Free government makes as its cornerstone the concept, or the idea, that men are equal, they are equal before the law, they have equal rights and equal opportunities in the governments maintained to protect them.

Mr. President, I ask that we strike a better balance toward the achievement of those equal rights, and trust adoption of amendment No. 303 will be approved.

Mr. President, I yield to the Senator from Texas.

Mr. TOWER. Mr. President, I thank my distinguished friend, the Senator from Arizona.

Mr. President, I support the Senator's amendment No. 303 to the tax reform bill. I would like to congratulate the distinguished Senator from Arizona for the excellent presentation he has delivered on his proposal.

Mr. President, during the course of debate on H.R. 13270, this body has been mainly concerned with providing more equity in our federal tax structure. The Congress has been concerned with closing loopholes in our tax structure. Individuals in the Congress have aimed their attack at wealthy individuals, corporations and industries. Like the vast majority of legislators, I am also very concerned about the establishment of an equitable and sound tax structure. The correction of the inequities of our tax system is a primary objective of this body, and I will continue to support those measures which I feel meet this objective.

As the Senator has already stated, supporters of this amendment have been attacked by special interests as being antilabor. This is not the case. Amendment No. 303 would require all tax-exempt organizations to refrain from political activity, including voter registration, or lose their tax-exempt status. In essence, all that this amendment does is establish a sense of fair play wth regard to the various tax-exempt organizations. I am sure that labor union officials would not want businesses and corporations to do what unions could not do. As the law stands now, unions have tax-exempt

status, whereas other tax-exempt organizations must refrain from partisan political activity or lose their tax-exempt status.

It is an obvious fact that union members contribute to a political candidate or party despite the fact that they will eventually oppose that same candidate or party on election day. Research studies have shown that union members are increasingly deviating from the wishes of union officials with respect to various candidates endorsed by the union. This is a natural tendency due to the increased political awareness and independence of the American electorate. Thus, in many cases, union members financially contribute to political candidates regardless of their own individual beliefs. With this in mind, I feel that it is safe to say that this amendment is a positive proposal that benefits labor unions as a whole; that is, in the sense that it grants the individual union member his constitutional freedom of choice.

Mr. President, this amendment attempts to provide for a just and fair balance with regard to tax-exempt organizations.

Therefore, I urge the Senate to adopt this amendment as introduced.

Mr. FANNIN. Mr. President, I thank the Senator.

I agree with the Senator. This would not limit the freedom of speech of anyone nor be a burden to any organization. It would not violate the freedom of speech of a union or individuals nor limit the freedom of speech of anyone.

If we consider the equity of it—I have had it very carefully checked—I am sure this would cover what we are talking about in the amendment. It would not apply to any organizations that are not tax exempt. If, for instance, they carry on different programs, they can continue to carry on those programs as long as the money that they utilize is voluntarily given to them.

I have supported the League of Women Voters. I have written checks for them. I think it is a good program. At the same time, I feel the greatest benefit that can accrue to a political party is for the members of that party to carry on voter registration.

I could give many examples. I can give my State as an example and what has taken place there. However, what other activity will create better citizens and a better understanding of the voter problem? What would contribute more than having the people who want to enter into political activities help a candidate or a party? If they say to a candidate, "What can I do to help you? What work can I do to help my party?" My advice would be for them to get involved in voter registration. There is not anything that would be more beneficial to them.

We do not need to have paid people going out to engage in this activity. We have plenty of people who can enter into voter registration work.

I think it is shameful that the people are not patriotic enough to move forward with voter registration on their own. Why should they have to pay people to go out and be good citizens? I think it is sinful that people think they must be paid to help their party.

It is certainly an unsound principle. I oppose that type of operation.

At the same time, I will certainly contribute to an organization. And I do not expect to take a tax deduction on the contribution I make.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. TOWER. Mr. President, the Senator's amendment would not proscribe legitimate volunteer political activity on the part of trade union members.

Mr. FANNIN. No. I think it would encourage it. At the present time people sit back and say, "Let John do it, or let someone else do it."

This would encourage such activity and make political parties more conscious of this fact, and it would greatly interest people in politics.

Mr. TOWER. It would not discourage individual union members from contributing to the party or candidate of his choice.

Mr. FANNIN. He can do whatever he wants to do. The very wording of the amendment indicates that it is not only not restrictive, but it would also greatly encourage people to work for their political parties.

I think rather than discourage or hamper voter registration, it would encourage it.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. PACKWOOD. Mr. President, the Senator mentioned the League of Women Voters and their activity in voter registration. Do I correctly understand the Senator to mean that his amendment would not apply to voter registration carried on by the League of Women Voters?

Mr. FANNIN. As long as the money was voluntarily given, it would not affect that activity. If the money being spent was tax-exempt money, it would.

Mr. PACKWOOD. Mr. President, no one has to join the League of Women Voters or the Chamber of Commerce. However, if we had a situation where the League of Women Voters was using their dues for voter registration, would that be proscribed by the amendment?

Mr. FANNIN. No. Mr. President, I intend to encourage rather than discourage this type of activity. I feel, as I have said, that we would encourage people to become more involved and not to get involved in something because they would be paid for their work.

Mr. TOWER. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. TOWER. Mr. President, voter registration is a congeneric activity of the League of Women Voters. They are set up for that purpose. They pay their dues voluntarily. They know what their organization does. In that sense, it would be excluded by the amendment. However, voter registration is not a congeneric activity of a trade union.

Mr. FANNIN. The whole matter, so far as I am concerned, is one of encouraging people to become involved in politics. This amendment would not discourage anyone. It would not discourage freedom of speech. It just means that people who are paid by tax-exempt money could not enter into these activities. They could enter into it if they were not representing the organization.

The limitations involved in this amendment have been overemphasized. It is very simple, and it pertains to exactly what it says. It says:

PROHIBITION ON CERTAIN POLITICAL ACTIVITIES.—No organization described in subsection (c) or (d) shall be exempt from taxation under subsection (a) for any taxable year in which any part of its income or of the amounts received for its support (including, in the case of a membership organization, dues, assessments, fees, or other charges imposed on members) is used, directly or indirectly—

When anyone says that "directly or indirectly" is going to cause difficulty, I say that he is being misled. I had this checked very carefully. I talked with several of the distinguished Senators on the other side of the aisle, and they brought this up. I had it checked out yesterday and today. I have gone to extremes to find out what would be involved. It certainly would not affect the work that we are talking about in getting voter registration, other than if tax exempt money is utilized. That is the only restriction we have.

What this amendment applies to is very clear: "to support or oppose any political party, or to carry on any voter registration."

This would apply just to tax exempt organizations that are involved. It would be illegal, under my amendment. I ask unanimous consent to have printed at this point in the RECORD a list of the 17 categories of organizations that are included in subchapter F, "Exempt Organizations."

There being no objection, the list was ordered to be printed in the RECORD, as follows:

SUBCHAPTER F.—EXEMPT ORGANIZATIONS

Part
I. General rule.
II. Taxation of business income of certain exempt organizations.
III. Farmers' Cooperatives.
IV. Shipowners' protection and indemnity associations.

PART I.—GENERAL RULE

Sec.
501. Exemption from tax on corporations, certain trusts, etc.
502. Feeder organizations.
503. Requirements for exemption.
504. Denial of exemption.

§ 501. Exemption from tax on corporations, certain trusts, etc.

(a) EXEMPTION FROM TAXATION.—An organization described in subsection (c) or (d) or section 401 (a) shall be exempt from taxation under this subtitle unless such exemption is denied under section 502, 503, or 504.

(b) TAX ON UNRELATED BUSINESS INCOME.—An organization exempt from taxation under subsection (a) shall be subject to tax to the extent provided in part II of this subchapter (relating to tax on unrelated income), but notwithstanding part II, shall be considered an organization exempt from income taxes for the purpose of any law which refers to organizations exempt from income taxes.

(c) LIST OF EXEMPT ORGANIZATIONS.—The

following organizations are referred to in subsection (a);

(1) Corporations organized under Act of Congress, if such corporations are instrumentalities of the United States and if, under such Act, as amended and supplemented, such corporations are exempt from Federal income taxes.

(2) Corporations organized for the exclusive purpose of holding title to property, collecting income therefrom, and turning over the entire amount thereof, less expenses, to an organization which itself is exempt under this section.

(3) Corporations, and any community chest fund, or foundation, organized and operated exclusively for religious, charitable, scientific, testing for public safety, literary, or educational purposes, or for the prevention of cruelty to children or animals, no part of the net earnings of which inures to the benefit of any private shareholder or individual, no substantial part of the activities of which is carrying on propaganda, or otherwise attempting, to influence legislation and which does not participate in, or intervene in (including the publishing or distributing of statements), any political campaign on behalf of any candidate for public office.

(4) Civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare, or local associations of employees, the membership of which is limited to the employees of a designated person or persons in a particular municipality, and the net earnings of which are devoted exclusively to charitable, educational, or recreational purposes.

(5) Labor, agricultural, or horticultural organizations.

(6) Business leagues, chambers of commerce, real-estate boards, or boards of trade, not organized for profit and no part of the net earnings of which inures to the benefit of any private shareholder or individual.

(7) Clubs organized and operated exclusively for pleasure, recreation, and other nonprofitable purposes, no part of the net earnings of which inures to the benefit of any private shareholder.

(8) Fraternal beneficiary societies, orders, or associations—

(A) operating under the lodge system or for the exclusive benefit of the members of a fraternity itself operating under the lodge system, and

(B) providing for the payment of life, sick, accident, or other benefits to the members of such society, order, or association or their dependents.

(9) Voluntary employees' beneficiary associations providing for the payment of life, sick, accident, or other benefits to the members of such association of their dependents, if—

(A) no part of their net earning inures (other than through such payments) to the benefit of any private shareholder or individual, and

(B) 85 percent or more of the income consists of amounts collected from members and amounts contributed to the association by the employer of the members for the sole purpose of making such payments and meeting expenses.

(10) Voluntary employees' beneficiary associations providing for the payment of life, sick, accident, or other benefits to the members of such association or their dependents or their designated beneficiaries if—

(A) admission to membership in such association is limited to individuals who are officers or employees of the United States Government, and

(B) no part of the net earnings of such association inures (other than through such payments) to the benefit of any private shareholder or individual.

(11) Teachers' retirement fund associations of a purely local character if—

(A) no part of their net earnings inures (other than through payment of retirement benefits) to the benefit of any private shareholder or individual, and

(B) the income consists solely of amounts received from public taxation, amounts received from assessments on the teaching salaries of members, and income in respect of investments.

(12) Benevolent life insurance associations of a purely local character, mutual ditch or irrigation companies, mutual or cooperative telephone companies, or like organizations; but only if 85 percent or more of the income consists of amounts collected from members for the sole purpose of meeting losses and expenses.

(13) Cemetery companies owned and operated exclusively for the benefit of their members or which are not operated for profit; and any corporation chartered solely for burial purposes as a cemetery corporation and not permitted by its charter to engage in any business not necessarily incident to that purpose, no part of the net earnings of which inures to the bent of any private shareholder or individual.

(14) Credit unions without capital stock organized and operated for mutual purposes and without profit; and corporations or associations without capital stock organized before September 1, 1957, and operated for mutual purposes and without profit for the purpose of providing reserve funds for, and insurance of, shares or deposits in—

(A) domestic building and loan associations,

(B) cooperative banks without capital stock organized and operated for mutual purposes and without profit, or

(C) mutual savings banks not having capital stock represented by shares.

(15) Mutual insurance companies or associations other than life or marine (including interinsurers and reciprocal underwriters) if the gross amount received during the taxable year from the items described in section 822(b) (other than paragraph (1)(D) thereof) and premiums (including deposits and assessments) does not exceed $150,000.

(16) Corporations organized by an association subject to part III of this subchapter or members thereof, for the purpose of financing the ordinary crop operations of such members or other producers, and operated in conjunction with such association. Exemption shall not be denied any such corporation because it has capital stock, if the dividend rate of such stock is fixed at not to exceed the legal rate of interest in the State of incorporation or 8 percent per annum, whichever is greater, on the value of the consideration for which the stock was issued, and if substantially all such stock (other than nonvoting preferred stock, the owners of which are not entitled or permitted to participate, directly or indirectly, in the profits of the corporation, on dissolution or otherwise, beyond the fixed dividends) is owned by such association, or members thereof; nor shall exemption be denied any such corporation because there is accumulated and maintained by it a reserve required by State law or a reasonable reserve for any necessary purpose.

(17)(A) A trust or trusts forming part of a plan providing for the payment of supplemental unemployment compensation benefits, if—

(i) under the plan, it is impossible, at any time prior to the satisfaction of all liabilities, with respect to employees under the plan, for any part of the corpus or income to be (within the taxable year or thereafter) used for, or diverted to, any purpose other than the providing of supplemental unemployment compensation benefits.

(ii) such benefits are payable to employees under a classification which is set forth in the plan and which is found by the Secretary or his delegate not to be discriminatory in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees, and

(iii) such benefits do not discriminate in favor of employees who are officers, shareholders, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. A plan shall not be considered discriminatory within the meaning of this clause merely because the benefits received under the plan bear a uniform relationship to the total compensation, or the basic or regular rate of compensation, of the employees covered by the plan.

(B) In determining whether a plan meets the requirements of subparagraph (A), any benefits provided under any other plan shall not be taken into consideration, except that a plan shall not be considered discriminatory—

(i) merely because the benefits under the plan which are first determined in a nondiscriminatory manner within the meaning of subparagraph (A) are then reduced by any sick, accident, or unemployment compensation benefits received under State or Federal law (or reduced by a portion of such benefits if determined in a nondiscriminatory manner), or

(ii) merely because the plan provides only for employees who are not eligible to receive sick, accident, or unemployment compensation benefits under State or Federal law the same benefits (or a portion of such benefits if determined in a nondiscriminatory manner) which such employees would receive under such laws if such employees were eligible for such benefits, or

(iii) merely because the plan provides only for employees who are not eligible under another plan (which meets the requirements of subparagraph (A)) of supplemental unemployment compensation benefits provided wholly by the employer the same benefits (or a portion of such benefits if determined in a nondiscriminatory manner) which such employees would receive under such other plan if such employees were eligible under such other plan, but only if the employees eligible under both plans would make a classification which would be nondiscriminatory within the meaning of subparagraph (A).

(C) A plan shall be considered to meet the requirements of subparagraph (A) during the whole of any year of the plan if on one day in each quarter it satisfies such requirements.

(D) The term "supplemental unemployment compensation benefits" means only—

(i) benefits which are paid to an employee because of his involuntary separation from the employment of the employer (whether or not such separation is temporary) resulting directly from a reduction in force, the discontinuance of a plant or operation, or other similar conditions, and

(ii) sick and accident benefits subordinate to the benefits described in clause (i).

(E) Exemption shall not be denied under subsection (a) to any organization entitled to such exemption as an association described in paragraph (9) of this subsection merely because such organization provides for the payment of supplemental unemployment benefits (as defined in subparagraph (D)(i)).

(d) RELIGIOUS AND APOSTOLIC ORGANIZATIONS.—The following organizations are referred to in subsection (a): Religious or apostolic associations or corporations, if such associations or corporations have a common treasury or community treasury, even if such associations or corporations engage in business for the common benefit of the members, but only if the members thereof include (at the time of filing their returns) in their gross income their entire pro rata shares, whether distributed or not, of the taxable income of the association or corporation for such year.

Any amount so included in the gross income of a member shall be treated as a dividend received.

(e) CROSS REFERENCE.—

For nonexemption of Communist-controlled organizations, see section 11(b) of the Internal Security Act of 1950 (64 Stat. 997; 50 U.S.C. 790(b)).

(Aug. 16, 1954, ch. 736, 68A Stat. 163; Mar. 13, 1956, ch. 83, § 5(2), 70 Stat. 49; Apr. 22, 1960, Pub. L. 86-428, § 1, 74 Stat. 54; July 14, 1960, Pub. L. 86-667, § 1, 74 Stat. 534; Oct. 16, 1962, Pub. L. 87-834, § 8(d), 76 Stat. 997.)

AMENDMENTS

1962—Subsec. (c)(15). Pub. L. 87-834 substituted "$150,000" for "$75,000."

1960—Subsec. (c)(14). Pub. L. 86-428 substituted "September 1, 1957" for "September 1, 1951."

Subsec. (c)(17). Pub. L. 86-667 added subsec. (c)(17).

1956—Subsec. (c)(15). Act Mar 13, 1956, substituted "the items described in section 822(b) (other than paragraph (1)(D) thereof)" for "interest, dividends, rents,".

EFFECTIVE DATE OF 1962 AMENDMENT

Amendment of subsec. (c)(15) of this section by Pub. L. 87-834 applicable with respect to taxable years beginning after Dec. 31, 1962, see section 8(h) of Pub. L. 87-834, set out as a note under section 821 of this title.

EFFECTIVE DATE OF 1960 AMENDMENTS

Section 2 of Pub. L. 86-428 provided that: "The amendment made by this Act [to subsec. (c)(14) of this section] shall apply only with respect to taxable years beginning after December 31, 1959."

Section 6 of Pub. L. 86-667 provided that: "(a) Except as provided in subsection (b), the amendments made by this Act [to this section and sections 503, 511, 513 and 514 of this title] shall apply to taxable years beginning after December 31, 1959.

"(b) In the case of loans, the amendments made by section 2 of this Act [to section 503 of this title] shall apply only to loans made, renewed, or continued after December 31, 1959."

EFFECTIVE DATE OF 1956 AMENDMENT

Amendment by act Mar. 13, 1956, applicable only to taxable years beginning after Dec. 31, 1954, see note set out under section 821 of this title.

§ 502. Feeder organizations.

An organization operated for the primary purpose of carrying on a trade or business for profit shall not be exempt under section 501 on the ground that all of its profits are payable to one or more organizations exempt under section 501 from taxation. For purposes of this section, the term "trade or business" shall not include the rental by an organization of its real property (including personal property leased with the real property). (Aug. 16, 1954, ch. 786, 68A Stat. 166.)

§ 503. Requirements for exemption.

(a) DENIAL OF EXEMPTION TO ORGANIZATIONS ENGAGED IN PROHIBITED TRANSACTIONS.—

(1) GENERAL RULE.—

(A) An organization described in section 501(c)(3) which is subject to the provisions of this section shall not be exempt from taxation under section 501(a) if it has engaged in a prohibited transaction after July 1, 1950.

(B) An organization described in section 507(c)(17) which is subject to the provisions of this section shall not be exempt from taxation under section 501(a) if it has engaged in a prohibited transaction after December 31, 1959.

(C) An organization described in section 401(a) which is subject to the provisions of this section shall not be exempt from taxation under section 501(a) if it has engaged in a prohibited transaction after March 1, 1954.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. FANNIN. I yield.

Mr. GURNEY. Mr. President, I support the Senator's amendment. I think it is a very worthy one, and it has been long overdue and urgently needed.

I should like to give an example of voter registration and how it worked in my own congressional district the summer of 1964. Suddenly, we were reading in the newspapers about a so-called nonpartisan voters league that had been formed in the summer of 1964. Many interested civic-minded citizens joined in the effort that the league was dedicated to, and that was voter registration.

As the summer went on and the voter registration proceeded, it became evident that some of the funds were coming from the AFL-CIO and some from foundations. The voter registration went along extremely well and was highly successful. There were approximately 10,000 new voters in the Democratic Party and almost none in the Republican Party. That is how nonpartisan it was. Of course, I was a little concerned, because I had won the year before—the first time I was elected to the House of Representatives—by only 3,000 votes. This nonpartisan voters league put on the voting list three times as many Democratic votes as was my winning margin.

I think there should be voter registration, too; but I think the political parties should conduct it under their own guise. I do not think that tax-exempt funds that were extracted from both Republicans and Democrats should be shot into the political activities of one party or the other. I think that in recent years they have been channeled pretty much in the direction of one party. Of course, that is one reason why I am protesting. But the shoe can flip and be on the other foot, too. As a matter of fact, some labor organizations in the country today are reassessing their political aims. They see a new climate coming to Washington and across the country, and they think, perhaps, that the prospects of the party that has been out of office have improved materially; and some of those unions, although there are only a scattered few at the moment, are channeling at least some of their efforts in other directions.

What I am really saying is that, while this may look politically appetizing, to vote either "yea" or "nay" depending upon what one's party registration is, these things have a habit of flip-flopping or turning around. The currents change; trends change. People think that perhaps if they vote one way today, they can be fooled tomorrow.

But, quite apart from that, what the political hard facts of life are, so far as this amendment is concerned, it certainly is true that tax exempt organizations which enjoy a special status under the Internal Revenue laws of the United States because their efforts are supposed to be channeled in charitable directions or efforts that are good for the country—and we want to encourage this sort of thing—none of these people should be engaged in political activity for either one party or the other. Even if the majority were on my side, this amendment is needed. People in the business of charitable foundations and labor unions and anybody else in this category should not be messing around and actively spending their money for politics, if they enjoy a tax-exempt status.

I would hope that we could close this loophole and put everybody on an even basis, and let the political parties do their own political activity. I certainly support the Senator.

I should like to make another point, and I think it is important; it is the real heart of this matter. No man, when he belongs to a labor union or some other kind of organization, ought to have his dues money—which is involuntarily taken from him in many States, because he has to join if he wants to keep a job—channeled into the efforts of a political party that may not be the one he supports.

Again, we harken back to my own political career. In the congressional district I represented, I used to get a majority of the labor union votes. Many members of labor unions would come to me and say, "Mr. Gurney, we're for you and we're going to vote for you, but we don't like what our leaders are doing and we wish we could do something about it," because they were very actively in support of the other side.

I simply cite that as an example of what the Senator from Arizona has been talking about, that the dues of many people are involuntarily used in quite a different way from that in which they want the dues used so far as political activity is concerned. The Senator's amendment would correct this, and I support him.

Mr. FANNIN. I thank the distinguished Senator from Florida.

In support of what the Senator from Florida has said, I have a letter from the Internal Revenue Service, dated November 17, 1969, signed by the Assistant Commissioner. I should like to read a couple of paragraphs to show that there is a difference:

Paragraph (c)(5) of section 501(c) is the only one of the seventeen paragraphs of that section that contains no definitions, limitations or prohibitions. Only in regard to labor, agricultural, horticultural organizations did Congress grant exemption in such broad, unlimited terms. For example, Congress did not set forth in section 501(c)(5) provisions such as those contained in section 501(c)(3) denying exemption to charitable and educational organizations which participate in any political campaign on behalf of any candidate for public office. The inclusion of various definitions, limitations, and prohibitions in the other paragraphs of section 501(c) evidences that in enacting the section Congress gave attention to such matters, yet did not apply any restrictions to labor organizations.

Therefore, it is the Service's position that if a labor union has as its principal purpose the representation of employees in such matters as wages, hours of labor, working conditions, and economic benefits, and the general fostering of matters affecting the working conditions of its members, the exemption of the organization is conferred by the statute. We find no basis to support a modification of this position.

Consequently, I say that there is no basis to support what is being done now by the unions.

Let us look at what is involved. Why am I so concerned about this particular amendment?

Mr. President, I feel this matter is as important as any amendment in the entire tax bill from the standpoint of the future employment of the people of our Nation. We must have a balance between labor, management, and the Government. If we do not soon obtain a balance between the unions, business officials and the Government we are going to see more and more jobs exported to other nations. This is something that affects every State represented in the Senate. We do not have to go very far to realize and to know what is happening. One can go to his own neighborhood, or to his State, and ask the chamber of commerce there. Ask the State union organization what is happening.

We see one organization after another putting plants in foreign countries. At the present time we are considering the textile industry. Most exasperating to me is that we are losing jobs in the textile industry. We could look at nearly any other industry. We could talk about motorcycles, automobiles, or any piece of equipment, electronic equipment, or, for instance, television sets.

This matter was forcefully brought home to me when I discovered that in the first 6 months of this year we only exported throughout the world about 65,000 television sets. Why do I bring up that matter? I am from a State which has some fine electronic plants. I observed those companies that were increasing their facilities, not in this country but by going into some foreign land because they have been driven out, they say, because of the restrictions labor unions have placed on their employees and their employment of people.

Mr. President, this does not mean I am against good wages. I am for good wages. With respect to working conditions, we have the finest working conditions, the best in the world. Our industries could be the most productive but many limitations are placed on them so that in many instances they are not competitive. Therefore, when I state we exported 65,000 television sets what has happened is that plants located in other countries were involved. We imported 653,000 television sets from foreign lands, made by American companies.

Even more exasperating and even more frightening to me is what has happened with respect to imports from Japan. Japan shipped to the United States in the first 9 months of this year about 2 million television sets. Imagine how many jobs were lost to American workingmen.

So I am fighting for members of the union; I am fighting for the working people of this country, and for all the people of this country, because if we do not do something about this situation to bring about a better balance, we are going to see more and more jobs go abroad. It is happening every day. I trust this body will realize that this is a first step to correct that situation. This is a very much needed step, and if we do not take this much needed step, we will probably never take it. I hope we will have a commission or board appointed by the President which will include labor officials, officials of industry, and officials of Government, a board that will get together and make a study of this problem and report back to the President, because this is one of the most serious problems facing this Nation today. That is why I am so anxious to take this first step.

Mr. CASE. Mr. President, amendment 303 proposes to revoke the tax exemption of any organization which carries on any voter registration.

In other words, organizations such as the Southern Regional Council, which conducts voter registration drives in the South, and the League of Women Voters, which conducts such drives throughout the country, would be forced to halt these activities or give up their tax-exempt status.

But the heritage of amendment 303 and a full page ad in the Washington Star indicate the amendment is aimed primarily at the tax-exempt status of labor unions.

The ad, paid for by the National Right To Work Committee, which is a tax-exempt organization itself, said the amendment "would treat unions like other tax-exempt organizations by removing the exemption privilege if any part of union 'dues, assessments, fees, or other charges imposed on the members' were used for politics."

The heritage of amendment 303 is derived from amendment 145, which specifically singled out labor unions and exempted all other tax-exempt organizations from its provisions.

While broadening its coverage to include all tax-exempt organizations, amendment 303 narrowed the type of political activities which would be grounds for revocation of an organization's tax-exempt status.

The original amendment called for loss of an organization's entire exemption if any portion of its dues or assessments was used "to support or oppose any candidate for public office or for other political purposes."

The new amendment is more specific, limiting the type of political activities affected, to support, or opposition to a candidate or a political party, or to carrying on voter registration.

The Corrupt Practices Act already makes it illegal for labor unions, along with corporations, to make a contribution or expenditure in connection with any election for President, Vice President, or Members of Congress.

In shaping the contours of the Corrupt Practices Act, Congress specifically sought to develop a balance to afford all groups a fair opportunity to take part in our political process. This act was not hastily drawn nor lightly considered. Indeed, in 1967 the balance struck by the act was reaffirmed by the Senate by rejecting a proposal which would have prohibited group activity in the political area.

The consideration and debate which preceded enactment of the Corrupt Practices Act demonstrated the complex policy questions which are involved in this area. Yet, amendment 303 is offered without benefit of thorough study and in the absence of committee hearings of its provisions.

The impact on voter registration drives is obvious. Not so obvious are its consequences on other activities of civic, charitable, and other nonprofit organizations which might be construed as opposition to a political party.

I shall vote against the amendment.

Mr. TALMADGE. Mr. President, I would like to have stated the amendment in the nature of a substitute which is pending at the desk.

Mr. FANNIN. Mr. President, I would like to make an inquiry of the Senator from Georgia.

Mr. TALMADGE. I yield for a parliamentary inquiry or such other inquiry as the Senator may have.

Mr. FANNIN. Is the Senator submitting an amendment?

Mr. TALMADGE. I am offering an amendment in the nature of a substi-

tute to the amendment proposed by the Senator from Arizona.

Mr. FANNIN. I thank the Senator.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk proceeded to read the amendment.

Mr. TALMADGE. Mr. President, I ask unanimous consent that further reading of the amendment may be dispensed with, and that the amendment may be printed in the RECORD.

The PRESIDING OFFICER. Without objection, it is so ordered; and, without objection, the amendment will be printed in the RECORD.

The amendment ordered to be printed in the RECORD, is as follows:

On page 148, line 16, insert the following:

"SEC. 122—POLITICAL ACTIVITIES OF TAX EXEMPT ORGANIZATIONS.

"(a) DENIAL OF EXEMPTION.—Section 501 (relating to exemptions from tax) is amended by redesignating subsection (e) as (f) and by inserting after subsection (d) the following new subsection:

"'(e) PROHIBITION ON CERTAIN POLITICAL ACTIVITIES.—No organization described in subsection (c) or (d) shall be exempt from taxation under subsection (a) for any taxable year in which any part of its income or assets or of the amounts received for its support (including, in the case of a membership organization, dues, assessments, fees, or other charges imposed on members) is contributed to any candidate for Federal office. For the purpose of the preceding sentence, a contribution shall be deemed to occur only where cash or its equivalent or property which has an ascertainable fair market value is transferred to or otherwise made available to a political party or to a political candidate or to an organization formed or availed of to support a political candidate. A contribution shall not be deemed to occur where the principal character of an activity in support of a political party or a political candidate constitutes mobilizing membership of the organization for such purpose, as distinguished from the contribution of cash or its equivalent or property which has an ascertainable fair market value.'

"(b) EFFECTIVE DATE.—The amendment made by subsection (a) shall apply to taxable years beginning after December 31, 1969."

Mr. TALMADGE. Mr. President, I applaud the distinguished Senator from Arizona for his attempt to close a very important tax loophole. It cannot be doubted that a great many tax-exempt organizations do make substantial political contributions to candidates for office. I share the Senator's objection to the improper diversion of tax-exempt funds from their intended purpose into large-scale subsidies for political candidates. I believe our normal political processes must not be subverted through massive injection of tax-exempt funds into political contests.

However, I am equally concerned that we not impair or destroy those legitimate political activities in which American organizations have traditionally engaged.

It is desirable that citizens who have similar objectives work together in membership organizations to make their voices heard in the democratic process of electing their representatives in Government. And, it is wholly proper that this activity occur through membership organizations such as chambers of commerce, labor unions, trade associations, civic clubs, and similar groups holding a tax-exempt status.

These are not charitable and educational organizations, on which special restrictions must be imposed because contributions to them qualify as charitable contributions for the purpose of a tax deduction. They are instead organizations which have been formed by their members because they desire to make common cause in a particular area. They may be businessmen, club members, farmers, union members, realtors, manufacturers, doctors, lawyers, and so on. They have a common interest within their particular area and that common interest naturally extends to the question of who represents them in Government.

It is true that the groups mentioned are not organized primarily for political purposes. Farm groups perform such diverse functions as advising their members of the latest farm technology and providing low-cost insurance. Labor unions are organized primarily for collective bargaining. Professional associations police their own membership and maintain the high standards of the profession. It would be punitive and unfair to eliminate the tax-exempt status of these worthy organizations just because the members of the organization wish to express their common voice in favor of a particular candidate or a particular party. It should not be our purpose to stifle that common voice. It should instead be our objective to insure that the tax-exempt funds are not diverted by these groups to support political parties and candidates.

Let us look carefully at the amendment of the Senator from Arizona. Read subsection (e). This amendment states that an organization shall lose a tax exemption if any part of its income or the amounts received for its support are used directly or indirectly to support a candidate, a party, or to carry on voter registration. This amendment is so broad that if a union rented a public hall to hear a particular political candidate, it would be subject to losing its tax exemption. It would have spent a part of its income to support a candidate for public office.

If a farm organization were to adopt a resolution in support of the farm policy of a particular party during a campaign, it could lose its tax exemption because of the incidental expense involved in publishing the resolution.

Under the language of the Fannin amendment, a civic club which organized its membership to make telephone calls for a party or candidate would lose its tax-exempt status.

Mr. FANNIN. Mr. President, will the Senator from Georgia yield?

Mr. TALMADGE. I yield.

Mr. FANNIN. I want to clarify one point. When the Senator says "civic club," would that be the same as a chamber of commerce, say?

Mr. TALMADGE. Any tax-exempt organization; yes, sir.

Mr. FANNIN. I would refer to the present law, "Political activities of social welfare organizations such as civic leagues which are exempt from section 501(c)(4) are limited by regulations issued under this section." So, they are already covered.

Mr. TALMADGE. Would the Senator repeat that, please?

Mr. FANNIN. "The political activities of social welfare organizations such as civic leagues which are exempt from section 501(c)(4) are limited by regulations issued under this section."

These regulations provide promotion and social welfare, but does not include those participating in a political campaign on behalf of or in opposition to any candidate for public office. So, they are already covered.

Mr. TALMADGE. I do not recall any of them that have ever had tax exemption revoked simply because they participated in the right of free speech under the Constitution of the United States.

Mr. FANNIN. Nor would they have, under my amendment. They absolutely would not have.

Mr. TALMADGE. As I read it, it says:

No organization described in subsection (c) or (d) shall be exempt from taxation under subsection (a) for any taxable year in which any part of its income or assets or of the amount received for its support including in the case of a membership organization, dues, assessment, fees, or other charges imposed on members if used directly or indirectly.

As I read that——

Mr. FANNIN. Go on, go on to the other three items.

Mr. TALMADGE. "To support or oppose any candidate for public office, to support or oppose any political party, or to carry on any voter registration."

I have had that carefully analyzed by some expert lawyers, and it is so broad that if a farm group got someone to fly down to Georgia to explain the farm program and he wound up denouncing the Republican Party or the Democratic Party, and they had paid his transportation to Georgia, they would lose their tax exemption as a result thereof.

Mr. FANNIN. That is a wide interpretation. I have had this properly and thoroughly checked by former counsel of the National Labor Relations Board and by attorneys who are reliable here in Washington, and in Arizona, and that simply is not true.

Mr. TALMADGE. I read the language again——

Mr. FANNIN. I understand the language. But that is the Senator's interpretation.

Mr. TALMADGE. Where they pay out of dues or assessments or fees or other charges imposed on the members, if it is used indirectly to pay a speaker to speak to an organization, and he denounces another political party or one of the candidates, it would be using that money indirectly or directly.

Mr. FANNIN. If he is using tax-exempt money to go down to Georgia to carry on a campaign, that naturally would be. But what the Senator is talking about is so far-fetched, where a person would go down to Georgia and talk, and in addition would talk and be involved in what the Senator is talking about, that would not apply.

Mr. TALMADGE. Let us use this illustration: A junior chamber of com-

merce at a national convention, if it had a candidate for President speaking there to the organization, would certainly be using their facilities to aid a political campaign.

Mr. FANNIN. Not one at the expense of the other. All we are asking for is a balance, for fairness. I talked to the president of the National Jaycees in Oklahoma City, and their counsel, and certainly I do not agree with the Senator's interpretation, and they do not, either.

Mr. TALMADGE. I think anyone who studies the language knows that it is broad enough to cover the situation to which I have referred. Everyone I have had look at it thought the same thing.

Mr. FANNIN. The exact opposite has been true. In my analyzation of it by legal counsel, I made sure that we would be careful when the language was prepared, to be sure that it did not cover anything of that nature.

Mr. TALMADGE. I think the language is so broad that if an association of manufacturers that paid the travel expenses of a member who spoke in favor of a political party would be denied its tax-exempt status.

Mr. FANNIN. That is not the interpretation given to me. It is cetrainly not the intent.

Mr. TALMADGE. I fear that Senator Fannin's amendment is so broad that it would preclude any partisan mention of political candidates by such organizations as the AFL–CIO, the National Association of Manufacturers, and the U.S. Chamber of Commerce in their own newspapers or other communications to members. It would also preclude the preparation and distribution of an analysis of the voting record of an elected representative on issues of concern to the members of the organization.

Mr. President, I believe that there is a great deal of merit in the Senator from Arizona's proposal. However, it must be modified to make clear that tax-exempt organizations can continue to engage in legitimate membership activities.

We should close the tax loophole that permits tax-exempt organizations to subsidize the campaigns of political candidates, but we can do this without harsh and punitive legislation.

Therefore, I would amend the proposal of the Senator from Arizona by the inclusion of language in the susbtitute I have proposed to the Senator's amendment, which would make it clear that the mobilization of an organization's manpower in favor of a political candidate or party is permissible. This kind of activity will be permissible only so long as the principal character of the activity is the mobilization of its membership rather than the contribution of cash or property.

Mr. President, I hope the Congress will act with restraint and reason in its attempt to curb abuses by tax-exempt organizations. It would be a tragedy if we were to deny to legitimate tax-exempt organizations of this Nation the right to give voice to the opinions of their members. To do so would be to deny freedom of expression to a force essential for a viable democracy.

In fact, to do so, in my judgment, would be violative of article I of the Constitution of the United States which grants to every citizen of the United States the right to free speech.

I doubt that Congress would do so.

(At this point, Mr. COOK took the chair as Presiding Officer.)

Several Senators addressed the Chair.

Mr. TALMADGE. Mr. President, let me first explain my amendment, then I will gladly yield.

The amendment I have proposed would do this: No organization described the same as the Senator's language shall be exempt from taxation under subsection (a) on any taxable year in which any part of its income or assets or of the amounts received for its support including in the case of a membership organization, dues, assessments, fees, or other charges imposed on members which contributed to any candidate for Federal office.

For purposes of the preceding sentence, a contribution shall be deemed to occur only where cash or its equivalent or property which has an ascertainable market value is transferred to or otherwise made available to a political party or to a political candidate, or to an organization formed or availed of to support a political candidate. A contribution shall not be deemed to occur where the principal character of an activity in support of a political party or a political candidate constitutes mobilizing membership of the organization for such purpose as distinguished with the contribution of cash or its equivalent or property which has an ascertainable fair market price. The effective date will be the years beginning after December 31, 1969.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield first to the Senator from Florida, who attempted to get recognition a moment ago.

Mr. GURNEY. Mr. President, I certainly compliment the Senator from Georgia on his amendment which cuts off the contribution of cash or property which may have value as far as espousing any particular candidate or party is concerned; but let me ask him to clarify the meaning of his language to some extent here.

All of us know that scores of dollars, millions of dollars, flow from labor union treasuries into political campaigns every election year. We also know that contributions go in two ways. Some are in cash and go directly to the candidate, to be used by him in whatever ways he wants. The amendment would cut that off. But the Senator also knows that the bulk of funds is used in other categories, the hiring of workers to espouse the candidate's cause.

Let us take an example. One of the operations in a campaign is the boiler room activities, where 100 or 200 telephones are hooked up, financed solely by labor union funds. What would the Senator's amendment do as far as that is concerned? Would it cut that off?

Mr. TALMADGE. I think any organization could make telephone calls or anything of that nature if it did not contribute cash or anything of ascertainable market value. That is what my amendment precludes.

Mr. GURNEY. I take it the Senator's answer is that if there were a couple of hundred telephones hooked up in a room in Dade County, Fla., for example, to espouse the cause of the Democratic candidate for Congress or for the Senate, or, for that matter, the Republican candidate for Congress or for the Senate, the Senator's amendment would not hit at that?

Mr. TALMADGE. Any tax-exempt organization could go out and attempt to get votes for a candidate. It could not contribute money or anything of ascertainable market value to any candidate or party in any Federal election.

Mr. GURNEY. What about workers, for example? Say a tax-exempt organization hires a couple of hundred workers whose job it is to distribute literature on behalf of a particular candidate or party. Would the Senator's amendment cut that off, or would it be legal after the Senator's amendment becomes law, if it does?

Mr. TALMADGE. If it constituted a contribution of ascertainable market value, it would be precluded. I attempted to draft the amendment in such a way that it would not preclude any tax exempt organization from fully participating in the political activities of the candidate or party of its choice; but it could not take money collected from its members in any way whatsoever to contribute to the candidate or party in such a way that it would constitute money or something of ascertainable market value.

Mr. GURNEY. I do not disagree with the Senator's statement that tax-exempt organizations ought to have a right to persuade their members to vote one way or the other. I think that is legitimate political activity. But I do not think the amendment strikes at the heart of the matter, and from the colloquy we have had here, if a union, for example, contributes money for boiler room operations in which workers would work for the party or candidate, it would not be covered. That is what the amendment of the Senator from Arizona does. It cuts off that kind of activity as well as the direct contribution of cash; and it is the other kind of activity, to help turn out the vote, which is usually the deciding factor in the campaign.

Mr. TALMADGE. If it did any work involved in a political campaign, then it would have an ascertainable market value and would be precluded.

Mr. GURNEY. Let us pursue that point, because that is important. If the amendment of the Senator from Georgia is adopted—and I think one amendment or the other may be adopted—I think we should have legislative history on it, and that is what I am trying to find out.

Mr. TALMADGE. If they recruit and hire employees to participate in that campaign for a candidate, then it would have an ascertainable market value and it would be precluded. On the other hand, if they had full-time employees who had been employed full time and

had been used, that would not be precluded.

Mr. FANNIN. That means that employees could be employed and money could be spent on them to do political work. It would be legitimate under the amendment of the Senator from Georgia. If, let us say, $1 billion had been raised from dues, $400 million could be taken out of that fund if they did not enter into political activity. In other words, they could save that money and cut it in half, is that not true, by using year-round employees?

Mr. TALMADGE. Under my amendment, a tax-exempt corporation could exercise its rights under the first amendment of the Constitution of the United States to support a candidate. I think to do otherwise would be a denial of free speech which is inherent in our Constitution. I thought the Senator's objective here was to get at money for political campaigns out of contributions.

Mr. FANNIN. It is just as bad to utilize money that goes for campaigns to hire employees to work for a candidate or party. What difference does it make? The Senators says they can take hundreds of millions of dollars and use it going from house to house, and do anything they want to in political activities. The Senator's amendment defeats the purpose of my amendment.

In other words, they could keep their regular work staff and they could have any size staff they wanted to if the staff were hired year round. Then they could use their surpluses and throw it into any type of service they desired. That is exactly what we are trying to prevent here. In other words, the organization could take the union members' dues which are tax exempt and use them that way. A member has not anything to do with how that money is spent. Many members have written to the Senator from Georgia and to me complaining about this. Still, the organization could take that member's money. No tax would be paid on it, but it is extracted from him.

Mr. TALMADGE. If the Senator will read my amendment——

Mr. FANNIN. I have already read it.

Mr. TALMADGE. It reads:

A contribution shall not be deemed to occur where the principal character of an activity in support of a political party or a political candidate constitutes mobilizing membership of the organization for such purpose . . .

Mr. FANNIN. And so they can use regular employees in any activity that they so desire.

Mr. TALMADGE. Any tax-exempt organization does that now. The AMA mobilizes its membership. The National Association of Manufacturers mobilizes their members. The lawyers mobilize their members. The doctors mobilize their members.

Mr. FANNIN. My amednment applies to the AMA and the Chamber of Commerce——

Mr. TALMADGE. I am aware of that, but I do not want to deny them a precious right which they have——

Mr. FANNIN. No one denies them the precious right which they have, but they are not going to get tax-exempt status under my amendment if they engage in political activities.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. TALMADGE. I yield.

Mr. PACKWOOD. I wonder if the Senator will make a distinction between two facets of this question. On the one hand, the Senator says any organization can use its work force if it limits contacts with their own members.

Mr. TALMADGE. Yes.

Mr. PACKWOOD. But there is a second distinction, and that is the category in which the organization goes beyond contacting their own members. The amendment says "cash or its equivalent or property which has an ascertainable fair market value." It is the "or its equivalent" which has me bothered, because to me that should include the value of paid people.

Mr. TALMADGE. It would if it went outside their own membership.

Mr. PACKWOOD. In other words, if the union takes its business agent, who is its full time business agent all year long, and, for September and October, delegates him to go to work for the Republican or the Democratic Party, or puts him in a boiler room operation that is calling people beyond its own membership, that is proscribed by the Senator's amendment?

Mr. TALMADGE. I think it would be.

Several Senators addressed the Chair.

Mr. TALMADGE. I am delighted to yield to the Senator from Florida for a question.

Mr. GURNEY. Just to follow up the question of the Senator from Oregon so we can pin it down, in some cases, labor organizations have actually lent a staff man to a political candidate, to help out in his operation; and, as I understand, the Senator's amendment would proscribe that also?

Mr. TALMADGE. That is correct. That would be ruled out.

Mr. GURNEY. I thank the Senator.

Mr. TALMADGE. Mr. President, I yield the floor.

Mr. MONDALE. Mr. President, I rise to oppose the amendment offered by the Senator from Arizona.

This is quite an amendment. I think the Senate ought to understand what it would do. May I have order, Mr. President?

The PRESIDING OFFICER. The Senate will be in order. Senators will take their seats.

Mr. MONDALE. This amendment does not prohibit unions from contributing treasury cash to Federal candidates, because that is already prohibited under Federal law. There is no issue here as to the use of compulsory dues by a union to help Federal candidates, because that is and has been prohibited by Federal law for many years.

This amendment tries to go beyond that, and thoroughly emasculate the capacity of unions and their membership to do anything, including advising their own members as to whom they support and whom they oppose, and including activities to encourage voter participation; and it extends beyond unions to every other kind of tax-exempt organization, such as the NAM, and AMA, the League of Women Voters, and any other similar organization. That is what it does.

There are certain things that it does not cure. I call the attention of the Senate to two very large advertisements which recently appeared in the Washington Evening Star and the Washington Post, sponsored by the National Right To Work Committee. This is a tax-exempt organization.

One of them states, after beginning with a quotation by Senator FANNIN:

Amen, Senator. An open letter to all the Members of the United States Senate.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. MONDALE. I will yield when I complete my remarks.

Do you want working people to be compelled to contribute to your election campaigns for public office? We think not.

Get this sentence:

Yet thousands of public officials, including many Members of the United States Senate, probably would not be in office today were it not for union spending of compulsory dues money in their election campaigns.

Many of us are apparently here only because unions violated the Federal law and contributed union dues money to us.

This particular advertisement was paid for by this tax exempt, nonprofit organization, and they can continue to spend these thousands of dollars in that way, under the Fannin amendment, and not be touched at all.

Now, suppose a union president, feeling that he has been libeled by this false allegation in this advertisement on behalf of the Fannin amendment, writes an editorial in a union newspaper saying that we should defeat people who support the amendment, because it utterly destroys the capacity of the union to serve its membership, without the use even of compulsory dues. Under the Fannin amendment, that union would lose its tax exemption. It would be silenced, and have to pay corporate income tax on the dues paid into the union, even though none of those dues could be used for political purposes.

That is what the Fannin amendment does. It is an unfair, one-sided, anti-labor amendment, designed not only to prevent citizens from contributing to a political campaign, but from even speaking up and asserting their rights under the First Amendment.

It does many other things. The League of Women Voters, for example, is a tax-exempt organization. In recent years, it has undertaken many exciting efforts to try to broaden voter participation in our country. In New York and Dayton, Ohio, for example, they have worked with churches and civic groups in an inner city registration drive, which added 4,000 new voters. In addition, in Waterloo and Cedar Falls, Iowa, the League of Women Voters worked together to aid in voter registration. Throughout this country, the League of Women Voters is trying to broaden the number of people who participate in elections as United States citizens should.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. MONDALE. I am delighted to yield to the Senator from West Virginia.

Mr. RANDOLPH. It is very important—yes, it is necessary—that voter registration drives by many organizations go forward on many fronts. I point to the need for participation, not only of those citizens who are unregistered, but of those who are registered but then fail to participate with the actual use of the franchise of freedom—the ballot.

The able Senator from Minnesota (Mr. MONDALE) has mentioned certain areas of this country in which registration efforts have been made by organizations, especially the excellent work of the League of Women Voters. We had, in the Commonwealth of Virginia, in the first primary in the crucial and bitterly contested governorship race this year, only 27 percent of those eligible to vote in that State who actually went to the polls. I think such an evident lack of real action is a tragedy, and yet it occurs. In New York City in the primary the results were somewhat better, but only 32 or 33 percent of the eligible voters in New York City used the ballot on that occasion. The voting culminated months of intensive campaigning, with millions of dollars spent to interest the people.

There is a very real need, as I have indicated, for efforts by organized groups to elicit the participation of their members and people generally, in voter registration. Whether they vote after they have registered is an individual determination, as is the way they vote. Too often they do not vote, and thus they weaken the elective process—the heart of our Republic's strength.

I decry this trend in our American system. There is a great body of young Americans that should be challenged with the opportunity to use the ballot, where now they are denied it. I speak of our 18-, 19-, and 20-year-olds. In 1942, as a Member of the House of Representatives, I offered one of the first constitutional amendments to lower the voting age to 18. I have repeated the effort through the years, often frustrated, but continuing within the legislative process to bring this to fruition.

Yes, the fact has been somewhat overlooked, even by the news media, that now the constitutional amendment which I have introduced and which is pending, has 66 cosponsors. There are four other Senators who have told me they will support my resolution when it comes to the Senate for decision. As Senators know, it is not two-thirds of the Senators present and voting, but two-thirds of the membership of the Senate, who can pass a constitutional amendment to be referred to the States for decision. I am very pleased to emphasize that, even though some of the Members of this body may not realize it that there are 66 Senators who have joined as cosponsors of my resolution.

I believe, if we check with the Subcommittee on Constitutional Amendments and the Committee on the Judiciary membership itself, we have the necessary votes to bring the measure to the Senate. I am hopeful that in January, we shall have an opportunity, in hearings, to focus attention on this very important matter.

I only wish there might be the kind of march that would bring youth to Washington, D.C., not to be against something but for something—an expression affirmatively, and hopefully, in their vigorous endorsement of the voter for 18-, 19-, and 20-year-olds. I think here is an answer to much of the problem that we now have with our young people. I only wish they could see it. Many of them do. Somehow we must help them realize the importance of doing more than they have done to bring about this opportunity for the States to face this issue, after Congress acts. A national thrust is vital now.

I do not say to the States what they shall do, but we would give the impact of congressional support to the 18-, 19-, and 20-year-old voting. Our country needs this successful effort at the present time.

I realize that that is an aside from what we are to vote on but I feel my views can be woven into the fabric of the broader discussion.

I am not critical of any Member who presents an amendment of this kind. I am listening to the debate with intense interest. Senators FANNIN and TALMADGE have given careful study to this problem. I fear, however, that their amendments will be a deterrent to organizations, including labor unions, which have persevered effectively in a legitimate way to interest people in active participation in the processes of government. We must not strangle these efforts. The intention, I am sure, is not to do so but the result can well be to that effect. I shall, therefore, vote against the amendments.

Mr. MONDALE. Mr. President, I thank the distinguished Senator from West Virginia for his most useful comment. No one has worked harder to bring the right to vote to those who are 18 years old or older, than has Senator RANDOLPH. Indeed, I am sure that his efforts will one day succeed and our Nation will be the stronger for it. His eloquent appeal today for broadened voter participation underscores the need to encourage, not discourage, efforts by the League of Women Voters, by organized labor, and by others who seek to increase broader participation. I commend him for it.

One wonders why the great fear, why the great apprehension which leads to these efforts to discourage the League of Women Voters and the foundations, just as, a day or two ago, we saw efforts to discourage private organizations and foundations from encouraging nonvoters to register and exercise their franchise.

This same kind of fear of people voting is seen in many States where registration laws are deliberately set up to block a working man from registering to vote during working hours. Voting registration is set up to coincide with working hours. And a man who is working an 8-hour shift cannot register to vote.

The professional man, however, can easily get off a few hours to vote. And his wife can easily take their second car and go to register.

In some States we have registration each year. And the lists are purged. That makes it exceedingly difficult for the average uninformed working person to even know of the complicated restrictions that make invalid, unknowingly, his capacity to even participate.

Some States, for example, hold registration during a period when they know that thousands and thousands of their people are out of State as migrant laborers. This is done because they know these people will be unable to register and participate in their elections.

This is done even though the migrant workers are in the majority in those counties.

We find here an amendment that would try to destroy the capacity of the League of Women Voters to expand and increase the number of participants who can register and vote in these communities.

I find it to be a very strange activity.

Mr. PACKWOOD. Mr. President, is the Senator talking about the amendment of the Senator from Georgia?

Mr. MONDALE. I am talking about the amendment of the Senator from Arizona.

Mr. PACKWOOD. Mr. President, I understand that in the colloquy had a while ago, we agreed, I thought, that this amendment would not apply to the League of Women Voters or to the Chamber of Commerce.

Mr. MONDALE. It applies to the League of Women Voters whenever it officially participates in the voter registration by the terms of the amendment.

Mr. FANNIN. Mr. President, I support the League of Women Voters.

Mr. MONDALE. We are not talking about theoretical support. We are talking about opposing any effort to register.

Mr. FANNIN. Insofar as the League of Women Voters is concerned, if they have voluntary contributions, that activity would not be affected.

I have never heard of them making any money. I do not know why their tax-exempt status is so important to them.

Mr. MONDALE. Mr. President, this is the same issue that we had a few days ago in the consideration of the Yarborough-Scott amendment when it was the effort of some to prevent private foundations from participating in voter registration.

The Senate Finance Committee adopted the amendment. They said it was wrong for private foundations to do so and that they would lose their tax-exempt status if they participated in any way in expanding the right to register, vote, and participate in American politics.

This is the same issue. However, this involves the League of Women Voters. This is directed against the League of Women Voters.

Mr. FANNIN. It is not directed at the League of Women Voters.

Mr. MONDALE. It says that if an officer of the League of Women Voters, a full-time, paid person, participates and uses the assets of the League of Women Voters to broaden the registration of persons to vote, they are in jeopardy of losing their tax-exempt status. It is the same thing with respect to unions or any other organization. They should have the right to expand the number of

people who assert their right in a democracy to vote.

Mr. FANNIN. We are trying to do exactly the opposite of what the Senator says. Since the Senator referred to same by name——

Mr. MONDALE. I have not yielded yet.

Mr. FANNIN. The Senator referred to me by name.

The PRESIDING OFFICER (Mr. MATHIAS in the chair). Does the Senator yield?

Mr. MONDALE. I am glad to yield for a question.

Mr. FANNIN. Mr. President, the Senator referred to my name in an advertisement. I wish the Senator would let me explain.

I do not object. This memorandum is 4 pages long. They devote 3 pages of the memorandum to me. They use a very fine high school picture of me. I do not know where they got it.

They talk about my amendment. It is very misleading. I do not object to that. However, Evelyn Dubrow, the legislative representative of the International Ladies' Garment Workers' Union is distributing a 7- or 8-page memorandum on my amendment.

The memorandum says:

> The amendment would not affect business-oriented and many other tax-exempt organizations (such as the National Association of Manufacturers) which are free to participate in political activities without loss of tax exemption. The Fannin amendment is just an antiunion proposal intended to increase the political power of business groups and other special interest groups such as right wing organizations by according them preferential status under the tax laws.

They are all covered by my amendment. I do not understand what the Senator is talking about.

Mr. MONDALE. Mr. President, then I will renew my point. These ads have cost the tax-exempt Right To Work Committee thousands of dollars. They declare that many of us in the U.S. Senate, because we receive illegal campaign contributions from union treasuries, should vote for the Fannin amendment.

If the union, for example, should write an editorial that some Senator should be opposed because he sponsored this amendment, or that another Senator should be supported because he opposed the amendment, under the Fannin amendment that union would lose its tax exemption.

The Right To Work Committee that sponsored these ads retains a tax-exempt status. However, if a union treasury advises its own members on an issue that it feels is essential to the welfare of that organization, it can lose its tax exemption.

That is one of the reasons why I oppose the amendment.

Mr. FANNIN. Mr. President, will the Senator yield?

The Senator is making statements that are simply not true.

Mr. MONDALE. Is the Senator from Arizona claiming that his amendment in any way affects——

Mr. FANNIN. I say it does not affect this publication in any way. It does not affect that publication. I did not intend for it to affect them.

I am not trying to have an all-encompassing amendment.

Mr. MONDALE. Mr. President, let me ask this question. Suppose a union would write an editorial in its paper, its official paper, and say, "Senator MONDALE should be supported in the next election because he opposed the Fannin amendment that we found to be inimical to our best interests."

Mr. FANNIN. I do not object to them opposing me. This publication is perfectly legal.

Mr. MONDALE. The Senator has not answered my question. So, I will ask it and answer it myself.

If the union wrote that ad, it would lose its tax exemption under the amendment.

Mr. FANNIN. This is not true. And here is the evidence of it.

Mr. MONDALE. The amendment says that any union which uses its dues assessments or fees directly or indirectly to support or oppose a candidate loses its tax exemption.

That is precisely what I referred to.

Mr. FANNIN. What did the Senator have the memorandum on COPE for? They do not lose anything as long as they operate within the law.

Mr. MONDALE. I think the point is very close.

Mr. GURNEY. Mr. President, will the Senator yield for a question?

Mr. MONDALE. I have some other remarks to make, and then I will yield.

The amendment goes beyond the prohibition of the contributions of dues which is now prohibited. In effect, it would nullify the Yarborough-Scott amendment adopted a few days ago for foundations to be able to participate in voter registration drives.

This would say to the League of Women Voters, now a tax-exempt organization participating in voting registration drives, "If you use any assets, any fund money, you jeopardize your continuation as a tax-exempt organization."

It goes so far—and I agree with the Senator from Georgia on this—that in my opinion it even impairs the rights of an organization or a person under the first amendment by declaring that to be illegal, if one wishes to keep his tax-exempt status, to support or oppose any candidate. So that if a union or if a tax-exempt organization sends out in its newspaper a letter in support of one of us or in opposition to one of us, it loses its tax-exempt status. If it supports or opposes any political party, it loses its tax-exempt status.

This is an unparalleled, unprecedented effort to interfere with the right of tax-exempt organizations to express themselves pursuant to the guarantees of the first amendment of the Constitution.

Moreover, it would place the power to drop the guillotine blade on any of these organizations at the discretion of the tax commissioner. He would first decide who had violated this broad rule and who had not. Every nonprofit organization—the League of Women Voters, the NAM, the AMA, the National Rifle Association, the Farm Bureau, the Grange, the chamber of commerce, the American Legion, the American Cooking Association, the AFL–CIO, the National Right To Work Committee, boards of trade, social organizations, life insurance associations, credit unions—would never know, when they speak to their own members, when the Internal Revenue Service would say, "You are now to be taxed as a corporation."

I say that it is an unprecedented effort to interfere with the right of people to speak out in the political matters of this country and must be defeated.

Mr. President, this amendment was never the subject of any hearings before the committee. It strikes at the laws of States and local governments as well as the Federal Government, without any hearings. It could affect local chambers of commerce and the other organizations to which I have referred, and it would, more than any other proposal I have seen, interfere with and imperil the vitality of the democratic processes of our country.

Mr. HARRIS. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. HARRIS. Mr. President, I wish to join in the statement being made by the distinguished Senator from Minnesota (Mr. MONDALE).

As a member of the Committee on Finance, I opposed and voted against this amendment or a similar amendment when it came up there, because I agree with the distinguished Senator from Minnesota that we ought to be doing everything we can in America to broaden the voting base and to make it easier for people to take part in our political processes. I think this amendment will do just the opposite. I think it will make it much more difficult for a great number of people who have associated themselves together in various kinds of organizations to take part in the political process, to broaden the base.

Therefore, I commend the distinguished Senator from Minnesota for the careful way in which he has presented his arguments to the Senate, and I hope his arguments will be approved by the Senate.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. EAGLETON. Mr. President, will the Senator yield?

Mr. MONDALE. I yield to the Senator from Missouri.

Mr. EAGLETON. Mr. President, I believe the remarks of the Senator from Minnesota (Mr. MONDALE) clearly demonstrate that the basic thrust of the Fannin amendment is not to eliminate an inequity in the present law, but it is in fact, designed to create an inequity.

The Senator from Minnesota has pointed out that the present law, with respect to political activities of tax-exempt organizations, applies to labor unions and that all tax-exempt organizations are treated equally. The only exceptions are charitable organizations which operate under a "no-politics" rule. So, contrary to the proponents of the Fannin amendment, labor unions do not enjoy any special privilege. There is no loophole here.

The Fannin amendment has been revised to apply to all tax-exempt organizations to give the appearance of neutrality. But it is a rather badly kept secret that even in its revised form, it is aimed primarily at the political activi-

ties of labor unions. In spreading its net a little more widely, the Fannin amendment now would catch another tax-exempt organization that carries on voter registration drives, as has been pointed out by the Senator from Minnesota—the League of Women Voters.

On Thursday of last week, the Senate adopted the amendment of the Senator from Texas (Mr. YARBOROUGH) which would permit foundation grants to organizations such as the League of Women Voters to carry on broadly based, nonpartisan, voter education and registration programs. The Fannin amendment would prohibit these activities by the League of Women Voters. Clearly, this is not the will of the Senate, but it would be a side effect, perhaps inadvertent, of the Fannin amendment.

The central issue, the intent of this amendment, is to put organized labor at a disadvantage vis-a-vis corporations with respect to political activities. Again, as the Senator from Minnesota has made clear, the present law is evenhanded in this regard. Under the Federal Corrupt Practices Act, which is on the law books and has been for many years, unions and corporations are treated identically. Both are prohibited from making direct contributions to candidates for public office. Both are permitted to collect and distribute voluntary political contributions. Unions are permitted to use union funds to provide political information to their members and to conduct nonpartisan activities such as voter registration drives. Corporations are permitted to deduct expenditures for the same kinds of activities. They may deduct the expenses of advertising their views on "financial, social, and other subjects of a general nature," and of encouraging their employees to register and vote and contribute to the party of their choice.

In short, under the present law, the criminal code prohibits the same activities by both unions and corporations. Corporations are allowed to deduct expenses for the very same political activities that labor unions are allowed to pursue with tax-exempt funds.

As I said when I commenced, it is clear to me—and it is even now more abundantly clear, after listening to the Senator from Minnesota in his exposition of his arguments—that the intention and the effect of this amendment is to create an inequity in the law where none now exists. For this reason, I shall cast my vote in opposition to the Fannin amendment.

Mr. GURNEY. Mr. President, will the Senator yield?

Mr. MONDALE. I shall yield in a moment.

I thank the Senator from Missouri for his comments. I think his comments are accurate, in order, and help expose the basic unsoundness of the proposed amendment.

I yield to the Senator from Florida for a question.

Mr. GURNEY. As I understand from the colloquy that has preceded, the Senator from Minnesota does not support the Fannin amendment; but, as I understand from what he has said, he does support the Talmadge amendment and will vote for it. Is that true?

Mr. MONDALE. I have been addressing my remarks to the amendment of the Senator from Arizona. I have not commented on the other issue.

Mr. GURNEY. But, as I understand the Senator's proposition, the present law provides that labor unions cannot contribute to candidates for Federal office, and of course this is what the Talmadge amendment simply says, except that it does define, among contributions, property of value. So I assume that the Senator from Minnesota will vote for the Talmadge amendment, and I certainly hope he will.

Mr. MONDALE. I thank the Senator from Florida.

Mr. President, a comment was made earlier about the vast amount of funds which are contributed to candidates for Federal office. I believe the comment was made that half the dues which are paid into unions could be eliminated if it were not for these tremendous campaign contributions by union members. I see in the Chamber the Senator from Tennessee, one of the Nation's experts on the issue of election reform.

We have obtained authoritative figures on the 1956 elections. I believe these figures were developed by the Senator from Tennessee in hearings. It shows that 12 families and the officers of 225 of the largest corporations made contributions of $500 or more that totaled $3 million; union officials together contributed $19,000 and all union members contributing voluntarily in this country made contributions of only $1 million or one-third of the total contributed by the wealthy individuals mentioned above.

It is illegal and a felony for a union to contribute to a candidate from union treasury funds in a Federal election. The only funds that can be contributed are those that are contributed voluntarily in a Federal election. The other statements we have heard to the contrary are false.

Mr. GRIFFIN. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. GRIFFIN. Does the Senator know if there have been any convictions under the Federal Corrupt Practices Act as far as unions violating that provision?

Mr. MONDALE. I am not an expert on the Federal Corrupt Practices Act. The same question could be asked about corporate contributions. There is a case pending now relating to labor unions.

Mr. GRIFFIN. It is my understanding that although that law has been on the books for a good many years, there has never been any conviction under it.

Would the Senator answer this question? Under the Federal Corrupt Practices Act, a labor organization is prohibited from making contributions to a candidate for Federal office. Suppose the union makes a contribution to the Americans for Democratic Action and the Americans for Democratic Action make contributions to a candidate for Federal office? How about that?

Mr. MONDALE. Well, it is my opinion, and it always has been my opinion that when a law prohibits something, one cannot do indirectly what he is prohibited from doing directly.

While I am not an expert as to what the law might be in every instance in connection with the Federal Corrupt Practices Act, where it relates to business corporations or unions, both of which are prohibited now from making such contributions, it has been my clear experience and the experience of everyone that I have talked that unions do not contribute out of their treasuries to certain campaigns directly or indirectly.

Mr. GRIFFIN. So that if at some time there were an amendment which made it clear that the contributions out of union treasuries to an organization such as the ADA, which in turn made contributions to candidates for political office, would be an illegal act, would the Senator support me in that?

Mr. MONDALE. I think that is nullity. The only reason that an amendment would be raised would be to correct a situation that does not now exist.

If we are going to propose such an amendment, then I would say in fairness the same amendment should apply to business corporations as well. But in any event the amendment before us today does not deal with prohibition of union treasury money to candidates because that is prohibited now. We are talking about an amendment that goes far beyond that, one that would prohibit any union from even advising members whether it favors or opposes a candidate, a political party or the use of its resources to encourage people to register and vote.

We have never had an amendment since I have been in the Senate that has sought to go as far as this one. In my opinion, it goes so far as to violate the right of free speech protection under the first amendment.

Several Senators address the Chair.

Mr. MONDALE. I yield to the Senator from Kansas.

Mr. DOLE. In relation to the Senator's statement with respect to the right of free speech what about those whose dues go to oppose a candidate that they are supporting?

I would call the attention of the Senator to a statement made by Mr. Joe Rauh who immediately was very active in connection with the Haynsworth nomination where he said:

> The only funds available to the union are those that come from dues, for the purpose of buying radio time, television time, and newspaper advertising. The small amount that has been collected as voluntary dollars has all gone as very small contributions to the candidates . . . when he (a union member) pays his dues, he had paid for his political action.

In 1961 Justice Hugo Black of the Supreme court wrote:

> There can be no doubt that the federally-sanctioned union shop contract here, as it actually works, takes a part of the earnings of some men and turns it over to others who spend a substantial part of the funds so-received in efforts to thwart the political, economic and ideological aims of those whose money has been forced from them under authority of law.

What about the first amendment as it applies to dues spent against a member's wishes? What about the question of whether these dues are voluntarily contributed?

Mr. MONDALE. The law is clear on that. In Federal elections unions may not use treasury money to support or oppose any candidate. They continue to have the right to speak out freely on issues affecting them. For example, under rulings of the Internal Revenue Service, business corporations have the broad power to spend money and deduct it as a legal necessary business expense, to lobby, to educate, to obtain a tax deduction for propaganda promoting corporation view on economic, social, political, or other subjects of a general nature, or to conduct educational campaigns, and they are tax deductibles as long as they do not discuss specific legislation or candidates.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. PACKWOOD. Mr. President, I am still confused by the Senator's position. Is the Senator in favor or opposed to the use of the union treasury—not voluntary contributions but the union treasury—for partisan political objectives?

Mr. MONDALE. I do not understand why the Senator would be confused. The law makes it illegal now. We are talking about the Fannin amendment which would prohibit unions and every other tax exempt organization——

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. PACKWOOD. I thought we were talking about the Talmadge amendment.

Mr. MONDALE. No.

Mr. PACKWOOD. I would like to ask my question. Does the Senator support the present law which the Senator alleges prohibits the unions giving money for partisan political objectives?

Mr. MONDALE. I do not allege it. I state it.

Mr. PACKWOOD. The Senator supports it?

Mr. MONDALE. Yes. I do not understand why we want to talk about everything except the Fannin amendment.

Mr. FANNIN. Let us talk about it.

Mr. MONDALE. That is what I would like to talk about.

Mr. FANNIN. Mr. President, will the Senator yield?

Mr. MONDALE. I yield.

Mr. FANNIN. Mr. President, on November 17 I contacted the Internal Revenue Service and asked the very question which is being debated at the present time. I am going to place this reply in the RECORD. It states:

> You indicated it is your understanding that there are no specific provisions in the Internal Revenue Code or in the legislative history of section 501(c)(5) warranting this special treatment for labor organizations in regard to political activities. You suggest that we review this subject to determine whether this position should be modified.
>
> Answer: Paragraph C–5 is the only one of the 17 paragraphs of that section that contains no definition, limitation, or prohibition. Consequently, they are in a special statute.

Mr. President, I shall put this material in the RECORD.

Mr. MONDALE. Mr. President, if the amendment of the Senator were agreed to we would not need any regulations because the union could not do anything at all, nor could the League of Women Voters or the Girl Scouts, for that matter. They could not talk to the membership or indicate to the members who they oppose or who they support. They could not encourage the mothers of Girl Scouts to register and participate in an election. They would be prohibited under the Fannin amendment.

Mr. President, not only is it violative of the first amendment, but it is the most far-reaching amendment I have seen to interfere with one of the healthiest things going on in this country, expanding the voter rights. This does not tell them how to vote, but is for voter participation. I thought we were in favor of that. I do not understand the great fear that some seem to have about people registering and voting. I do not understand why it is necessary for the Senator from Texas (Mr. YARBOROUGH), the Senator from Pennsylvania (Mr. SCOTT) who joined the other day to strike out a provision prohibiting private foundations from registering people.

But it was in the committee report and it was necessary to bring up an amendment on it, and we won the amendment. It is now possible for private citizens to participate in the registering of voting activities, unless the Fannin amendment is adopted; and if it is adopted, we will be right back where we were before the Yarborough-Scott amendment passed. We will have to prohibit any tax-exempt organization from even encouraging anyone to exercise his rights as a citizen to register and to vote. I cannot believe that that is good public policy.

Mr. DOLE. Will the Senator from Minnesota yield?

Mr. MONDALE. I yield.

Mr. DOLE. We have been discussing rights under the first amendment. I am reminded of the decision written by Justice of the Supreme Court Douglas, who is known by some in this Chamber, a decision rendered in 1961. Let me read briefly what he said:

> The collection of dues for paying the costs of collective bargaining of which each member is a beneficiary is one thing. If, however, dues are used, or assessments are made, to promote or oppose birth control, to repeal or increase the taxes on cosmetics, to promote or oppose the admission of Red China into the United Nations, and the like, then the group compels an individual to support with his money causes beyond what gave rise to the need for group action.
>
> I think the same must be said when union dues or assessments are used to elect a Governor, a Congressman, a Senator, or a President. It may be said that the election of a Franklin D. Roosevelt rather than a Calvin Coolidge might be the best possible way to serve the cause of collective bargaining. But even such a selective use of union funds for political purposes subordinates the individual's First Amendment rights to the views of the majority. I do not see how that can be done, even though the objector retains his rights to campaign, to speak, to vote as he chooses. For when union funds are used for that purpose, the individual is required to finance political projects aaginst which he may be in rebellion.

The Senator from Minnesota has been talking about the first amendment and about the rights of those who may publicly endorse or oppose a political candidate.

But, what about the rights of the minority? In many cases, their money is taken and used for political purposes for a political candidate they do not wish to support. What about the first amendment rights of those since the Senator is talking so loudly about the first amendment.

Mr. MONDALE. Mr. President, this is the sixth time I have said this, but I will repeat it. It is illegal, it is a felony, to use compulsorily collected union dues to support any Federal candidate for any election.

Justice Douglas also stated in the Mitchell case—I do not happen to have the citation here—but he said it would violate the first amendment to the Constitution to deny a union the right to communicate to its own membership in its union newspapers on the key issues affecting political campaigns, including endorsing or opposing candidates. I do not have the specific language, but that is the gist of it. That is exactly what the Fannin amendment seeks to do.

Mr. DOLE. Does the Senator believe that a union member, whether Democrat or Republican, should have his dues used for a political purpose he opposes—let us be practical about it—what about his rights? Should he have the right to contribute or not contribute to a candidate?

Mr. MONDALE. Present law prohibits the right of a union to use compulsory collected dues to support a Federal candidate. The implication in the statement of the Senator from Kansas is that there are some unions that are resorting to a felony in making contributions, nevertheless.

If that is correct, then the Senator should report them to the Department of Justice. If I may say so, this discussion has absolutely nothing to do with the Fannin amendment. We are talking about an amendment that would prohibit—as I have said many times—the right to register and vote, and the right of a union, or the League of Women Voters, or any other organization to communicate to its members on behalf of matters opposing or supporting a candidate, or in support of or opposing any political party. If they do that, their right to a tax exemption status would be lost.

Mr. DOLE. There are the Talmadge and the Fannin amendments on this—is there a Mondale amendment?

Mr. MONDALE. I do not have an amendment.

Mr. DOLE. But if the Senator should submit one——

Mr. MONDALE. For a change.

Mr. DOLE. Is the Senator saying in effect, then, that he concurs in the thought that if, say, I am a member of a union, that my dues should not be extracted to support some candidate if I do not wish to support that candidate? Is that correct?

Mr. MONDALE. Let me make it absolutely clear that something that I thought I had. I am opposing the Fannin amendment which not only leads to the laws that makes a felony out of a union business agent who contributes union-owned dollars to a Federal candidate but,

in addition, prohibits a union from opposing or supporting a candidate for any office, or opposing or supporting a political party or even seeking to register its members. That is what we are talking about. That is what is before the Senate now.

Mr. DOLE. Well, along this line of colloquy, what about unions subscribing to section 501(c)3, which applies to corporations, community chests, and foundations organized for religious charitable purposes? Why not amend that section to include labor unions? That section says clearly certain things can be done but if money is used for partisan political purposes, the tax exempt status is lost.

Certainly, the Senator from Minnesota would not object to including labor unions in section 501(c)3, would he?

Mr. MONDALE. If I may respond to the Senator from Kansas in this way: I took an oath to uphold the law when I came to the Senate. It should be enforced. Among the laws we have, there is a law that prohibits unions from contributing treasury money. I do not know why, for example, the Senator from Kansas, the National Right to Work Committee, and others, continue to pursue their assertions that unions are making illegal contributions.

Mr. DOLE. They are being made to some committee.

Mr. MONDALE. Does the Senator have knowledge of such an event?

Mr. FANNIN. If the Senator will allow me to interject there, I can give him all the information regarding it he wants.

Mr. MONDALE. Would the Senator supply it, because I do not have it.

Mr. FANNIN. Certainly I will.

Mr. MONDALE. Very well.

Mr. FANNIN. Let me read it to the Senator. I cite the oral argument of one Joe Rauh, an attorney for the United Auto Workers, who told the Supreme Court—here is the excerpt:

Mr. RAUH. We have never had the type of funds on voluntary dollars—

Justice REED. You can't get as much from voluntary dollars as you can from dues?

Mr. RAUH. Well, sir, a union man thinks he has paid, when he has paid his dues, he thinks he has paid for bargaining, for legislation, and for political activity. He doesn't feel he should pay a second time for political activity. That is why it is so hard to raise voluntary contributions . . . When he pays his dues, he has paid for his political action.

This was stated before the Supreme Court of the United States.

Mr. MONDALE. In that case, it is entirely consistent with what I am talking about.

Mr. FANNIN. It certainly is not.

Mr. MONDALE. It does not say that any union was contributing treasury money to a candidate. It says it is hard to raise money.

Mr. FANNIN. He said they have spent it for that purpose. It is very clear that they would not get voluntary dollars.

Mr. MONDALE. That is not the way I understand it.

Mr. FANNIN. That is what it says here, if the Senator wishes to read it.

Mr. MONDALE. It says that it is hard to raise voluntary contributions.

Mr. DOLE. Will the Senator from Minnesota yield further?

Mr. MONDALE. I yield.

Mr. DOLE. There has been discussion in this Chamber about that during the Haynsworth debate. I do not wish to go back to that discussion, but there was discussion about contributions from labor going to a candidate and a Member of this body. There have been all kinds of figures mentioned of $50,000, $60,000, $70,000, or more. The contributions may have gone to some committee. But on the point raised by the Senator from Arizona (Mr. FANNIN), let us be even-handed about it, let us treat business and labor alike. Let us treat both parties alike.

Mr. MONDALE. Let me say that I have been in politics for 20 years. I ran for the U.S. Senate and I have never received one dime as a campaign contribution from a union. I do not know of anybody who has. What is more, the whole subject is irrelevant to the Fannin amendment that goes far beyond that issue. I can understand why the proponents of the Fannin amendment would want to change the subject——

Mr. DOLE. Will the Senator seriously say they do not make political contributions?

Mr. MONDALE. No; not to Federal candidates. That is correct.

Mr. DOLE. Never have?

Mr. MONDALE. Well, I am not a member of the FBI or the Justice Department. All I know is from my own personal experience. I believe that what we are talking about now is irrelevant. If the Senator wants to continue talking about it, that is all right with me, but it is not the issue of the Fannin amendment.

Mr. DOLE. Some of us talk about it, and others get the money.

Mr. President, the citizens of my State, like those in the other 49 States, I believe, want a system of tax laws which distributes the tax burden as fairly as possible on all groups in our society. Several editors in Kansas and many of my constituents have called attention to a glaring inequity in present tax law—a tax loophole which should challenge the conscience of every Member of this body. And this inequity is not corrected by the bill as it is presently written.

This loophole results from a unique provision in the Tax Code which allows a certain few specially privileged tax-exempt organizations, primarily labor unions, to spend their exempt income for partisan political purposes, while denying that privilege to all other tax-exempt organizations. This is precisely the type of tax favoritism which I believe our constituents expect us to eliminate in this bill. I recognize that this is a delicate question for any Member of this body who may rely on the expenditure of tax-exempt union funds as an important, and perhaps essential source of his own campaign financing. Those who have recently evidenced new sensitivity about the ethics of public officials now have a rare opportunity to demonstrate their consistency. Surely those whose campaigns benefit enormously from funds channeled through this special tax loophole will agree that ethics call for applying the same rules to tax-exempt labor unions as to all other exempt organizations.

The amendment offered by the Senator from Arizona would deal with this question in complete fairness and impartiality. It simply applies across the board the same rules for all organizations. The Senate Finance Committee, in its report, acknowledged that it is already "congressional policy" to prevent the use of "tax-exempt or tax-deductible funds" to aid the campaign of candidates for public office. The Fannin amendment applies that policy to everyone, without fear or favor.

One of the many fine newspapers in our state, the Emporia Gazette—whose publisher is the noted journalist, W. L. White—commented editorially on the matter in these words:

The Senate Finance Committee last week rejected an amendment to the tax reform bill which would have denied "tax exemptions to labor unions engaging in partisan political activities."

Some unions have billions of dollars invested in unrelated businesses and spend large sums in support of political candidates. The money from the investments come from dues paid by workers. Big Labor has long been (and still is) exempt from some federal taxes. The Internal Revenue Service has ruled that "unlike other exempt organizations a union does not lose its tax exemptions because it engages in political activities."

Most other tax-exempt organizations are prohibited from using their funds for political programs, and properly so. But a double standard in the present tax laws permits unions to collect from millions of workers and spend the money for political projects. In some cases union money is spent in support of candidates without the consent—or even the knowledge—of the men who paid the dues.

The move to close the tax loophole for unions failed by a single vote. The amendment was rejected by an eight-to-eight tie vote in the Senate Finance Commitee. (Tie votes kill amendments in committee.)

Sen. Paul Fannin of Arizona offered the amendment. When it was defeated in committee, he said the amendment will be proposed again when the bill reaches the Senate floor. He plans to call for a roll-call vote to "give the American people an opportunity to determine exactly how many Senators are beholden to union czars" . . .

Union leaders have in the past supported their favorite political candidates and they will do so in the future. What these leaders do with union money is a private matter. But it seems unfair for these funds to be exempted from federal taxes.

The Atchison, Kans., Globe made this comment in its editorial column:

The AFL–CIO applauds when churches now under fire for not paying taxes on unrelated business enterprises are included in the new reform proposals. The AFL–CIO is spending large sums lobbying for the passage of this kind of reform. But it shouts in outraged indignation when it is suggested that what's sauce for the goose should be sauce for the gander.

Labor went all-out for Hubert Humphrey and against Richard Nixon in 1968, as it goes out every two years against almost every Republican now holding a seat in Congress. And if the unions are included in the tax reform measures, candidates independent of labor will not have to face the massed financial power of the unions in the future. This should embolden the timid on Capitol Hill.

Some Members have suggested that this amendment is unnecessary because it duplicates the Federal Corrupt Practices Act. This is not the case.

In the first place, the FPCA, even if it were enforced against labor unions, applies only to contributions to campaigns for Federal office, not those to State and local parties and candidates. The authoritative publication, Congressional Quarterly, points out that State political committees are a frequent conduit for transferring money to individual candidates for national office. Comments Congressional Quarterly:

> This practice is traditional for labor union political funds.

Second, even at the national level, the FCPA is "a law filled with loopholes," according to Congressional Quarterly.

Third, even if the FCPA were a uniformly enforced law, Federal tax law should be consistent with it by denying tax exemption to organizations which use their income for politics. The Internal Revenue Service asserted in a letter dated November 17, 1969, that there is a basis in law for its "special treatment for labor organizations in regard to political activities." IRS continues:

> The inclusion of various definitions, limitations, and prohibitions in the other paragraphs (which list sixteen categories of exempt organizations) of Section 501(c) evidences that in enacting the section Congress gave attention to such matters, yet did not apply any restrictions to labor organizations.

There is no reason why labor unions—or any other specially privileged group—should be permitted to pour millions of tax-exempt dues dollars—most of it collected under compulsion—into campaigns of political candidates and parties selected by the union's officials.

Some defenders of union political practices contend that all political spending by union officials is done with funds voluntarily contributed for that purpose. While the evidence is overwhelming that this is not the case, those who argue that only nonexempt voluntarily contributed funds are used by unions for politics have nothing to fear. This bill will have no effect whatsoever on that kind of political activity.

Mr. President, the amendment offered by Senator FANNIN is fair, it is nondiscriminatory, and it corrects a major inconsistency in present tax law.

Mr. MONDALE. Well, certainly that is a tough proposition.

I yield to the Senator from Texas.

Mr. YARBOROUGH. Mr. President, I have had experience in elections in my State seven different times—in seven different State of Texas elections. We have criminal penalties against any corporation or any labor union contributing to a political campaign. The climate in Texas is such that candidates are watched like a hawk watches a chicken. Candidates are investigated time after time. The attorney general investigates, and all candidates are watched. I had a screening process set up to make certain that no labor union or corporation contributed to my campaign. Since I came to the Senate I have added another duty to those already in that screening process; namely, to see to it that no Federal employee contributed to my campaign. It is all right for a Federal employee to contribute to a State or Federal campaign, but not to a congressional campaign.

We have received small checks from time to time, never over $50, from some small family corporations or small labor unions that did not know the rules, and we promptly sent them back. They were checks in small amounts from little family corporations or little unions that had no legal advice and had sent them in by mistake. The screening committee has had a certified public accountant watching them.

We have never had any big unions send contributions, because they have their own lawyers, and the lawyers watch them in my State, because they would be indicted and placed in the penitentiary for violating the law.

As I said, I have been involved in seven campaigns in my State, one for attorney general, three for Governor, and three for the Senate. So any labor union that contributes funds for that purpose in my State is going to face the penitentiary if it contributes to a political campaign. So the unions do not even try.

Mr. PACKWOOD. Mr. President, I wonder if, before I start, I may ask the Senator from Georgia a question.

Mr. TALMADGE. Certainly.

Mr. President, if the Senator from Oregon will yield, I ask for the yeas and nays on the substitute amendment.

The yeas and nays were ordered.

Mr. TALMADGE. Now I yield for a question.

Mr. PACKWOOD. Is there anything in the Senator's amendments that in any way strikes at, prohibits, hits at, or has anything to do with voter registration?

Mr. TALMADGE. No.

Mr. PACKWOOD. I wanted to make that clear because of the first amendment diatribe we have been hearing. This has nothing to do with the first amendment. Whether we adopt the Talmadge amendment, the Fannin amendment, or any other amendment, we are not talking about shutting off anybody's right of free speech. What we are talking about is making the organization taxable if it uses its funds for partisan political purposes—not shutting it off, not even regulating it; we are just saying that if they do it in a partisan, political vein, they are going to be taxed.

From having been in politics and in the practice of labor relations in Oregon, I think I know something about the role of business and other organizations in Portland, Oreg. When one talks about any organization—I do not care whether it is the American Medical Association or a union—I am talking in terms of contributions which it can give to a political candidate or a party—money, property, services, or manpower paid for by the organization, for brief times close to the election time, and before that for substantially longer periods. It is done by corporations, by associations, and by unions. There is not a Senator who does not know it is done. Anybody who has been in politics for 5 years at the State level, let alone elected to the United States Senate, who can in all honesty say he has never seen a corporation or union or association give personnel or other contribution to a political campaign is speaking, I think, incredibly. He either is naive or absolutely must have blinders on.

So let us talk about organizations generally. There are three kinds of contributions: money, services, and property.

Let us get to the unions and their types of contributions. They are basically of two kinds, voluntary, what they call COPE—the Committee on Political Education—the old Political Education Committee of 15 or 20 years ago. In theory, those contributions are voluntary—in theory. I am not going to quarrel with whether they are or not. These are extra amounts paid by members, and a member does not have to pay it. With a little check on a sheet once a year, he can say whether he wants to give to the committee. He cannot be compelled to if he does not, and he cannot lose his job as a result. But the union cannot take it out of his dues.

They tried a gimmick once, where they had $10 dues, but they said, "Those who want to give to the Political Action Committee can drop it to $9." But that was stricken down.

So let us talk about contributions to the political education groups, the amount that comes from so-called voluntary contributions. Again, I am not going to quarrel with whether they are voluntary or not.

The Senator from Minnesota (Mr. MONDALE) has indicated that, in his estimate, unions do not contribute to political campaigns. In my experience, again in politics, and also in the practice of labor relations, that is not true. Unions do contribute extraordinarily in the form of property. They do not actually give property. They give the use of their buildings, trucks, or telephones to both parties. These are not things given only to the Democratic Party; but the unions endorse candidates of parties.

Almost any night in a political campaign one can go to a labor temple and see the supporters of a candidate working at telephone banks, paid for out of the fees, assessments, and dues. That is a contribution from the union out of the dues that have been paid.

Now let us go to the business agents. Mostly in September and October, but in some cases prior to that, a part of their obligation is partisan support and activity for the candidate the union has endorsed. So they spend a lot of time on registration drives that might benefit a political candidate, building a registration drive that would benefit that candidate. They spend a great amount of time at COPE headquarters, with women manning the telephones by the evening, and the time organized by the union agents who have never once left union payroll during the campaign. That is a contribution of service. There is no other way one can define it. That may or may not be a violation of the Corrupt Practices Act, but it is done. It is done with the help of corporations and associations.

When I look at the amendment of the Senator from Georgia (Mr. TALMADGE)—and I am going to limit my comments to

that amendment until we see whether it is adopted—it is not going to touch voter registration. The Senator from Georgia just answered my question with respect to that. There is nothing in the amendment that has to do with voter registration. So any Senator who uses the excuse of voter registration to vote against the amendment will have to find another excuse. This vote will not affect voter registration, let alone the League of Women Voters or the Junior Chamber of Commerce. Let us clear that fog from the issue before we vote on the amendment.

Second, there is nothing in the amendment that prohibits a union from using its assessments and dues to contact its own members for partisan political purposes at its own headquarters. The union can call its own members and tell them to vote for PACKWOOD or TALMADGE. That is not precluded, because the Senator feels a union ought to have the right to contact its own members for its own political partisan goals.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. PACKWOOD. I yield.

Mr. TALMADGE. Not only a union, but any other tax-exempt organization.

Mr. PACKWOOD. Absolutely.

What I wanted to make clear when I questioned the Senator further was that a union cannot use its dues and assessments and initiation fees for union members at union expense to contact the broad spectrum of the public. Do we agree to that?

Mr. TALMADGE. Yes, we do.

Mr. PACKWOOD. So I would say that what we are voting on with respect to the Senator's amendment is as follows: One, we are not putting any limit on free speech; let us be clear about that. Second, we are not saying unions cannot use voluntary contributions from COPE for support and cash contributions to political campaigns. We are not saying a union cannot use its own dues and assessments to contact its own members for political partisan reasons. We are simply saying that union dues and assessments cannot be used.

We are simply saying that a union cannot use the dues and assessments that are paid by a member—because he has to belong to the union and has no choice but to give them to the union—for any other purpose than a political public purpose that a union can support. They cannot be used for any other purpose.

For that reason, I intend to support the Talmadge amendment in the nature of a substitute.

Mr. CURTIS. Mr. President, the issue can be simply stated. The Corrupt Practices Act deals with offenses and punishment. It is the criminal code we are talking about—the taxation of tax-exempt organizations.

It is a criminal code. Here we are talking about taxation for tax-exempt organizations.

Is there a Senator here who can spend his own money to get reelected, and get a deduction for tax purposes? He cannot. Is there anyone who can make a contribution for political purposes, and deduct it from his taxes as a business expense? There is not. Political expenses are paid after taxes. That is the rule applied to the rank and file in America. Why on earth should we let tax-exempt organizations get into the field of politics at all? Everyone else has to pay for his politics after taxes.

As I read the Talmadge substitute, it would permit labor organizations to gather up all their agents and party workers throughout the United States, and send them into a particular congressional district or a State, assign them a little bit of union work, but turn them loose to defeat or elect a candidate. If we pass the Talmadge amendment, we have made that the law.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. TALMADGE. I think the Senator has misconstrued my amendment.

Mr. CURTIS. I beg the Senator's pardon.

Mr. TALMADGE. They could only utilize their activity in mobilizing the membership of their own organization, not others.

Mr. CURTIS. But the Senator defines that which is prohibited as "cash or its equivalent."

Mr. TALMADGE. Or any property of ascertainable value.

Mr. CURTIS. Yes. And if there is a mixture, with some union duties to perform, they travel to that State or congressional district at union expense, stay at the hotels at union expense, and so on; and there is no one here so naive as not to know that when you move a thousand union workers into a State or a district, they can wield considerable political power; and you cannot put a monetary value on it.

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. TALMADGE. Assuming the Senator were correct, and the unions sent a multitude of people into a congressional district or a State. That effort can be utilized only to mobilize their own membership. If they went beyond that, it would be a violation of my amendment.

Mr. CURTIS. I think not. The Senator's own language prohibits certain expenditures from dues and assessments. Then it goes on to describe that they must be in cash or equivalent. If you cannot translate them into equivalent cash, which in a mixture, you cannot, you have made them lawful.

Mr. TALMADGE. Will the Senator yield?

Mr. CURTIS. I yield.

Mr. TALMADGE. I quote the language of my amendment:

> A contribution shall not be deemed to occur where the principal character of an activity in support of a political party or a political candidate constitutes mobilizing membership of the organization for such purpose, as distinguished from the contribution of cash or its equivalent or property which has an ascertainable fair market value.

I would think that if unions sent a multitude of agents to a particular area to campaign, that would have an ascertainable market value, and would be prohibited.

Mr. CURTIS. The language is defective in many other instances. It says "to mobilize the membership." It does not say that the membership dues may be used to inform the members how someone voted, or how they stand, purely for purposes of advancing the cause of union labor. It says you can send them in there and mobilize them in a campaign.

As I said a moment ago, that is why I shall vote against the Talmadge substitute and for the Fannin amendment; for most Americans have to put their money into politics after taxes. I believe we do the tax exempt organizations a disservice by letting them have any part in politics.

Mr. President, I totally disagree with all this talk about the first amendment. The first amendment gives the right to people to say what they please. What is at issue here is, Are they going to use tax-exempt money to broadcast, either by the printed page, the radio, the television, or somebody's car?

Mr. TALMADGE. Mr. President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. TALMADGE. Broadcasting would have an ascertainable market value, and would be precluded, except to members of the organization themselves.

Mr. CURTIS. Well, as a practical matter, the Senator knows that his amendment would have to be treated in this manner: That if they wrote a check or gave a thousand dollars' worth of printing, it would be covered; but he also has to know that if they use their time strictly, if it is a part of the time to mobilize the members—and his language does not say to inform the membership on issues; it says to mobilize them—that is one of the big jobs in a campaign, to mobilize its workers.

I have no illusions about how this amendment would turn out. I have no illusions at all. The powerful unions do not like the Fannin amendment. They do not like Mr. Haynsworth, either.

Mr. YARBOROUGH. Mr. President, it seems to me that the thrust of both these amendments is at voter registration, and voter participation. It seems to me the Fannin amendment is directly designed to limit voter participation, because on page 2, line 7, it says they shall not use these moneys to carry on any voter registration.

The amendment agreed to last week, cosponsored by the Senator from Pennsylvania and me, was designed to further voter registration. I wish to refer to the Gallup poll printed in the Washington Post yesterday, Sunday, December 7, to show the need for voter registration activities.

We all know of the low voter registration and the low voter participation in America as compared to other democracies of the world. West Germany votes 80 percent of the qualified electorate; Great Britain 76 percent, and our country less than 70 percent.

There was great interest in the Presidential campaign of 1960 between Kennedy and Nixon in Texas in that election. Due to the great interest and the television debates, there was a relatively lower voter participation—63 percent of the electorate voted. In my State, only 43 percent voted, because we then had a poll tax.

In 1968 we had the highest registration we had ever had in my State—6

million qualified adults, 4 million registered. We had knocked the poll tax out by then. We had a very spirited gubernatorial campaign in both parties, and the total vote—that is, in both the Democratic and Republican Parties, was only 1,500,000, out of 4 million eligible voters.

The problem is first to get voters registered. We can get them registered, but we already have restrictions. They make it a felony in my State for a member of a labor union to contribute to the activity officially.

I know that many other Senators have that same experience. As proud and, perhaps, as egotistical as we are to be Senators, more voters register to vote in a gubernatorial campaign than in a senatorial campaign.

I know, because I campaigned three times for the Senate and three times for the governorship.

Very few people register to vote in this country. The League of Women Voters is working to increase registration. These amendments would keep these people from registering and from voting.

Mr. President, I read from an article on the Gallup poll. The headline is, "Laws on Voter Registration Hurt Democrats, Help GOP." It is from Princeton, N.J., and is written by George Gallup. It reads:

One out of every four adults in the United States is not registered as a voter, a Gallup Poll survey reveals.

In numbers this represents an estimated 29 million potential voters who are disenfranchised because they are unable to meet residence requirements imposed by the various States, or because they have not taken the initiative to see that their names are placed in the registration books.

Democrats suffer more than do Republicans from low voter registration. When a sample of the 29 million nonregistered voters is examined, twice as many are found to have Democratic leanings as Republicans.

That is because they have less money. They are laborers. They are more mobile. They move from State to State. There are many reasons for that. However, two of them do not register for every suburban Republican that registers. That does not concern a party sense but a population sense. I am talking about trying to get people to register who are mobile and who are not affluent.

I continue to read from the article:

A total of 3,127 adults were interviewed in person during the period October 17 to November 3 and were asked this question—

I point out that this was a personal interview. It was not a telephone sampling. Some of the polls inform us that they are the result of a telephone sampling.

They were asked this question:

Is your name now recorded in the registration book of the precinct or election district where you now live?

The following table shows the percentage of adults not registered, nationally and by key groups.

*Unregistered adults*

| | *Percent* |
|---|---|
| National | 25 |
| Men | 24 |
| Women | 26 |
| 21–29 years old | 50 |
| 30–49 years old | 24 |
| 50 and over | 12 |
| Own home | 16 |
| Rent | 44 |

Since they rent, they are mobile. They move, and they do not get registered.

I continue to read from the article:

The above figures represent the most accurate registration figures for the nation. While some states try to keep lists up to date, the difficulty of removing the names of those who move, or die, is enormous.

It should be pointed out that in four states voting laws permit those under 21 to vote. In Georgia and Kentucky the age is 18; in Alaska, 19; and in Hawaii, 20. These small segments of the population are not covered in the above figures.

Mr. MONDALE. How often do the voters of Texas have to register in order to participate in the election?

Mr. YARBOROUGH. In my State the voters must register every single year. We have the most repressive voter registration law in the Union. They have to register every single year to vote in any kind of election—city, county, State, bond issues, school trustees, mayor—anything we can think of. If that voter is not registered every single year, he cannot vote.

He has to be registered to vote by the 31st day of next January or he cannot vote in the elections next November. He has to register before he knows who the candidates will be or what issues are involved. In the peak year, we had only two-thirds of the adults registered.

Mr. MONDALE. When was that registration law adopted?

Mr. YARBOROUGH. That registration law was adopted after the Federal court eliminated the poll tax. The establishment came back and gave them this voter registration law to take the place of the poll tax and keep them from voting.

Speaking of corporations and all their activities in political races. In some of my races for Governor, they emptied the corporation offices. They sent junior executives out to the counties. They sent out questionnaires. They sent them back to their home counties to work against me.

Does the Senator think they made those junior executives pay their expenses? That is listed as a business expense in the campaign against us.

And if they advanced fees to their lawyers, they paid them big enough fees so that the lawyers could pay their income taxes and then contribute to our candidates.

What labor union members honestly give is chicken feed compared with what the corporations do through subterfuge.

They are too smart to write a check on the corporation. They pay big fees to their lawyers and let them pay their income taxes and then contribute the rest to the campaign.

They put out their army of workers. They paralyzed the corporate structure of Houston for 2 weeks when I was running. They turned out the employees from a 32-floor office building. They send out the secretaries and the junior executives. They send them back to their home counties to work against me.

Mr. President, I continue to read from the article:

In 32 of the 50 states one year of residence is required before one can register and vote. In 15 states the requirement is 6 months; in two, 3 months. One state, Mississippi, has a requirement of 2 years.

The importance of mobility as a deterrent to registration is dramatically revealed in the figures for home owners versus renters, who change their place of residence frequently. Of all home owners, only 16 per cent do not have their names registered. Among renters the comparable figure is 44 per cent.

So, if we try to register voters and make this effort, these amendments would strike those efforts down. The Fannin amendment is directed against such efforts.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. YARBOROUGH. I yield.

Mr. PACKWOOD. Mr. President, are we agreed that the Talmadge amendment would have no effect on voter registration?

Mr. YARBOROUGH. A businessman can get his people to vote. He can get them to go to a rally of the party.

Do not think for one moment that if someone else were to use those tactics, he would not have him hailed into court by the hair of his head.

Mr. MANSFIELD. Mr. President, I wonder if we could bring this debate to a head? I do not think there is much more we can learn. We have been told and retold this.

I think it is time to get to a vote. It is a very important matter on which people have had their minds made up.

Mr. TALMADGE. Mr. President, I am prepared to vote at any time.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Georgia as a substitute for the Fannin amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BYRD of West Virginia (when his name was called). On this vote I have a live pair with the able senior Senator from Louisiana (Mr. ELLENDER). If he were present and voting, he would vote "yea." If I were permitted to vote, I would vote "nay." I therefore withhold my vote.

Mr. HOLLINGS (after having voted in the affirmative). On this vote I have a pair with the distinguished Senator from Missouri (Mr. SYMINGTON). If he were present and voting, he would vote "nay." If I were permitted to vote, I would vote "yea." I therefore withdraw my vote.

The assistant legislative clerk concluded the call of the roll.

Mr. KENNEDY. I announce that the Senator from New Mexico (Mr. ANDERSON), the Senator from Montana (Mr. METCALF), and the Senator from Missouri (Mr. SYMINGTON) are necessarily absent.

I further announce that the Senator from Alabama (Mr. ALLEN), the Senator from Nevada (Mr. CANNON), and the Senator from Louisiana (Mr. ELLENDER) are absent on official business.

I further announce that, if present and voting, the Senator from Nevada (Mr. CANNON) and the Senator from Montana (Mr. METCALF) would each vote "nay."

Mr. GRIFFIN. I announce that the Senator from Arizona (Mr. GOLDWATER) is absent on official business.

The Senator from South Dakota (Mr. MUNDT) is absent because of illness.

The Senator from Colorado (Mr. DOM-

INICK) and the Senator from Alaska (Mr. STEVENS) are necessarily absent.

On this vote, the Senator from Colorado (Mr. DOMINICK) is paired with the Senator from Arizona (Mr. GOLDWATER). If present and voting, the Senator from Colorado would vote "yea" and the Senator from Arizona would vote "nay."

The result was announced—yeas 25, nays 63, as follows:

[No. 192 Leg.]

YEAS—25

| | | |
|---|---|---|
| Allott | Hansen | Saxbe |
| Baker | Hruska | Smith, Maine |
| Bellmon | Jordan, Idaho | Sparkman |
| Byrd, Va. | Long | Spong |
| Cook | Miller | Talmadge |
| Cotton | Murphy | Thurmond |
| Dole | Packwood | Young, N. Dak. |
| Griffin | Pearson | |
| Gurney | Russell | |

NAYS—63

| | | |
|---|---|---|
| Aiken | Gravel | Montoya |
| Bayh | Harris | Moss |
| Bennett | Hart | Muskie |
| Bible | Hartke | Nelson |
| Boggs | Hatfield | Pastore |
| Brooke | Holland | Pell |
| Burdick | Hughes | Percy |
| Case | Inouye | Prouty |
| Church | Jackson | Proxmire |
| Cooper | Javits | Randolph |
| Cranston | Jordan, N.C. | Ribicoff |
| Curtis | Kennedy | Schweiker |
| Dodd | Magnuson | Scott |
| Eagleton | Mansfield | Smith, Ill. |
| Eastland | Mathias | Stennis |
| Ervin | McCarthy | Tower |
| Fannin | McClellan | Tydings |
| Fong | McGee | Williams, N.J. |
| Fulbright | McGovern | Williams, Del. |
| Goodell | McIntyre | Yarborough |
| Gore | Mondale | Young, Ohio |

PRESENT AND GIVING LIVE PAIRS, AS PREVIOUSLY RECORDED—2

Byrd of West Virginia, against.
Hollings, for.

NOT VOTING—10

| | | |
|---|---|---|
| Allen | Ellender | Stevens |
| Anderson | Goldwater | Symington |
| Cannon | Metcalf | |
| Dominick | Mundt | |

So Mr. TALMADGE's amendment was rejected.

Mr. YARBOROUGH. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. MONDALE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is now upon the amendment of the Senator from Arizona. On this question the yeas and nays have been ordered.

Mr. HOLLAND. Mr. President, has the time elapsed, or is the time under control?

The PRESIDING OFFICER (Mr. GRAVEL in the chair). The time is not under control.

Mr. HOLLAND. Mr. President, I hope the amendment offered by the Senator from Arizona will be agreed to. I happen to know something about this matter from personal experience. I have run for State office about as many times as my distinguished friend from Texas, and I think on every occasion I was opposed by some of the labor leaders of the State, generally by most all of them.

At the same time, at every election I have been fortunate enough to receive the support of a large number of the members of those labor unions and I have received each time I ran dozens of letters—I think it would be hundreds, all told—from members complaining of the fact that their dues and contributions to their unions, of which they were members, were being used against my campaign, against my nomination or election, as the case might be, and they protested vigorously against that practice.

Mr. President, when we considered the repeal of the right-to-work amendment in 1966, I placed in the RECORD some 50 or 60 letters. I do not recall the exact number, but Senators can find them as a part of my remarks in the CONGRESSIONAL RECORD, volume 112, part 2, beginning at page 1463 and extending for 20 or 30 pages in that RECORD. I have not had time to read through all of those letters, but I have already found four of them complaining against the repeal of the right-to-work provision in the Taft-Hartley Act, because we have the right-to-work provision in Florida adopted by a majority vote of all our citizens in a general election.

In about four of those letters—and I have gone through about half of them—I find they complained that their contributions and dues were being used against their wishes by union leaders. That testimony is not from me. It is from the members of the unions in my State who were complaining that their money was being used by their leaders against their will, against their wishes, and against their candidates. Senators can find it in the RECORD if they wish to read it. I mentioned that there were more than four instances. I read about 25 of those letters hurriedly.

There were over 50, as I recall it, that I placed in the RECORD during debate at that time. The fact is, it is a well-known practice in my State. It is vicious practice which I think should be ended. It is a vicious practice which I hope will be ended by the adoption of the Fannin amendment.

I cannot speak for other Senators. I can speak only in the limited degree for my own State. I know that in the five general elections in which I have run for office in my State, as well in the primaries for those years, I have had that experience. It does not do any good to say that these things do not occur, when good men—many of them known to me—not just because they supported me but because they were my friends—write me and tell me these things contained in the letters. When the returns, for instance, come in from the area of Jacksonville, where the working people generally live, they show that I received more than my share of the votes of labor union members. When that kind of information comes to me in writing at every election, and in large numbers, I cannot ignore it.

It is a practice which does exist in my State, which generally speaking, is known for rather clean elections and for rather large participation in elections. We stopped the poll tax in its application in 1937 a long time before any Federal law on the subject was passed either by constitutional amendment or by unfortunate action of the Supreme Court.

In many ways we have tried to clean up elections in our State. I just want to say that has been my own personal experience and I would be derelict to fellow Senators if I did not say that right here on the floor of the Senate. Senators will find the list of 50 to 60 letters included in the other debate. Confessedly it had to do with the question of whether we should repeal the right-to-work provisions in the Taft-Hartley Act, and those were people writing against repeal and in favor of the continuance of the right-to-work amendment in our State constitution and its operation. They found occasion time after time, to say what I have just said to the Senate, that they knew that their dues were being spent for political purposes, against their wishes, against their own objectives and against own preferred candidates.

Now, Mr. President, that same experience, but in larger measure, has taken place in every race I have had and I want the record to show that that is the case.

I am not one of those who feel that men who belong to labor unions are willing blindly to do the will of their leaders who attempt to dictate to them in too many instances because I have found that the exact contrary is true, that they will not follow that dictation, that they will follow, instead, their own convictions.

I want the record to show that.

I shall vote for and strongly support the amendment offered by the distinguished Senator from Arizona.

Mr. MILLER. Mr. President, will the Senator from Arizona yield?

Mr. FANNIN. I yield.

Mr. MANSFIELD. Mr. President, would the Senator from Iowa consider the possibility of a time limitation?

Mr. FANNIN. The Senator from Iowa just wishes to take a couple of minutes and then I am ready to vote. I wish to use only 1 minute.

Mr. MANSFIELD. That is fine.

Mr. FANNIN. I do not want to delay the vote.

UNANIMOUS-CONSENT AGREEMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent, if there is no disagreement to the request, that there be a time limitation of 15 minutes on this amendment, with the time to be equally divided between the distinguished Senator from Arizona (Mr. FANNIN) and the chairman of the committee, the distinguished Senator from Louisiana (Mr. LONG).

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana? The Chair hears none, and it is so ordered.

Who yields time?

Mr. FANNIN. Mr. President, I yield 4 minutes to the Senator from Iowa.

The PRESIDING OFFICER. The Senator from Iowa is recognized for 4 minutes.

Mr. MILLER. Mr. President, I invite the attention of my colleagues to part 6 of the hearings, particularly to page 5248 where colloquy occurred between a witness by the name of Harold Ketelhut, a member of the United Auto Workers International Union and myself, and I ask unanimous consent that the marked portions of the hearings be printed in the RECORD. There was a further witness before the committee by the name of Mrs.

J. M. Ford, a member of the ILU of Lawrence, Kans., and I ask unanimous consent that a portion of her testimony as designated on page 5255 be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

STATEMENT OF HAROLD KETELHUT, A MEMBER OF THE UNITED AUTO WORKERS INTERNATIONAL UNION, FREEPORT, ILL.

Senator MILLER. Mr. Chairman, I want to commend this witness for his courageous testimony. I am concerned about part of his testimony. Now, as I understand it, a great amount of political activities by the AFL–CIO are financed out of the funds of the committee on political education known as COPE. Do I understand correctly that the contributions made by union members to COPE, are voluntary?

Mr. KETELHUT. My experience with COPE is that they will offer you a lottery, a form of lottery ticket or a chance to win a television set and so on. You contribute $x$ dollars by the number of chances you get. That is part of the money that goes into the political action, yes.

Senator MILLER. Of course, that would be a voluntary matter for a union member to buy some chances. He does not have to do that, does he?

Mr. KETELHUT. Well, another thing in my experience has been on the IAM staff for 6 years, every staff conference that I attended that was a head of an election, a national election or a big State election coming up, if it happened to be a national election I was asked to donate some dollars, and if I didn't I would not remain on the staff very long. If it was a State election I would attend the State labor convention and be told the same thing. It was voluntary to the extent that if you did not contribute your international office frowned upon you.
